LOCAL and PERSONAL

Mrs. Annie Bruhn visited last week end with Miss Mabel Thompson.

Mr. and Mrs. May were visitors to Vermilion on Sunday. They returned in a new Chrysler car.

Mr. McCullough and Robert Whyte motored to Mr. McCullough's home near Lacombe during the week-end.

Dr. and Mrs. Carmichael of Bawlf, spent Sunday at the Dr. Law home here.

Mr. Allen, formerly Bank of Montreal accountant at Tofield, and now of Leduc, spent Sunday in town.

Mr. and Mrs. Geo. McLoughlin and son Donald motored to the city on Monday.

Mr. and Mrs. E. W. Rogers, Mrs. McCauley and Lucille Gray motored to the city on Thursday.

Mr. and Mrs. A. Ross and children, Mr. Hetherington and Mr. Eldred motored to Innisfail on Sunday.

Mr. and Mrs. Bert Lovell and Bert Swift attended lodge at Ryley on Tuesday.

Miss Marion Carter of the Camrose Canadian staff, visited on Friday with Miss Ross, leaving on Saturday for her home at Holden.

Mr. Geo. Agnew left for Vancouver on Wednesday for a visit there. George has not been in the best of health lately and it hoped that a trip to the Pacific Coast will benefit him.

Mr. Geo. Strange who has been with the Mercury for a couple of weeks, left on Tuesday to take a position in an Edmonton printing office.

Mr. and Mrs. Shane and son of Edmonton, were visitors at the McCauley home on Sunday. Mr. Shane will be remembered as being principal of the Tofield schools some years ago, leaving Tofield in 1918.

Mr. Savage, a former Tofield school principal was in town for a day or so this week.

The Misses Clement were Edmonton visitors over the week-end.

The Basket Ball girls club are putting on a whist drive in the curling rink hall on Friday, May 18th. Admission 35c. Play will commence at 8:30 and refreshments will be served later in the evening.

On Sunday night last, the congregation at the United Church was very large. In addition to the regular service and sermon, which was in keeping with Mothers' Day, their was a special pageant also in keeping with this special day. Those taking part in the pageant were: Mrs. Firth, Mrs. Craig, Mr. Wm. Swift, Misses Ruth McLaughlin, Craig, Gwendolyn Firth and Kenneth Harrison.

The attendance at Sunday school too, was very large, one hundred and eighty-three being present. This, if not a record, is close to it. The pageant was presented here also.

The Women's Institute are working hard up at the school grounds, endeavoring to make the school and its surroundings a place of beauty. The Mercury wishes them every success. The institute have a reputation for doing things thoroughly and well, and although this is no easy task that they have undertaken, they are going at it with an enthusiasm that spells success. They are now calling for fertilizer and good earth.

"I'm looking for my ideal dog," said the lady in the canine fancier's shop. "I'd like one with a head rather like a collie and a body after the style of an Irish terrier, only with longer hair and nice, distinct markings. Do you keep dogs like that?" The dog fancier shook his head sadly. "No, ma'am," he said, "I drowns 'em."

The following advertisement appeared in a Sweetwater, Tenn. paper: "Found—Lady's handbag containing two Octagon Soap Coupons, one Red Cross Stamp, a quantity of Church of God Literature and one pair of Dice.

Telescope large enough to detect life on Mars will be placed in Mt. Wilson Observatory if plans of Miss Mary Proctor, British astronomer, are realized. The cost will be $12,000,000.

CORRESPONDENCE

Walnut Creek, Ohio,

To the Mercury Readers:

A few words to our many friends at Tofield who might be interested to hear of our whereabouts. We left our home at Tofield the 1st day of Dec. 1927 in company with our son H. E. Brenneman and family, son-in-law O. O. Hersphergen and family, also Mr. and Mrs. Jacobs, Tofield, for Vancouver. There we left the latter party and we continued our journey on to Seattle, Wash. by boat via Victoria.

Upon our arrival at Seattle we took possession of our new Master Buick which was ready for us. Since then we have travelled with it through 14 states and stopped in nearly all of them for a short visit. We had many good rides on some of those splendid highways, most of our travels have been on hard-surfaced roads, either paved or gravelled. We have been having very good luck on our trip thus far. Up to this time we have not seen any kind of an auto accident. The only trouble we had were a few tire punctures.

Since we left we have seen people working in the field every month, either seeding or planting their crops. Going through South Arizona, New Mexico and South Texas we saw them gather their winter vegetables and shipping it up North. Hundreds of acres of lettuce and all kinds of vegetables were along the highways.

Coming up through Oklahoma, Kansas and Nebraska we saw the beautiful winter wheat fields, as green as a meadow in February and March. These states are raising large crops of winter wheat and it looks very promising this year.

Going on east through Iowa, Illinois, Indiana and Ohio you see less winter wheat and what they have is mostly abandoned on account of being winter-killed. Very little wheat will be raised here this year. Wheat here in Ohio is worth over $2.00 a bushel right now.

This country is settled very thickly, dotted all over with large cities and good highways, which afford very good markets for everything the farmer raises.

The farming in these eastern states does not appeal to us western farmers. We would not like to go back with two horses hitched to a walking plow and plow up and down on those hills because we are used to plowing with a tractor on the plains of sunny Alberta with two-mile rounds.

It seems like there was a surplus of ground here as it is all covered over with large piles of ground which we call hills and now they can farm those on three or four sides, which is a decided advantage where people are settled so thickly ha! ha! We are stopping over here to take part in the Annual Memorial Mission Board Meeting which is being held here. After which we wish to continue our trip on east through Pennsylvania and New York States, then over into Ontario, crossing at Niagra Falls. After a brief stay in Ontario we will again proceed on west towards home stopping at Goshen, Indiana, where our son Fred, is teaching physical education at Goshen College. Then on to Hesston, Kansas where three of our sons are attending high school.

From there, in company with our sons, we again wish to turn the wheels to the great North West. The land of wheat and oats.

Jacob Brenneman.

W.I. NOTES

The Institute are delighted with the returns for the school ground fund. Up-to-date we have $66.40 for this fund and happy to say those who haven't had the opportunity to give theirs will in the near future. We take this opportunity of thanking you all. We still need 25 loads of good earth and at least ten loads of fertilizer. Will our good friends help us? We feel we are going to have a very beautiful school ground in time and we are putting our very best into this effort. We ask you for earth and fertilizer and feel that you will give us this at your very first opportunity.

Don't forget our plant sale on May 26th. Keep this in mind and come to our sale of all plants. We're also serving afternoon tea. We will welcome you all in our rest rooms on May 26th. If you wish to order early, 'phone Mrs. Abbott or Mrs. Beirnes. We have on display in Beirnes' window an aluminum casserole—get a ticket on this beautiful dish only 25c. and lucky number gets it. The money from this goes to our school ground fund. "We need the money." is our slogan.

LAKE SHORE

Mr. Sam Bethel was taken back to the Lamont hospital on Sunday after two or three weeks at home. We are sorry to report that Mr. Bethel is not improving in health.

Mrs. Dorothy Walker has sold her farm in this district to Mr. Geo. Weatherill of the Lindbrook district. Mr. Weatherill has also bought one quarter section of Johnston Ferguson which adjoins. We will be very pleased to welcome Mr. and Mrs. Weatherill to our community.

Miss Georgina Garrett of Edmonton is assisting Mrs. Roe Phillips with her housework.

Mr. and Mrs. H. Eaton motored to Lamont on Sunday.

Mr. Jack Johnston is putting in the foundation for his new house this week. Mr. Johnston is building a seven room house of the semi-bungalow type which will be a very comfortable home as well as a great improvement in the district. R. C. Phillips and Lloyd Wood are also building new houses this summer.

Miss Myrtle Bethel is driving a Ford these days.

U.F.W.A. NOTES

The meeting was held on Saturday evening of May 12th. The attendance was rather small. The roll call was answered with our "Duty as Canadian Citizens." Mrs. Baptist gave a paper on "Our Duty to New Canadians." The paper was evidence that Mrs. Baptist has given the subject a great deal of study and thought and we strongly suspect that she has been practising her ideas on the subject for a long time. She was given a hearty vote of thanks by the members present.

One visitor, Mrs. Bigland, a newcomer in the district, was present. We are very pleased to welcome Mrs. Bigland in our local and hope any other new comers in the district will follow her excellent example.

The next meeting will be on Friday, May 25th at 2:30 p.m. in the W.I. rooms. Miss Amy Conroy, lecturer from the Department of Public Health will give a talk on Infectious diseases. Kindly note the time and place. Everyone cordially invited whether U.F.W.A. members or not.

CORRESPONDENCE

Editor, The Tofield Mercury.

Dear Sir:

Allow me respectfully to suggest that it is high time the "press" of Canada should speak out, in stern condemnation of the species of political "banditry," now in process of being planned and prepared, among our avaricious representatives at Ottawa.

Twice already, within recent years, with unblushing effrontery and amazing unanimity, they have raided the national treasury and increased their sessional indemnity, in a manner and degree that were neither dignified nor patriotic.

Shall the long-suffering and too-submissive people of Canada now permit a repetition of this shameless form of malfeasance, on the part of their official servants, elected definitely to guard the national interest, to promote the moral and economic welfare of the people, and to lighten and ameliorate, in every possible way, the burden of taxation and the wasteful machinery of government.

But, when one calmly contemplates the hatching of this new, predatory plot, under all the circumstances in which Canada has financially staggered, since the period of the Great War, the inference is both natural and inevitable, that the promoters of this new official audacity are sadly wanting, in conscience and in common sense.

They are alike ready to grind out unsavory "divorce bills" at the rate of seventy-seven, of a Friday evening, to the moral and social degradation of the Canadian people, or to tax the public treasury to the tune of six thousand dollars apiece, throughout the rank and file of Canada's Parliament, regardless of sex or service.

They are already vastly overpaid, for the too-often questionable service they render our country. To grab from the national treasury an additional two thousand dollars per head, were nothing short of adding insult to injury. How far removed from real, manly, patriotic service is such an unscrupulous attempt!

Will the enlightened, independent "press" and people of Canada, in the modern phrase, "take lying down" this proposed legalized pillage? I sincerely trust not. The moral and social results of such callous and cold-blooded public policy are deplorable and disastrous, in the extreme. It tends directly to engender a popular feeling of angry contempt for legislators and their laws; and to utterly destroy the gentle sentiment of good will, the generous sense of national brotherhood. It is, in short, the omen and blind precursor of class-hatred and communism.

Faithfully yours,
MALCOLM MacCORMICK.
10146-106th Street,
Edmonton, Alberta.

[illegible]

A large crowd of one hundred people turned out to "Mothers' Day" services at the school house on Sunday. Besides the Mothers' Day program seven of the Tofield Sunday school put on a Mothers' Day pageant which was very interesting and was much appreciated. Those taking part were Mrs. Firth, Mrs. Craig, Mr. Wm. Swift, Misses R. McLaughlin, Craig and Gwendolyn Firth and Kenneth Harrison.

Mr. Wm. Lee and daughter, Viola, motored to Edmonton on Thursday for the day.

Mr. and Mrs. Carlisle motored to Edmonton on Tuesday with a truck load of hogs.

Mrs. Joe Sutton was taken to the Camrose hospital on Monday. Her condition is very serious.

Miss Selma Nomeland is assisting Mrs. Henry Sutton with her housework.

Mr. and Mrs. Barnes, Mr. Hull, Misses Lilian Carlisle and Pearl Welch visited Mrs. Hull in Camrose on Sunday.

Mrs. Wm. Lee was under the doctor's care last week, suffering from an attack of acute indigestion.

Mrs. Kate Shaw of Calgary is visiting at the Henry and Joe Sutton homes.

In spite of the busiest month of the year for farm women, enough dropped into town on Wednesday to have a very interesting M.A.S. meeting with Mrs. Gordon. Nine members and three visitors were present. Visitors were Mrs. Firth, Mrs. Geo. Francis and Miss Hannah Jenson. Mrs. Firth read an interesting and profitable paper written by herself on Missionary work in Africa. Mrs. John Brown favored with a solo, "Tell Mother I'll be there," in honor of Mothers' Day. After the meeting a social hour was enjoyed during which time the hostess served a tempting lunch, assisted by Mrs. Firth.

BARDO

The Mothers' Day programme by the Young People's Society of the Lutheran Church was enjoyed by a large audience.

Mrs. Jenbert of Manitoba is visiting her sister, Mrs. M. B. Ness.

Mr. and Mrs. Bert Ness of Ryley celebrated their silver wedding last Sunday. Those from Bardo who attended were the M. B. Ness family, Olaf Anderson, Mr. and Mrs. Emil Rude and Mr. and Mrs. Pete Eggen.

Mr. and Mrs. Lerbekmo, Miss Florence Boness and Mr. and Mrs. Hills were guests in the H. E. Brenneman home on Sunday.

Monday evening was the date set for Miss Gudrun Ness' junior year recital at St. Olaf's College. Many of her Bardo friends were with her in thought, and wished for her a successful evening.

On Sunday, Mr. and Mrs. Jake King entertained the A. A. King, M. Wideman and Jake Yoder families; also Mr. Heading and son from Oregon.

Mrs. Bender was so unfortunate as to get a piece of steel in one of her eyes. It was removed by Dr. Law and she is recovering nicely now.

Mr. J. L. Stauffer and Mr. Wideman were Edmonton visitors on Tuesday.

Fragments of a shell and the positions of the skeletons indicated that the four had been buried by the missile that killed them.

Co-Operative Wool Marketing

During Ten Years Of Operation More Than Thirty-Six Million Pounds Were Handled

More than 36,000,000 pounds of wool have been handled by the Canadian Co-operative Wool Growers Ltd., Toronto, during the ten years that it has been operating. This association is a sales agency serving the provincial and local associations in the provinces of Canada from Nova Scotia to British Columbia. Wool of the 1927 clip was assembled by 16 local associations and delivered to the larger organizations for marketing. The 1927 receipts consisted of 2,636,315 pounds of wool and 11,938 pounds of pelts. Of this amount 41 per cent. came from Alberta and 19 per cent. from Ontario, Manitoba and Saskatchewan together furnished 16 per cent. of the total quantity.

In addition to marketing wool the association has handled sacks, twine, stockmen's supplies, and manufactured woollens. Total sales of these side lines for 1927 amounted to $77,-272.

Lawyer: Don't you think you are straining a point in your explanation?

Witness (a cook): Maybe I am, but you often have to strain things to make them clear.

My Scotch boy friend sent me his picture.

How does it look?

I don't know. I haven't had it developed yet.

Science Discovering Secrets Of Leprosy

Caused By Bacteria Says Professor Of Tropical Medicine

Leprosy, the dread disease, which sends its victims into colonies of "The Living Dead," has begun to give its age-old secrets.

New evidence relative to the ancient scourge, tending to show it is caused by a definite bacterium and is not contagious has been gathered by one of the famous microbe hunters of the University of California.

He is Dr. E. L. Walker, professor of tropical medicine in the University Medical School, Berkeley, Cal., who recently returned from a 14 months' stay in Honolulu. While there he carried on extensive investigations of the cause of leprosy at the Molokai Receiving Hospital.

Although Dr. Walker made it clear his findings are only tentative, he predicted that if they are sustained by further research they will result in changes of great scientific, economic and governmental importance.

Here are the two conclusions reached as the result of his studies in Hawaii.

1. Leprosy is caused by a bacterium related to the fungus actinomyces, a plant like growth of microscopic size which thrives on no living organism except that of man, but which is found in the soil virtually everywhere in Hawaii.

2. These bacteria enter the body in cuts or wounds about the feet, and are not transmitted by the leper despite the cry of "unclean" which has driven him as an outcast from society.

Winnipeg Newspaper Union Fashions

For Smart Occasions

A delightful printed Pussy Willow silk dress, with fashionable tiered skirt that can be worn for street, yet is dainty enough for any smart afternoon. The long-waisted bodice with square neckline and applied bands forming deep V at front, of plain harmonizing silk crepe, slenderize the figure. Design No. 867 is attractive and serviceable made of wool crepe, two surfaces of crepe satin or georgette crepe. Pattern is obtainable in sizes 16, 18 and 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 4¾ yards of 40-inch material with 3¾ yards of 1½-inch ribbon. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Small Town Papers

BY FRANK PARKER STOCKBRIDGE

Reprinted by special permission from Saturday Evening Post. Copyright 1927, by the Curtis Publishing Company. [illegible]

(Continued.)

Awards like these, and the others which the association gives annually, are doing a great deal to stimulate country editors to produce better papers. The Brookings Register, in South Dakota, for example, holds the current award for the best front page. That puts the Eastern publishers on their mettle, but it was an Eastern paper, the Graphic, of Newton, Massachusetts, which won first prize in the association's advertising contest, while the News, of Montevideo, Minnesota, took first place as an example of good newspaper production.

These awards are powerful influences for the betterment of the country press, the others agreed, but two or three spoke simultaneously of the schools of journalism as perhaps the most potent factor of all in the progress of the small-town weeklies.

"You didn't think that all this flock of boys and girls who are being graduated every year from the schools of journalism were getting city jobs, did you?" asked Bert Mills, as I expressed surprise. "I don't know just how many there are, somewhere between thirty-five and fifty universities, I believe, which have full-fledged journalism schools. I noticed that Prof. Willard Bleyer, dean of the Wisconsin University school, said the other day that there were more jobs than there are graduates to fill them, and I believe he's right. And many of these schools are concentrating on the problems of the small-town weekly rather than on the daily press. Indiana State, for example, pays almost no attention to daily journalism, but when a boy or girl is graduated there he or she can always find a job on a country weekly. It won't be long now, perhaps in our own time, when the country editor who is not a university graduate will be as rare a bird as the oldtime tramp printer is today."

That turned the talk to the modern counterpart of the tramp printer, the real journeyman, who drifted from town to town and was the main reliance of the old-fashioned country editor. The machine operator—usually a machinist as well as an operator and often an all-round printer as well—has taken his place, they told me. And "he" is often as not a "she." Gone are the whisky bottle and the corn-cob pipe, the ribald jest and the odoriferous spittoon which made the old-time country newspaper shop so picturesque and glamorous. It is a ladylike boudoir nowadays by comparison. It was a Nebraska linotype operator, on the Cook Courier, who was crowned Queen of the Johnson County Fair last fall! No tramp printer ever achieved anything like that.

"Gentlemen," I said when we had got that far, "you have been breaking my heart by degrees ever since we foregathered. You have knocked my lifelong illusions into a cocked hat. You have thrown romance into the hellbox, as it were. You have turned what was once a glorious, irresponsible adventure into a sordid, commercial, efficient, prosperous money-making business. I can survive these revelations as I have survived the discovery that Santa Claus and the type louse alike are myths. But do not shatter my last remaining link with the romantic memories of rural journalism as I knew it in my youth. Do not, I beg of you, do not tell me that the patent inside is dead!"

My appeal moved them, though not precisely to tears. They hastened to assure me that the patent inside still lives. The patent inside and its younger brother, the boiler plate of beloved memory, are still stand-bys in country newspaper shops. Four or five thousand small-town weeklies still buy their paper stock printed on one side with a variety of news features, pictures, fiction and the like, calculated to appeal to the rural reader, but with this main difference from the old days. That the editor has the privilege of selecting just what shall be furnished in his ready-print service instead of taking whatever the haughty magnates who used to demand their money C.O.D. at the express office, choose to send him, advertisements and all. Or he can buy the same sort of material in boiler plate column-wide stereotyped strips of type metal, pictures and reading matter which he can put on his own press and print from. And 20 per cent. or more of country weeklies now have their own stereotyping outfits, purchased or leased, with which they can cast their own plates from paper matrices furnished by advertisers or obtained from syndicates which supply not only editorial features, comics, cartoons, fashion and sport services, among others, but also well-designed advertising drawings and borders to enable the country newspaper to give its local merchants as attractive advertising display as one can find in the city papers.

Such co-operative services make it easier than ever for the ambitious young man to establish a creditable country paper on small capital. Credit for equipment is extremely liberal, the country editor is no longer a financial pariah. Country papers are still started on shoestrings, without a printing plant at all, getting the paper printed in the nearest good-sized town. If the editor-publisher is really in love with his job and is willing to hustle hard for local news and advertising, he has a better chance than ever to establish himself in a prosperous business, Bert Mills and the rest assured me. And the established country weekly today is so valuable and so profitable that if Franklin Sumner would turn over in his grave if he could hear how things have changed.

I guess that novelist is crazy like a fox.

Christie's FIG BARS

Simply scrumptious . . . Christie's Fig Bars. Wholesome, too, and especially good for youngsters because the filling is made with genuine Smyrna figs—pure and unadulterated.

A SERVICE CHARGE ON SMALL ACCOUNTS

Is Predicted By Toronto Man But Bank Manager Thinks Not

Are Canadian banks likely to follow the example of those in the United States, which levy a service charge on small accounts? In the Financial Post, A. D. Watts, a Toronto and New York stock broker, was reported as saying to a group of the younger financial men of Toronto, that this would come about.

The question was in turn propounded to C. L. Hodgkins, manager of the Royal Bank of Canada, Brantford branch, and president of the Brantford Board of trade.

"I do not agree with Mr. Watts when he predicts that Canadian banks should and will charge a service fee for operating a savings bank account, for two reasons.

1. "That the Canadian banks are performing a national public service, encouraging thrift among the small and with this in view the banks will as well as the large wage-earners, open a savings bank account with $1 and will afterwards accept deposits for any amount the customer may wish to deposit.

2. "While it is true that in some cases savings banks accounts are operating at a loss, this is the exception, as when a savings bank depositor has been secured, he seldom leaves a bank and in many cases the original deposit has grown, in a few years, to a substantial balance and a profitable account and valuable connection for the bank.

"A small fee on small savings bank accounts would discourage many from acquiring the savings habit and while a few unprofitable accounts would be avoided by charging a service fee, the small increase in profits from this source would be more than counterbalanced by the increase in profit that accrue from the prosperity engendered by thrift and the saving habit acquired throughout the whole Dominion."

New Industry In Winnipeg

One of the largest United States manufacturers of paper bags used in the cement industry is likely to locate in Winnipeg shortly, according to information received by the Industrial Development Board. Officials of the company have been in Winnipeg recently consulting with the Board as to the suitability of this location, and there is strong likelihood of their approving it.

To Improve Cattle Industry

Some 32 municipalities in Saskatchewan are in process of eliminating all grade sires and establishing themselves as purebred sire areas under the Act in force in this province. It has been estimated that if all the calves in Saskatchewan were sired by good purebred bulls it would add $15,-000,000 to the value of the cattle in the province.

The "Flu" LEFT HER WITH A VERY WEAK HEART

Mrs. Beulah Demone, Pleasant River, N.S., writes:—"Having suffered with the 'flu' a few years ago, I was left with a very weak heart.

"I was unable to go about, and could not do my housework.

"I would get dizzy spells and would have to go and lie down.

"I could not sleep at night as the least little noise would wake me up.

"I tried different kinds of medicines, but they seemed to do me no good.

"A friend recommended

MILBURN'S HEART AND NERVE PILLS

I have used five boxes and am much better; do not get those dizzy spells, and can do my own work as well as ever."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

MAY 20

JESUS TEACHING IN THE TEMPLE

Golden Text: "He taught them as one having authority."—Matthew 7. 29.

Lesson: Mark 12.13-44.

Devotional Reading: Psalm 119.1-8.

Explanations and Comments

The Captious Question in Regard To Tribute, verses 13-17. The Herodians were a small political party who were partisans of Herod. A few of the Pharisees sympathized with the Herodians, but most Pharisees hated them as cordially as they did the Sadducees, yet they united with Herodians and Sadducees in a plot to snare Jesus. The men whom they sent to Jesus prefaced their remarks by saying that the question they were about to propound was a dangerous one to answer, but they knew that He was not afraid of consequences. "Thou regardest not the person of men, but of a truth teachest the way of God," they said. Thus would they flatter Him and put Him off His guard.

Then they asked their question, "Is it lawful to give tribute unto Caesar, or not?" The "tribute," literally "census money," that is, poll tax, was paid by every Jew. It was inquisitorial, followed a careful taking of the census, in which every man was obliged to report his family, his property, and his income, and was extremely odious to the Jews, who counted it a badge of their national degradation. Its payment was resisted by some, especially among the Galileans, not only on political, but also on religious grounds."—Lyman Abbott.

The Pharisees asked their question with malice of forethought. If Jesus said "Yes," He would bitterly antagonize the people, and if He said "No," they could accuse Him of treason to the Roman government. And indeed, two days later they falsely said to Pilate, "We found this man perverting our nation, and forbidding to give tribute to Caesar," Luke 23.2.

"Shall we give, or shall we not give?" they put the question plainly. Here was their alternative: pay tribute to a foreign power where emperor worship prevailed, or refuse to pay and remain loyal to God. They thought that whatever answer Jesus made it would condemn Him. Jesus denied there was an alternative, both were aspects of one duty. He would not teach contempt of the established government and disobedience to law. Nor would he teach disloyalty to God.

Jesus well knew their evil intent. He quickly saw through the purpose of their flattering words. "Why make ye trial of Me?" He asked, as He called for a coin, a denarius on which was graven the image and name of Caesar. The coin represented Rome's services to the people governed, as well as Rome's power and authority. "Whose is this image and superscription?" He asked. (A small boy in Australia in telling the story gave it thus: "He asked them to show Him a penny, and when they gave it to Him He said, Whose miserable subscription is this?")

"Caesar's," they replied. Then said Jesus, "Render unto Caesar the things that are Caesar's." Render, give back; the coin came from Caesar, and they owed him something in return. They were accepting the services of Caesar's government, for these services they must render an equivalent.

Must Import Food

Irish Free State Imports Bulk Of Wheat and Flour Needed For Home Consumption

Of the population of the Irish Free State, 53 per cent. is engaged in agricultural occupations. But less than 13 per cent. of the land is cultivated, and the industry is mainly pastoral. Of Ireland's agricultural workers 74 per cent. are the farmers and their families, and only 13 per cent. are permanent wage earners. The Free State imports most of its food. The average annual import of wheat and flour is 522,763 tons. The country itself produces only 30,000 tons of wheat, on an average, in a year.

A four-volume folio Bible printed in 1480 by Adolph Rusch, of Strasbourg has been added to the rare book collection of the Princeton University library.

The risk of being struck by lightning is five times greater in the country than in the city, and twenty times greater at sea than on land.

Criticizes Medical Inspection System

Hon. George Langley Says Sending Canadian Doctors To Britain Creates Antagonism

Canada was confronted with a blockade of British immigration to the Dominion as a consequence of the new medical inspection system. This opinion was expressed by Hon. George Langley, former Minister of Agriculture for Saskatchewan, at the immigration inquiry in Ottawa.

"The sending of Canadian doctors into Great Britain has completely antagonized the medical men of the Old Country and has created an atmosphere of antagonism toward immigration to Canada. It is all over the country from one end to the other," continued Mr. Langley. It was only through a recognition of the facts that the blockade could be removed as the displacement of British doctors did not meet with British public approval.

"You have to clear away this antagonism in the Old Country," he declared. Rosier doctors should be used in conjunction with Canadian doctors in medical examinations at British ports.

Mr. Langley recounted his experience as a member last year of the Canadian farmers tour of the British Isles. He was somewhat critical of the 3,000 family settlement scheme. The feeling in the Old Country, Mr. Langley stated, was that the scheme retarded the obtaining of the more desirable type of British immigrants such as the young single men.

Passage fares were too high, Mr. Langley commented. Efforts toward a reduction in ocean passage should be made by the government.

"That has been tried," interjected Hon. Robert Forke.

Mr. Langley visualized a prosperous situation in Canadian agriculture.

"The farming prospect of Canada has not been so good for 30 years as it is today," he remarked.

How Much Water Should Baby Get?
A Famous Authority's Rule
By Ruth Brittain

Baby specialists [illegible] nowadays that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day, and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent. bottles contain thirty-five doses.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XXIV

It was at Fort Simpson, in November, on his way out, that Jack Doran heard of the war. They had floated down the Nahanni River on a moose-skin barge to the Liard, and down the Liard to the MacKenzie on a spruce scow, arriving in Fort Simpson one raw November day when an icy wind from the North gave warning of the freeze-up. They had brought with them a few furs, which George, the half-breed guide, had got with his trap-lines, and from the sale of these they hoped to be able to buy supplies for the home journey.

Their summer had been full of adventure. They had seen the leaves come on the trees, the flowers bud, bloom and fade, the leaves fall, and now the lowering clouds of November driven by the cold winds, but with their bags full of gold quartz to show what they had found, and their little lump of dust carried in chamois bags and glass phials, they were elated and confident.

Jack, with all the eagerness of the amateur, had been full of enthusiasm going in, and in the washing of gold from the sand of the river he had enjoyed a [illegible] delight. To see the glint of yellow gold in the black sands at the bottom of a pan fired his imagination. Keith had complimented him on his success in panning.

"She's gettin' better all the time," Keith had said, "so we are gettin' closer to the deposits." He had a map of the country showing the exact spot where the claims would be staked. "You'll have some nuggets to bring home to that new wife of yours that will make her eyes pop out of her head."

It was in September they reached the place, and Keith announced the object of their search achieved. They staked their claims and gathered some rich pieces of quartz to bring back with them. Keith was exultant, and even George, the half-breed, grew garrulous with the prospect of riches. He was going to have three cars and a colored driver in a gray uniform!

Keith had the plan for mining all arranged. He showed them where the sluices would be placed, drawing a diagram to show the angle at which they would be set and how the riffles would be put in the bottom. He would bring the water in a pipe-line from farther up the river, and throw it against the banks of gravel in powerful jets. At the falls, up the river he would generate the electricity to run a stamp mill, where the crushed rock would be reduced to powder and passed through a sieve, and the gold collected on copper plates. "You'll see a bigger trek to this field than there was in ninety-eight," he assured his eager listeners.

The return journey, lacking the stimulus of novelty which had kept them from discouragement going in, was tedious and depressing. Their way lay through a gloomy, barren country, and the weather was cold and wet. The shortening days and lengthening nights, too, were unfavorable to travelling. But at length, ragged, unkempt, unshaven and dirty they arrived in Fort Simpson just before the freeze-up.

The good-natured proprietor of the store bought their furs, outfitted them, giving them the news of the war as the transactions went on. "I wish I was younger, and I'd be off," he said. "I'd like to do a bit of fightin' before my time comes to step off."

"What is it all about?" Jack asked, as he tried on a pair of long boots.

"Well, I'm not clear on that, but sure it's a poor war that ain't better than no war, and you see war has to come once in a while to clear out the surplus population. We breed too fast, ain't that the truth? so it's either pestilence, war, or famine, and war's a lot more fun than the other two!"

Jack looked at him indignantly. "How many children have you?" he asked. He had noticed several little half-breeds around the store, moccasin footed, noiseless, beady-eyed, looking inquiringly at the strangers.

The storekeeper did not resent the question at all. "I think there are six boys big enough to go," he said. "Three of them are out on the trap-lines and haven't heard about it yet, but the other three are going out. Their mother is cuttin' up a little, but she'll calm down, she's a good woman. We have eight others comin' on. It's a good chance for the boys to see the world."

The war did not relate itself in any way to Jack Doran until he arrived at Peace River. He had one unsumming thought in his mind now, and only one, and that was to get to Eagle Mines as soon as he could, and to Helmi. He went at once to the telegraph office and sent her a wire.

"Mrs. Jack Doran, Eagle Mines:—Back safe, expect me in a week. Love, Jack."

Peace River was alive with excitement. Homesteaders walked the streets waiting for the train to take them to Edmonton. There was some delay, owing to trouble on the Judah Hill.

Jack, Keith and George got a room at "The Peace," and soon had the grime of travel washed away, and went to the dining-room for supper. Men in uniform sat at a table, eating noisily and drinking. The room was full of excited talk.

There was a meeting in the hall that night, advertised by a huge red poster in the stores. It said that Major Gowsett and Pte. George Crowe would address the meeting. Pte. Crowe had been wounded at Mons and been invalided to Canada. There were flags in the dining-room, and on the way in that day they had noticed flags flying from the houses and stores, fluttering bravely in the cold wind.

To the hall they went at eight o'clock, and were met at the door by women selling red roses for the Red Cross. A band inside was playing "It's a Long Long Way to Tipperary." To Jack it seemed as though he had come back to a new world, a nervous panicky, high-strung world, abounding in new phrases, new emotions. Fresh from the solitudes of the North, he could not at once grasp the meaning of it all.

Pte. Crowe, a pale lad, standing with a crutch, spoke first, and spoke simply and well. His superior officer had chided him for the mildness of his address at Spirit River the night before. "You've got to put more thunder into it," he said, "these people want color and action. Tell them about the children you saw with their hands cut off."

"But I didn't see any," protested the lad.

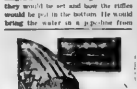
"Well, you heard of them, you might have seen them. Speed up a little, lay it on thicker, or you'll never get recruits."

But again the boy told just what he had seen, the mud—the hardships—the indescribable carnage—the comradeship and heroism of his companions of the trenches. There was no hatred, revenge or bitterness in his heart, only a great bewilderment. He appealed on behalf of his comrades, they were so brave, so cheerful and so fine, so willing to die.

Jack's heart was torn with the pity of it. Worst of all was the boy's twitching hands, never still a moment. What horrors that boy must have come through! His lips had quivered as he spoke, like a child's about to cry. "Don't leave those boys alone, send them reinforcements. The more we can send the sooner it will be over." That was the message of the quivering lips, coming from a heart that was clean and brave. He could talk without apology, could Pte. Crowe, he could ask any person to make a sacrifice and not ask them to do more than he had done.

Major Gowsett, who arranged the program, had left himself for the last. In the ordinary affairs of life Major Gowsett believed in being first, but, understanding what he would have called "mob-psychology," he believed the last speaker had the best chance. He began by damning the Germans with great spirit, reviewing their history, military aspirations, and their home life. He showed that they threatened the whole world. Major Gowsett had not been further than Boulogne during the present war, but one would never know it from his speech. It reeked with the stench of battle. It abounded in personal incidents. He dragged his listeners into shell-holes, dug-outs and across "No Man's Land." He specialized on the treachery of the Germans, the hatefulness of their women, the bitter hatred they had instilled into their children. He had lived with them, he said, and he knew. It seemed that he and Lord Roberts knew the war was coming, but England had not listened to them.

(To Be Continued.)



Cut-away sections of a Gum-Dipped Tire showing one cord unravelled into 11 strands. Every fibre of every strand is insulated with rubber.

Why Gum-Dipping Increases Tire Life

A tire in use is being constantly bent backwards and forwards by road action. Such movement generates friction and heat that has a deteriorating effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because Gum-Dipping puts a coating of new live rubber around each separate cord that keeps it from rubbing against the cords that lie next to it. It stays cooler and therefore lasts longer.

Your local Firestone Dealer will gladly advise you on your tire problems. See him today.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative but do not gripe. They are soothing but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, expel worms, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home and once a mother has used them for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who writes: "I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A six-weeks-old calf was nibbling at the grass in the yard and was viewed in silence for some minutes by the city girl. "Tell me," she said, turning quickly to her hostess, "does it really pay you to keep such a small cow as that?"

Minard's Liniment for Toothache.

The man who tries to prove too much very often proves nothing.

One way to put in your time is over the pawnbroker's counter.

The Experience of Mrs. Roy Brown is Well Worth Reading

Peterboro, Ont.—"I was in a miserable state of health, my nerves gave way completely, I could not sleep, had backaches and I was completely exhausted—so weak and sleepy and tired that I was compelled to give up and take to my bed. I was advised to try Dr. Pierce's Favorite Prescription and nothing I had used helped me. By the time I had taken one bottle I was able to be up and around. I kept on taking it and was completely restored to health. I cannot say enough in praise of the 'Favorite Prescription' for the wonderful help it gave me."—Mrs. Roy Brown, 221 King St.

All druggists. Tablets or liquid.

Exacting cup tests carried out in our blending rooms insure for Red Rose Orange Pekoe Tea a quality that is absolutely uniform. This supreme tea comes to you at its peak of freshness and flavor because it is packed in aluminum—the only package worthy of its fine quality.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

CHILDHOOD DISEASES AFFECTING TEETH

It occasionally happens that teeth erupt faulty in shape or with the enamel pitted and stained, and you wonder what has caused it.

Now a very probable source of this trouble is a general disturbance from some constitutional disease associated with high temperatures, such as scarlet fever, measles, or chicken pox.

Occasionally this disturbance is so great as to totally destroy the tooth germ, but more often it merely affects the tooth structure as described above.

But there are two general diseases that in particular affect tooth structure and tooth eruption.

Of these rickets is a disease of faulty nutrition and it is worthy of note that it is a disease not only of the very poor who are denied proper and sufficient food, but of the rich, who have an abundance of food but of an improper kind.

The characteristic affections of the teeth from rickets are these: the deciduous teeth erupt late and, in the more extreme cases, there is a general deformity of the skull and jaws, moreover these teeth are lost early whilst the permanent teeth in turn erupt late, the result is, faulty or mal-occlusion. Moreover, the teeth themselves are structurally affected, being bluish, sparse and somewhat tapering.

The other disease, more or less specifically related to tooth mal-formation is tuberculosis.

A child suffering from tuberculosis will erupt both the deciduous and permanent teeth early, but the root of the deciduous tooth is not absorbed as it should be, with the resultant [illegible] position of the succeeding permanent teeth.

It is perhaps easier to understand why these diseases should injuriously affect tooth structure as they do when you remember that the teeth are in the formative stage through early childhood and hence are readily liable to influences of a disturbing nature.

No Cause For Worry

Great Britain Still In a Position To Pay Her Debts

It is regrettable that into the United States presidential election campaign there have to be injected unwarranted attacks upon Great Britain. Here is what Senator Reed, in an address before the Daughters of the American Revolution, had to say: "England has been given 60 years in which to pay her debt to us, and God knows if she will be there that long."

Does the fact, the Halifax Herald wonders, that the Reeds are in the midst of a political campaign give them warrant for such unmitigated nonsense. Perhaps it does. But when they have calmed down, may they run across this contemporary utterance by Winston Churchill, British Chancellor of the Exchequer: "England is not done yet. She still has the power to help a friend or pay a debt."

And Great Britain probably will enjoy that power for many years to come, when the Senator Reeds will have been lost in oblivion and when mouth that passes for "one hundred per cent. Americanism" will look silly in retrospect.—Regina Daily Post.

Canada To Establish Bureau Of Standards

Action Of Government Will Be Acceptable To Provinces

The Government proposes shortly to set up a Bureau of Standards which will operate under the National Research Council, according to Hon. James Malcolm, Minister of Trade and Commerce. When the new Bureau of Standards is established, he said, Canada will not have to accept her standards from Chicago. A Bureau of Standards would be acceptable to all the provinces of Canada as well as to the electric power companies throughout the Dominion, the Minister claimed.

Good Price For Prize Steer

Annie Turner, 11-year-old girl who cleaned up with her steer at the Kamloops, B.C., bull sale and then proceeded to do the same at Calgary, afterwards led the animal into the ring at Edmonton, where it fetched 56 cents a pound liveweight, the purchasers being the Hudson's Bay Company. The sale netted $600, in addition to which prizes averaging $130 were won at each of the three shows.

Neuralgia succumbs to Minard's Liniment.

An Outstanding Invention

Two Ontario Men Have Plans For Quick-Firing Machine Gun

The attention and interest of the world's war departments, especially the highest ordnance officers, are focussed on London, Ont., at the present time because in this city plans have recently been completed for a new machine gun that is undoubtedly the most outstanding quick-firing invention yet perfected.

Otto F. Rindlehardt, superintendent of the Carling Brewery, assisted by H. Koenig, of Germany, now of London, is the inventor of this weapon which may have an important effect on the armaments of the world. Defects of both cooling and recoil systems prevalent in the machine guns of all nations in the world war have been entirely done away with in the new London gun, that is the result of seven years' tests and proving.

Probably the greatest advance made in the new quick-firer is the long-sought feature of non-expensive liquid air cooling, a goal sought by the war research laboratories of all nations. This invention alone can be readily disposed of for a very large sum, as the liquid air which has been extremely dangerous to handle in the past, is now rendered perfectly safe. At last a machine gun that will not overheat, and necessarily have to cease action to cool off, has been built.

Speed Up Construction

German Contractors Use Furnace On Wheels To Dry Walls

Homes and apartments are so scarce in Berlin, Germany, that architects and constructors think up every conceivable device for hastening the process.

Their latest quick service help consists of a furnace on wheels which is calculated to hasten the drying process in buildings under construction. It is placed outside the house or apartment building and furnace pipes are laid from it into the room to be dried. The heat is conducted just as though a hot air furnace were in operation in the basement.

In this way, it is estimated, construction is hastened by many days, as the painters and decorators can get busy much earlier.

Next month another 1,100 head of buffalo will be shipped from the Canadian National Park at Wainwright to the big reserve north of the Peace River. Overstocking of the Wainwright Park renders this necessary.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early will prevent incipient condition from becoming chronic and saves hours of awful suffering.

The Arabs were the first to discover the art of refining sugar, with the Egyptians a close second.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Aspirin without it! A drugstore always has Bayer, with the proven directions tucked in every box.

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

Little Helps For This Week

"Cast thy bread upon the waters, for thou shalt find it after many days."—Eccl. xi. 1.

Oh, if the selfish knew how much they lost!
What would they not endeavor, not endure,
To imitate, as far as in them lay,
Him who His wisdom and His power employ
In making others happy."
—William Cowper

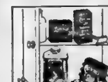
The most delicate and the most sensible of all pleasures consists in promoting the pleasures of others.
—La Bruyere

Happiness is not perfected until it is shared.—Jane Porter.

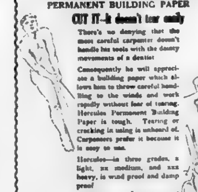
Worms are encouraged by morbid conditions of the stomach and bowels, and so subsist. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Demand For Rental Farms

Swift Current reports a record business being done in automobiles, and farm tractors. Money seems fairly plentiful as a large proportion of the orders placed are on a cash basis. Horse sales and sale of farm equipment have improved greatly over last year according to the dealers. There is also a big demand for rental farms and quite a movement in purchase lands.



Always Keep Cuticura Preparations On Hand
The Soap, because of its absolute purity and emollient properties is unsurpassed for every-day use. Assisted by Cuticura Ointment it does much to keep the skin and scalp healthy. Cuticura Shaving Stick makes shaving easy for tender-faced men. Cuticura Talcum is the ideal toilet powder.
Cuticura Shaving Stick 25c.

HERCULES
PERMANENT BUILDING PAPER
CUT IT—it doesn't tear easily


There's no denying that the most careful carpenter doesn't handle his tools with the dainty movements of a dentist.

Consequently he will appreciate a building paper which allows him to throw careful handling to the winds and work rapidly without fear of tearing. Hercules Permanent Building Paper is tough. Tearing or cracking in using is unheard of. Carpenters prefer it because it is easy to use.

Hercules—in three grades, x light, xx medium, and xxx heavy, is wind proof and damp proof.

Wednesday, May 16th, 1928

BECOMING A MENACE

A few years ago the citizens of Tofield, under the direction of J. W. Chapman, generously spread cinders over the business section of main street. The idea at the time was a good one and the cinders made a good road bed for a time. Now, however, with the ever increasing motor traffic the cinders have been ground up into a fine dust which either due to the wind or passing traffic is continually floating in the air. It is worse when there is no wind and considerable traffic than when a breeze is blowing, for the breeze takes the dust away—that is that portion that does not find its way into main street business places. On Sunday last during the whole afternoon and evening there was a haze of dust over main street, continually kept there by the travelling automobiles.

It is needless to say that this condition is not only unhealthy but positively dangerous. Children playing around main street (they should not but they do) are continually breathing dust laden, and for all anyone knows, germ laden air.

We do not profess to be road experts, but we suggest the town council consider the sprinkling of main street with crude oil, which would we believe, lay the dust. As this could be procured direct from Wainwright, the cost should not be great. Whether this suggestion is acted upon or not, something should be done to attempt to lessen the dust nuisance on main street.

Since writing the above we have learned that the Tofield Town Council, last year, made arrangements to purchase gravel for main street, but that the gravel was not delivered. While commending this action, we also express the hope that the council will take immediate action this season to put some bettre surface on main street.

BRUSHERS WANTED—To brush and burn on the North-East quarter of 18-50-18, and North-East quarter of 12-50-19.—Apply at once to R. W. Pincott, Tofield.

FOR SALE—One 14-inch John Deere Gang Plow. 1 Case Tractor and some good work horses, ages from 5 to 7 years old.—Joseph Vaughn. Phone 209, Tofield, Alta.

FOUND—On Saturday, May 5, about 4 miles south of Tofield a large tire.—Owner can have same by paying for this ad, and calling at the Mercury Office.

FOR SALE—Good, Private Garage—Apply Mercury Office, Tofield.

The Bank has over 600 Offices in Canada, Newfoundland, United States, Mexico; at London, England, and at Paris, France, with Correspondents in all Countries, offering exceptional facilities in all departments of General and Foreign Banking.

The Bank of Montreal holds an interest in Barclays Bank (Dominion, Colonial and Overseas), and by reason of that association is able to offer its clients close competitive rates and complete banking service for business with the West Indies, among the important advantages offered being facilities for obtaining accurate local information.

[illegible] FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alberta.
May 12, 1928

Seeding of wheat is from sixty to seventy-five per cent. completed in the southern part of the province and from thirty-five to fifty per cent. in central and northern sections and spring work is proceeding under ideal conditions, according to telegraphic reports received by the Department of Agriculture.

In a number of districts early sown wheat is well above the ground and a start has been made with the seeding of coarse grains. All reports indicate that the soil is in excellent condition as regards moisture. This is especially true of the central part of the province where rain and snow during the past week somewhat delayed spring work. Seeding of wheat is general throughout the Peace River country with sixty to eighty per cent. completed in a number of districts.

Reports from a number of [illegible] in the province indicate that the 1928 wheat acreage will show an increase of from five to fifteen per cent. over work has been unusually delayed. The wheat acreage of the province will be limited to some extent by the small amount of fall plowing done last year, but in many cases this will be more than offset by the large acreage summer fallowed and newly broken in 1927.

Good progress is being made with the threshing of the 1927 crop which is still standing in the field in some southern districts and the quality of grain being threshed at this time is reported to be considerably better than was anticipated.

Another week will see the completion of sugar beet seeding in the south of the province where a large acreage is being put in. Winter wheat and winter rye have come through the season very satisfactorily and in practically all cases good stands are reported.

Livestock generally is in good condition and pastures are making good growth.

[illegible]

It has come to the attention of the Provincial Department of Agriculture that a firm known as the Central U. S. Swine Company Inc., Utah, has started operations in Southern Alberta. The firm is registered under the Foreign Companies Act.

A number of [illegible] have been working in several districts in Southern Alberta, their first efforts being to secure the interest of prominent men in the locality whose influence will carry some weight with neighboring farmers and persuade them to become interested in the proposition and to invest in the hogs which the company has for sale.

Their offer is to sell pure bred Chester White gilts at prices up to $100.00 each, these gilts to be bred to registered boars of the same breed, or boars are to be supplied at a fixed service fee of $2.50 each, and the company agrees to take back from the farmer all good standard gilts from the first two litters which weigh not less than 150 pounds each and do not exceed six months of age for the sum of $35.00 per head, provided said gilts are of a standard equal to that of the original stock supplied to the farmer.

This company has been doing business along similar lines in a number of the Western States during the past few years and has been particularly active in Washington. The Department of Agriculture as the result of steps which it has taken to investigate their activities, has secured data which will not justify it in recommending the scheme to Alberta farmers.

Some of the outstanding objections are as follows:

The price charged to the farmer for the sows supplied by the company is at least twice as high as he would have to pay a private breeder for sows of the same or better quality.

The contract is one-sided. The farmer is bound to take the sows which the company supplies and no definite statement is given as to the standard the gilts must reach before they will be acceptable to the company. It will readily be seen that the setting of an exceptionally high standard when the gilts are ready to sell would leave the farmer with much of this stock on his hands.

Many of the sows which have already arrived in Alberta from the United States for distribution under this scheme are said by officials of the Department who have inspected them to be of inferior quality, and under the terms of the contract, the farmers who have signed contracts are compelled to accept them.

From information which the Department has received, the experience of certain American farmers with similar [illegible] has proven them to be economically unsound and it is felt that the system adopted by this company cannot be recommended to Alberta farmers because of the fact that it places the swine breeding industry on a false basis. It is not on the basis of the market value but depends entirely on the ability of the company to resell gilts which they buy for $35.00 to some other breeders for the sum of $100.00. This necessitates, of course, the opening up of new territory since the buying-back feature of their program is the only basis that justifies them in charging two or three times as much for a gilt as she can be purchased for from a local breeder.

American farmers have found that in the case of similar organizations, this endless chain has broken under its own weight.

In view of the large amount of educational work which has been done during the past six years by Provincial and Dominion Departments of Agriculture, packers and livestock organizations in general towards promoting the production of a bacon type of hog suitable for the British market, the introduction of a lard-type hog such as the Chester Whites into Western Canada is decidedly a backward step. Many western farmers have built up good herds of breeding stock of the bacon breeds and are in a position to supply the demand for animals which will maintain Canada's position in the export market.

It may be pointed out that never previous to the adoption of the national type of bacon hog in Canada have the pork products of the Dominion enjoyed their present high position on the British market and that every effort should be made to maintain the reputation thus secured. The introduction of stock of an unsuitable type into Alberta will certainly place this province in an unfavorable position on the export market in comparison with the other provinces and if this outlet is jeopardized breeders of inferior animals will undoubtedly find themselves with much of their breeding stock left on their hands and with greatly reduced prices available for their market stock.

The Chester White is not a new breed in Canada. Before the campaign for the production of high class bacon hogs was launched, numbers of herds of these and other lard type hogs, such as Poland Chinas and Duroc Jerseys, were to be found in every province of the Dominion. To-day [illegible] have [illegible] from their prize lists as not being the desirable type to promote.

In view of the above facts, Alberta farmers would be well advised to avoid paying unnecessarily high prices for breeding stock of an unsuitable type and to continue their efforts towards supplying the requirements of the British market.

WHETHER you operate one truck or a fleet, you will save time and money by turning to Chevrolet for all light truck requirements. Because the Chevrolet Commercial Chassis is providing the lowest ton-mile cost in the commercial car field to-day. This unparalleled economy is due to an amazing combination of quality features . . . powerful valve-in-head engine, three-speed transmission, single-plate dry disc clutch, complete electrical system . . . and to Chevrolet's rugged construction, heavy channel steel frame, sturdy cross-members, massive, banjo-type rear axle, extra long and heavy steel springs. You never realized that so much truck value could be obtained at so low a price. The Chevrolet Commercial Chassis is adaptable to a wide variety of body types. Let your Chevrolet dealer help you select the style you need.

The G. M. A. C. . . . General Motors' [illegible] payment plan affords the most convenient [illegible] way of buying your Chevrolet [illegible].

The Wheat Pool Brings About A New Condition of Affairs

Western Canada's 1927 Wheat Crop Government Estimate 415,000,000. Delivered to Market 370,000,000. Estimated Balance Yet to Be Delivered By Farmer 20,000,000.

Over eight months have passed since the commencement of the crop year on September 1, 1927, and ninety per cent. of the crop has been delivered. The great bulk of non-Pool wheat has left the growers' hands.

Except for those who have not had their grain threshed owing to weather conditions, and the few who held their grain since last harvest, the non-Pool farmers have little concern in the present higher prices for wheat. The "Average closing prices" ever on the lips of the Grain Trade should really be figured during the time the bulk is going on the market. That is, from September to April. With very little wheat in non-Pool farmers' hands how can they be benefited by high prices from now on?

Wheat Pool members, on the other hand, have a vital interest in present prices. They have seen their Pool start the crop year under a burden of tremendous wheat supplies, and a handicap of a cloud of "bearish" news. Last fall grain poured in rivers into Winnipeg, and Vancouver's facilities were taxed to the limit. Argentine had raised a tremendous crop. Europe's production was up by millions of bushels. The United States' wheat crop was heavy and altogether things did not look any too rosy.

The Canadian Pool had a difficult task on hand and Pool members may have a good excuse for a feeling of elation at the successful manner in which a grave situation was handled by the organization they had created. Pool members are now in a position to participate to an appreciable extent in the rising market prices.

If there was no Wheat Pool in Western Canada what would the situation have been? The bulk of the wheat would be out of the farmers' hands and in the hands of market intermediaries who would reap a very rich profit indeed. The Wheat Pool has changed this situation in a decided fashion. Now Pool members can sit back unworried and feel assured they will get the best year's average price for the product of their labors.

NO ONE IS GOING TO EXTRACT EXTRAVAGANT PROFITS FROM POOL WHEAT.

Farmers should realize that only by the Power of Control of Volume has the Wheat Pool been able to function efficiently. This volume is assured by Signed Contracts.

Join your brother Pool members in this vital [illegible]
[illegible]

HELPING ARMENIAN REFUGEES

Canada has always been sympathetic towards the suffering Armenian race in their terrible days of massacre and exile, as well as today in the sad condition of thousands of them as refugees.

The Armenian Association of Canada and the Canadian Committee of the British Save the Children Fund, co-operating with the Lord Mayor's (Armenian) Fund of London, have joined in an appeal to the Canadian people on behalf of nearly a hundred thousand Armenians still stranded in Syria. The League of Nations has taken the initiative, through the International Labor Office, in setting up a plan for placing these unfortunates on the land or in industries in Syria. The French (mandated) Government is helping most liberally, and the process is under way by which those who are thus settled will be able to care for themselves. The League and the interested Governments need, however, the assistance of private charity to complete this much desired plan, which, when finished, in a few years, should enable the refugees to become self-supporting and thus fulfil long overdue promises made to them by the Allied Powers.

The system is to finance, as a loan, a small plot of land to an Armenian family in northern Syria, and also assist in building houses and supplying stock and seed grain.

Dr. Kennedy, the Canadian expert on Near East refugee conditions, has recently inspected the Syrian plan and cables his warm approval of the methods being adopted and the results already achieved, and he warmly commends the appeal to the sympathy of Canadians.

Many leaders in Great Britain and Canada have given their approval to the undertaking including, in England, the Archbishop of Canterbury, the Bishop of London, Sir Philip Gibbs, John Galsworthy and T. P. O'Connor, and in Canada His Excellency the Governor General, Sir Robert Borden, Sir George Foster, Hon. T. A. Crerar and others, while organizations like the I.O.D.E., the National Council of Women, the Social Service Council of the Church of England, and the Toronto League of Nations Society have passed approving resolutions.

Gifts are therefore solicited from Canadians who feel that a great debt is still due the afflicted Armenian race and that, in aiding to pay it, an international as well as a philanthropic contribution is being made. Contributions may be sent, to the treasurers of the joint appeal, H. L. Stark and R. J. Dilworth, 90 Dundas Street East, Toronto 2. Full information will also be sent on request to Frank Yeigh, Secretary

Cream Shippers
This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.
If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.
YOURS FOR 300,000
THE TOFIELD CREAMERY
Alex Ross, Manager

It may or may not be true that "Life is what we make it," yet it is a fact that, for various reasons we deny ourselves things that would materially benefit us.

There are many farm houses in Alberta, yes in the Tofield district, that would be lighter and brighter, were there that wonderful light and power, electricity, available.

The Kohler electric light and power plant will at the push of a button or turn of a switch give the farm home brilliant healthful light and plentiful power. It will do more—in the barn, granary, cow shed, chicken house, where ever there is a light or power appliance—just switch it on and you get full rated power from the plant.

When you turn a switch the plant starts and stops when the last light is turned off. Thoroughly dependable. Thousands in use both on land and sea.

We recommend the Kohler as being America's best private lighting plant.

Now is the time to consider the installation of a plant for next fall's use. We will be pleased to give you prices and information regarding any particular installation.

For Humanity!

The world [illegible] names of men and women who have rendered [illegible] service to the cause of humanity [illegible] out by [illegible] such recognition than that of Henri Dunant, the [illegible] of whose birth in Geneva, Switzerland, was observed throughout the world on May 8th of this year, and who lived to the ripe old age of 82 years.

What service did Henri Dunant render to mankind entitling him to this honor?

As a young man of 31 years, Dunant, author and philosopher, was travelling [illegible] in the summer of 1859 in Northern Italy and happened to arrive in the neighborhood of Solferino just at the conclusion of the battle which [illegible] and which was waged between the Austrians [illegible] Franz Joseph II and the Allied French and Sardinians [illegible] strength, the total of men engaged [illegible] The armies met in the early morning and fought [illegible] in the afternoon when the Austrians were forced [illegible] so short a battle the losses were large, [illegible] killed [illegible] leaving almost 40,000.

Upon such a scene of carnage came Henri Dunant accidentally in the course of [illegible] pleasure. Suffering and dying soldiers left on the [illegible] and groans but there was no [illegible] sympathies stirred for these fellowmen who but a few hours [illegible] the pride of health and strength, Henri Dunant organized the [illegible] villagers who did what little they could to cope with the [illegible] ministering to those whose lives might still be saved.

But Henri Dunant did more. The vivid and terrible scenes he had witnessed so impressed themselves upon his mind that a year or two later he published his experiences in a small volume entitled "Un Souvenir de Solferino" (A Remembrance of Solferino), in which he advocated the formation of voluntary organizations to aid the army authorities in carrying out the national obligation of caring for the sick and wounded in future campaigns.

The result was the organization of the great world-wide Red Cross Society.

In this day and generation, with the events of the Great World War still fresh in mind, it is unnecessary to attempt any review of this international [illegible] humanitarian organization. Sufficient it is to say that probably no other organization in the world's history has a finer record of achievement, or so completely commands the confidence and support of all peoples. The Red Cross flag and insignia is known and respected everywhere as a sign [illegible] among warring nations and the highest standard of [illegible] to all suffering humanity.

[illegible] to the sick and wounded of armies in time of war, its amazingly efficient organization and outstanding service during the Great War [illegible] the statesmen of the world confronted with all the difficulties of [illegible] of a well-nigh bankrupt civilization, [illegible] Versailles unanimously called upon the Red Cross [illegible] remain organized and active, and undertake [illegible] peace-time work among the civilian populations.

[illegible] Red Cross, therefore, the creation of Henri Dunant, was accorded [illegible] organization apart from Governments [illegible] the League of Nations, with the solemn obligation [illegible] on all nations joining the League to encourage and promote [illegible] of voluntary national Red Cross Societies, having for their [illegible] promotion of health, the prevention of disease, and the mitigation [illegible] throughout the world."

[illegible] the world the Red Cross with its tens of millions of members, including all races, languages and creeds, is engaged in its mission [illegible] disaster upon a small [illegible] the Red Cross is the first on [illegible] an epidemic [illegible] break out the Red Cross nurse [illegible] humanitarian ideals of Florence Nightingale [illegible] in the alleviation of suffering. [illegible] the Red Cross educational campaign in the promotion of [illegible] And should war again inflict mankind, [illegible] Red Cross will be found better organized and stronger than ever to [illegible] thus imposed upon it.

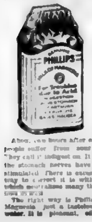
In the galaxy of the world's great humanitarians, Pasteur, Jenner, Florence Nightingale, William Booth, Curie, and others, the name of Henri Dunant shines brightly while the sympathy which prompted his [illegible] Solferino and the inspiration leading to his [illegible] organization in the cause of [illegible] the most splendid self-denial and [illegible] the banner of the Red Cross.

Stocking Alberta Fishing Waters

A total of 1,164,175 pike [illegible] game fish were [illegible] in Alberta fishing waters in 1927. These [illegible] fry and fingerlings [illegible] [illegible] nearly three [illegible] which were placed in [illegible] several fishing waters in order to maintain the supply of fish for this growing industry in the province.

Timed By Hockey Clock

One of the electric clocks invented or developed in 20 years work by W. F. Martin, of Port Arthur, for use in scoring time at hockey matches will be installed in the House of Commons where the 40-minute rule is now in effect, calling for the same accuracy in measuring time while members are speaking with interruptions cut as in hockey games.



When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia, just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Textile Plant For Edmonton

Mill At Edmonton Will Convert Western Wool Into Fabrics

The establishment of a plant in Edmonton by the Western Canada Woollen Mills, Ltd., is contemplated during the coming summer, according to an announcement made recently. This project has been under an exhaustive series of technical experiments. The mill production has been scheduled to include a range of fabrics including blankets, light and heavy tweeds, overcoatings, velours, flannels and other types of cloth for which western wool is suited.

RICH, RED BLOOD
A REAL NERVE TONIC

The Source Of All Nervousness Is Weak, Watery Blood

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Deane, R.R. No. 1, Wasbago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Faces Carved On Building

Likenesses Of Men Prominent In Chemical World Appear On New Structure

Faces of living men are carved in stone on the new million-pound building of the Imperial Chemical Industries nearing completion at Westminster Exchange.

One of the faces is that of the head of the concern, Sir Alfred Mond. All the other carvings are said to be excellent likenesses of many men prominent in the chemical world.

The sculpture around the building also includes figures of peacocks, which are said to be there as a symbol of incorruptibility, following the ancient tradition that the flesh of the peacock is incorruptible.

Nation-Wide Fame. — There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Eclectric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and for any other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Film Industry In Calgary

Production of the first of a series of British films for use under Great Britain's quota law will be started in Calgary this month, May 1. Local capitalists, including P. Burns and A. E. Cross, are backing the project. Neal Hart will be the director of the first picture, which will be western in its flavor.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Buying Registered Seed

Saskatchewan Farmers Have Purchased Much More This Year

The Saskatchewan Registered Seed Association advises that farmers throughout the province have purchased more registered seed this year than in any year in the past and that they are becoming more interested [illegible] There has been a heavy movement of tractors from United States points to points in Saskatchewan this spring and the sale of motor trucks has greatly increased. Evidently farmers are becoming more and more interested in mechanical power.

During the war, Germany raised 12,000,000 men.

[illegible]—except no other.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

Recipes For This Week

(By Betty Barclay)

QUEEN GEORGIA'S CAKE

- ½ cup shortening.
- 1½ cups sugar.
- 3 eggs.
- ¾ cup sour milk.
- 1 teaspoon soda.
- ½ cup raisin juice.
- 1 cup nectar raisins.
- 1 teaspoon salt.
- 1 teaspoon nutmeg.
- 1 teaspoon cloves.
- 1 teaspoon cinnamon.
- 2 cups flour.
- 4 teaspoons baking powder.

Plump raisins, drain and chop, using a coarse cutter. Cream together shortening and sugar. Add 3 beaten egg yolks and 1 white (save remaining whites for frosting), raisins, sour milk, and raisin juice. Combine with flour sifted with baking powder, soda, salt, and spices. Mix thoroughly. Pour into 3 greased layer cake pans and bake 15 minutes in a moderate oven (350 degrees F.). Put together with boiled frosting.

JUNE WEDDING SALAD

Cover individual salad plates with crisp leaves of head lettuce. Place on these, strips of fresh or canned pineapple, one-inch squares of orange pulp, cut thick, and a few smaller sections of sweetened grapefruit pulp. Top with a mound of flavored whipped cream and a maraschino cherry or strawberry. Just before serving add a little lemon sauce—juice of one lemon mixed with two tablespoons granulated or powdered sugar. An ideal salad for wedding feast, or for a company dinner.

Record Building Activity

Building and construction contracts awarded in Canada during the month of April, 1928, totalled $34,345,800 in value, the largest total for any month ever recorded except for May, 1926, when $37,139,700 worth of new work was contracted for. During April this year, $116,962,500 was the total of contemplated work in the Dominion. This total is the largest ever recorded for any month without exception.

The accumulative contracts awarded total for the first four months of the year is surprisingly large compared with previous years. It now stands at $125,647,100.

Calgary's Population

Calgary's municipal report on the city's population places the total at 72,500 this spring. The figures given by the census of 1926 were 65,513. Two hundred houses were erected here last year, and 300 will [illegible] this year. There is an increase of 30 per cent. in the quantity of household effects being brought in by new residents. Blocks and apartment houses are all full and hotels are operating at capacity.

Useful in Camp. — Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be [illegible], nothing could be better as a dressing or lotion.

Will Construct Power Plant

Construction of the first unit of a big power plant in the Estevan coal field is announced by the Montreal Engineering Company, a $750,000 project which will represent the first actual development of power in Saskatchewan by a central generating station for distribution over a wide territory.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

National wealth of Canada is announced as $2,772 per head of population. Get in the line early and make sure of your share.

[illegible]

"Can you give me an example of wasted energy?"

"Yes sir, telling a hair-raising story to a bald-headed man."

Heat naturally flows from a hot body to a colder one even in the electric refrigerator.

Wheat Pool Building Fastest Grain Elevator

Elevator Now Under Construction Will Have a Capacity Of 6,000,000 Bushels

Work has begun on the construction of a 6,000,000 bushel capacity grain elevator at Port Arthur for the Saskatchewan Wheat Pool, which, it is said, will be the most modern and the fastest operating terminal elevator in North America. It will be ready for operation [illegible] October 15, 1928. When completed it will be served by both the Canadian National and Canadian Pacific Railways, and will be able to receive as many as 500 cars of grain per day during the rush season. It will have a capacity of 360 cars per day of ten hours, and will be able to ship out grain at the rate of 150,000 bushels per hour.

The total length of the new elevator known as Terminal No. 7 will be 1,344 feet and the width 236 feet. The elevator trackage will provide space for 225 loaded cars to be spotted at one time, ready for dumping by the five automatic car dumpers, each of which will completely unload a car of grain in ten minutes on the average. To take care of this immense volume of grain 28 elevator legs will be required to take the grain to the top of the elevator, from [illegible] it is [illegible] into the scale garners.

The completion of this terminal elevator will give the Saskatchewan Wheat Pool a total capacity of 22,975,000 bushels at the head of the Great Lakes which, together with a 2,000,000 bushel terminal elevator at Buffalo and the space provided by the Pool country elevator system in Saskatchewan, will give a total grain storage capacity of more than 50,000,000 bushels for the 1928-29 crop year.

A Timely Suggestion

The farm hand took his girl for a buggy ride. Nine miles out in the country the horse dropped dead. Louise said she knew she'd drop dead, too; it was a terrible predicament. "Suppose I give you a nice, sweet kiss. That will put lots of life in you." "Are you sure that a kiss will put lots of life in me?" "Positive, darling." "Then, suppose you kiss the horse."

Appointment Is Popular

New Inspector Of Taxation In Saskatchewan Has Had Wide Experience

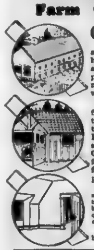
Hon. George Scott is to be congratulated upon his appointment as Inspector of Taxation in Saskatchewan. This is an exacting position, but Mr. Scott has many qualifications which would seem to assure that he will measure up to its demands. The new appointee has had wide experience in educational life, in business life, in agricultural life, and in public life. All this will be helpful to him in his new post.

Hon. Mr. Scott will be missed in the Legislative Assembly, where as member for Arm River he rendered conscientious and able service not only in behalf of his constituency but also in behalf of the Province as a whole. Whether as Speaker of the House, or as a private member, he consistently enjoyed the respect and regard of members of all political groups.—Regina Leader.

The first advertisement printed in a newspaper was a "travel ad" in the Gazette de France, July 4, 1631, advertising the waters of Forges.

The promontories on each side of the Strait of Gibraltar are known as the Pillars of Hercules.

FIREPROOF Farm Construction



GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations — for remodelling — for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gyproc protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gyproc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gyproc comes in broad, light, ceiling-high sheets of gypsum rock. Takes any decoration—and is especially suitable for Alabastine. Fuel saved by the insulating qualities of Gyproc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

"EMPIRE" GYPROC Fireproof Wallboard

GREAT BRITAIN IS ANXIOUS TO OUTLAW WAR

London.—Sir Austen Chamberlain, secretary of the foreign office, speaking in the House of Commons concerning the Kellogg outlawry of war proposals, said that the British government not only warmly welcomed the initiative of the U.S. but was hopeful it would be successfully concluded, and would make a real contribution to world peace.

Sir Austen's statement followed remarks by Ramsay MacDonald, the Labor leader, who supported the Kellogg proposals.

"Our attitude toward this note is going to have a very considerable influence in Anglo-American relations," Mr. MacDonald said. "Nobody who has [illegible] America recently or who has [illegible] the American press will deny that these relations are not quite as good as they ought to be."

Sir Austen said he would proceed in the ordinary diplomatic channels in treating on the proposals, although he had at first favored submitting the matter to a conference of international jurists, as the case of the Locarno pact.

This idea was dropped, however, he explained, when "one of the governments concerned"—understood to be the United States—indicated that it did not approve this method.

The British attitude, the foreign secretary continued, had already been forwarded to the governments of the dominions in order that all elements of the empire might seek a common position toward the proposal. He expected to transmit the reply to Secretary Kellogg soon after the responses of the dominions were received.

Sir Austen was heard with profound interest by the whole chamber.

The only mark of disapproval came when he said that war had never been used as an international policy by any British government of the present era. Here the Labor benches burst into protest, but the secretary maintained his position.

Ramsay MacDonald said first reaction was that the proposal was ridiculous, in view of the complicated nature of the problems and the simplicity of the Kellogg scheme. Later he was convinced that the plan was bound to be a forward step in the battle for peace. Its realization, he said, would make it impossible for nations to threaten war, and thus prevent sowing the seeds of war.

David Lloyd George was another who argued that there would be no point in making reservations to the United States proposal.

Made Chancellor Of Oxford University

Viscount Grey Of Fallodon Elected By Acclamation

London.—Viscount Grey, of Fallodon, former Secretary of State for Foreign Affairs, will be elected by acclamation to the chancellorship of the University of Oxford in succession to the late Viscount Cave. Apart from the gracious gesture to Viscount Grey the decision to elect him without a contest is generally regarded as an indication of the university authorities' desire to separate the chancellorship from its association with politics.

Viscount Grey was foreign secretary from 1905 to 1916.

Hunting Gold With 'Planes

New York.—An aeroplane hunt for gold in Ontario is planned by Jack Hammell, wealthy gold mine owner. Hammell, who is president of the North Aerial Exploration Company, has purchased a Fairchild monoplane for the trip, and said four Fokker planes would join the quest in June. The expedition would head for the Red Lake district of North-western Ontario.

Italian Naval Program

Rome.—A new Italian naval building programme was announced by Under-Secretary Sirianni in the senate recently. Sirianni said the new programme complements preceding ones and provides for the construction of two 10,000-ton cruisers, four destroyers, and four submarines, for which contracts will be let this month.

Killed By Father's Car

Toronto.—A few minutes after her father had kissed her goodbye at his doorstep, 18-months old Ruth Dewsbury, daughter of Mr. and Mrs. Eric Dewsbury, was run over and killed by a car driven by her parent in Mimico, suburb.

Would Follow British Plan

United Farmers Of Canada Have Scheme For Co-Operative Stores

Winnipeg.—An elaborate scheme for the organization of co-operative societies on the British model is now being drawn up by the United Farmers of Canada, according to W. M. Thrasher, secretary of the Saskatchewan section of that body. It is hoped to lay the foundation of a system of stores which will ultimately extend all over the West.

The central body in Canada will, it is understood, have the hearty co-operation of the great British Wholesale Co-operative in Manchester which serves millions of customers in hundreds of stores all over the United Kingdom.

Share capital in small units, Mr. Thrasher stated, will be subscribed to start stores, and safeguards will be erected to prevent any one shareholder from becoming predominant. Though called share capital, the stock to be issued will virtually be debentures in nature, since it will receive only a fixed return on the investment.

May Consult League

Possibility Of China and Japan Submitting Dispute To Geneva

Geneva.—A protest from China to the League of Nations over Japanese military action in Shantung is a possibility, Cheng Loh, Chinese member of the League Council, said to the Associated Press correspondent. He adds he was awaiting instruction from his government at Peking.

Cheng Loh, who is now in Paris, but is coming to Geneva for the meeting of the council in June, said over the telephone that both Northerners and Southerners have the same view concerning the attitude of the Japanese in Shantung. He thought it conceivable that both factions might unite in deciding to submit the dispute to the League of Nations.

Japan's attitude on the question of referring to the League of Nations the dispute is unknown here. The Chinese-Japanese conflict is regarded in Geneva as cutting straight across the Kellogg outlawry of war proposal.

Looking For New President

University Of Alberta Will Seek Strong Man To Fill Vacant Position

Edmonton.—Hon. Perren Baker, minister of education, will leave shortly for points east, on a tour of investigation that will have as its objective the location of likely appointees to the vacant presidency of the University of Alberta.

He will go right across the Dominion, to the Maritime provinces, and may also cross the line into the Eastern and middle states.

It has not even been decided yet that the new university president is to be a Canadian, but other things being equal, the preference will naturally be given to a man Canadian-born or at least Canadian experienced.

New Road To Coast

Project Roads For Northern British Columbia Country

Victoria, B.C.—A new railway route pass through the mountains from the coast to the Peace River and northern British Columbia country was announced by H. M. Holston, editor of the Portland Canal News who was here on his way north to Stewart.

"The new pass which has just been located for getting over the Naas and Skeena watersheds to the Finlay basin, is 3,500 feet lower than the original pass mapped under Sir Donald Mann," Mr. Holston said.

"It will mean a much easier railway route to the coast."

Alberta Mounted Rifles

Ottawa.—"C" Squadron, 2nd Regiment the Alberta Mounted Rifles at [illegible] has been relocalized at High River, Alta., the department of national defence has announced. A regimental badge of revised design has been authorized for the Saskatoon Light Infantry, Saskatoon, Sask.

Governor Leaving Hong Kong

Hong Kong.—Sir Cecil Clementi, Governor of Hong Kong, has left for England. He is returning via Canada. Sir Cecil Clementi has been governor of Hong Kong since 1925, and has been in public service in China for many years.

Man Power Plane

New York.—A model aeroplane, the motive power of which is obtained by hand as a boat is rowed, has been demonstrated by Lehman Weil, who now plans to construct a man-sized machine on the same theory. The model in test rapidly took the air.

Plan Meets Opposition

British House Discusses Cold Storage For Imported Meat

London.—Speaking for the government in the House of Lords, Lord Stradbroke, minister of agriculture, promised most carefully to consider a suggestion that all refrigerated meat imported into Great Britain from countries where the foot and mouth disease is prevalent should be placed in cold storage at the port of landing for three weeks.

Lord Kylsant, in opposing the suggestion, pointed out that 2,045,000 tons of meat were consumed in Britain in 1927, of which 925,000 tons were imported chilled beef of a quality almost equal to the best home-killed beef. In order to secure imported meat in a satisfactory condition, however, it should be [illegible] in Britain within 21 days after being shipped.

If chilled meat had to go into cold storage for three weeks on arrival, he said, its value would be considerably reduced as it would have to be frozen. The result would be that the importation of chilled meat would cease and nearly half the people of Great Britain would have to consume frozen meat of an inferior quality and pay a higher price for it than they did at present.

CLASH BETWEEN JAP TROOPS AND NATIONALISTS

Shanghai.—The Japanese 28th brigade under General Sotoyama, bore the brunt of fighting between the Japanese and Nationalists forces.

General Sotoyama's brigade came into contact with a force of southerners at Kotien, about 15 miles east of Tsinan, and disarmed many of them after stubborn resistance.

When Sotoyama's forces were returning to Tsinan they encountered a powerful force under General Chen Tiao Yuan. Fighting was last reported still in progress with the result unknown.

Chen Tiao Yuan was formerly governor of the province of Anwhei and commanded the three nationalists armies which succeeded in cutting the Shantung railway April 30 at Ningshai.

The Japanese were continuing today their attempts to disarm the nationalists as rapidly as they came in contact with them in the entire Tsinan area. The Mikado's forces had occupied the bridge across the Yellow River at Tsinan and other strategic points.

With the exception of the two encounters with Sotoyama's forces most of the fighting was of a minor nature.

Would Have U.S. Mediate

Suggestion Made That Action Be Taken To Prevent War Between Japan and China

Geneva.—The peace purposes of the League of Nations will be served if Washington should wave a magic wand and prevent war between Japan and China, said a league authority discussing the possibilities of friendly mediation either by the United States Government or by the league.

Geneva circles appear confident that some soothing influence will be exercised to prevent the Chinese-Japanese conflict from growing worse. The league is ready to act if asked.

PROMINENT FINANCIER

Alfred Loewenstein, financier, now in Canada, who, representing one-third of the ordinary stock of the company, is reported to be seeking to obtain control of Brazilian Traction Co., one of the world's largest public utilities.

Passports Required For Short Vacation

Week-End Tickets To Europe Cost Britishers $10.00 Extra

London.—The British Easter holiday crowd of "trippers" to the Continent was thrown into consternation by being required to pay $10 extra for their annual spring outing abroad—for the first time since the war passports were required.

Since 1919 a special facility had been in force under which persons were allowed to buy week-end tickets to certain French and Belgian ports, available from Friday to Tuesday which allowed the holders to travel without a passport. Henceforth passports will be required.

Persons who enquired at the French consulate-general in London, learned that the British authorities had never consented to grant a reciprocal advantage to French and Belgian nationals, and the French Government now intended to make the abuse of this facility by one individual an occasion for withdrawing it altogether.

Says Alberta Bill Is Given Support

Hon. C. A. Dunning Has Every Hope That It Will Pass

Edmonton.—Hon. Charles Dunning, Federal Minister of Railways, telegraphed Premier Brownlee in reply to the latter's request for co-operation in getting the Northern Railways extension through the house that he has every hope of the bill passing. The Government has done everything possible, he says, to facilitate it and extra time has been given private bills after the House had unanimously agreed that Government business should take precedence. Mr. Dunning adds that talking-out tactics on private bills have become very prevalent during the present session.

Arrives In Big Plane

Ottawa.—Captain Alfred Loewenstein, Belgian multi-millionaire, arrived at Lindbergh Field here in his tri-motored monoplane, the largest machine Ottawa has ever seen. Captain Loewenstein and Mrs. Loewenstein were the guests of Premier Mackenzie King at dinner, at Laurier House. He declared emphatically that his visit to the capital was merely a social call.

British Boys Study Agriculture

The above shows a splendid group of British Public and Secondary school students who have just arrived at the Macdonald Agricultural College. Recruited by the Department of Colonization and Development of the Canadian Pacific Railway, these young men will pursue a two years' course at the College. During the summer months they will work on farms where places have been selected for them. On completion of their studies they will engage in various branches of Canadian agricultural operations, by which they will be accustomed to Canadian methods.

The scheme under which these students were brought to Canada has now entered upon its fourth year of operation and the College authorities are thoroughly satisfied with the soundness of the plan. At the extreme left of the picture is Dr. H. Barton, Dean of the Faculty of Agriculture, Macdonald College, and at the extreme right is Mr. L. H. Hamilton, Instructor in Agriculture, who is especially charged with the supervision of the students under this particular scheme.

New Money For Ireland

London Mint Is Striking Coins For Free State

Dublin, Ireland.—A few months hence the people of the Irish Free State will begin to handle new coins intended to displace British coins in local circulation. The contract for minting was given to the London Mint, which has submitted Dublin the first strikings and now will proceed with production, beginning with silver coins.

The new coins will be of the same value as British coins up to half-crowns, and no higher denomination will be coined at present. Provision has been made for a proportion of silver higher than that in British coins, in order to counteract any possible suspicion of the new coinage. The sixpence and the threepenny piece will be of nickel, the new threepenny piece being of the size of the British silver sixpence, but without any milling. Bronze coins also are being struck, but it will take a little longer to substitute these for the corresponding British coins.

Urge Acceptance Of Canadian Currency

Washington Asked To Sanction Its Use In U.S. Centres

Ottawa.—The Journal in an editorial says:

"Due to a letter addressed by A. H. Jarvis, of Ottawa, to the United States consul-general here, steps have been taken by the State Department at Washington, which may result in the future acceptance of Canadian currency at all centres across the line.

"Hesitation on this score on the part of Americans in many districts has long been a source of inconvenience and annoyance to Canadian visitors to the U.S. Although we are Uncle Sam's best customer and despite the fact that the American dollar is accepted without question over here, there are many places and business houses and hotels across the border where the Canadian dollar is no more regarded than if it were the paper of Soviet Russia."

British Bankers Worried

Over Flood Of American Capital Which Is Entering Canada

London, Ont.—Grave fears are entertained by British bankers concerning the flood of American money which is entering Canada, according to Major Hume Cronyn, London financier, who has just returned from a trip to England and the Riviera.

"It is impossible for us to secure money in England for anything like the rates at which we can secure it here," said Major Cronyn. "This is due largely to the interest of the U.S. in Canadian securities. The result is that British capital is naturally prevented from coming in to any great extent and the fear is felt in Britain that the new alignment of money power in Canada will have a bearing on the future relations of the Empire. I heard this referred to in England as a menace."

SASKATCHEWAN OLD AGE PENSION PLAN OPERATIVE

Ottawa.—Hon. Peter Heenan, Minister of Labor, signed on behalf of the Dominion Government the agreement with the Province of Saskatchewan for old age pensions.

The cabinet had passed orders-in-council authorizing Mr. Heenan to sign the agreement and endorsing the plan of administration proposed by the province.

The agreement was signed on behalf of the province by Hon. C. M. Hamilton, Provincial Minister of Agriculture, under whose jurisdiction the pensions scheme will be operated by the Child Protection Bureau.

The signing by Mr. Heenan was witnessed by Premier King and a number of his colleagues from Saskatchewan.

British Columbia has been paying old age pensions since last September and had disbursed about $390,000 to the end of March, the Federal Government having re-imbursed the province for half this amount.

Saskatchewan will be the second province to actually begin old age pension payments.

Manitoba has passed the necessary legislation to take advantage of the Dominion Act, and it is more than likely that payments will begin there some time during the summer.

It is expected that an agreement with the Yukon will be made very soon.

JAPANESE FORCES IN CONTROL OF CITY OF TSINAN

Shanghai.—Japanese soldiers had cleared the last Nationalist forces from Tsinan, capital of Shantung province, and were in complete control of the city for the capture of which the Southerners had expended the entire force of their drive.

Reports of casualties involved in the expulsion of the Southerners from the city are indefinite, but loss of life is believed to be heavy for both Japanese and Chinese with the probability that many Tsinan civilians will be numbered among the dead.

Three field batteries which the Japanese had placed in the foreign settlement, one near the United States consulate, started to shell the city with shrapnel early in the day. Most of the population of [illegible] were caught unawares and a heavy slaughter is believed to have resulted.

In the course of the fighting the Japanese blew up the southern and western corners of the city wall and what southerners were left in the city departed in a rout fleeing northward after crossing the Yellow River.

Resistance by the Nationalists in the main amounted to no more than sniping although occasionally small bands put up desperate fights to avoid disarming and expulsion from the city by the Japanese.

According to Nationalist reports to this city the Japanese now have complete control not only of Tsinan but of the entire Shantung railway, and the south end of the bridge across the Yellow River, and the city of Kotien, located 15 miles east of Tsinan.

To Speed Mail Delivery

Cunard Steamship Line May Use Airplanes For This Purpose

Montreal.—To further speed up delivery of mail from the British Isles for Canada, it is understood that the Cunard Line in Liverpool have been considering a scheme whereby their ships to the St. Lawrence will each carry an aeroplane to be released when the Gulf of St. Lawrence is reached, the 'plane to take important mail either to Rimouski or to Quebec.

Officials here state they know nothing definite of the scheme yet, but say that it is quite feasible, as it is occasionally being carried out by ships on the New York service.

At present there is complete air mail chain from Rimouski to Toronto, operated by the postal department.

Wins In World Race

Jap Beats Competitor Who Was Held Up By Storms

Tokio.—Tsuchiro Araki, taking the Eastern route, won the Globe encircling race with his fellow countryman, Ryukichi Matsui, by his trip in 33 days, 16 hours and 26 minutes. The Western bound competitor, who is now on a liner crossing the Pacific ocean, missed his chance of winning the novel race when the steamer carrying him from England to New York was delayed by fog and storms.

A prize of $1,500 will be awarded Araki, while Matsui gets $500.

Amend Criminal Code

Ottawa.—The senate rejected the House of Commons bill amending section 98 of the criminal code by a vote of 32 to 22. This section makes it unlawful for any person or association to advocate the employment of force to bring about changes in the governmental, industrial or economic conditions of the country, and gives certain powers to public officers to deal with violations of the act.

Landslide In Colombia

Bogota, Colombia.—Ten persons were killed and many injured in a landslide at the Vende-Calzones mines, according to information from Rio Sucio. It is feared many more were buried alive and rescuers are endeavoring to reach the imprisoned men, the information said.

Start Flight To Tokio

Le Bourget, France.—Captain Pelletier D'Oisy, Captain Gonin and Mechanic Carol left aboard a commercial airplane for Bucharest, en route to Tokio. They will make many stops on the way including Asia Minor, Indo-China, China and Japan.

German As Official Language

Capetown, South Africa.—The Southwest assembly, by a vote of 9 to 8, passed a motion to amend the Southwest African constitution to make German one of the official languages.

CROP REPORT

Furnished by the Bank of Montreal

May 19th, 1928.

General—Seeding of wheat is proceeding rapidly throughout the Prairie Provinces, and with favourable conditions in every district the indications are that a larger area will be put under crop than last year. In Quebec field work is from 10 to 20 days behind the average of recent years, and is not yet general. The season is also about two weeks later in Ontario, seeding is well advanced in the western part of the Province, but in Eastern Ontario the land is still too wet to work. In the Maritime Provinces average weather conditions have prevailed, and some work on the land is under way. In British Columbia unusually cool and wet weather has made the season about three weeks late, but prospects now are favourable.

Prairie Provinces

Alberta—Soil conditions generally throughout the Province are satisfactory with sufficient moisture for germination. Indications are that the total acreage will be slightly increased. Seeding operations are general. Northeastern Area—Wheat seeding is 15 to 25 per cent completed under favourable conditions. Southeastern Area—Weather conditions are good, and 25 to 55 per cent of the wheat acreage has been seeded. Western Area—Wheat seeding is well advanced with 35 to 45 per cent finished. The sugar beet acreage will show little change, 80 per cent of the crop has been sown. Saskatchewan—Seeding started about a week later than the ten-year average, but work is being caught up under fine weather conditions. The acreage sown to wheat will probably be about 10 per cent more than last year. Seeding of coarse grains has not yet commenced. Northern Area—The soil is in excellent condition and wheat seeding is proceeding rapidly in ideal weather. Southern Area—Conditions are favourable, and wheat seeding on summer fallow is practically completed. Manitoba—Wheat seeding is proceeding earlier than last year, from 25 to 60 per cent has been completed in the north, and 65 to 100 per cent in the south. An increased acreage under crop is expected. The seeding of coarse grains is under way and conditions generally are favourable.

KINGMAN

Mrs. Agronovitch and Mrs. Jack Hardin spent a few days in Edmonton last week.

H. Sparby and Mohness spent the week-end in Banff.

Miss Lillian Lundberg visited in Edmonton over the week-end.

Mrs. E. Erickson and Mrs Tyrhog motored to Camrose on Saturday.

John Erickson and Simon Simonson spent the week-end with their parents here.

Mr. and Mrs. C. R. Blychert, Mr. and Mrs. T. Horte, Mr. and Mrs. H. Reiger, Mrs. R. Molvik, and Mrs. H. Haugen were the guests of Mr. and Mrs. J. Munson of Camrose on Sunday.

Mr. and Mrs. C. Erickson visited with Mr. and Mrs. C. Tyrhog on Sunday.

Sam Cinnamon motored to Edmonton on Friday to visit his mother who is sick at the Hospital.

A dance will be held in the Kingman Hall on Friday, May 25th. Everybody come and have a good time.

MIKE'S GARAGE

We specialize in Automotive Electricity. Ignition, Starting and Lighting Troubles Repaired Promptly. All work done by expert.

C. H. MEYER.

AIN'T NATURE WONDERFUL?

Once I was a pollywog beginning
to begin,
Then I was a froggie with a tail
tucked in,
Then I was a monkey up a banyan
tree,
Then I was a man with a big D. D.
A pollywog, a frog, a monkey and a
man;
Glory be to nature for her wondrous
plan. —The Shantyman.

"Is your poor husband gone?" ventured the minister, seeing an aged woman of the parish had put on heavy mourning.

"Oh, no, suh, he ain't dead."

"Why are you wearing black then?"

"Well, suh, the old man nagged an' bothered me so much that I've went into mournin' again fo' mah fust husband."

FLY-X-IT

FLY AND INSECT REPELLANT

FLY-X-IT is a non-injurious, non-mineral oil fly and insect repellant. Tested at Governmental Experimental stations and used by leading dairymen throughout the Pacific Northwest States and Western Canada, and awarded highest points of merit over all other sprays tested.

One application of FLY-X-IT keeps flies and mosquitoes and other insects off animals for from 36 to 72 hours continuously. This means a great saving in labor and material and continuous relief instead of for a few minutes.

MAIN STREET, TOFIELD

NEAR FIRE AT TOFIELD

GAS EXPLOSION IN DRUG STORE

By the narrowest of margins Tofield escaped a serious fire on Sunday morning, when at about 6:45 a.m. a gas explosion occurred in Dr. Law's office, which is located in the drug store.

The first person to know of the explosion was a young man by the name of Carl, who called Walter Bellamy across the street and told him that an explosion had occurred in the drug store.

Walter looked in the window and seeing the place in disorder immediately notified Mr. Beirnes who came down and together they opened the front door, but almost immediately left to get Mr. Imler, the Northwestern Utilities representative here. While Mr. Beirnes was away getting Mr. Imler, Mr. Bellamy went to the side of the building and through the glass door could see a small blaze in Dr. Law's office. By this time Mr. Imler and Mr. Beirnes were at the store and the gas was immediately turned off at the base. They then entered and extinguished the small blaze.

Fortunately there was no one on the premises at the time of the explosion, had there been, serious injuries, perhaps fatal, would have befell them.

The explosion, it is assumed, was caused by a gas leak, the ignition being caused by the gas lamp pilot. Its force was sufficient to force out the partition between Dr. Law's office and the drug store dispensary. The wall that was dislodged was the one on which the shelves containing all the bottles were located. Many bottles were broken, but practically all of them were on the floor.

It is nothing short of a miracle that the building did not burn down. Here and there were charred and scorched things, while other articles entirely escaped. If one of the outside windows had been broken, thereby letting in the air, there is no doubt but what the building would have ignited.

A curious feature of the explosion was that while it forced down a partition, it did not break the mantle on the lamp in Dr. Law's waiting room.

The damage has now been mostly repaired and the gas pipes thoroughly tested out.

PETE TO FLY AGAIN

The editor called upon Mr. Lerbekmo, recently, while he was working upon his new aeroplane.

His workshop, which is in the rear of the Queen's hotel building, presents quite an appearance of zeal and industry. Pete, while not exactly making the 'plane, has gone over every individual part to see that it is first class in every particular. The wood work has all been scraped and varnished and new cotton put on the wings. This is a particularly hard job. After the cotton is put on, it must have several coats of preparation and the wings are of no small size.

An entirely new engine has been installed, and everything possible done to make the ship thoroughly airworthy. All of this work, Mr. Lerbekmo has done himself during the winter and early spring months.

Just when he would be ready to fly, he did not say, but judging by the progress he has made, it will not now be long. In company with his many well wishers in the Tofield district, the Mercury wishes him good fortune.

TOFIELD GARAGE INSTALLS NEW VALVE GRINDER

In addition to other new equipment, the Tofield Garage, under the management of Mr. P. M. Haugen, has recently installed a new and up-to-date electrical valve grinding machine. The machine, which works electrically, will grind valves in a few minutes, the result being the equal of a new valve. Should the valve seat need grinding, there is an attachment that will do this work also.

The garage has also just recently added another electric light plant and a new electric sign.

KINGMAN

C. F. Seelund was a business visitor in Edmonton last week.

Mrs. C. R. Blychert who has been taking massage treatments for the last five weeks is much improved.

Mr. Nix, the superintendent of the United Grain Growers was a visitor in town on Friday.

T. W. Olson motored to Edmonton on Sunday where he has received a position as a plumber.

Mr. and Mrs. T. Horte and family and Mrs. H. Haugen motored to Edmonton on Saturday.

Mr. and Mrs. T. J. Regness and family and Mr. and Mrs. Haleeth visited in Banff on Sunday.

Mr. and Mrs. Sam Simovitch of Round Hill visited with Mr. and Mrs. Hardinson on Sunday.

Mr. and Mrs. John Anderson and Hjalmer Hanson and Mr. Charnberg visited with Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. C. Tyrhog and daughter spent the week end with Mr. and Mrs. K. Tollifson.

Mrs. Blychert and Mrs. Ovelson were afternoon guests of Mrs. E. Erickson on Friday.

W. Jardie who is farming Theo. Madeson's land, one mile east of town, reports some of his wheat five inches high. In fact the crop prospects in the district are very bright, and many fields of wheat are well above ground.

Ole Bjorgum, a progressive farmer, has sown four hundred acres of wheat this spring.

Mr. and Mrs. Martin Bjorgum and family visited with Mr. Soma on Sunday.

Don't miss the dance in the Kingman hall on Friday, May 25th.

Mr. and Mrs. Hans Simonson and Mr. and Mrs. Y. Haugen of Edmonton, were visitors at the Ovelson home on Sunday.

LOCAL and PERSONAL

Among visitors to the City this week were Mrs. Griswold, Mrs. Scott, Miss Lorett Ross, Mr. and Mrs. Lamont.

Mrs. Firth and Mrs. McCauley attended a church convention held in Edmonton on Tuesday and Wednesday.

Mrs. W. A. Ross, of Oakland (nee Miss Irene McIntosh) spent Wednesday with Miss Lucille Gray after spending the winter with her parents at Biggar, Sask. Mrs. Ross is enroute to Oakland.

Miss Hilda Nomeland, now of New Norway spent the 24th at home.

Mr. and Mrs. McLaughlin and family spent Sunday in the city.

Mr and Mrs. Constantine left for Toronto on Friday of last week for a contemplated stay of two or three weeks. Mr. Constantine received word of the illness of his mother.

Don't forget the summer half holiday commences next week. All Tofield business places will be closed at one p.m. on Wednesdays.

LINDBROOK

Everyone is busy these days here getting the crops in, seeing to innumerable chickens and turkeys, calves, piglets, etc., so real news is scarce, although the chief subject here now is, rain. The ground could do with it and it would cool the air and lay the dust which has been particularly irksome this last week on the men in the fields.

We of the Lindbrook district wish our friend, Geo. Weatherill the best of luck in his new venture altho we hate to lose him.

A steam crane has been working at Lindbrook this last week unloading rails for the new mile of passing track to be installed here this summer; the ties are here and a steam shovel is supposed to come to cut the banks down to make the fill. The double crossing is already laid and an extra gang is expected soon to work on the rest of it.

KETCHAMOOT

Wheat fields are showing green;
Plowing for oats is well under way,
Extreme heat for the month of May;
So a nice cool shower would be welcome to-day.

Rev. Gordon and Mr. Leslie, a ministerial student, exchanged pulpits on Sunday, Mr. Leslie taking charge of our service.

There will be no preaching service next Sunday owing to it being conference Sunday. Sunday school will be held at the regular hour, 2:00 p.m.

Mrs. Joe Sutton is a patient in an Edmonton hospital, not Camrose, as was announced in last week's news.

Ketchamoot friends of the Ingram family who formerly resided in the Woodlawn district, were shocked to hear of the death of Wm. Ingram, eldest son of the late Mary Ingram, who passed away on Sunday at Chilliwack, B.C. The body will be shipped to Tofield for burial. As yet, nothing definite has been heard of the funeral arrangements, but it is thought that the funeral will be held on Wednesday or Thursday.

Mr. and Mrs. Percy Sutton and little daughter, Miss Alice Simmonson and Mr. Tom Welch left on Thursday by motor for Portland, Oregon, where they will visit friends and relatives for the summer.

Mr. and Mrs. Wilson Sen., Mr. and Mrs. Earl Wilson of Lindbrook visited at the McMullen home after services on Sunday.

Mr. L. Carlisle and Mrs. O. Barnes motored to Camrose on Sunday. Mrs. Hull was able to accompany them home and stood the trip very well.

Mr. and Mrs. Forvil Brooke are residing at the Percy Sutton home in the absence of Mr. and Mrs. Sutton.

Mr. and Mrs. McGinitie and fam-

Mountains Splendor Open to Motorists

Upper right—The scene of the first venture of the Kicking Horse Bus [illegible]. Lower right—Every curve of the road reveals greater beauty such as the undisturbed magnificence of the [illegible] Lake. Upper left—The highway is fringed with thick woods as shown in this scene, looking towards Castle Mountain.

A new 24-hour motor detour of 142 miles along perfect motor roads through the Canadian Rockies is announced by the Canadian Pacific Railway, which states that the trips will run every day in each direction from either Banff, Alta., or Golden, B.C., beginning on June 15 and ending on September 1. By this detour a traveller can leave the train either at Banff or Golden, stay the night at Lake Louise, and continue the motor drive next morning, rejoining the train that afternoon.

This new motor road, built by the Canadian Government through Rocky Mountains National Park and Yoho National Park, is a very magnificent one. At one point it rises to a height over a mile above sea level, while at the highest point it is nearly three-quarters of a mile higher than at its lowest level. Nearly forty mountains tower in the vicinity of the road, and gigantic glaciers, roaring rivers, deep canyons and primeval forests abound. Wild mountain game are also met with in abundance at the roadside.

Motoring in the Canadian Rockies is the tourist's keenest delight, more especially after a railway journey. For this reason a schedule has been drawn up for the season of 1928, to coincide with the arrival and departure of trains at Banff, Field or Golden.

The large touring cars used for this trip are commodious and comfortable, with facilities for hand-baggage. Johnston's Canyon, 16 miles from Banff, is the first stop made going west. Here the creek cuts through high rock walls and is spanned at intervals by tiny rustic bridges, reminders of Japanese prints. The canyon is deep and cool, and the walk of 20 minutes is delightful.

Lovers of nature should rise early at Lake Louise to see the coloring on this gem of mountain lakes, for the glaciers and high peaks are diffused with superb shades of rose and gold. A beautiful spot on this trip is Wapta Bungalow Camp, a veritable village of camps nestling on the shore of Wapta Lake—the source of the Kicking Horse River.

The Yoho Valley is beautiful beyond imagination, a virgin country unscarred by fires. Takakkaw Falls are at the end of the valley and come tumbling down in a lacy pattern almost 1,300 feet. The Yoho Camp is a few hundred yards away. Emerald Lake, seven miles from Field, is a vision of sylvan loveliness, and a Swiss chalet adds to its attractiveness.

From Field to Golden the highway follows the Kicking Horse River most of the way and the scenery is spectacular, the road hugging the mountain-side, with the river 700 feet below.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Hall Caine, novelist and dramatist, Greeba Castle, Isle of Man, celebrated his 75th birthday recently.

Tin has been discovered in Northern Manitoba according to a wire received by Premier J. Bracken from a prospector named [illegible] Lacker, of The Pas, Man.

The House of Lords unanimously adopted a resolution presented by Lord Reading that the proposals for the outlawry of war presented by the U.S. should have prompt and favorable consideration.

Sir Frederick Stupart, director of the meteorological service of Canada, and of the Toronto Observatory, will retire at the end of the year. He had been connected with the service for more than 55 years.

Scandinavians who last year visited Canada and returned to their own country for the winter months are now returning in large numbers to take up land in Northern Saskatchewan, officials of the Canadian colonization department announce.

New York newspapers say that a new national transportation system using both aeroplanes and railway trains which it is hoped will eventually link New York and the Pacific Coast on a 48 to 52 hour schedule, is being planned.

Over $300,000,000 has been paid out by Canadian mines in dividends and bonuses up to the end of 1926. To this British Columbia mines contributed $60,575,646; Ontario silver mines $96,239,852; Ontario gold mines $40,546,634, and nickel mines $94,723,452.

Cheques amounting to over $18,000 have been distributed among beet growers of southern Alberta by the Canadian Sugar Factories Limited. This represents an additional payment of 50 cents a ton for 1927 beets, bringing the total amount paid for last year's deliveries up to $7 per ton.

Pays Smallest Income Tax

The smallest income tax payment in Canada is believed to have been remitted by a taxpayer in Toronto whose tax totalled two cents according to officials of the Federal income tax department. His taxable income was less than $1 and he paid it with a two-cent postage stamp.

Will Open Marble Quarry

Marble found near the Hudson Bay railway north of The Pas is being investigated by a group of Winnipeg men with a view of opening a quarry.

Harry Buss's Back bothered him for over 17 years

Then Gin Pills relieved his pain

Harry H. Buss of Egmont, B.C., suffered from a lame back for over 17 years. Every spring he was laid up from work. He tried many remedies, but could not obtain relief. He was advised to try Gin Pills and immediately obtained relief. Read his letter:

"There is nothing to compare with [illegible]"

Pains in the back, constant headaches, swollen joints, painful urination, murky urine, brick dust deposits, scanty or too frequent voiding of urine are all symptoms of kidney trouble. Relieve your suffering and ensure a future free from kidney ailments. Get a box of Gin Pills today. 50c at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

We reached Plymouth in the early morning, while it was yet dark. How strange to find our ship suddenly still after days and nights of throbbing movement. How eager we were to get ashore to feel our feet at last on English soil.

Our itinerary promised us great things, but who would have imagined an official reception at the hour of 7 a.m. We were scarcely ashore when we found ourselves greeted by the Mayor of Plymouth (Councillor W. H. J. Priest) who warmly bade us welcome to Plymouth and England, awakening that sense of kinship which we were to feel more and more deeply every day of the tour.

Here also we made the acquaintance of Mr. E. A. Weir, organizer of the programme and itinerary, and Mr. D. M. Johnson, European Colonization Manager of the Canadian National Railways, London. Our programme told us that we were to have landed at Liverpool, but circumstances had ordained that we should have the pleasure not only of seeing the historic town of Plymouth, but of travelling through some of the most beautiful countryside that the west of England can boast.

We were taken to Plymouth Hoe. We were shown where Drake finished his game of bowls before going to fight the Spanish Armada. We saw the spot where the Plymouth Father's embarked, and the ladies of our party were taken for a private motor tour over the moors of Devon.

We could have had no better introduction to the beauties of the Old Country than our trip from Plymouth to Liverpool, for it took us through [illegible] Somerset, Monmouth, by way of the Severn Tunnel, Hereford, Shropshire and Cheshire, unfolding before us a complete panorama of English life with rolling lands, quiet towns and villages, bustling industrial cities, and it was fascinating to us as Canadian farmers to note the different breeds of animals that were seen in the fields as we passed into the counties famous for them; they also marked the boundaries! Although it was January, men in many parts were working in the fields preparing the land for spring.

Liverpool was reached in the evening where we found our hotel one of the finest in Europe, with steam heat and running water in every bedroom. Here Mr. Weir explained the objects of our tour and presented each of us with a volume containing much information on markets and descriptions of most of the places we were to visit. The next morning, sharp at nine, in bright sunshine and a crisp air we were on our way to the extensive dock system of the Port of Liverpool, through which passes a third of the ocean-going traffic of the United Kingdom. The docks extend for 7 miles, and our visit was to the most recent addition, the Gladstone Docks, which were opened last year by His Majesty the King. The Gladstone Graving Dock which forms part of it, the largest dry dock in Europe, can accommodate the biggest ocean liner. We were shown through one of the three-storey warehouses of this dock whose combined warehouse provides 60 acres of storage space. Even the roofs accommodate goods in times of emergency and from one of them we obtained a view of the whole Gladstone Docks system. Hundreds of cranes, ships upon ships, and piles of merchandise gave us a vivid impression of the important part that Liverpool plays in the everyday commercial life of Great Britain. One vessel alone was unloading 8,000 carcases of frozen Australian mutton, yet this we were told was considered a very small shipment. The previous ship from Australia had brought five times as much in addition to other cargo.

The docks of the Port of Liverpool are under the jurisdiction of the Mersey Docks and Harbour Board, and during our inspection of the Gladstone Docks, we were the guests of this organization.

The great tobacco warehouse was next visited, where we saw storage space for 70,000 hogsheads of tobacco each valued at about $2,500, the value of the tobacco in store at the time of our visit being more than one-third of the total value of Canada's wheat crop last year, and we noted with pleasure a large quantity of Canadian tobacco. Outside the building is an incinerator, known as the "King's pipe" where all condemned and spoilt tobacco is destroyed.

We were now taken to the Liverpool Corn Exchange where we saw a spot market and were able to examine the different kinds of grain that come to the British market from other countries. We also visited the main trading hall where British grain dealers gather for direct trading, and completely equipped laboratory for the grading of grains. Before leaving we were addressed by H. G. Harker, the President of the Exchange, who in an informative talk told us that one-fifth of the wheat imported through the port of Liverpool was Canadian and one half of that was absorbed by the mills of the Liverpool area.

After lunch we paid a flying visit to the extensive cattle lairages at Birkenhead, across the river, where fat and store cattle are received, now mostly from Ireland, the supply of Canadian cattle being practically nil. On our return to Liverpool we had the rare and delightful experience of a reception by Liverpool's Lord Mayor, Miss Margaret Beavan.

(To Be Continued.)

Dense Population

Belgium has the greatest population to the square mile of any European country. The ratio is 636. Great Britain has 391 inhabitants to the square mile. In Germany there are 348, and in France 187.

Her Color Went Black. She Was Frightened To Death

Mrs. Watts, New Brighton, writes: "That deadly indigestion and gastritis caused by constipation made my color go black. I was frightened to death, and I feel your laxative saved my life. I take them every night now for precaution, and do not fear an attack of constipation poisoning any more."

NEWEST MOTOR VEHICLE

Motorized Baby Carriage Now Being Used In London

The modern world has become accustomed to the idea of motorized industries. Almost everything in the household is now operated by motors—sewing machines, washing machines, dish-washing machines, sweepers operated on the vacuum principle, electric cooking utensils of all kinds, from toasters to coffee percolators, electric foot-warmers, hair curlers and almost countless assortment of other things, all mechanical, operated either by steam or electricity.

But the motorization has affected even the toys of childhood. There are now electric kiddie cars. They were on exhibit recently at the British Industries Show in London. Tiny motor-cycles for children were shown. The wheel chair upon which valetudinarians at spas were propelled down the boardwalk by servants has now been replaced by gasoline engine wheel chairs operated almost like taxicabs.

The most interesting of the exhibits however was a line of motorized baby carriages. They ranged from flivver baby carriages purchasable for about $100 to the equivalent of Rolls-Royce baby carriages, costing a thousand dollars, and in some special models considerably more. The de luxe models are splendid specimens, in miniature, of the carriage-maker's art, with a single-wheel motor attachment in front. They are already in use, and it is not an uncommon sight in the London parks to see neatly uniformed nurse girls driving babies in the motorized carriages. The speed limit to the carriages is automatically limited to five miles an hour, and the average speed is three miles an hour.

Nurse girls are required to pass a test before they are given licenses to drive the motorized baby carriages. Special traffic regulations will undoubtedly have to be passed, governing the speed and right-of-way regulations as applied to such conveyances, and undoubtedly filling stations to supply petrol and oil for the "pramobiles" will make their appearance in the malls and parks to cater to the new type of vehicle.

Crow and Gopher Campaign

Manitoba Department Of Agriculture Offers Prizes Totalling $1,000

The Manitoba Department of Agriculture announces a campaign against crows and gophers in which prizes are offered for the persons sending in the greatest number of legs, eggs and tails to the Chief Game Commissioner. For each gopher tail one point will be reckoned, for each crow's egg two points and for each crow leg four points. The first prize is $100 and minor prizes will bring the whole amount to $1,000.

Eggs must all be taken and gophers and crows all killed not later than September 1, 1928, and within the province of Manitoba.

He: We've knocked a man down. Aren't you going to stop?

She: Oh, that's all right. We'll read about it in the papers.

Canadian Game Animals For New Zealand

Pair Of Rocky Mountain Sheep and Pair Of Beaver Shipped To Auckland

One of the happy results of the wild life conservation policy carried out in our national parks by the Department of the Interior is that Canada is now in a position to assist conservationists of other lands. At various times in recent years donations of wild animals have been shipped to points in the United States and other countries.

Recently one pair of beaver and one pair of Rocky Mountain sheep were shipped from Vancouver to the city of Auckland, New Zealand. The beaver were taken in Jasper national park, while the sheep are from the rapidly increasing wild herd in Rocky Mountains National Park.

Every precaution was taken to see that the animals reached their destination in good condition, and on arrival at Auckland they were placed in the Zoological Gardens of that city.

Winnipeg Newspaper Union Fashions

Neat, Slender and Smart

An individual style at a moderate cost. Graceful fulness is added by pressed plaits at either side of skirt. Tucks at shoulders are decorative. Deep V at front gives vertical line. NEW WHITE STAR LINER LAURENTIC

The new White Star liner "Laurentic," 19,000 tons, completed late in 1927, especially for the St. Lawrence route, which arrived in Montreal on May 8, on her maiden voyage to St. Lawrence ports. With the White Star liner "Albertic" she shares the honor of being the largest cabin liner ever to come up the St. Lawrence to Montreal.

SUNDAY SCHOOL LESSON

MAY 27

THE WICKED HUSBANDMEN

Golden Text: "Jehovah knoweth the way of the righteous. But the way of the wicked shall perish."—Psalm 1.6.

Lesson. Mark 12.1-12, 13.1-37.

Devotional Reading: Psalm 1.

Explanations and Comments

The Parable Of the Wicked Husbandmen, verses 1-8. This is the parable which Jesus spake to the Pharisees. A man planted a vineyard and provided it with all things necessary for the making of wine, protected it with a hedge and watch tower and dug a pit for the winepress. Recall the question of the owner in Isaiah's "Song of the vineyard": "What could have been done more?" This Song was well known to the enemies of Jesus, and when Jesus began in this way they undoubtedly recalled it and its direct condemnation of the leaders of the people of Isaiah's time, and knew that Jesus was about to utter a condemnation of themselves.

Then the lord of the vineyard let it to husbandmen and went away. (Possibly it may be necessary to explain to [illegible] that the husbandmen [illegible] the farmers. One pupil when asked the meaning of the word said they were the married men.) When the season of fruits came round he sent [illegible] servant after another to collect what was due to him, but the husbandmen beat one, badly treated another, killed a third, in like manner they treated yet other servants whom he sent. "Which of the prophets did not your fathers persecute?" Stephen cried to the mob which soon stoned him, "and they killed them that showed before of the coming of the Righteous One." "Jesus treats the whole long series of violent rejections as the acts of the same husbandmen. The class or nation was one, as a stream is one, though all its particles are different, and the Pharisees and scribes were the living embodiment of the spirit which animated all the past."—Alexander Maclaren.

"The terrible moments of evil in that it ever tends to reproduce itself in aggravated forms. Think of the influence of habit, the searing of conscience, so that we become able to do things that we would have shrunk from at an earlier stage. Remember how impunity leads to greater sin. [illegible] here the first servant is merely sent away empty, the second is wounded, the third is killed. All evil is an inclined plane, a steady, downward progress."

Asking For Federal Grant

Manitoba Applying For $300,000 Standing To Credit Of Province

Application will be made by the Manitoba government for $300,000 which is approximately the sum that stands at the credit of the province in connection with the grants made by the Dominion government to the provinces nine years ago for technical education, Hon. R. A. Hoey, minister of education, Manitoba, has announced.

Because of the industrial depression that prevailed at the time the grant was first made Manitoba was not able to take full advantage of it, but conditions have changed now, Mr. Hoey added, and the need for technical instruction, with the industrial development occurring now, was more apparent than ever.

Organize Construction Department

Saskatchewan Wheat Pool Will Supervise Building Of Elevators

A new Construction Department has recently been organized by Saskatchewan Pool Elevators Limited, which will supervise the construction and acquisition of the Pool elevators included in the 1928 building programme as well as the maintenance of the elevators at present existing in the system. The department comprises an engineer, two superintendents and eight foremen in charge of the various districts. Each superintendent is in charge of a division and each division has four districts with a repair foreman for each.

Dutch Immigration

Manitoba Deputy Minister Of Agriculture Going To Holland On Mission

J. H. Evans, deputy minister of agriculture in the Manitoba Government, is leaving for Holland at the invitation of a Dutch emigration organization which is investigating settlement conditions in Manitoba and Western Canada generally.

With L. A. Gibson, head of the dairy branch of the provincial department of agriculture, Mr. Evans will also represent Manitoba at the world's dairy congress to be held in London around the end of June.

New Chemical Discovery

Furfural a Powerful Solvent Made From Oat Hulls

Sit down at the breakfast table, eat your porridge, glance at a magazine and look at your watch to see if you can walk to the 8.15.

Do you realize that oats furnished the breakfast and helped make the watch and the magazine? asks the New York Herald-Tribune. Moreover, oats may have helped to make your motor car tires, to color your hose and to keep healthy a wounded tree. And that's only a part. What's the answer? Furfural, which is a product of oats and which was one of the hundreds of things tucked away in the booths of the recent chemical exposition that justified the slogan over the New York headquarters of the American Chemical Society: "Chemistry Creates New Competition."

Furfural has a picturesque story. It is a powerful and effective solvent, which can be made from many waste products of the farm. Corn cobs are an excellent source, but, unfortunately, corn cobs are scattered over many farms and the task of bringing them together in one place is expensive.

Oats are another problem. The makers of a brand of oatmeal used to have on their hands some tons of oat hulls every day, which were useful only for fuel, and not very good fuel at that. So the consulting chemist of the company decided that what could be done with corn cobs could be done with oat hulls; furfural in commercial quantities resulted.

That Stomach of Yours!

London, Ont.—"I was in a general rundown state of health. I had indigestion and my stomach was weak and so sore I could not bear to touch it. I got where I did not have any health at all, was not able to follow my usual line of work. I saw Dr. Pierce's Golden Medical Discovery recommended for stomach trouble so I decided to try it and it relieved me of my indigestion and weak stomach and built me up in health. I can highly recommend the 'Discovery' to anyone who suffers as I did. It is excellent."—Francis Henry Cook, 471 Elizabeth St.

All dealers. Extra large bottles, liquid $1.35. Tablets $1.35 and 65c.

Write Dr. Pierce's Invalids Hotel, Buffalo, N. Y., for free advice.

Trade With China

American tourist business in China is having a far-reaching effect upon the dairy industry of British Columbia. The American tourist has carried to the Orient his well known appetite for ice cream and to meet his demand, ice cream is being shipped to Shanghai from Vancouver. There is also growing Oriental demand for Canadian fruits, butter, beef and bacon.

Men who speak before they think have occasion to offer many apologies.

WAS VERY WEAK
NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very badly with my heart and nerves, the cause of it, I think, was my going through the change of life.

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well.

"I was advised to try

MILBURN'S HEART & NERVE PILLS

so I sent at once for a box; took them and got another, and before they were all gone I felt good, my nerves are fine, I [illegible] not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

OGDEN'S CUT PLUG

Soothing—yet a man's smoke

COOL AND FRAGRANT

Save the Valuable "POKER HANDS"

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XXIV. Continued.

Then he exalted war and military life. It developed the best in a man, and at this the Major beat his breast, directing his audience to that storehouse of accumulated virtues. Then he appealed to the young men to "get into the game." He painted the glory of it, the freedom of it; the army was the place where a man was a man. The nation's hero was the warrior; mollycoddles have no place in the world, especially with women. There was truth in the old song yet:

"If a lad a lass would marry
He must learn a gun to carry."

Then in a lighter vein the gallant Major hinted at the charm of the French girls and how they admired the Canadians. His manner indicated that but for the presence of the ladies he could tell more.

While he was speaking, Pte. Crowe's hands were never still, nor did his lips cease from trembling.

The Major then called for recruits. "One volunteer," he said, "is better than ten conscripts. Conscription is coming, though"—he glanced over this—"we cannot desert our Army now. If men will not fight of their own accord, there are other methods." The Major unconsciously tapped his sword.

Suddenly it became apparent, even to the Major, that the spirit had gone out of the meeting. His audience sat stony-faced and rigid; the fires had gone out; the current was off. There was no response to his call.

The appeal had not gone home to the men of the north, who love the long trail, with its camp-fires and its peace; brave men, who do their duty from an inward sense, but to whom the thought of force brings not fear but rebellion.

The chairman tried to save the situation by calling for a song, but something had gone from the meeting. The people began to straggle out.

As Jack made his way back to the hotel he was deeply disturbed in mind. There was no moon, but the night was bright with stars. Looking up, he saw the North Star, like an old friend, looking so remote, serene and undismayed, though nations were rocking with war and hatred. The Major and his fiery eloquence were easy to turn aside, but Pte. Crowe, so pale and shaken, quivering with the horror of war, walked beside him in spirit.

The hotel that night sounded with jangling noise, shrill voices, snatches of song, bursts of harsh laughter. The Major was a prince of story-tellers. "Say, boys, did you hear this one? One of the boys who had been on leave ..." Roars of laughter followed, then more beer. "Too much hard liquor is bad," laughed the Major, "but too much beer is just right. No danger of being pinched for being noisy—we have both the proprietor and the policeman. Now, listen to this. There was a French girl ..."

At one o'clock the party broke up. The Major had secured six names. He decided the next morning to let Private Crowe go back to the City. The kid was all right, but he lacked "pep." This was a job for a real he-man, and after all, the best little recruiter apart from himself, if it ever could be considered from himself, was the amber-colored bottle. It gave just the proper warmth and glow.

Jack made his journey around by Edmonton to Eagle Mines, arriving there on the first day of February. There had been no reply to his wire. He stepped off the train with a strangely beating heart. Helmi would be there, surely, but the platform was almost bare. Not a person whom he knew did he see as he hurried across the street and over to his own house.

The door was not locked, and he went in. A strange scene met his eyes—dirty dishes on the table, the remains of a slovenly meal, ashes from cigars on the plates; the bed showing that it had been slept in, the coffee pot was on the stove. The floor had been tramped by muddy feet and spat [illegible] by tobacco chewers, and a forgotten pipe was on the window-sill. The air was heavy with tobacco smoke and the stale fumes of beer.

Jack's heart was heavy with apprehension. He went up to the loft by the ladder on the wall. The bed there had been used too, and a man's coat was thrown across it. There it was, [illegible] house he had built, defaced, defiled. What did it mean? He would know what it meant, he would go over to the boarding-house.

Mrs. McMann, a few minutes later related the interview to her friend Mrs. Turner. "He bounded in at me," she said, "just when I was puttin the potatoes on to boil. 'Where's Helmi?' he almost shouted at me without even biddin' me the time of day. How could I tell him where Helmi was? 'She's not here,' I said, 'and I don't know where she is—she's been gone over a month,' I says. 'Where did she go?' he said. 'To Edmonton,' I said.

"'Why did she go?' he stormed. 'Didn't she know I was coming back! Where did she say she was going?' 'Well, Helmy never confided in me, as you know,' I said.

"Land! I couldn't tell him why she went. I never was one that could talk about those things. I don't believe any of my people could. The Weekses were funny that way.

"'Where's Sim?' he said at [illegible], staring at me as if he didn't see me. 'Sim had an accident in the mine and went out the last train.' 'Well, look here, Mrs. McMann, who has been stayin' in my house?' he says, 'can you tell me that?'

"'I know very well a party of hunters had spent the night there—swells from town out deer shootin'; drunk as fools, too. I wouldn't let them in.

"'I certainly have no knowledge of what's been goin' on in your house since you've gone,' I said, very stiff. Mr. McMann always said there was no one could be stiffer than I could when I wanted to be. 'Do you know of anyone having stayed there?' he said. 'Yes,' I says, 'the crazy Englishman from English Creek was there for a week, about six weeks ago.'

"Lord, I thought he was goin' to strike me, but none of the Weekses was ever cowards, so I just glared back at him stiff as pork. I could give him eye for eye, let me tell you. He went out at that and over the the office. I think maybe he expected a letter from Helmy, but if she's written to him it's more than she's done for any of us. Gone over a month and not a word from her. And I was good to that girl, though I ain't the one to tell what I've done for anyone. Now, if Jack Doran had come in a better spirit he might have heard more from me. I'm funny that way, anyone can lead me, but strong horses can't drive me."

Jack Doran went to the postoffice. His voice sounded queer to him, and his tongue felt like a piece of rope. "Are there any letters for me, Mr. Armstrong?" he asked, hoping his voice was not beating like his heart.

"Two have just come for Mrs. Doran," said the postmaster, handing them to him. "Glad to see you back to us again, Jack. People come and go at Eagle Mines—come and go—it makes it hard for a postmaster."

Jack went back to his own house—he must get under cover—the eyes of the people he met hurt him—they bored into him, twisting, [illegible] screwing, gouging, red-hot and sharp as ice. He must get somewhere where he could shut the door.

In his own house, Jack sat with the letters in his hand. Helmi had gone, she had not waited. He was a month late, but Helmi should have waited. Where had she gone?

The letters might tell him—it would be better to know. He opened the first one and found it contained a Government cheque for fifteen dollars payable to Helmi Doran, and it said it was on account of Pte. Arthur Warner. Jack stared at it without understanding.

The other letter was from Montreal. "Dear Helmi," it said, "I have made over my separation allowance to you, and I hope you will accept it from me. You are the only person in Canada who has any claim on me. I have paid every other person in Canada for everything they have ever done for me. You, dear Helmi, I can never pay in money, for you gave me the most precious thing a man can have who goes out as I am going, a memory of something tender and sweet. I have made my will, leaving everything I have to you. I will never forget your last words to me. Nobody ever spoke to me like that before. Will you write to me, Helmi?

Ever Yours,
Arthur Warner."

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Jap Flier Was Ambitious

Not satisfied with his first record for night flying, Captain Toshio Kato of the Japan aviation school at Tokyo, immediately flew again and established a new record. He hopped off at 8.30 o'clock in the evening and broke by 23 minutes his previous record of six hours in the night air. He immediately flew again and remained up until 9.25 o'clock in the morning, beating his previous record of the night by three hours. Most of his flying was in dense fog.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

The time to take care of the coming years is this year.

Love and potatoes must be akin—they both spring from the eyes.

CUTICURA HEALS LARGE PIMPLES

Caused Itching Burning, Also Disfigurement.

"My complexion was completely marred by pimples which varied in size. Some were large, hard and scaly, while others were just red and festered. They caused an itching, burning sensation, also disfigurement.

"After using scores of remedies for over two years, with but little results, I sent for a free sample of Cuticura Soap and Ointment. I was so pleased with the results that I purchased more, and after using two cakes of Cuticura Soap and one large box of Cuticura Ointment I was completely healed." (Signed) W. E. Blackburn, 30 Bellevue Ave., Toronto, Ont.

Use Cuticura to clear your skin.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

WHY "NEW TEETH FOR OLD"?

Perhaps you were wondering why little sonny had to lose his "baby" teeth and have them replaced with new ones.

Why, you asked yourself, do they not remain permanently and develop in size during the growing years just as do the ears and eyes?

"Because they become decayed" you say, but not necessarily so since tooth decay is a disease and is therefore abnormal and preventable, and for that matter, when you lose a tooth through decay at six and twenty, does a new tooth replace it?

But consider. You have seen a little sapling grow to be a big tree—"large oaks from little acorns grow"—but did you ever hear tell of a small pebble growing to become a large stone? Not likely so, and for obvious reasons for, as you know, the tree is of organic matter, while the stone is of inorganic.

Now the tooth, being composed largely of inorganic matter, especially the outer enamel covering, which is almost wholly so, like the pebble cannot of itself change in form, and so grow larger once it is fully developed.

Obviously too, sonny's little jaw has no room for the larger teeth that he will need when he is fully grown.

So unlike the potatoes that "from little ones do big ones grow" we have instead, "new teeth for old."

These baby teeth then serve temporarily for mastication until [illegible] maxillary or jaw bones are sufficiently developed to accommodate [illegible] larger permanent teeth of adult age.

They are another Nature's expedient, as it were, and a good expedient too, if given half a chance.

Little Helps For This Week

"Inasmuch as ye did it not to one of the least of these, ye did it not to me."—Matthew xxv. 45.

Living thou dost not live
If mercy's spring run dry,
What Heaven has lent thee wilt thou
freely give
Dying thou shalt not die.
He promised even so:
To thee His lips repeat,
Behold, the tears that soothed thy
sister's woe
Have washed thy Master's feet.
Oliver Wendell Holmes

The final test of religion at that last day is not religiousness, but love; not what I have done, not what I have believed, but how I have discharged the common charities of life. By what we have not done—by sins of omission—we are judged. It could not be otherwise. For the withholding of love is the negation of the spirit of Christ, the proof that we never knew Him, that for us He lived in vain.

Henry Drummond.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

Recipes For This Week

(By Betty Barclay)

CREAM OF ASPARAGUS SOUP

Wash each stalk of asparagus carefully with a vegetable brush to remove all grit. Then cut [illegible] pieces using all but the very tough parts. Cook, covered, until the asparagus is tender, in enough water to cover. Add salt to taste just before the asparagus is done. Allow two cups cooked asparagus and cooking water to 2 cups medium cream sauce (2 cups milk, 4 tablespoons flour, 4 tablespoons butter). Season and serve [illegible].

Note. The less tender part may be cooked longer and put through a sieve. If desired, the tops may be used for salad.

FRUIT BLISS

- 2-3 cup sugar
- 1-3 cup water
- 2 egg yolks
- 4 tablespoons lemon juice
- Red color paste
- 2 cups fruit.

Boil sugar and water five minutes. Pour over egg yolks, cook over hot water until thick, stirring constantly. Add lemon juice and red color paste and chill. Pour over fruit, using peaches, oranges, red cherries and strawberries cut in pieces. Serve very cold. Serves 6.

Enlisting Their Sympathy

Counsel for the victim of a motoring accident: "Gentlemen of the jury, the driver of the car states he was going only four miles an hour. Think of it! Think of the agony of my client, the victim, as the car drove over his body at four miles an hour!"

"I see you are getting all the girls off your hands."

"Yes, but the worst of it is I have to keep their husbands on their feet."

Neuralgia succumbs to Minard's Liniment.

THERE is nothing quite equal to Aspirin for all sorts of aches and pains, but be sure it is Aspirin. The name Bayer should appear on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it:

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. [illegible]

Salt Essential To Health

Is One Of the Four Prime Necessities Of Life

Salt is necessary to life and health. Deprived of salt, disease and ultimate death would follow. In certain parts of the world where salt is scarce salt is used in lieu of cash in trade and barter. Salt ranks with water, bread, sleep as one of the four prime necessities of life. A medical man stated recently that the chronic ill-health of many people is due to their under-consumption of salt; they take too little in condiment form and even less in vegetables, such as cabbages which contain valuable salts.

Look at your salt-cellar. Each white grain of glistening salt is a perfect crystal. In a tiny pinch there are thousands. They will pass to every part of your body—blood, brain tissue, and bones—and do their health-keeping work.

Wrong Idea Of Sin

More should be written about the pleasures of virtue. The old theology gave the impression that sin is delightful and that those who forego it give up what is most thrilling in life.—American Magazine.

Minard's Liniment for Toothache.

"Let's look at this budget sensibly John."

"But you can't save money even on paper."

"But I do. I got fifteen sheets of paper for 10 cents today."

Why Firestone Tires Give Most Miles Per Dollar

The greatest enemy to tire life is not the harsh grind of city streets or rough roads, but heat which is created inside the tire by internal friction. Heat not only weakens the fabric, but also softens the rubber, causing blowouts and tire failures.

The above illustration shows a single cord of a Firestone tire greatly magnified and untwisted into fifteen smaller cords composed of many little fibres.

By means of the exclusive Firestone Gum-Dipping process, every fibre is insulated with rubber, which prevents internal heat and friction.

Your local Firestone Dealer gives you the better service that goes with these better tires. See him today.

BEAUTIFYING THE SCHOOL GROUNDS

THE MEMBERS of the Tofield Women's Institute are working upon an admirable task, that of beautifying the school grounds. Most Western schools are bare and ugly, seemingly typifying the discipline carried on therein. Consequently it will be a real pleasure to have the Tofield school grounds a beauty spot, rather than a bare and barren place. The task the ladies have undertaken is no easy one as the ground is hard and anything but tillable. However, "wher's there a will there's a way" and the Tofield Women's Institute have a reputation for "putting things over." The Mercury wishes them every success.

Speaking about beautifying places, leads us on to suggest that at some future time the town council and the Canadian National Railway consider the beautifying of the plot of land immediately east of the station. This land is, we believe, railroad property, but if anything like a mutual agreement could be made between the town and the railroad regarding beautifying this piece, we believe it would be good business for the town to take action. It would, we believe, lend itself to cultivation easily and in a few years be a small park where music could be played or radioed on Sundays and summer evenings. It would make a good "front garden" for the town and people coming in and passengers passing through would receive a pleasant impression of Tofield.

HOW ABOUT IT?

AUTOMOBILES ARE the source of much pleasure and considerable usefulness. If motorists are lax, however, in their driving habits, they can also be the cause of much misery. The month of May opens the motorist season into full tilt. A colorful variety of new cars, and others of early vintage, are emerging from cold storage, and the highways are becoming choked with traffic.

If, under these circumstances, we disobey traffic rules, take chances that are unwarranted, have little regard for the safety of others, the following facts should develop the safety habit when we are at the wheel.

According to records of previous years, about 20,000 people will be killed in the United States, before next Christmas, in automobile accidents.

There will be accidents due to defective equipment, such as poor headlights, poor tires, loose wheels, and faulty brakes, but more fatalities result from other causes. About 50 per cent of the tragedies, it is estimated, can be blamed to the inattention of the driver; 25 per cent to failure to grant right of way; 15 per cent to skidding; 5 per cent to drivers on the wrong side of the road; 5 per cent to careless backing; 5 per cent to driving while intoxicated.

A TALE TO HOUSEWIVES

Real warm Summer weather is just around the corner, hot days when it is impossible to find a cool spot anywhere, when hot food is unappetizing and cold dishes are the order of the day. It is then that the housewife has to use her wits to invent and prepare dishes that will be tempting and at the same time nourishing.

The most perfect food we have is milk. It is the cheapest food we have, and it is of all foods the most difficult to collect, handle and transport. It requires the greatest care from cow to container and from container to consumer.

Milk gets sourer than any other food. It is difficult to handle during the warmer months when most is needed, various diseases may be made with milk, both hot and cold, and the cold ones are delicious. The housewife and mother need never worry about the question of calories and vitamines for the little folks if she feed them milk, milk that has been kept covered, cold and clean.

The various members of the farm family love two things: Suitable food and warmth in which to grow and multiply. Milk is to them the choicest of food and warmth milk in their parables. When the housewife buys milk she does not buy a "pure paradise", she buys a nourishing food for her family. So she buys milk that she knows had been handled in a proper manner. She keeps it **covered and cool.**

For those who have no refrigerator an efficient ice box can be made at home. Write to the Red Cross, 466 Civic Block, Edmonton, Alta., and get instructions how to do it. Recipes of delicious summer milk dishes may be had from the same source.

PASTURE TO RENT.—Four miles west of Bardo station. $3.00 per head for cattle for the season. $1.00 per month for horses. Good water. Apply to A. Campbell, on the place, or Tofield Post Office, or to Editor of Mercury. 19p

STRAY.—From the south-east of section 14-50-20, w 4, on or about May 10th, one bay mare, white strip in face. Has visible brand: inch in left ear; wgt. about 1250; unbroken and wild; half percheron and half blood. $5.00 reward for recovery of animal. Finder please communicate with Mercury Office, phone 33. 18p

COUNCIL MEETING

Regular meeting of the Council of Cornhill Municipal District, held at the Municipal hall on Saturday, May 5th.

There were present: The reeve, Mr. A. J. Williams, and Councillors Christenson, Morden and Verge.

The minutes of the last meeting were read and adopted.

Moved by Councillor Verge that Secretary write the C.P.R. offering flat rate of $12.50 per acre for their lands used by the district for road diversions, to all parts of the district.—Carried.

Moved by Councillor Verge that secretary send Mr. Conor Cruise, Hay Lakes, a copy of resolution, allowing him a lease on road allowance running into a lake on his property. Also to a correction be made regarding a resolution allowing Alfred Jackson to purchase that portion of road allowance lying west of section 7-52-20, w4, rendered useless by a diversion being surveyed around same and that secretary send Alfred Jackson a copy of resolution.

Moved by Councillor Christenson, that Councillor Morden and himself be asked to put in two culverts on right of way east of the elevator at Kingman.

Moved by Councillor Verge that one large map and six small maps of the Municipal District of Cornhill be ordered.

Moved by Councillor Verge that $6,400 of surplus monies raised in previous years be spent in 1928 on roads. Such division to be effected by council.

The Court of Revision was set for July 9th, 1928, to be held at the Municipal Office at 2:00 p.m.

The Council will meet again on June 2nd at 1 p.m.

BELIEVE IT OR NOT

Seven years ago a farmer living only a few miles from the city hung his vest on the barnyard fence. A calf chewed up a pocket of the garment in which there was a standard unit watch. A short time ago, the animal, a stald old milch cow, was butchered for beef and the timepiece was found in such a position between the lungs of the cow that the respiration—the stoking in and filling of the lungs—kept the stem winder wound up, and the watch had lost not four minutes' variation in seven years.—Lyon News.

A Successful Six because—

SINCE the introduction of the "New Series", Pontiac Six has shattered all its own high records of success! Why?

Because here is all Pontiac's proven dependability . . . all Pontiac's well-known strength and stamina . . . all Pontiac's economy . . .

And in addition . . . new, dazzling beauty . . . new style and smartness . . . new, long, low Fisher bodies . . . new, modish color harmonies . . .

. . . new engine refinements . . . new feed-pump (replacing vacuum-tank) . . . new GMR cylinder-head . . . new Rear Wheel Brakes . . . new Lovejoy Hydraulic Shock Absorbers . . .

And because the New Series Pontiac Six is the lowest-priced six in the world that can give you all these desirable features and qualities.

Valve-in-Head Supreme

-in the Sky
-at the Speedway
-on the Road

Lindbergh, Maitland, Chamberlin, Byrd—all of the famous flyers of the day—use engines employing the Valve-in-Head principle in their record-breaking flights.

Practically every racing car entered in all the major speed classics of the past twelve years, as well as every winner of every important event, has also been Valve-in-Head equipped.

The famous McLaughlin-Buick Valve-in-Head Engine, developing more power than any other automobile engine of its size, has given conclusive proof of leadership in all elements of performance over a period of twenty-four years.

Choose McLaughlin-Buick—powered by the famous Valve-in-Head Engine—supreme in the sky, at the speedway, on the road!

Speeding up Freight Service

The recent installation of Mack Tractors and Lapeer Trailers by the Dominion Transport Company Limited, for the transfer of L.C.L. freight between the Canadian Pacific Plaza Viger freight sheds and their outlying terminals in this city, was demonstrated before E. W. Beatty, Chairman and President, and other executives of the railway outside the Windsor Street Station.

Mr. Beatty was especially interested in the mechanism by which the trailer is connected up with the tractor. This is done by the simple operation of backing the tractor slowly into the trailer. The coupling is actuated from the tractor by the simple moving of a lever. The President and other operations performed several times and expressed his appreciation of their simplicity.

Coupling and uncoupling of the trailer is operated by means of a mechanism known as a fifth wheel which is bolted to the tractor frame and upon which the front end of the trailer rides, interlocks itself mechanically with the trailer through the use of rolling contact type locking jaw receivers. Brakes of both the tractor and trailer are applied individually and operated by the driver and are at all times under control. Were it possible for a trailer to become disconnected from a tractor at any time when in motion, the brakes of the former are automatically applied bringing it almost immediately to a stop.

Through the use of a "dolly" block consists of a fifth wheel mounted on a pair of road wheels, two or more semi-steel trailers may be attached to one tractor thereby forming a tractor train and by so doing much increases the total load capacity. With the addition of the extra trailer wheels the total weight of the vehicle and load is divided over a greater road surface tire area, thus overcoming the disintegrating effect of heavily loaded trucks on the highways and city streets.

The capacity of the trailers used is 10,000 to 15,000 pounds with an inside dimension of approximately 16 feet long, 6½ feet wide and 7 feet high. The tractor is of the internationally known "Bull Dog" type and its drive-bar pull is for in excess of anything that will be required of it, but was deemed advisable to use in view of the heavy road conditions prevailing in Montreal during the winter months.

While the tractor is of standard Mack design, only the chassis is as in the case of the trailer, the body being built and finished in the Transport company's plant in Montreal. The body is all cut throughout with a sheet metal covering and the whole equipment is highly finished in dark blue with red wheels and undergear, the standard colors of the company, making a very handsome appearance. The service side panels or sliding doors of the trailer as well as the rear doors and front panel are decorated with the Maple Leaf and Beaver Insignia of the Canadian Pacific Railway. The doors of the tractor bear the same crest. The Canadian Transport Company have at present nine trailers in operation and will increase this number to twelve in the next few weeks. Similar automotive equipment has been ordered for use in Toronto by the company.

Mack Tractors and Lapeer trailers are employed in most modern efficiency methods of handling freight. It consists of operating one or more trailers at stipulated times between a freight to be picked up. When the trailer is loaded the tractor calls for each in turn, taking them to their respective destinations under what is known as the Shuttle System. By this method no time is lost by full trailers waiting to be moved, as they are operated on an hourly schedule between each of the outlying freight depots and the central station, thereby giving the merchants and manufacturers of those outlying districts the same despatch with their freight as those who are more centrically located.

THE MENNONITES IN MEXICO

(Swift Current Herald)

An intimate view of the life of the Mennonites from South of Swift Current who migrated to Mexico through their partial school troubles was related to the Herald yesterday by Abram J. Friesen, the well known storekeeper of Shumacher, who has just returned after a visit with his parents.

Corn is Their Crop

On the Friesen farm, stated Mr. Froese, after the first few years of experience, the Mennonites are nothing loath to a communal life and are beginning to get back on the right side of the ledger financially. Many of them experimented with winter wheat, and fall rye at the outset, which proved costly, and now they are all falling back on the staple crop, corn, and making it pay. The farms average from 15 acres up, one former Shumacher man, David Bergen having a holding of 1,000 acres. Jacob J. Peters hopes this year from 60 acres of corn to realize more than from two quarter sections of wheat him.

Mr. Froese states the difficulty at present is the price. Home grown corn sells for 75 cents a bushel, while that imported from the United States is at $1.35 a bushel. This is due to the peculiarities, he states.

No Trouble With Peons

The Mennonites are having no trouble with the Mexican people, who leave them entirely alone. The greatest guarantee and carrying out absolute protection. Only in one instance relates Mr. Froese, some of Villa's bandits raided a bemby but the culprits were caught, one of them mercilessly executed and his body exposed on a truck and driven with gruesome aspect through the Mennonite villages to show to what extent Mexican law functioned.

The Mexican peon, according to Mr. Froese, is of a very ignorant type, dirty of habit, and consequently there is very little fraternizing by the Mennonites and no intermarriage between the two peoples. The Mennonite colonies are segregated in one district in Mexico, the representations from the Swift Current district being in a chain of some twenty-eight villages, each containing about twenty houses. The Mennonites have educational homes made of brick, which they mold themselves from clay. They have their own schools with separate administration and are not interfered with in any way by the government.

A Primitive Country

"Travelling through Mexico as I did," says Mr. Froese, "I was surprised at how backward the people are: their modes of transportation, living conditions, etc., and you would think you were back 1,000 years ago in the primitive age. The poor plows by employing oxen to pull the plow, which at best is a very crude affair. About six oxen will be harnessed to Indian fix with poles tied to the horns of the animals. One man sits on the makeshift plow merely to hold it down. The Mexican transports his crop on small donkeys, each carrying a load of around 200 pounds."

Corn growing for the Mennonite farmers in Mexico is held by them to be the profitable endeavor. There is no need of outside help, each farmer being able to put in his crop and harvest it with the aid of his child ren. The overhead is small and the return good.

Provisional Government

When the Herald representative enquired whether there was any indication of a further migration from this district, Mr. Froese was non committal and stated he did not know. Apparently the Mennonites are satisfied with his lot here and content to see Mexico only occasionally on visit to their parents. The government apparently takes quite an interest in the Mennonites, with a presidential election in view there, both members have expressed their intention, however, to pay a visit to the Mennonite colonies. Mr. Froese was of the opinion that the Mennonites in Mexico are quite satisfied with their lot, especially now that their religious beliefs, as far as schools, etc., are respected.

"Then the Mexicans bother the people in the colonies at all?" he was asked, to which the reply was, "Well from what I heard and saw, the Mexican peon doesn't know enough to bother them. He has a reputation as a coward and wouldn't try anything unless he could get a up with it. I heard of very little trouble in that regard, while I was there."

TOOK SODA 20 YEARS FOR GAS—STOPS NOW

"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—J. B. Hardy.

Adlerika relieves stomach gas and sourness in TEN minutes. Acting on BOTH upper and lower bowel, it removes old waste matter you never thought was in your system. Let Adlerika give your stomach and bowels a REAL cleansing and see how much better you feel. It will surprise you!

BREVITY

A cub reporter, frequently reprimanded for prolixity and warned to be brief, turned in the following:

"A shocking affair occurred last night. Mr Edward Royalene, a guest at Lady Passmore's ball, complained of feeling ill, took a highball, his last, his coat, his departure, no notice of his friends, a taxi, a priest from his pocket, and family has life. Run sight. Mr Edward Royalene, a guest shop. Regrets and all that."

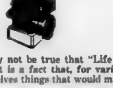
Cream Shippers

This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED! THANK YOU.

YOU BUY FOR $00.000

THE TOFIELD CREAMERY
Alex Ross, Manager



It may or may not be true that "Life is what we make it," yet it is a fact that, for various reasons we deny ourselves things that would materially benefit us.

There are many farm houses in Alberta, yes in the Tofield district, that would be lighter and brighter, were there that wonderful light and power, electricity, available.

The Kohler electric light and power plant will at the push of a button or turn of a switch give the farm home brilliant healthful light and plentiful power. It will do more—in the barn, granary, cow shed, chicken house, where ever there is a light or power appliance—just switch it on and you get full rated power from the plant.

When you turn a switch the plant starts and stops when the last light is turned off. Thoroughly dependable. Thousands in use both on land and sea.

We recommend the Kohler as being America's best private lighting plant.

Now is the time to consider the installation of a plant for next fall's use. We will be pleased to give you prices and information regarding any particular installation.

Eternal Vigilance Is the Price Of Safety

Because of the appalling loss of life through motor car accidents, Governments and municipalities are enacting ever more stringent laws governing the use of highways and the operation of automobiles. Laws regulating the speed of driving, governing the use of headlights, compelling cars to come to a full stop before proceeding to cross railway tracks have been passed, while signalling devices, signs, guard rails at curves, embankments, and other danger spots are erected, all with a view to protecting the public.

For the same reason laws are passed and regulations enforced governing the management of factories, mines, operation of railways and ships, laying down conditions under which women and girls may be employed, and stipulating a hundred and one things which must be done to safeguard workers in all departments of industrial life.

According to figures, the correctness of which are vouched for by the Midwest Safety Conference, as reported in a San Francisco paper, there were 24,000 deaths in the United States last year through traffic accidents, and 23,000 deaths through industrial accidents almost all of which were preventable.

But it will be a surprise to many to learn that accidents occurring in the homes of the United States took an even greater toll of life than did traffic accidents or accidents in industry. Avoidable accidents resulting in death in United States homes in 1927 numbered 27,000, and, according to the report already referred to, "the bathtub and the stepladder were among the deadliest adjuncts of domestic life and the two combined contributed a large proportion of these 27,000 home fatalities."

Traffic regulation and industrial safety laws are the business of the public as well as of the individual, hence the interest displayed by all governmental authority. Because they are susceptible of public regulation the problem they present, and which fills the newspapers today, should be easier than that of the household fatalities. As the San Francisco paper says, "It is not possible to put the equivalent of a traffic cop into every home to supervise the hanging of draperies, the dusting of walls and the training of the climbing vines. Nor would it be desirable even were it possible to have a uniformed public official handling careless people in and out of slippery bathtubs. The law cannot direct the turning on and off of gas cocks. It cannot keep matches out of the reach of children. It cannot be the keeper of the family medicine chest. It cannot make itself the custodian of the household arsenal and see that unloaded guns are always unloaded. It cannot prevent the starting of stove fires with kerosene,—or the use of gasoline near a lighted lamp or a burning fire."

These and a multitude of other vigilances rest solely with the individual. Until the individual exercises the necessary caution the lurking dangers of the household will continue to take their toll.

Throughout this great Canadian west not a week passes but the newspapers tell the terrible story of a calamity in some home, resulting in death and maiming for life, the direct result of downright carelessness. A destructive prairie or forest fire rages because someone neglected to put out a camp fire or dropped a match or started burning straw or rubbish without taking necessary precautions. An explosion wrecks a home and takes a toll of life because gasoline was left where it should not have been. A child drinks a cup of lye in mistake for water, and dies or is crippled for life. And so on, and on and on.

And all the laws and regulations and prohibitions that all the Parliaments and Legislatures and Municipal Councils in the country may pass cannot stop these tragedies. In the forceful slang of the day "it is up to the individual" to exercise caution, to be vigilant. Only so can the daily loss of life through these accidents in the home, in industry, and on the highways of our country be reduced and practically eliminated. Ninety-nine out of every one hundred of such accidents are preventable. It is for the people to realize this. When they do the accidents will cease, until they do realize it and govern themselves accordingly, sorrow, pain and loss will continue to be a permanent visitor in our midst.

Named After Lindbergh

Canadian Island and Station Will Bear Aviator's Name

Colonel Lindbergh will have the honor of having an islet in British Columbia and a station in Alberta named after him. Paul Lambert, of New York, owns a small island in Boddie Bay, near Nanaimo, B.C., and asked the Geographic Boards of British Columbia and Canada to permit the name Lindbergh for it, as they heard he objected. They claim as private property he can call it what he likes, as long as it doesn't interfere with present names.

The Dominion Geographic Board received an application from the Canadian National at Winnipeg to approve naming a railway station in Alberta after the famous aviator. The board has given approval.

It's a long time since there was a time like the present for doing it.

Secured a Homestead

Two Brothers Maintain Long and Lonely Vigil For This Purpose

Determined to file on a homestead near his father's and brother's at Loyalist, Alberta, when the cancelled homestead rights were thrown open to the public at the Dominion Lands Office in Calgary, Cyrus Duxton, 18 years of age, assisted by his brother Paul, 21, kept first place outside the land office for an entire week prior to the opening. A blanket was drawn across a corner of the building within a few feet of the entrance and here the brothers slept during their six hours' shifts. They were successful in securing the desired homestead.

Minard's Liniment for falling hair.

Nagg: Did you hear of my father's death? Do you know, he left $30,000?

Tagg: That's nothing. My grandfather left the earth.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali effective yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

World's Grain Congress

Will Mark Fiftieth Anniversary Of Coming Of the Railway and Birth Of Prairie Agriculture

The first world's grain congress, scheduled for Regina, in 1932, will mark the 50th anniversary of the arrival of the Canadian Pacific Railway and the birth of prairie agriculture, outside of a comparatively small earlier settlement in Manitoba. In outlining steps preliminary to the summoning of the congress, Hon. W. R. Motherwell, Federal Minister of Agriculture, announced: "The proposal to hold a world's grain congress in Canada has been quietly discussed and canvassed by a few enthusiasts in the west for the past two or three years. In the meantime, the pronounced success of the world's poultry congress has stimulated and crystallized the proposed grain congress into possibility and visibility."

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood Made By Dr. Williams' Pink Pills.

There must be no guesswork in the treatment of pale, anaemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anaemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills coupled with nourishing food and gentle out-of-door exercise. The new, life-giving blood which comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the nerves and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 5, Shelburne, Ont., praises this medicine for restoring her daughter's health. She says:—"When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies, but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not very long after she began taking the pills that I could see a change for the better. She kept on taking the pills for several months, and through them grew into a strong healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Wireless Saved the Situation

Egypt Able To Greet Afghan Ruler With His National Anthem

A very embarrassing situation was averted and Egypt greeted King Amanullah and his queen with proper ceremony upon their arrival from Bombay, thanks to wireless.

A frantic message picked up by the P. and O. liner Rajputana, from an Egyptian operator, bemoaning the fact that Egypt was not acquainted with the Afghan national anthem. The purser had it wirelessed to Port Said, where it was deciphered—note for note—and upon the arrival of the royal pair they were greeted with a perfect rendition of their anthem.

Cheapest Of All Oils.—Considering the qualities of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Fort Vermilion Wheat

Wheat Grown Close To Arctic Circle Weighs 64 lbs. To the Bushel

Wheat from Fort Vermilion, 320 miles north of Peace River, weighed 64 pounds to the bushel and graded No. 2 without dockage. It was sent to the Alberta wheat pool by James McGraw, a farmer in that district. Although Fort Vermilion is close to the Arctic circle, wheat growing is not new in that area. In 1876, wheat grown at that point won the championship at the Centennial Exhibition at Philadelphia.

Ideal Tourist Camp Of Calgary

The Calgary Automobile Club is planning to equip and operate what they claim will be the most modern automobile tourist camp in Western Canada. The camp will be well lighted and equipped with gas for cooking, water, shower baths, car shelters and other conveniences for the accommodation of motor tourists.

Insist on Minard's Liniment—accept no other.

PILES are quickly Soothed & Healed by Zam-Buk

British-American Friendship

Chas. M. Schwab Says the British Are the Most Sincere People In the World

In an appeal to abolish the "hands across the sea" sentiment between Great Britain and the United States, Charles M. Schwab said at an English-speaking union luncheon that the two nations are knit together not only sentimentally but actually, and that a large factor in this union is the steel industries of the two countries. He said that Great Britain was the mother of the steel industry, but that the great British processes, including the Bessemer process, were developed in America.

"I consider the British the sportiest, truest, most sincere people in the world," Mr. Schwab said. "Nobody knows what they have suffered from the great war, and what they are now doing to get back on their feet. I am proud of my British friendship. I have received more honor from Great Britain than from my own country.

"I am not disturbed by the boastful, flamboyant Americans who falsely represent America abroad, and I am not disturbed by our newspapers cause I know that the relations because I know that the relations between us are not affected by such things."

First Thing Man Exploited

In 1300 B.C. Hittites Had Laws Governing Bees

The bee was probably the first created thing whose labors were exploited by mankind.

In the Hittite code of laws, dated 1300 B.C., punishments for the theft of bees and hives were mentioned. About 4000 B.C. the bee was adopted as the symbol for the King of Lower Egypt. Hieroglyphic bees were found from the First Dynasty down to Roman times, a period of some 4,000 years.

Bee-keeping was regularly practised in Egypt in 3000 B.C.; reliefs exist showing the conformation of the hives—mud structures placed one over the other, and the men engaged in pouring out the honey and sealing it in jars. But thousands of years before this the wild honey was extracted from rocks and trees. It was only in comparatively recent times, some six or seven thousand years ago, that it occurred to man to reduce the bee to slavery.

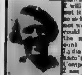
Miller's Worm Powders not only make the infantile system untenable for worms but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Increase In Tobacco Production

Production of tobacco in Canada in 1927 totalled 43,916,700 pounds valued at $9,112,274, an increase over 1926 of 13,092,700 pounds in production, and $1,732,708 in value. Last year 44,628 acres were sown to tobacco in Canada or 10,673 acres more than the previous year. Ontario planted 33,600 acres, Quebec 10,018 acres, and British Columbia 290 acres. The average yield per acre was 987 pounds.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound



Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women."—Mrs. Mary Schramm, Grainland, Sask.

Preparing For Trial Flights

Luxurious British Airship Built For London-New York Traffic

From New York to London in 48 hours, and with all the comforts of the most luxurious ocean liners!

This may sound like a dream of Jules Verne but it will be accomplished this year by the R-100, a British airship, built under direction of Commander C. Dennis Burney, M.P.

The Burney ship, of 5,000,000 cubic feet displacement, has progressed so far that it is expected to be ready for trial flights in July.

American capital has become interested in the R-100 and a Detroit group has taken an option on a substantial interest in the Burney Company with a view of establishing a fleet of six 8,000,000 cubic feet air liners built on the Burney designs and for use in London-New York traffic.

Half of these ships will be built in the United States and half in England with the operating company owned jointly by British and American capital.

The R-100 will carry 100 passengers and ten tons of express freight. It will be able to make the eastward passage in 48 hours and the trip from London to New York via the Azores in 60 hours. The southern route on the westward passage is contemplated to avoid head winds.

If plans for the trans-Atlantic airship company materialize, the R-100 will be used as an experimental ship, followed by the larger dirigibles with capacities for 140 passengers and 20 tons of freight.

The R-100 has been furnished, the staterooms are completed and rugs have already been laid in the dining salon.

Most Unusual Job

Going Through Hotel Waste Paper Baskets To Retrieve Lost Articles

Waste-paper baskets sifting is an unusual job, but one that is highly important in large hotels. Most lost articles are found in waste-paper baskets, and in some hotels there are people who spend most of their working hours going through the vast quantities of papers and cast-off articles placed in waste-paper baskets by guests. Many thousands of dollars' worth of jewelry, valuable papers and such things as theatre tickets, railroad and steamship tickets and pieces of wearing apparel are discovered every month. One of the most expensive amethysts in the world, owned by a guest who wears it as a pendant, was picked up in waste-basket rubbish less than a month ago. Recently, too, there were two $100 bills found in the trash that was sent down from a guest room.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

First Elevator In Angora

Another Western Importation Added To Turkey's New Capital

The first elevator has been placed in one of the buildings of Turkey's new capital.

Thus another red-letter day has been added to the series commemorating the construction of the first new house in the erstwhile village, the first turning of the tap of the new water system, the first puff of heat from the first steam radiator and the first switching on of electricity.

But the elevator, latest importation from the West, does no elevating as yet, for the Minister of Hygiene in whose new headquarters it has been installed has not yet been able to find any one in Angora capable of testing and setting it in motion.

Preserves Water Supply

Forests are nature's preservers of water supply. The forest floor, being porous, retains the maximum amount of rainfall. This physical condition combined with the mechanical obstructions of tree roots, retards the rapidity of run-off. Excess water is released gradually and the equilibrium of stream flow is preserved. In like manner the melting of snows in the springtime is delayed by the lower temperature and shade in the forest, so that the danger of floods is lessened.

Landlady: "You have been here three months and have never paid any rent."

Student: "But you said it would be like home here!"

Landlady: "Well, I hope it is."

Student: "At home I never paid any rent."

Thrift is a state of mind. A man buys a $900 car as an example when he wants a $5,000 car and can afford no car at all.

Always have the magic WRIGLEY package in your pocket.

Soothes nerves, allays thirst, aids digestion.

Are Aids To Scientists

Rats and Monkeys Contribute To Knowledge Of Dietetics

Rats and monkeys are, in their humble way, contributing much to the knowledge of scientists regarding dietetics, says an article in Tit-Bits.

At the famous Lister Institute in London, is to be found a modern "Pied Piper" in the person of Miss Henderson Smith, who has charge of some 500 rats of all ages and sizes, which occupy a regular nursery.

People come from all over the world to see Miss Henderson's charges. They come with shudders of horror at the thought of so many "beasties" in so small a space, but they go away charmed with the little creatures.

You must not imagine that these are ordinary rats. They are nearly all black and white, though some are entirely white with pink eyes. They are tame and friendly, and if they do occasionally give a little bite—it is kindly meant.

The rats and ten monkeys near by are doing extremely important work. They are teaching scientists all about the mystery of the all-important vitamins and are contributing daily to the knowledge of dietetics.

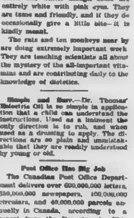
Simple and Sure.—Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Post Office Has Big Job

The Canadian Post Office Department delivers over 600,000,000 letters, 330,000,000 newspapers, 400,000,000 circulars, and 40,000,000 parcels annually in Canada, according to a report from the Department. This delivery is made through about 12,440 post offices, and over 200,000 rural mail boxes extending over an area of nearly 3,700,000 square miles.

Don't Make a Toy Out of Baby—Babies Have Nerves

By RUTH BRITTAIN



Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, coaxed to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep, yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

THE MERCURY, TOFIELD, ALBERTA.

MUCH DEBATE OVER REVISED PRAYER BOOK

London.—Debate on the new revised prayer book probably will not begin in the House of Commons before the end of June, but controversy over the changes is raging.

The prayer book measure passed the first preliminary when the ecclesiastical committee of both houses voted 20 to 3 to allow it to proceed. The legislative committee must now approve it before it is submitted to the House.

The principal contenders in the controversy, so far, are Sir William Joynson-Hicks, Home Secretary, who opposes the revision, and the Right Rev. Arthur Foley Winnington-Ingram, bishop of London, who supports it.

The bishop precipitated the argument by circularizing London Members of Parliament, urging them to support the measure. The Home Secretary announced that passage of the measure would be far more grievously regarded throughout the country than its rejection would be.

Some Conservative Members of Parliament questioned the propriety of the Home Secretary's action in identifying himself so prominently with the opposition since he was a cabinet minister.

The bishop, in his rejoinder, asked if the opponents of the measure were trying to drive the Anglo-Catholics out of the Church of England.

"No one," he said, "wants to drive out those who are ultra-Protestant in their doctrine. Cannot the people on your side be generous enough not only to keep within the Church of England, but to make happy in the Church of England those to whose work and devotion we owe so much?

"Your present policy, if successful can only lead to the disruption of the Church of England, and this, I feel sure, no one would deplore more than yourself."

Discuss Exchange Of Lines

Co-operation Between 'Phone and Telegraph Service Possible In Alberta

Edmonton.—Ways and means for working out an exchange of facilities between the government telephone system and the telegraph companies are at present under consideration and a conference in connection with the matter was held between W. D. Robb, vice-president of the Canadian National Railways, and R. B. Baxter, Deputy Minister of Telephones.

Mr. Robb is referring the question as thus opened to the head office of the Canadian National Railway Telegraphs and it is likely that a working agreement will result.

Under the proposed plan the wires of the provincial telephone system will be made use of by the telegraph company in certain parts of the province for the transmission of telegraphic messages, while the province will use telegraph pole lines for stringing its wires in other places by way of exchange. A similar arrangement in some parts of the province is already in operation between the province and the Canadian Pacific Railway telegraphs.

Exports Cut In April

Imports Were Higher and Income Tax Revenue Increased

Ottawa.—Canadian exports in April were lower in volume than a year ago while imports were higher. Revenue from customs and excise were lower by nearly a million dollars in April last than in April, 1927.

Revenue from income tax was nearly two million dollars more last month than in April a year ago, according to the monthly statement issued by the Department of National Revenue.

To Study B.C. System

Winnipeg.—Major C. K. Newcombe, chairman of the workmen's compensation board which will handle the administration of old age pensions in Manitoba, will leave for Vancouver to study methods used by the coast province in handling the pensions system. To date, 1,300 persons have filed applications for pensions in Manitoba, and this number is expected to be doubled shortly.

Sending Plane To States

Oslo.—The plane in which Captain George H. Wilkins and Carl B. Eielson flew from Alaska to Spitzbergen, has left Tromso aboard a ship for Bergen. It will eventually be sent to America on a Norwegian liner.

Might Make Separate Pact

British Dominions Could Deal Directly With Washington On Peace Plan

Washington.—The possibility that the British Dominions may make separate treaties with Washington to outlaw war is being discussed here.

Secretary of State Kellogg, whose proposals for treaties between the great powers to disavow war as an instrument of national policy have been tentatively approved by Britain, said that he had no official intimation from London that any reservations would be demanded as indicated in news dispatches. He agreed that if any difference of opinion existed as to the exact basis on which Britain would negotiate with Washington, they probably were between Great Britain and her Dominions. He had been informed that London was taking up the whole question with the Dominions before replying to the U.S. Secretary of State's overtures.

Asked if the Dominions would have separate treaties, Secretary Kellogg said that was a matter for the Dominions themselves to decide, in consultation with the British government. In a general way the opinion is expressed here that it would not be inconsistent with the policy of Canada in recent years if Ottawa elected to deal directly with Washington when it comes to a declaration of policy on the arbitration of disputes and the outlawing of war.

Salary Increase For Judges Recommended

House Will Have To Approve Report Of Committee

Ottawa.—An increase in salary to Canadian judges has been approved by the special parliamentary committee. The committee's report will, it is stated, recommend an increase of $2,000 to county court judges, the same amount to provincial court judges, and $3,000 increase for judges of the supreme court of Canada.

The committee held its sessions in camera. It is understood that the report was only adopted on the casting vote of the chairman.

The committee's recommendation will have to receive the approval of the house.

An increase in salary of $2,000 per annum is also recommended for judges of the exchequer court of Canada.

The conclusion reached by the committee was that the remuneration paid to judges in Canada was inadequate and should be increased.

Willingdon Opens Institute For Blind

New Building Provides Treatment For Sightless In West

Winnipeg.—The opening of the new building of the Canadian National Institute for the Blind, at Winnipeg, will be the means of not only comforting and supporting hundreds of those now afflicted, but of saving the sight of at least half of those in Saskatchewan and Manitoba whose vision would otherwise be doomed.

This was the repeated statement of successive speakers representative of the institute when His Excellency Viscount Willingdon, governor-general of Canada, officially declared the new building open.

Amendment Defeated

Anti-Dumping Move Lost By Large Majority In House

Ottawa.—A Conservative anti-dumping amendment to supply was defeated in the House by a vote of 110 to 80. The amendment was moved by R. K. Anderson (Conservative, Halton), and was that the government should take necessary action effectively to control the importation into Canada of natural products of a class or kind produced in Canada under conditions that operate to the detriment of the Canadian producers. A. W. Neill (Independent, Comox-Alberni), voted with the Conservatives, while the Progressives and U.F.A. voted with the government.

Explorer Reported Safe

Berlin, Germany.—Reports received here from Leh, Northern India, says the German explorer, Wilhelm Filchner, the British missionary, Mal Wilson, and the American missionary, Playmire, arrived safely there. Filchner, in 1926, had been reported murdered together with several members of his Tibetan expedition.

May Be Envoy To Canada

Washington.—It is rumored here in diplomatic circles that Setsuzo Sawada, counsellor to the Japanese embassy here, will be the first Japanese minister to Ottawa. The Japanese embassy declines to comment on the rumor.

Farm Workers Scarce

Demand In Northern Alberta Exceeds Supply Is Report

Winnipeg.—The influx of immigrants this season has been well covered, and in northern Alberta there is scarcely enough farm help to meet the demands, according to J. S. McGowan, western manager of the colonization department of the Canadian National railways who returned here from a tour of the west.

He estimated that well over a million acres of new land will be cleared and brought under the plow this year in northern Alberta and northern Saskatchewan.

New immigrants, he said, were being used extensively in this work.

No Opposition From Britain

But Chinese Troops Must Not Enter Legation At Peking

London.—The British government has no intention to offer any opposition to the advance of the Chinese Nationalist armies on Peking, Godfrey Locker-Lampson, under secretary for foreign affairs told the House of Commons.

Mr. Locker-Lampson said the Government's only care was to see that these troops did not enter the legation quarters.

ADVOCATE PLAN OF INSURANCE FOR UNEMPLOYED

Ottawa.—The House of Commons committee on industrial and international relations endorsed the principle of unemployment insurance based on compulsory contributions by the state, the employers and the employee in its report tabled in the House.

The report states that the necessity for providing some method of unemployment insurance, "will inevitably have to be dealt with before long as a solution in part, of the industrial problems of the present day."

The report indicates that the success of any plan of unemployment insurance depends upon several of the provinces being willing to act simultaneously.

It is of the opinion that the matter should be referred to the provinces to find out the extent to which they will be willing to adopt legislation respecting unemployment insurance and to what extent they will be willing to go.

The committee experienced difficulty in arriving at approximate costs of unemployment insurance because there was no definite method of ascertaining unemployment at any given point for any length of time.

The committee recommends:

"That the government immediately devise some means whereby the amount of unemployment over a period of a year could be reasonably calculated."

The committee also recommends that the government secure from Great Britain advice on the subject and that the subject be dealt with further by the committee at the next session of parliament.

Formed Permanent Organization

Dr. C. M. Hincks, medical director of the Canadian National Committee for Mental Hygiene, was elected president of the Canadian conference on social work held in Montreal. Due to the success of this first conference a permanent organization was formed with Dr. Hincks at its head.

Ask Higher Tariff On Dairy Products

Findings Of U.S. Commission Not Yet Submitted To President

Washington.—The tariff commission's recommendation on milk and cream duties has not yet been sent to the president. The Canadian Press learned two weeks ago that the findings of the commission which recently investigated the cost of production in Canadian dairies, were ready for the White House, and it was understood that an increase in the duties would be recommended.

The farmers' co-operatives, who claim to represent 861,000 farmers in this country, asked for upward revision of the tariff on practically all products of the farm, except grain on which they already have a prohibitive tariff. In most cases they ask, in their resolution addressed to Congress, about 100 per cent. increase in the existing duties.

Discusses Antarctic Plans

Wilkins Hopes To Locate Suitable Base For Meteorological Station

Tromso, Norway.—Captain George H. Wilkins commenting on Spitzbergen's place in the future of Arctic airways, said: "It likely will be the half-way house between Chicago and China."

Wilkins said, in discussing his plans for an Antarctic flight, that he hoped to make an aerial camera survey of the coasts of the Ross Sea to Graham's Land, for the purpose of locating a suitable base for a meteorological station. Such a station would be of great importance in forecasting the weather for Australia, South America and Southern California.

Will Not Resign

Bucharest.—Premier Bratianu will tell the Rumanian parliament that the cabinet has no intention of resigning or heeding other of the peasants' demands, it is learned from semi-official quarters.

TWO IS COMPANY

Rolf Hansen and Anna Augusen, of Oslo, immigrants, were married in the Canadian National Railways Colonization Offices by Rev. T. J. Langley, of the Norwegian Lutheran Church, on their arrival in Winnipeg. They desired to face their new life in Canada as man and wife rather than to separate. They will go on a farm near Birch Hills, Sask.

File Appeals In Libel Suit

Defendant In Currie Action Claims New Evidence Discovered

Toronto.—Appeals from the verdict of the special jury at the Cobourg assizes last month awarding Sir Arthur Currie, commander of the Canadian corps in France, $500 damages in his libel action against W. T. R. Preston and F. W. Wilson, of Port Hope, were filed recently. Mr. Preston and Mr. Wilson were not accompanied by counsel when they visited Osgoode Hall to file the appeal.

One of the chief grounds of Mr. Preston's appeal is contained in a statement that new evidence has been discovered. He claims that an order was issued to the respective units of the Canadian corps about 4:30 p.m., November 10, 1918, that operations would be concluded and hostilities cease at 11 o'clock on the morning of November 11.

Other grounds include the assertion that the judge mis-directed and non-directed the jury, that certain evidence was erroneously excluded and that the judgment was contrary to the evidence.

Mr. Preston and Mr. Wilson filed separate notices of appeal.

Staff Is Kept Busy

Requests For Returns By House Members Are Numerous

Ottawa.—Returns requested by members of the House of Commons are so numerous and voluminous that some of the Government's departments are having difficulty in keeping pace with the demand.

This was stated in the House of Commons by Hon. J. A. Robb, Minister of Finance. Mr. Robb informed the members that Government departments stated that the requests from the House were adding materially to their work. Some of them declared that they must either have more time to get out the returns or more help to do the work.

Mr. Robb made this statement in explaining why it took some time to furnish certain returns requested by members.

DID NOT NAME MR. McMURRAY SAYS HON. FORKE

Ottawa.—Emphatic denial of any knowledge that Hon. E. J. McMurray, former Solicitor-General, had trafficked in special immigration permits was made at the parliamentary immigration inquiry by Hon. Robert Forke, Minister of Immigration.

"I can state emphatically that I did not make any of the statements which Mr. Coldwell says I made about Mr. McMurray," Mr. Forke declared, in referring to the statement by Ald. M. J. Coldwell, of Regina, that Mr. Forke had named Mr. McMurray in this connection.

"Mr. McMurray's election was in 1926, two years before I came into the department," Mr. Forke continued, "and I know nothing about Mr. McMurray's transactions with the department, if any took place, and since I came into the department I have had no dealings with Mr. McMurray, directly or indirectly."

"Regarding Mr. Coldwell's statement about my telling him I had checked up the records of the department regarding the number of permits issued by my predecessors, and that I said I wrote my predecessor and that he wrote his predecessor, I want to say positively, that if Mr. Coldwell got this information at all, he did not get it from me," Mr. Forke continued.

"At no time did I ever examine or check up the previous records of the department in regard to the number of permits issued by my predecessors. I have no knowledge of the number of permits issued by them and I did not write to any predecessor in connection with the number of permits which had been issued."

Hon. R. J. Manion, (Conservative, Fort William), was given permission at the outset of the sitting to make a statement in respect to the casual mention of his name by Ald. Coldwell.

"I wish to state emphatically that in the time I was acting minister of immigration in July, 1926, I personally issued no permits to anyone and no permits were illegally or irregularly issued to anyone," Dr. Manion declared.

"In fact no permits of any kind were issued which were not wholly within the law and the regulations."

Dr. Manion emphatically denied that he had communicated at any time by word or letter with Mr. Forke regarding permits. He felt that Mr. Forke would agree with him [illegible]

REQUEST IS MADE FOR INCREASED TARIFF ON SUGAR

Ottawa.—For the second time the application of the Dominion Sugar Company, of Chatham, Ont., for upward revision of the tariff on refined sugar was before the tariff advisory board.

The application is being heard in conjunction with a request from W. M. Thrasher, Saskatoon, for downward revision of the tariff on sugar. Mr. Thrasher also asks for the abolition of the Dutch standard.

On behalf of the Dominion Sugar Company A. V. McIntyre said there was a loss of 7 per cent.

Chairman W. H. Moore questioned A. W. Stewart, of the St. Lawrence Sugar Refining Company, supporting the Dominion Sugar Company's application, as to what was the cost of sugar refining in Canada. Mr. Stewart was doubtful if this information could be obtained. Chairman Moore thought, however, that as similar data was obtainable in the United States, it should be obtainable in Canada.

Mr. McIntyre asked the board to grant protection of one cent per pound on refined sugar to put the industry on a sound basis. This protection, continued Mr. McIntyre, would ensure a substantial increase in Canadian production and good prices for Canadian sugar beets. Farmers would also, he declared, be ensured a fair price.

Premier May Go To Geneva

Suggestion Made That Premier King Attend Next Session Of League Of Nations

Ottawa.—The suggestion that Premier Mackenzie King attend the next assembly of the League of Nations has been endorsed by the central executive of the society in Canada.

The resolution, moved by Senator Belcourt, was as follows:

"That the suggestion by Sir Herbert Ames to the effect that it was most desirable that the Prime Minister, Right Hon. W. L. Mackenzie King, attend the next assembly of the League at Geneva, and sit at the council meeting as Canada's representative, has the cordial endorsation of the society, and that the general secretary be instructed to send a copy of this resolution to the Prime Minister, and to express the hope that he may find it possible to act in accordance with it."

Radium Exempted From Duty

Action Of British Treasury Will Greatly Relieve Hospitals

London.—The British treasury has decided to exempt all radium compounds from customs duty. The concession will greatly relieve hospitals who are experiencing serious difficulties in obtaining supplies owing to the enormous cost. The government in January, last year, imposed a duty of 33 1-3 per cent. on all radium.

Acquire More B.C. Land

Sardis, B.C.—The John I. Haas Hop Company, of San Francisco, that now has 100 acres of land in hops at Sardis, B.C., recently acquired additional 80 acres just south of its present holdings, which will be trellised during the coming season. There were approximately 750 tons of hops grown in British Columbia last year, practically all of which have been shipped.

To Tighten Up Liquor Law

Toronto.—Ontario's liquor control act is to have its teeth sharpened, it is understood, by the introduction of the padlock system of dealing with erring hotel and resort proprietors. Such a system cannot be set up under the law as it now stands and consequently special legislation will be required. This legislation, it is unofficially reported, will be brought down at the next session of the House.

Sending Observers To Geneva

Washington.—While the United States has declined an invitation to participate in the eleventh international labor conference at Geneva beginning May 30, it is learned that both the United States government and the American Federation of Labor will send unofficial observers to watch proceedings.

Railway Manager Arrested

Warsaw, Poland.—Police arrested Stanislas Turek, assistant manager of the railway administration, and three other men, charged with selling secret plans for Polish railway mobilization in case of war to Moscow. The men also are accused of betraying secrets of Polish airplane manufacturers.

KETCHAMOOT (continued)

ily visited with Mrs. McGinitie's mother, Mrs. Bruhs at Rhoeta on Sunday.

Friends of Mr. George Cookson were sorry to hear that it was necessary for him to go to an Edmonton hospital last week. Mrs. Cookson is staying with him.

Mr Barnes and Ralph plowed for Mr Geo. Lawson last week with their new tractor.

Mr. and Mrs. P. O. Moline and family of Rhoeta visited at the C. A. Ingram home on Saturday afternoon.

W. I. NOTES

Don't forget our plant sale on Saturday the 26th. For some years now the institute has held a plant sale in the spring of the year. This sale has afforded an opportunity to many to replenish their supply of house plants as well as to procure plants for setting out etc. As in other years, the prices will be reasonable, and as far as humanly possible, the quality the best.

LAKE SHORE

Miss Loretta Ross was a week-end visitor at the Bethel home.

Mr and Mrs Keith McIntosh motored from Comstock Sask., and have been visiting relatives and friends in the district. They returned home on Tuesday.

Word was received on Sunday, that Will Ingram, formerly of the Ketchamoot district had passed away at Chilliwack, B.C. Mr. Ingram had many friends in this district where he used to be a frequent visitor some years ago. The sympathy of the entire community goes out to the brothers and sisters.

Mr. D. W. Warner was a visitor in this vicinity last week.

AN ADVENTURE WITH A PIG

(By Hazel Lone, Barrhead.)

One day three of us girls and my brother stayed home and kept house while our mothers' went visiting. After we had dinner my brother went to water the pigs at the ice hole in the river while we washed the dishes. After we got our dishes washed we wondered why he didn't come up to the house because we were going to make candy and have a real good time when he came up. We waited quite a while longer and then we went out in the yard and called him. He answered us and told us to come quick. We wondered what on earth had happened so we ran down there as quick as we could and there he was down at the river trying to get a pig out of an ice hole. We went down to the pig and one of my girl friends was afraid so she stayed on the other side of the fence, while my other girl friend and I went to help my brother get the pig out of the ice hole. The pig was so deep in the ice hole that its head and two front feet were just sticking out. We didn't know what to do so we each got a stick and put it under the pig so it wouldn't go under the ice. Then we each got hold of its feet and ears and pulled it and it squealed like the duce and tried to bite us, so we let go of the thing and he started to slide deeper and deeper in the ice hole. The other girl friend on the other side of the fence kept hollering to us, "get it out, get it out" and we were trying to get it out but we couldn't. We couldn't think of any other way to get it out so we got big boards and pried it out on the ice and I be jiggered if it didn't slide right back into the ice hole and we were sure mad because we didn't know what to do so we got our boards again and pried it out on the ice and this time we pulled it away so far from the ice hole it couldn't fall back in. When we got it out it was just full of mud that you could hardly see its eyes and it had to go up a bank to get off the river so it could get something to eat to keep it alive because it was in such bad condition. We tried to get it up the bank, but it would just roll down as fast as we could get it up so we took the axe and cut trenches in the mud so it could go up the hill. Then we got behind the pig with a board and helped it up the hill to its pen where it could get something to eat and left it.

Then we all went up to the house and washed the mud off of us because we were just like niggers. After we got the mud washed off of us we didn't know what to do to amuse ourselves, so we made some candy and played some games and by that time our mothers were coming. When they got home we told them all about us and the pig and they sure did laugh at us. I sure hope we don't have to [illegible] one out because that one was enough to [illegible] me.

Editor's Note.—This is another of the interesting stories sent in by the children for the April competition.

Minister (to flapper): "Would you care to join me in the new missionary movement?"

Flapper: "I'm crazy to try it. Is it anything like the Charleston?"

NOTICE

[illegible] Weekly [illegible] Holiday in the Town of Tofield

Notice is hereby given that all shops, and places where merchandise or goods are sold by [illegible], will be required to close at 1 o'clock in the afternoon on each and every Wednesday during the months of June, July and August. This is required under the provisions of By-Law No. 212 of the Town of Tofield which was regularly passed pursuant to "The Early Closing Act of the Province of Alberta."

Dated at Tofield, this 23rd day of May, 1928.

J. W. Chapman,
Secretary-Treasurer.

"Mr. Florist," blubbed the great Bodalk, emotionally, "I been drinkin', been in poker games two days an' now I gotta go home and face m' wife. I want shome flowers."

"A difficult situation," responded the florist.

"Still, some appropriate blossoms may assuage the lady's wrath. What would fit her general characteristics? Roses? Daisies? The delicate jasmine flower?"

"Gimme shome tiger lillies."

MIKE'S GARAGE

LOCAL and PERSONAL

Born.—To Mr. and Mrs. W. F. H. Swinton, on Wednesday, May 30th, a daughter.

Born.—To Mr. and Mrs. Laroche, on May 28th, a daughter.

Mrs. Wallis and Mrs. Flanagan visited Tofield on the 24th.

Mr. and Mrs. Ross and family motored to Clyde on Sunday, returning on Monday afternoon.

Miss Thelma Edwards of Edmonton visited at the McLaughlin home last week.

Miss M. Bowick made a business trip to the city this week.

Glen Wood motored to Viking on Saturday, returning on Sunday with Mr. and Mrs. Rollans.

The Misses Clara Abbott and Minnie Wood motored to Camrose on Saturday.

Mr. and Mrs. McIleffey motored to Camrose on the 24th.

Mr. and Mrs. J. Whyte are now driving a Chevrolet Sedan.

Born.—To Mr. and Mrs. Jack Dioriais, on May 26th, a son.

The 24th, Victoria Day, was very quietly spent in Tofield, most of the citizens with cars, going to other points. Vegreville claimed some, Camrose others, while others went to the sports at Viking.

Mr. and Mrs. Lewis of Edgerton spent the 24th at the W. Bowick home. Miss Mattie Bowick returned to Edgerton with them and spent the remainder of the week with them there, returning on Sunday evening.

Word was received that Mr. Constantine's mother passed away at Toronto last week. It is expected that Mr. Constantine will return shortly.

Miss Minnie Hay, passed away after a lengthy illness, this week. The funeral, which was private, was also held this week, interment being made in the Tofield cemetery.

Mr. and Mrs. L. C. Hay motored to Holden on Sunday. Mr. Hay says there was no rain at Holden or Ryley on that day, and the mud was not reached until near Mr. Moen's farm. Then there was an abrupt ending of dry roads and a beginning of slippery, muddy ones.

The Mercury is sending out subscription notices to a number of subscribers. It is a matter of pride to any newspaper to have a fully paid up list. We would appreciate subscribers giving these notices their attention. If by any chance, your notice is incorrect, we will be pleased to correct it.

Sunday morning being fine but windy, several Tofielders made a motor trip to Cooking Lake. The first few hours spent there were pleasantly spent but during the afternoon a black cloud appeared on the horizon and the motorists made tracks for home. The storm, however, broke before they reached town and for several miles out they encountered muddy and slippery roads. They all reached home without mishap, but there were some anxious moments. The following are among those who made the trip: Mr. and Mrs. Clutterham, Blake and the Werton boys, Mr. and Mrs. McCann, Mr. and Mrs. McLaughlin and family, Mr. and Mrs. Bissett, Mr. and Mrs. Calvert, Mr and Mrs. Reeves.

TOWN OF TOFIELD

Re: Sanitary Conditions

Notice is hereby given that an inspection of sanitary conditions within the town was made on May 29th by a Provincial Sanitary Inspector, and a large number of outside premises and outbuildings, particularly in the business section of the town, were found in an unsanitary condition.

Notice is hereby given that the above mentioned unsanitary conditions must be cleaned up by Saturday, June 9th, after which date a further inspection will be made by an official of the Provincial Department of Health, following which, those still having unsanitary conditions on their premises will be prosecuted without further notice.

J. W. CHAPMAN,
Secretary, Local Board of Health.

BARDO

On the evening of June 15th, Mrs M. H. Conquest, the Red Cross Radio lady will talk in the Lutheran Church at Bardo, to the Bardo U. F.W.A. along the line of Red Cross work in Alberta. She will have lantern pictures illustrating same. No admittance will be charged. Everybody cordially invited.

The Joe Burkholder, John Stauffer and H. K. Brenneman families were guests in the N. E. Roth home on Sunday.

Among those who went to Vegreville from this district on the 24th were, the Rude, Jacobson, Emil Rude, and Pete Eggan families, and Olaf Anderson and Raymond Nordhus.

The pupils of the Grand Forks School had a short programme for all the parents on Friday afternoon May 25th. In connection with this the Bronze Plaque given by the Department of Education was unveiled.

Mr. M. Eide gave an interesting address and unveiled the plaque.

The children's singing was good and the exhibit of art work by pupils was splendid reflecting credit to the teacher.

Let all parents be more interested in the school work and give our teachers more support, it will help the work and encourage the teachers.

The Misses Anna and Mabel Jevning spent the week end with home folk.

Mr. and Mrs. I. Haugseth are leaving for Grande Prairie on Wednesday night to visit among friends and relatives.

Mr. and Mrs. Iver Moen had their little daughter christened at the Lutheran church last Sunday. She received the name of Ila Gwendolyne. The sponsors were Mr. and Mrs. L. Foshaug and Mr. and Mrs. L. Rolfstad of Ryley.

Mr. and Mrs. Axel Kindley also had their little son christened at the same time, he being named Harold Edward. Sponsors were, Mr and Mrs. A. Steen and Mr and Mrs Reuben Eide.

LINDBROOK

Rain at last! a welcome sight altho' by this we do not imply that we're in the dry belt, but it was needed just the same and will the crops wonderfully.

A pleasing little ceremony was performed at the school here on Wednesday afternoon, May 23rd. This was the unveiling of the [illegible] plaque presented by the Dominion Government to commemorate the 60th anniversary of Confederation. The Plaque was veiled with a Union Jack on a white ground [illegible] by the various [illegible] of [illegible] and was unveiled by Mr. J. Leahy, late of the Princess Patricia's Canadian Light Infantry.

Mr. W. Swift M.A. of Tofield gave a speech to the children explaining the reason of Empire Day and why celebrated. One thirty [illegible] during this, Mr Swift asked the children who else were [illegible] their Majesties the King and Queen, and one youngster [illegible] remembering bridge parties or whist drives at home [illegible] put up his hand and [illegible] the "Jack" also had a [illegible]. The children also gave speeches [illegible] the occasion and sang patriotic songs, etc.

Mr. E. W. Hooper was called to Edmonton on Saturday night to see his son, Lyndon, who was taken to the Royal Alexandra Hospital suffering from rheumatic fever. He returned on Monday and reports that Lyndon is doing as well as can be expected.

Mr. A. Campeau & C. [illegible] are [illegible] on section [illegible] brushing for Mr. Donald [illegible] who is having this clearing broken shortly.

Messrs. P. B. Anderson and M. B. Ness left for Banff last Wednesday. They are staying some time, trying the warm baths for rheumatism.

Willie Simonson and John Johnson made a trip to the Buffalo Park at Wainwright last Saturday. They report an interesting trip.

KETCHAMOOT

After many days of hot weather and high winds, the weather broke on Sunday evening with a grand and [illegible] which was beginning to be needed very badly.

For some unknown reason Mrs. Ed Cookson and Ed Ingram were unable to get the body of their brother William, shipped back from Chilliwack, B.C., for burial here, which was a keen disappointment to them. Their friends extend their sympathy to the brother and sister in their sad loss.

Mr. and Mrs. Wm Lee and daughter Viola and son Roy, motored to the city on Friday.

On Thursday afternoon, the 24th of May, Miss Lawson and pupils put on a patriotic program. A number of visitors were present who treated the children to treats of candy, peanuts and lemonade. Those present were Mrs. Carlisle, Mrs. Appleby, Mrs. Hanson, Mrs. John Brown, Mrs. Leslie McGinitie, Mrs. Coombes, Mrs. J. H. Ingram, and Mrs. Sears; the Misses F. Fawcett, Lilian Carlisle, Jeanette Brown, and Mildred Ingram.

Mr. and Mrs. Maurice McGinitie and Mr. and Mrs. Henry McGinitie were Edmonton visitors on Friday.

Mr. and Mrs. D. H. Mitchell, Mrs. J. Young and daughter, Mabel and son [illegible] motored down from Edmonton on Saturday evening and visited with their parents, Mr. and Mrs. Hugh Mitchell, and brother W. A. Mitchell, until Sunday afternoon.

Mr. Ed Ingram left Thursday evening for Chilliwack, B.C.

Mrs. Annie Johnson and son Jim left on Sunday morning for Williams Lake, B.C. Mrs. Johnson will visit indefinitely with her son Malcolm and wife. Jim will return soon, motoring back in his car which he was compelled to leave there last fall.

Born.—To Mr. and Mrs. Ernest Brick of Edmonton, on May 22nd, a son. Mrs. Brick will be remembered by many as Miss Susan Ratigan.

Mr. and Mrs. Geo Shaw, Mr. Joe Sutton and nephew Joe motored to Edmonton on Thursday. Mrs. Joe

The Beauty of Spring in the Land of the Maple Leaf

Spring is a resurrection of nature, and human nature also awakens to new hopes. A story of a being season is given when the rising of the sap signalises the budding of the tree, when the rivers sing a song of freedom and the birds add their songs to the voices of little children in streets or country lanes.

Though Spring and beauty can be found anywhere, it is in the country that it is ideal. Here one can watch the tilling of the soil, the plowing and planting that the earth may yield for the needs of man. Nova Scotia is delightful, for there the bustle and stress of the modern era does not exist. It is a part of that ancient country of Acadia, and it is one of the most beautiful provinces in the Dominion of Canada. There is no part of Nova Scotia more permeated with poetic legend and historic lore than the Annapolis Valley, Windsor, Grand Pre and Gaspereau. They were centres of events in the early history of the North American continent, for French explorers visited this section as far back as 1604.

Quebec Province in spring is equally lovely, and especially the rural districts near the fortified Old World city of Quebec. Old Norman farm houses sprawl along country streets for miles. Wayside shrines are many in this devout province. Glimpses are had through quaint courtyards or narrow galleries of women at their spinning wheels. Here, as in sections of Nova Scotia, time is apparently not fought for as elsewhere.

Quebec is lovely in May, especially during the Canadian Folk Song and Handicraft Festival, to be held this year from May 24-28. At the Chateau Frontenac one is transported into past decades, seeing the work of the habitants as they ply their shuttles of distaffs. The musical programmes are those of the early French Canadians, habitant melodies, brought over originally by the French of early days.

It is refreshing in this age to have a little of the peace of the old world, and Quebec is impregnated with an atmosphere of romance and pastoral beauty. Spring days quicken the wanderlust, and with the first notes of the meadow lark and robin the country attracts, and "Only the call of the long white road to the far horizons wall" lures and beckons in the unknown places, beautiful in Spring.

Is Champion Boy Orator

William Fox, Jr., Of London, Ont., Wins Oratorical Championship

Champion orator of Canada—William Fox, junior, of the Lasalle school, London, Ontario.

Second in oratorical honor — Miss Swanhild Matthison, Vancouver.

Third — Miss Alice Elizabeth Muse.

The winner was presented by J. R. Burnett, of Charlottetown, with a ticket for a free trip to Europe as the guest of the newspapers and committees in the various provinces associated in this educational enterprise and in the autumn he will represent Canada at the international contest to be held at Washington with competitors from Mexico, Argentina, Japan, Holland, United States and Germany. The runners-up get nothing out of their efforts but glory. Each of the young ladies was presented with a huge bouquet of roses as a mark of appreciation by the audience. Frederick Hilton, of Tavistock, last year's Canadian champion, was slated to be the first to congratulate Mr. Fox but the lady competitors "beat him to it" and shoving their bouquets under one arm reached out and grabbed him with the other the instant the decision had been announced.

Nearly eleven thousand people jammed into the great arena at Toronto to listen to the final contest for the oratorical championship of Canada under the auspices of Canadian newspapers, the Winnipeg Women's Canadian Club and the United Farm Women of Manitoba, with the Teachers' Federation of Ontario. Before the doors were opened at 7.30 long lines of ticket holders stretched out for several blocks in every direction.

The five contestants, in the order of their appearance on the platform were: Alberta, Miss Margaret Kinney of Victoria High School, Edmonton.

Manitoba, Miss Alice Elizabeth Muse of Robin Consolidated School, ...

WORLD HAPPENINGS BRIEFLY TOLD

Farmers' Marketing Tour

Canadian National Railways' Tour To Agent Britain and Denmark, 1928

(Continued)

Our first engagement on the following day was to visit Liverpool Cathedral, one of the most beautiful examples of modern architecture in Great Britain and the largest ecclesiastical building in the country. It is 584 feet long and will take in all 75 years to complete. It has now been building twenty years. This wonderful cathedral is exceeded in size only by St. Peter's, Rome, Seville Cathedral, and St. John's Cathedral, New York. The style is Gothic and the building material red sandstone. The roof is of solid copper. It is the first cathedral to be consecrated in the northern counties for 600 years.

The memorial chapel to the men of the diocese killed in the War is perhaps the most impressive part of the beautiful building. Here is to repose in a receptacle lined with pure cloth of gold a book containing the names of 40,000 men of all creeds who gave their lives in the Great War. The volume itself has taken eight years to complete and has cost $30,000. The chapel is ringed with the crests cut in stone of the various regiments. At one end is a "Window of Sacrifice" in which are depicted some of the great sacrifices in history. Flanking the Holy Table which is beautifully wrought in solid oak, are two life-size bronze figures of a soldier and a sailor.

The ceiling of the nave is the loftiest in the land, rising 116 feet above the floor and the stained glass window at one end of the nave is the largest in the country. The organ has 164 stops and 10,000 pipes and is electrically operated. It cost $150,000 and is the biggest in the world.

We had fallen so much under the spell of the beautiful cathedral that we had to hurry to keep our appointment with the Liverpool Produce Exchange, operated by the Liverpool Provision Traders' Association. It is organized for trading in pork products (bacons, hams, sides, lard, meats in pickle), in butter, cheese, eggs, etc., and is, therefore, directly interested in Canadian trade. Its dealings are spot and c.i.f. except in lard which may be either option or spot. Its lard option market is the largest in Europe. The actual trading is practically all done privately and a large amount by telephone. Considerable interest was shown in our visit by the members who gave us a cordial welcome.

CHAPTER XXIV. Continued

With the letter in his hand Jack sat looking at his polluted house—his poor desolate, violated house, the emblem of his own life. He had built that house with his own hands, lovingly, taking pleasure in driving every nail and fitting every board. And now—and now—so it had been with his life—he had lived it cleanly, decently.

Try as he would, Jack could not believe that Helmi had forgotten him or been unfaithful to her marriage vow. If the worst he feared was true, it was some racial fault in her. Helmi had not sinned as an individual. What did he know of her traditions? He felt he knew her but little, although she was his wife. Nothing could alter that—she was his wife.

A dog came whimpering to the door. As Jack opened it the sable collie, thin and miserable, sorely neglected since old Sim had gone, looked timidly in at him. Jack recognized the animal—the crazy Englishman's dog. Mrs. McHann said the Englishman had stayed at his house six weeks before. Here was the proof, and this explained the letters "Arthur Warner." Jack had never heard his name. He had seen him then—a strange, uncouth, unshaven fellow.

Restraining a first impulse to drive the dog away, Jack coaxed her to come in, which she did shiveringly. Her feet were sore, her nose hot. Jack went to the butcher shop and bought her some meat, which the ...

... night in his little broken house, every inch of which was so dear to him—the little house that had lost its soul.

When Jack left it he did not think of locking the door, although there were things in it, the stove, chairs, table, beds, for which he had paid his hard-earned money. But it did not matter now. His little house, which he had built so eagerly, had been violated.

Jack sealed his letters and returned them to the Post Office, then hired a team at the livery stable and drove to Dunnerman where he would catch a train for Edmonton. On the way he met the time-keeper, who apparently did not want to speak, for although Jack drew up his horses the other went on. Recognizing Jack he feared embarrassing questions in respect to the money which had been owing. The time-keeper had one rule—if trouble seemed near make a wide detour and get around it. Something might happen before it again comes near—someone might die—the world might come to an end—the coming of the war had made all things possible. So, instead of stopping when he saw Jack drawing up his horses, he hurried on.

Jack believed the time-keeper's reluctance to speak was because of what had happened, and his heart grew still heavier. A pale moon and starlight enabled the horses to follow the trail, leaving him free to pursue his own gloomy thoughts. He thought, with a stab of memory, of the words he and Helmi said across the running water. The stream was silent now in its fetters of ice and the marks of their feet in the soft, sandy banks had been obscured long ago. He wondered if Helmi had forgotten it—wondered, too, if he would ever be able to forget?

At the top of the hill, when the flickering lights of the little town ...

... in a place where you would not be pleased to find her."

"I don't care where she is—she is my wife and I will never believe that she had done wrong unless she tells me so. I know her better than you do."

"I am sorry for you, Mr. Doran, and that is why I am so patient with you. This Mitlander girl has gone back to her old associates, the Chinese like is in one of the all-night eating-houses. I suppose you know what it means when a white girl goes into one of these places."

Jack sat staring at him. "Who was your friend who saw her there?"

"I would rather not tell. It is not necessary that I should and he wrote in confidence. He knew I was interested. She evidently tired of the quiet life here—these girls crave excitement. There was some talk about her and the Englishman who owns the bungalow at English River. He stayed with her for a week before he enlisted. That is common talk at the mines. Men who are going out to fight, you know, like to take their fling."

He did not need to hurt his own thumb now. Jack Doran's face was enough. It had grown suddenly old and seamed and full of hatred. His nostrils quivered like those of a race horse.

He was about to go, but the magistrate waved him to a seat. "Mr. Doran, you were very indignant with me a year ago or a little less, when I dared to advise you. You were quite indignant, and of course I am ready to admit your feelings at that time were very creditable—very creditable—mistaken, but creditable. Since then you have had a bitter lesson, a very bitter lesson. I did not harbor any ill-will—on the contrary, I was still ready to be your friend. I was your friend, even though you scouted my friendship." Col. Blackwood leaned over, and his voice fell. "A man in my position does not expect thanks, we do not get thanks, but that is quite all right. We do not expect thanks, but I hope you see that I was trying to befriend you."

(To Be Continued.)

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the ...

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, flexibility, freedom from rust, and many other good qualities, make it adaptable to a multitude of uses, a chief one being as a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package.

THE WALKING STICK

Appears To Be Doomed To Pass Into the Limbo Of Forgotten Things

The walking-stick, so long the symbol of the Englishman at home or abroad, apparently is doomed to pass into the limbo of forgotten things or discarded things. A writer in the London Daily Express, after relating how thousands of walking-sticks are annually left in trains and street cars by absent-minded travellers, later to be sold at auction with other unclaimed articles, decides that the day of the cane has passed.

A walking-stick, I suspect, hates to be the despised appanage of a generation which never walks at all, he writes. The heart of a walking-stick is broken as soon as it is born.

The first walking-stick was a branch wielded by the ape-like man or the man-like ape in self-defence. Its evolution through the ages is a theme worthy of Hazlitt or Lamb or Beachcomber.

At least one volume would be dedicated to the Irish shillelagh. My first walking-stick was a blackthorn which my father cut down for me out of a hedge in County Down.

Then came the memorable summer day when my father showed me my own blackthorn growing in a hedge. I begged him to cut it for me at once. "No, James," he said with a whimsical smile, "it will not be ready to cut until Christmas!"

At least once a week we stealthily stole a glance at it, and always my small heart throbbed with delight in knowing that it was safe and secret. My father cut my blackthorn for me on Christmas day and dressed it for me with the skill of a craftsman.

Alas! We walk no more, and the walking-stick is a dandiacal ornament. It is anachronistic in this age that despises Shank's mare.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

PRE-NATAL DIET

There is a phrase respecting Motherhood: "for every child a tooth," which is to say that during the period of formation of the little life certain changes take place in the mother's teeth causing them to decay and be more easily lost. And this is so. But why?

For the rearing of the little structure that is so quietly proceeding, the little bone-builders in their construction of the bones and teeth depend chiefly on the calcium salts. Should the mother's diet be deficient in these building stones, the little workmen are obliged to go to the only other available sources of supply, the bones and teeth to meet their wants. Robbing Peter to pay Paul. If you will yet the little structure must be reared at all costs in such a case the mother's teeth are so structurally weakened as to invite disease.

Not only to avert this disaster to herself but keeping uppermost the welfare of the coming infant and remembering that she must contribute generously towards the influence that will make for normally developed teeth in her offspring, the expectant mother should select her diet with the utmost care. Hence she should choose plenty of lime-containing foods—milk, eggs, cereals, the leafy-topped vegetables and fresh fruits.

Following birth also, the demand for calcium in the mother's diet is still high since, with the infant feeding naturally, as it should, the mother's milk requires large amounts of these salts. An inadequate diet on the mother's part certainly affects harmfully her own teeth as well as those developing in the nursing child.

Moreover, it should be stressed that if the teeth are to be of good quality the infant should at this time be naturally fed. The ravages of tooth decay have been found to be much greater among children who as infants had been artificially fed.

The expectant mother should take at least a quart of milk a day in addition to her other food. This will ensure a proper start of the teeth in the jaws of the infant at birth and as well the proper bony development of the child generally.

TOASTED RAISIN SANDWICH

VANILLA JUNKET ICE CREAM

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."

British Columbia Poultry

Poultry and Egg Business Ranks High In the Province

The poultry and egg industry ranks high in British Columbia and the total value of eggs and table birds commercially produced within the province in 1927 is estimated at $6,...,000. In that year it is estimated there were 1,500,000 mature fowl on British Columbia poultry farms and in addition close to 2,000,000 young birds.

ALL CLEAR AHEAD

THE FELLOW that wrote "It takes a little rain with the sunshine to make the world go round," expressed something greater than the theme of his song. The rain of Sunday and the rain of Tuesday night and Wednesday morning, came at a most opportune time. With seeding practically finished, the moisture will give a send off to the actual growing season that could not be bettered. Farmers have their troubles—plenty of them—but it is a grand and glorious feeling to know that from one to three hundred acres of wheat and oats are receiving the one vital necessity, water, at the right time. May the season's finish be as good at its [illegible].

TO OUTLAW WAR

THE UNITED States Secretary of State, Mr. Kellog, has accomplished much. By putting into concrete treaties or agreements an anti war spirit, and approaching Great Britain and France with these agreements, and getting them assented to, no one can tell how much misery and loss of life has been spared.

No doubt, other nations, fired with a passion for peace, will also join the anti war circle, and the world will be the better for it. However, it must never be understood that two or three great powers can outlaw war as far as the entire world is concerned, and it must never be understood that an agreement made today, will not be subjected to tension and strain. While in many ways, the world has immensely improved with the passing of the ages, yet man's temperament has changed little. Man knows more, yes. He knows that war is futile and that the glory, in spite of heroes and heroic deeds, is largely a myth; he knows that broken hearts, broken lives and premature graves are the product of war and he now believes the price is too high. Men know this. They also know that no matter how brave, how heroic and how chivalrous a nation may be, its chances of winning a war are chiefly dependent upon larger armies, larger and faster ships, and more "modern" death dealing appliances. In other words, in a large measure, a war is won or lost before it is fought. Hence the "race" for armaments takes place with its consequent and inevitable breaking point, which either takes the form of a reduction of armaments proposal or an excuse for war.

Man still has the temperament of his forbears. He loves, hates, is pleased and displeased as much as they, and moreover, the desire for personal gain is as strong as ever. The real battle to be fought, now and forever, is between reason and passion, knowledge and feeling.

In spite of anti-war agreements now in force, if men that are to follow us, allow prejudice, fear, hatred, avarice and envy to over ride good will, fair dealing, wisdom and knowledge, the great nations of the world will in all probability engage in another war.

These are days of democracy. Universal suffrage prevails in many places. The best preventative of war is the common people themselves. It is they who do the fighting; it is they who bear the suffering. A plebiscite may be a slow way of settling an international question, but it nevertheless would give the common people of each country, time to see each others views. A better understanding of each others problems and a degree of tolerance, would do much to kill the "junker" spirit if there is any such spirit left in the world. The desire on the part of nations to banish war is praisworthy and encouraging.

FIRST OF JULY CELEBRATION

THERE WERE many people who were greatly pleased with the program put on by the Dominion Day Sports Committee last year. So much so, that we have heard it stated that if the council and rural council again undertook to manage the day this year, it would meet with general approval.

Sports day in a small town is essentially a children's day, and it is a good thing for the town, at least once a year, to invite the country people in, not for the purpose of swelling gate receipts, but to give them as good a time as possible. Given fine weather, there is no better day than July 1st.

JOHN LEE, Tofield

Here and There

(30)

Victoria. — The area of forest land in British Columbia dedicated to future forest production is 5,000,000 acres, according to a Government report.

Calgary. — Plans are actively under way by the Calgary Terminal Grain Company to build a seven hundred thousand bushel elevator at Vancouver it is announced by A. R. Botts, manager of the company. Mr Botts said that an eminently suitable site had been secured on the north shore, approximately opposite Spillers elevator.

Five special trains carrying around 1500 pilgrims passed through Montreal recently on their way to Quebec City and the shrine of Ste Anne de Beaupre also visiting the shrine of St. Joseph in Montreal on their return trip. They were from the church of St Aidan, Jersey City and under the care of Father Thomas M Curry, parish priest, were on their annual pilgrimage to these shrines.

Shipments of freight destined to points in the north-west of Canada via Port McNicoll, Ont., on the Canadian Pacific lake and rail route will now be accepted, the earliest date being April 9. There will be five steamers in the company's lake service between Port McNicoll and the head of the Lakes during the coming season. Through passenger service will be resumed this season from Owen Sound May 7 and from Port McNicoll, May 19.

Installation of Mack Tractors and Lapeer Trailers for rapid movement of freight from Canadian Pacific depots to and from outlying terminals has now been completed in Montreal and will shortly be in use in Toronto. The tractor is immediately attachable to one or more of these tractors which each can hold up to 15,000 lbs of freight and can be as swiftly disconnected. They are expected to immensely expedite the movement of C. P. freight.

Immigrants are flowing into Canada at record [illegible] since lately and Canadian Pacific steamers from [illegible] Britain [illegible] Europe are bringing them over at the rate of shiploads of close on a thousand per ship. The majority are farm laborers of British [illegible] Europe stock and are mostly going on the land in the Prairie Provinces with a fair proportion going to Ontario and the Maritime Provinces.

Winnipeg. — Despite the heavy movement of immigrants to the West during the past two weeks, more positions are open on western farms than the railways and employment agencies can fill, immigration and employment officers state. Thousands of vacancies, the officers said, had been reported. Likelihood of an earlier commencement of seeding operations is generally conceded in the West, they added and unless immigration continues at its present high peak the opening of operations on the land may find western farmers [illegible].

As the result of a conference between members of the Sheep Breeders' Association, financial representatives and members of the Winnipeg and Brandon Boards of Trade, a movement is under way for the placing of 100,000 sheep annually on Manitoba farms. These will be sold in groups of fifty to each farmer somewhat similar to the plan now in operation in North Dakota. J. D. McGregor was appointed temporary chairman of a committee to make further arrangements for the carrying out of this plan.

PASTURE TO RENT.—Four miles west of Bardo station. $2.00 per head for cattle for the season; $1.00 per month for horses. Good water. Apply to A. Campbell, on the place, or Tofield Post Office, or to Editor of Mercury. 10p

The Two Jims Weekly

Vol. 1. Wednesday, May 30 No. 1

Published in the Interests of the People of Tofield and District by Carver & Hannan, Editors.

EDITORIAL

We suppose everybody sometime has wanted to run a newspaper of his own. We plead guilty.

Worton of the Mercury says running a newspaper is full of grief, but if we insist he'll rent us this little corner each week and it'll be up to us to make good.

So we'll be here every week with The Two Jims Weekly in which we will talk about:
YOU PEOPLE
OUR COMMUNITY
ITS IMPROVEMENTS

and maybe a little bit about our business.

We'll promise to be interesting all the time, but we'll need your HELP with criticisms, comments, and contributions.

WRECKIN' SO
Hush little lamp post
Don't you cry
You'll smash a motor car
By and by.

Art Trent says [illegible] McCormack Deering Grain Drill has paid for itself several times over on account of increased crops as the result of proper seeding.

"The plot thickens" said the old man as he sowed more grass seed.

"That's some tractor" is the way Fred Wilde put it in speaking of his 15—30 H.P. McCormack Deering. He has had his tractor four years and has had practically no repair work.

We like to please and it pleases us to please another customer.

Leads Its Field in Style and Refinements

THE New Series Pontiac Six was designed and built in the belief that everybody admires style in a motor car.

So, in Pontiac Six, everybody can enjoy it!

Beautifully-proportioned bodies that tell their Fisher craftsmanship at a glance . . . Long, low lines and deep, massive radiator design . . . Rich harmonies of color in exterior Duco and interior trim . . . Delightful evidence of luxury in upholstery and appointments . . . PLUS the smoothness of Pontiac's powerful "Six" engine . . . the safety of Four Wheel Brakes and the comfort of Lovejoy Hydraulic Shock Absorbers.

No wonder the New Series Pontiac Six literally leads its field in style and refinement. Prove it all for yourself by a demonstration.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

Most Distinctive of Low Priced Cars

BUILT on a wheelbase of 107 inches—four inches longer than before . . . sweeping low to the road . . . and with its hood streaming back in graceful, unbroken lines to blend with contours of the Fisher bodies—the "Bigger and Better" Chevrolet is everywhere hailed as a car of outstanding distinction.

The new radiator is higher and narrower, and embellished with a large, flat, all-metal radiator cap. The hood is longer and deeper—vividly interpreting the greater stamina, staunchness and fleetness of the new chassis. Windshield posts are slender and graceful, bodies are beautifully beaded and paneled, hardware is of period pattern, and roof-lines are smartly low.

Interiors, too, are impressively rich—with new upholsteries, wide, restful seats, and a beautiful enclosed instrument panel—indirectly lighted.

Come, see this great new car—and you'll know why thousands have acclaimed it the world's most luxurious low-priced automobile. C-26-5-106

Cream Shippers

This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

YOURS FOR 300,000

THE TOFIELD CREAMERY
Alex Ross, Manager

It may or may not be true that "Life is what we make it," yet it is a fact that, for various reasons we deny ourselves things that would materially benefit us.

There are many farm houses in Alberta, yes in the Tofield district, that would be lighter and brighter, were there that wonderful light and power, electricity, available.

The Kohler electric light and power plant will at the push of a button or turn of a switch give the farm home brilliant healthful light and plentiful power. It will do more—in the barn, granary, cow shed, chicken house, where ever there is a light or power appliance—just switch it on and you get full rated power from the plant.

When you turn a switch the plant starts and stops when the last light is turned off. Thoroughly dependable. Thousands in use both on land and sea.

We recommend the Kohler as being America's best private lighting plant.

Now is the time to consider the installation of a plant for next fall's use. We will be pleased to give you prices and information regarding any particular installation.

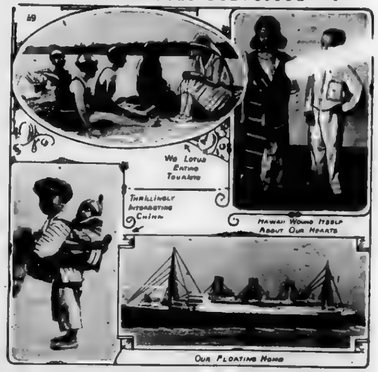
Seven Seas Traversed



Our Floating Home

We passed in luxurious comfort, free from any care or irritating responsibility and absolutely without one disturbing incident from continent to continent," stated Lady Williams-Taylor on her return from a world cruise on board the Canadian Pacific liner, the "Empress of Australia," during which tour five continents, twenty-one countries and twenty-six ports were visited and seven seas traversed.

"With sheltered ease," continued Lady Taylor, "we had unfolded to us the soul-penetrating magnificence and the somewhat repellent fanatical conditions of India and distraught, yet ever thrillingly interesting China. We steamed up and down the dangerous Pearl River, and saw first-hand the devastation of Canton. Mysterious Java, and almost untouched domains, held us spellbound. Singapore and its evergrowing docks amazed us, and lovely Ceylon enchanted us. But Hawaii wound itself about our hearts and, to its haunting 'Aloha Oe,' we saw it fade away through regretful tears. Not only are the islands more than fascinating, but the Royal Hawaiian Hotel would tempt any traveller to return.

"After such a wonder tour of 133 days," concluded Lady Taylor, "we 'Lotus Eating Tourists' have once again to face the realities of ordinary existence without the untiring supervision and perfect organization of the mighty and far-reaching Canadian Pacific Railway and Steamship's protection and care of us. It was, indeed, with hearts full of gratitude and appreciation for our splendid captain, his staff, and for the constant and devoted attention of the cruise directors, that we finally bid farewell to our floating home—the 'Empress of Australia.'"

"Does your wife talk very [illegible]?"

"I should say she [illegible] all of the [illegible] it'd take [illegible] weeks to find it out."

Let Us Celebrate

A year ago the people of Canada engaged with a very real enthusiasm in the celebration of Dominion Day the Diamond Jubilee of Confederation. It was, of course, an especially memorable anniversary and for weeks and months many committees of public-spirited citizens spent long hours in planning and preparation for the notable ceremonies which marked the [illegible] Canada's birth. The effect of that general [illegible] from sea to sea and the carefully planned and well executed [illegible] including educational and historical features of great value was [illegible] noticeable in the greater pride and [illegible] in Canada's [illegible] future which was displayed by the Canadian people.

The year [illegible] since elapsed has been a year of expansion and prosperity throughout the Dominion. Steadily, even rapidly, the Dominion of Canada has grown in national stature and in international importance. It has commanded and continues to command, an ever increasing interest [illegible] outstanding men and women in realms of government, education, [illegible] commerce and industry not only in Canada, but throughout the world have referred to this Dominion as among the most favored of all and the one country above all others which today offers the greatest opportunities and the brightest promise for the future.

The [illegible] celebrations of a year ago helped to arouse and to stimulate the [illegible] consciousness of the Canadian people and, because [illegible]

[illegible]

It is gratifying to note in the columns of the weekly papers of Western Canada that steps are being taken in an unusually large number of communities to again fittingly celebrate Dominion Day this year. But the number [illegible] will be largely increased, and it is earnestly to be hoped that [illegible] where, as yet, no definite action has been taken to [illegible] committees for a proper celebration of Dominion Day, [illegible] no further time will be lost in taking such action. It is a duty we owe [illegible] growing youth of Canada that they be taught to observe the natal [illegible] of their country and [illegible] through observance of Dominion Day a true [illegible] for and pride in Canada be developed.

Winnipeg Flying Field

Winnipeg Flying Club Expect To Have Finest Field In Western Canada

A flying field which, when work on it is completed, is expected to be the finest in Western Canada, has been secured by the Winnipeg Flying Club. It will be ready for the operations of the club shortly when two Moth planes will be received from the Dominion Government and the organization will start its summer flying. The field is 125 acres in [illegible] high and level, in St. James municipality. Hangars capable of housing half-a-dozen planes will be constructed and an imposing club house will be built on the Sackville St. side of the aerodrome. It is also planned to lay out tennis courts on the aerodrome for the use of the members and their friends. Half a hundred men, many of them war fliers, have already taken active memberships in the club and the number of associate members is growing daily.

SAME SYMPTOMS IN MANY CASES

An Anaemic Condition Easily Recognized—Calls For a Blood Builder

In most cases of anaemia the symptoms are almost the same. The sufferer grows pale and is easily tired after the least exertion. The appetite is fickle and the patient loses in weight. Sometimes there are headaches, and often inability to sleep well. As the blood becomes thinner the symptoms become more pronounced and often there are fainting spells. All this shows that the blood is thin and watery and at the very first symptom of this condition the patient should take Dr. Williams' Pink Pills, the most reliable blood-builder and nerve tonic known. The sole mission of this medicine is to enrich the blood, and when that is done all the distressing symptoms disappear. Among those who have reason to praise this medicine is Mrs. M. K. Patterson, Shanklin, N.B., who says:—"About four years ago I became very much run down, I could not eat, sleep nor rest, and I grew so nervous that the smallest things would annoy me. Eventually I grew so weak that I did not have strength to move about without help. I was just a miserable wreck, and became very much discouraged as I had tried many medicines which failed to help me. In this wretched state a friend urged me to try Dr. Williams' Pink Pills. I did so and before long found they were helping me. Gladly I continued taking the pills until I fully regained my health and strength and I have since continued to the best of health. Later my daughter became anaemic and six boxes of the pills restored her to health, strength and color. Naturally I consider Dr. Williams' Pink Pills a blessing to weak run-down people."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Made in Canada – No Alum!

OUR MERCHANT MARINE

Renders An Important Service To People Of Canada

The annual report of Canada's Government Merchant Marine by its [illegible] justifies those critics who hold that the ships are an enormous and serious drain upon the Treasury and that they should be sold. It is true that there was an operating loss in 1927 of $720,000 as against $90,000 in 1926, but, on the other hand, the improvement over the 1925 showing was more than $200,000, and almost $700,000 over 1924.

The past year was not a good one for shipping, no matter how operated. There was a shortage of cargo tonnage, this producing increased competition which resulted in reduced freight rates. "During the latter months of the year," says the report, "the volume of traffic moving from Canada to the United Kingdom became reduced, with the result that earnings of steamers trading to the United Kingdom were seriously lessened."

With brighter prospects for 1928, the next annual report of the Merchant Marine may well be of a more cheerful character. Nor must it be forgotten that, apart altogether from profits or surpluses, the Merchant Marine renders an important service to the Canadian people. It undoubtedly provides traffic for the Canadian National Railways, it advertises Canada abroad and it is a measure of protection for Canadian exporters from private shipping rings.

It is possible, of course, to pay too highly for such things, but, having regard to all existing conditions, and in view of future prospects, the time would hardly seem to have yet arrived when the Government could sensibly dispose of the ships of the Merchant Marine, especially at existing prices.

Mechanical Man Is Assistant To Doctor

Administers Anaesthetic In Exact Amount Required and Mistake Is Impossible

The Toronto Mail and Empire recently published the following special dispatch from Baltimore, Md.:

"A Robot, or mechanical interne, believed to be the first of its kind in the world, has been devised by a professor at the University of Maryland for use in the medical and surgical field.

"This machine, called an automatic anaesthetiser, was invented three years ago to be used in connection with experiments being conducted by the Department of Pharmacology. Not only does this new Robot do away with the necessity of having a special doctor, nurse or orderly to administer the anaesthetic during operation, but it also prevents an under or over-dose, and uses the exact amount necessary to keep the patient in total unconsciousness.

"The general principle of the machine is based upon the variation of pressure in the lungs of the patient during respiration. Danger of fatality is held impossible."

Will Have To Wait

A native of Poland, for some time a resident of Oshawa, Ontario, went into one of the railway ticket offices there recently, and wanted to know if he could get a cut rate on one of the "seaplanes crossing the Atlantic." He was told to come back later.

The salaries and wages in Canada's forest industry total annually about $100,000,000.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

For a City Beautiful

To make Ottawa second in beauty [illegible] of the capitals of the world, is planned in a measure which proposes the expenditure of $200,000 annually for 30 years, with an immediate outlay of $3,000,000. One of the principal features of the improvement scheme is the formation of a large central park.

Among some Indian tribes of North America it is customary to cut the hair of widows and forbid them to remarry until their hair has grown again to its original length.

A Tire For Your Every Need

Firestone Dealers offer you a complete line of tires, each supreme in its class, headed by the famous Firestone Gum-Dipped Balloon. All are [illegible] by Firestone in the world's most economical tire plants—an assurance of the most for your money.

Firestone distributes tires only through regular service-giving dealers direct from Factory branches and authorized distributors — never through mail order houses or so-called special jobbers.

Takes Place Of Sight

Gauges In New Airplane Enables Pilot To Fly Blindly

An aeroplane which can find its own way about is the latest wonder.

This has been invented by a French aircraft designer. A new set of gauges which a pilot can learn to read in a few hours takes the place of human sight.

Twelve French pilots were the first to give the new machine a trial. At the beginning each was inclined to spiral and then to wobble a little but when they had become used to their instruments they were able to control their machines perfectly.

They flew blindly to a point thirty miles away, turned, and came back to the take-off. The new invention should be invaluable for flying by night or in fog.

The highest peak in the Canadian Rockies is Mount Robson, in British Columbia. This mountain has an elevation of 13,972 feet above sea-level.

The judgment of Solomon was great but he never tried to umpire a baseball game.

Acid Stomach

[illegible] the common [illegible] of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

Appointed Danish Consul

H. P. Madsen Will Represent Danish Government In Northern Alberta

H. P. Madsen, of the Edmonton City Dairy, has been appointed Danish Consul for Northern Alberta with headquarters at Edmonton. Increasing Danish settlement, estimated at 3,700 in 1927, is given by the Danish Government as the reason for the establishment of the consulate. The territory will likely extend from Red Deer north.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

British Army Men For Canada

Will Arrange To Place Demobilized British Soldiers On Land Here

Col. J. H. Hibbard, Commandant of the British Army Training Centre at Chiseldon (Wiltshire), England, is now in Canada planning to draft out large numbers of demobilized British Army men to Canadian farms if satisfactory arrangements can be made with the Government and other organizations. Up to the present most of these men have gone to Australia, the Colonel states, where they have done splendidly. The course of farm training is thorough and begins six months prior to actual discharge from the army.

People of 65, according to a British M.P., don't go to work for the love of it. Other people who likewise don't go to work for the love of it are those of 25, 35, 45 and 55.

If ignorance is bliss, why isn't there more happiness in the world?

Minard's Liniment for insect bites.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Aeroplane Service For West

Expect To Establish Flying Service Between Winnipeg and Pacific Coast

With the ultimate object of establishing an aeroplane service between Winnipeg and Pacific coast cities, the Western Canada Airways Limited has purchased the Pacific Airways Limited, Vancouver. Plans have already been made to extend the activities of the Pacific Company to take in part of Alberta and a larger territory on the seaboard.

[illegible] disappear when treated with Holloway's Corn Remover without leaving a scar.

Hat Brings High Price

One Of Napoleon's Sold Recently For Fifteen Thousand Dollars

One of Napoleon's hats, a well-worn specimen, has been sold at auction for $15,000. The hat will not leave France, since it was announced that the purchaser was a French army officer. The hat, in the shape made famous by Napoleon, was accompanied by a certificate guaranteeing that it had been sold by his valet in 1814 to an old clothes man.

For Rheumatism use Minard's Liniment.

A London vicar has proposed the charging of an extra fee of $1.25 for weddings where confetti is used, to pay for the extra work of cleaning afterward.

Shanghai's largest hospital uses only a pound of morphia a year.

Here's How —

You Can Always Keep Your Farm Buildings in Good Repair

GYPROC Advantages for Farm Buildings

Easy to use. Low cost. Workable as lumber. Cannot warp, bulge, crack, shrink or burn. Takes any decoration. Resists heat and cold. Vermin proof. Eliminates repairs. Protects your stock. Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings. Especially suitable for converting attics and basements into extra rooms.

THOUSANDS of farmers have learned how easy and economical it is to keep farms up-to-date with Gyproc. Whenever repairs or alterations are required—whenever new buildings are needed—they rely on this famous fireproof wallboard.

For fast, economical, fireproof construction there is nothing to equal Gyproc. It cannot warp, crack, shrink, bulge or burn. Its million-celled rock insulation protects stock from cold, heat and vermin. Saves time, saves labor, saves fuel—the easiest to erect and most satisfactory Wallboard you can buy.

THE MERCURY, TOFIELD, ALBERTA.

DOMINION IS INVITED TO SIGN U.S. PEACE PLAN

Washington, D.C. — Expressing keen satisfaction that the British Dominions had been so favorably inclined towards the treaty for the renunciation of war which the United States Government proposed on April 13, 1928, as to wish to participate therein individually and as original signatories, Secretary of State Frank B. Kellogg has extended to Canada a cordial invitation to become one of the primary parties to the treaty for the renunciation of war which is now under consideration.

Secretary Kellogg's note on this subject was despatched to the Canadian Government through Hon. Wm. Phillips, American minister at Ottawa. An identical note has been sent to the governments of Australia, New Zealand, South Africa, the Irish Free State and the government of India.

The American note refers specifically to the treaty to outlaw war as an instrument of national policy, to which all the great powers have [illegible].

No mention is made to a further proposed treaty to provide machinery for the arbitration of international disputes. This second treaty in the case of the British Empire would replace the Root-Bryan arbitration treaty, which is about to expire.

Shows Regard For Dominion

Submission Of U.S. Peace Plan "Pretty Compliment," Says London Paper

London. "Frank B. Kellogg, Secretary of State for the United States, has paid the British Dominions a pretty compliment in officially communicating to each of them the United States' proposal for a treaty for the renunciation of war before approaching the minor powers in Europe," says the Daily Telegraph.

"Of course the position of the Dominions is different from that of the minor European powers. On all big international issues and great international conferences since 1919 the British Empire has been represented by an Empire delegation, including delegations from all the Dominions.

"Still, Mr. Kellogg's gesture argues a regard and friendliness for the Dominions which they and the Empire as a whole cannot fail to appreciate."

May Not Be Nominated

Reported That Hoover's Chances For Republican Nomination Not So Good

Washington. It is the well-founded fear in informed and influential Republican circles here that Herbert Hoover, prospective candidate for the Republican presidential nomination, cannot carry the country against Governor Alfred E. Smith, of New York, whose nomination as Democrat candidate seems assured, and this fear may eventually block Hoover's choice as party leader.

Hoover has identified himself with every policy of the Coolidge administration and is the popular Republican candidate. His nomination, however is far from assured. The formal opposition to his candidacy within the party is fairly strong and well organized.

Want Censor Committee

Toronto Men Would Have Books and Magazines Checked

Toronto. At a conference between publishers, literary men and the police department to consider the advisability of appointing a committee to censor books, magazines and other periodicals against which complaints are made to the police it was decided to communicate with the Dominion Government and ask them to select a committee to act for the Dominion. If this cannot be done an effort will be made to appoint a committee here.

Memorial To General Booth

London. The foundation stones of the Salvation Army training college which is to cost $1,625,000 have been laid. The building is being erected at Denmark Hill, in the Southeast of London, as a memorial to General [illegible]

Sir Arthur Currie Ill

Montreal. General Sir Arthur Currie is confined to his home here recuperating from a slight illness. It is understood that Sir Arthur will visit Europe after McGill University closes for the summer holidays.

Denies Dealing In Immigration Permits

Former Solicitor-General Declares Charge Is Wrong

Ottawa.—Hon. E. J. McMurray, former Solicitor-General, denied absolutely before the parliamentary immigration inquiry that he had dealt in immigration permits for $100 apiece as charged by Alderman M. J. Coldwell, of Regina, before the immigration committee.

"I was astounded and stunned to read in the papers the statements of Mr. Coldwell," Mr. McMurray said. "I denied it and welcomed the opportunity of [illegible] before the committee and clearing away the charge. I was glad to read the denial of the minister of immigration. What he said was true. I have had no dealings with Mr. Forke since he has been in office."

Mr. McMurray explained he had been elected in 1921 from North Winnipeg, which was half foreign born. Many of these people wished to bring relatives to Canada.

"I assisted them, but I never charged them a cent," he said. The numbers had become so great that later on he had charged them telegraph costs and such things. Then he had turned them away.

The records of Mr. McMurray's law firm of 1922 showed that seven applicants had been handled by his firm "in a strictly legal way."

The legal fees charged varied from $15 to $50. After his return to Winnipeg in 1926, four cases had been handled at fees of $25 each.

Frown On Sunday Labor

Alberta Will Take Steps To Enforce Lord's Day Act

Edmonton. — Attorney-General Lymburn is instructing the Commissioner of Provincial Police to notify all police detachments in the province that it will be the policy of the department to secure a wider and better observance of the law in respect to Sunday work.

The local police will be expected to co-operate with the citizens in maintaining respect for the provisions of the Lord's Day Act.

Mr. Lymburn points out that under the extreme weather conditions that have prevailed at critical periods of the past two years, considerable leniency in regard to the Sunday law has been exercised, because a certain amount of Sunday work on farms was unavoidable.

He says that this is not, however, to be taken as establishing a precedent, and the law of the land still stands. An effort is now being made to appeal to the interest and good judgment of the general public in the direction of better observance of the day of rest.

Endorses Peace Treaty

Kellogg Plan Would Make Armies Useless Says Ramsay MacDonald

London. When the great powers sign the treaty suggested by the proposals of the United States Secretary of State Frank B. Kellogg, the armies and navies of the world will shrivel up, Ramsay MacDonald, former Labour Premier, declared before the American Chamber of Commerce at a luncheon.

"Sign a multi-lateral pact outlawing war," said the leader of the opposition in the House, "and those false securities we have faintly trusted, these defensive armies which have never protected us, will disappear, because they are useless."

Mr. MacDonald described the Kellogg peace note as "this magnificent declaration of simple fact."

With one part only of the British reply Mr. MacDonald found fault — that regarding self-defence.

"When such a treaty is signed," he said, "self-defence becomes unnecessary and any aggressor immediately becomes an outlaw."

Shrine Destroyed By Fire

[illegible] Statuary constructed during the time of the French revolution was destroyed in a fire at the Sacred Heart shrine near Lebret, Sask., east of Regina. The shrine was levelled. Origin of the blaze has not been ascertained.

Japs Return Prisoners

Tokio. — Advices from Tsinan, Shantung, say that after conference with the Nationalist authorities the Japanese agreed to return to the local Chinese police all prisoners and munition taken there in the recent trouble.

Another X-Ray Martyr

Rio Janeiro, Brazil.—Another martyr to the X-ray is dead. Dr. Alvaro Alvin began research in 1896 and notwithstanding loss of both hands continued his work until a few days ago.

Thornton Will Serve On League Committee

President Of C. N. Railways Has Accepted Appointment

Geneva. Sir Henry Thornton, president of the Canadian National Railways, has accepted an invitation to serve as a member of the League of Nations Railway Committee.

Major-General Raymond D. Candolle, former manager of the Great Southern Railways of Buenos Ayres, also has accepted an invitation to serve.

Montreal.—Sir Henry W. Thornton, K.B.E., chairman and president of the Canadian National Railways has accepted an invitation to become a member of the railway [illegible] of the advisory and technical committee on communications and transit of the League of Nations, it was announced here.

The sanction of the Federal administration to the acceptance of the invitation was given to Sir Henry by the Prime Minister and by the Minister of Railways and Canals.

As Sir Henry may not be able to attend some of the meetings, permission has been given to F. A. Clews, European traffic manager of the Canadian National Railways, located at London, to represent him when occasion requires.

AWARDS ARE MADE COVERING WAR LOSSES

Ottawa. — Canadians have been awarded $6,289,169.24 as war reparations against Germany in a report by Commissioner James Friel, K.C.

The total amounts include $4,246,[illegible].75 assessed in favor of the claimants, and $2,042,520.30 representing five per cent. interest on all awards calculated to March 10, 1928.

Claims dismissed by Commissioner Friel totalled 150 and involved $21,[illegible]4.944.03. Eighty-seven claims, totalling $4,301,344.40 are dismissed in the report with the notation "no action, claims withdrawn, or not pressed, may be considered dead."

The records the report states, cover loss of life and property on the British ocean liner Lusitania sunk by a German submarine off the coast of Ireland on May 7, 1915; on the Hesperian sunk by enemy submarine September 4, 1915, and on other passenger and merchant vessels; merchandise lost on ships torpedoed; claims of fishermen and owners of fishing vessels sunk by submarines or raiders; claims for property destroyed in enemy territory; internment claims, claims of insurance companies for war losses; air raid claims; claims of ship owners and charterers, claims in respect to nurses and soldiers in hospital ships sunk; claims in respect of the Halifax explosion and other miscellaneous claims.

The awards of 1,612 claims dealt with range all the way from $20 to $366,000. The largest amounts are awarded under the headings of steamship losses, which include $334,316 awarded the Canada Steamship Lines, $346,000 to the Dominion Coal Company; $300,000 to the Dominion Iron and Steel Company, and $105,000 to the Nova Scotia Steel and Coal Company.

The T. Eaton Company, Limited, is awarded $128,796.15 for merchandise lost on 19 vessels and goods seized at Antwerp. The total amount of this claim aggregated $163,231.19.

Sentenced For Mail Theft

Toronto.—Charles L. Pettit, local postman, was sentenced to four years in penitentiary for the theft of letters from the mails.

CHIEF JUSTICE OF ONTARIO

Right Hon. Sir William Mulock, chief justice of Ontario, who was chairman at the Canada oratorical championship held in Toronto, May 16.

Says St. Lawrence Scheme Unnecessary

Report Given To Senate By Shipping Federation Officials

Ottawa. —"It is our firm conviction that as far as Canada is concerned the project is untimely and unnecessary," said A. L. W. MacCallum, manager of the Shipping Federation of Canada, to the Senate Committee on waterways with respect to the St. Lawrence project.

Mr. MacCallum assured the committee that the organization which he represented was concerned only with ocean shipping and that it was not wedded to any particular port or ports in Canada. It felt, however, that the immense expenditure on such a scheme as the St. Lawrence waterways could only be justified if it was proven that the benefits would be large.

The Federation had given special consideration to the matter and it has come to the conclusion that the expenditure at present was not warranted.

Buys Another Airplane

Baron Huenefeld Now Owns Sister Ship To the Bremen

Albany, N.Y.—Baron Gunther von Huenefeld, backer of the first successful westward flight across the North Atlantic, has purchased the Junker's plane Europa, sister ship of the Bremen, but what flight he plans in the new plane, are a matter of conjecture.

One report is that the German Baron, Captain Koehl, and Major Fitzmaurice, would attempt a return flight to Europe, having the new plane shipped to New York from Germany. Baron von Huenefeld, however, denies that such are his plans.

He said it was possible that the plane would be shipped to Ireland, and that he and Koehl would fly it there to Germany, but that the plans were indefinite.

Honors Go To B.C.

Crescent Beach, B.C. — William Brankston, son of Mr. and Mrs. W. Brankston, of Nanaimo, a pupil of St. George's school, Crescent Beach, won a special prize awarded for geometrical drawing by the Royal Drawing Society of London. He took five honors and a pass for first place in the world, it is claimed, leading against 73,000 contestants.

Cost of C.N. Equipment

Ottawa. The Canadian National Railway purchased $36,074,219 worth of equipment in Canada from 1922 to 1927, inclusive, it was stated in reply to a question in the House.

Scots From China

J. S. and Mrs. Calder are Scottish but their sons are Chinese if one is to derive nationality from place of birth. The passport problem was a puzzle but was solved in one way or another, for here they are "All aboard the C.P.S.S. 'Melita.'" J. S. Calder, sen'tor, has resided in China for twenty-seven years and his sons spoke their native tongue before they learned English. They go to England to school.

Gives Life To Aid Science

Doctor Studying Source Of Jungle Fever Succumbs To Disease

New York. An expedition into Africa in an attempt to discover the relation between South America and African yellow fever resulted in the death of Dr. Hydeyo Noguchi, of the Rockefeller Institute for Medical Research, the institute was advised.

Dr. Noguchi, discoverer of the source of South American yellow fever in 1916, died at Accra, West Africa. Recently he wrote to New York friends that he had been stricken with African yellow fever and had been in an African hospital from December 26, 1927, to January 9, this [illegible].

He said his own was the first case of the disease to come under his observation and that from his bed he had directed the innoculation of a monkey with some of his own infected blood. The animal died 12 days later and additional experimentation, his letter said, disclosed the micro-organism responsible for the disease.

Coarse Grain Payment

Saskatchewan Coarse Grain Pool Making Second Interim Payment

Saskatoon, Sask. A second interim payment amounting to $740,361 is being mailed to members of the Saskatchewan Coarse Grains Pool. This represents a payment of 5 cents a bushel on all grades of oats except a few very low grades, and 10 cents a bushel on all grades of barley, flax and rye. This brings total payments to growers by the Coarse Grain Pool for the 1927 crop to the level of 53 cents a bushel for 2 c.w. oats, 73 cents for 3 c.w. barley, 1 n.w. flax, $1.75 per bushel; and 2 c.w. rye, 95 cents per bushel basis Fort William.

ROYAL SOCIETY HONORS THREE FELLOW MEMBERS

Winnipeg. — Distinguished scientists and scholars honored three fellow members of the Royal Society of Canada, in annual meeting here when outstanding awards were conferred on Bliss Carman, Canadian poet; Dr. A. P. Coleman, F.R.S., of the University of Toronto, scientist, and Dr. Thomas Chapais, of Quebec, [illegible].

To the distinguished Canadian poet was awarded the Lorne Pierce medal, Dr. Coleman was the recipient of the Flavelle medal, and Dr. Chapais received the Tyrell medal, the highest awards which science and literature can bestow in Canada.

The presentation of awards made by Professor A. H. Reginald Buller, F.R.S.C., of Winnipeg, president of the Society, featured the evening session held at the University of Manitoba.

Many papers on important scientific problems and addresses by outstanding historians were delivered before various sections of the society.

An interesting paper was presented by W. P. Thompson, of the University of Saskatchewan. He displayed slides showing the effects of crossing wheats of various strains, how the chromosome numbers of wheat could be calculated in second generation plants, and many important points in the practical breeding of grains.

Wheat, for example, he said, can be crossed with rye, provided wheat is the female parent, but not if it is the male.

A sum of $33,000 has been placed at the disposal of the Royal Society as the nucleus of an endowment fund by the Carnegie Corporation of New York, it was announced by Sir Robert Falconer, president of Toronto University.

The amount, he stated, will be retained exclusively for endowment purposes.

In reporting to the convention of the Society Sir Robert said that the endowment committee had given consideration to the [illegible] of raising a fund that would enable the society to be [illegible] independent. The Dominion government, he said, so far had only given $8,000.

Other assistance, however, was being sought.

Sixteen new fellows were declared elected to fill vacancies in the council. They are: Sir Robert L. Borden, W. H. Boyd, Ottawa, Robt. H. Clark, Prof. J. S. Delury, Prof. D. C. Harvey, of the University of Manitoba, L. L. Stines, Saskatoon, Geo. W. Scarth, Montreal, Stanley Smith, Albert Ferland, Rev. Father Hugolin, Oskar Klotz, B. R. MacKay, Right Rev. P. X. Ross, James Malcolm Swaine, W. Stewart Wallace and W. T. Waugh.

DIRIGIBLE ITALIA MAKES FLIGHT OVER NORTH POLE

King's Bay, Spitzbergen. Coated with much ice and fighting a strong southwest wind, the dirigible Italia was slowly making her way back to her base at King's Bay after a brilliant flight to the North Pole.

Gen. Umberto Nobile, successful in his second dirigible flight to the top of the world, sent three historic messages from the Pole, one to Pope Pius, telling the pontiff that he had dropped the oaken cross entrusted to him on the North Pole from the Italia, and the others to King Victor Emmanuel and Premier Mussolini.

While over the Pole the flags of Italy and Milan and various other souvenirs were dropped.

The cross, which was about eight feet high with a metal base, had a repository in which was placed a message written in Latin by Pope Pius.

For two hours the dirigible cruised over the pole, reaching that spot at twenty minutes after midnight, nineteen hours and forty minutes after leaving King's Bay.

At 2.20 a.m. the return flight was begun, the dirigible following the 24th meridian to the half way point about 250 miles from the pole and then turning for King's Bay.

General Nobile had planned to land several men at the pole to make observations, but the messages received at King's Bay indicated that this part of the plan had not been carried out.

Takes Responsible Position

Lindbergh Given Full Charge Of Big Air [illegible]

New York.—Col. Charles Lindbergh, who has been out of a regular job since he quit the air mail service more than a year ago to fly from New York to Paris, has gone to work for the Trans-Continental Air Transport Corporation.

Lindbergh's new position is a "full time job," his employers said. As chairman of the corporation's technical committee, the famous ocean flier will have charge of selecting airplanes, motors, safety devices, routes, and flying schedules for the new coast to coast air mail service.

It is up to Lindbergh to say how soon the new 48-hour passenger service between New York and San Francisco can begin. The colonel already has given some time and considerable thought to the problems of his new job and it is believed the service may be inaugurated within six or seven months.

Four other aviators will serve on Lindbergh's fellow committee with C. M. Keys, president of the transport corporation, who announced the signing of Lindbergh, said the colonel's aides on the technical committee would be men "of long experience and proved ability."

Alberta Forest Fires

Fire Raging On Both Sides Of the Athabasca River

Calgary. Fire is raging on both sides of the Athabasca River where it joins the Slave River at Smith, divisional point of the Edmonton, Dunvegan and B.C. railway, a telegram informed the Calgary office of the Dominion Forestry Branch.

J. R. Hall, supervisor of the Lesser Slave National Forest, is in charge of fighting the fire. It is not in the National forest but in the near vicinity.

T. F. Blefgen, district supervisor of fire protection, said that the fire hazard in the whole Northern portion of the province was dangerously acute owing to last year's growth of rank grass and absence of rain to any extent so far this season. No damage has been reported.

"If present weather continues it will be very difficult to keep the fires under control," Mr. Blefgen said.

Send Ship For Bremen

St. John's, Nfld. The steamer Sagona, which left Humbermouth, Que., will endeavor to reach the scene of the Bremen, stranded on the Quebec-Labrador coast, and if the famous monoplane can be salvaged the Sagona will bring it back to Humbermouth. The Bremen was seriously damaged when it attempted to take off from Labrador recently.

Many Dead In Mine Disaster

Mather, Pa. The ill-fated Mather mine scene of a disastrous explosion, continues to give up its dead. The known death toll reached 82 and mine experts said that all other missing men numbering 113 would be added to the list of dead.

TOFIELD PITCHING ACE IS "GENERAL" NOW

Editor's Note.—The following, taken from a New Westminster Newspaper will be good news to the many Tofield admirers of Howard Lee, not long since pitcher for the Tofield nine.

New Westminster May 12.—"General" Lee, recently acquired pitcher of the Fraser Cafe team, has entered the Royal City's ball of fame. Last night at Queen's park, in a New Westminster and District league "A" baseball game he held the strong Fraser Millers to the palm of his hand for nine innings. He only allowed three base hingles, struck out ten of McLeod's best, worked a home run into the centrefield grandstand, spacing Lacey ahead of him, and gave Jack Morgan's Cafeterians a 5—0 victory. The Lumbermen never got past second base. It was the first loss suffered by the Lumbermen this season.

HAY LAKES CAR IS STOLEN AND RECOVERED AGAIN

On Saturday of last week, Mr. and Mrs. Keil of Hay Lakes motored to Edmonton in a Buick Roadster.

At a garage on the north side, Mr. Keil had the gas tank filled and the crankcase filled with fresh oil. Then, having some shopping to do, they drove from place to place loading up the car with various parcels. While making a few final purchases at the market square, the roadster was stolen from where it was parked a block away.

The police were immediately notified, but the car was not recovered until Monday when it was found parked on Alberta Avenue. It had been driven over two hundred miles, theives realized this and abandoned and the majority of the parcels it before they were caught red handed which it contained had been stolen. od.

KINGMAN

Born.—To Mr. and Mrs. T. Grahn, on Wednesday, May 23rd, a son.

Mrs. T Hortis, Mrs P. Simonson and Mabel, Mrs. E. Erickson and Mrs. H. Haugen visited with Mrs. L. Ergo on Thursday

Miss Helen Hyckert of Camrose spent a few days at her home here.

Mr and Mrs. H Brau motored to Hay Lakes on Thursday

Mrs. R. Holvik, Mrs. Ovelson and Mrs. E. Erickson were the afternoon guests of Mrs. C. R. Hyckert on Friday.

Mr and Mrs. O. Thompson and Mrs. Ed. Thompson motored to Cold Lake last week.

BEE CAREFUL

You never hear a bee complain,
Not hear it weep and wail,
But if it wish it can unfold,
A very painful tail.—Goblin.

Father "Well, do you think you can make my daughter really happy?"

Suitor: "Say, you should have seen her last night."—Exchange.

Mrs. Keil's coat which had been left on the seat was still in the car.

The roadster is an awkward one to steal, there being less than half a dozen of this particular model in the province. Evidently, the thief or thieves realized this and abandoned the car.

KEITHAMOOT

(Continued from front page)

Sutton returned home with them.

Mr. G W. Fears and Stanley motored to Mr Achley's at Rose Creek on Wednesday., Stanley driving home a tractor to be used in breaking.

The first ball game of the season was called on Sunday between Lapan and Reichenbach on the local diamond. On account of the storm, only two innings were played, the score being 6—1 in favor of Lapan

The Alberta Wheat Pool Ltd. is erecting a new elevator in Kingman.

Mrs. T. Hortis, Mrs. A. Johnson, Mrs. P. Simonson and Mabel, visited with the Jensen family of Bardo on Friday.

Mr. and Mrs. Dan Scrannted and family and Mr. and Mrs. O. Benno and family visited with relatives here over the week end.

Mr and Mrs. T. Hortis motored to Tofield on Saturday evening.

A dance will be held in the Kingman hall on Friday, June 1st. The Blended orchestra of Camrose will furnish the music.

Mr and Mrs. J. Munson of Camrose and Mr. and Mrs. K. K. Hagg band of Bashaw spent the week-end with Mr. and Mrs. C. R. Hyckert.

STRAYED.—On or about May 22nd, from our milk route of Tofield, one light bay horse, wgt. about 1100 lbs., branded on left hip. Finder please notify R. W. McClymont, Tofield, 'phone 1910.

FOR SALE.—Good, Private Garage. Apply Mercury Office, Tofield.

FOR SALE OR TRADE.—97 acres farm in Peace River country for sale, or will trade for house in Tofield. Apply to Mrs. May Pollock, c.o. to administer the order of Caesare of R. Wilson, Box 33, Tofield. formation.

Airmen In New Venture

Aviators Used To Check Spread Of Rust In Western Canada

Shooting microbes from an aeroplane is the latest venture among aviators in the Royal Canadian Air Force. It has some of the fascination of a fast game in addition to being an important undertaking for Canadian agriculture.

For the past four years the Canadian Federal Department of Agriculture has been trying to combat wheat rust, which makes its appearance in the great wheat fields of Western Canada, by working from the ground. The Department has now enlisted the aid of the Royal Canadian Air Force. The airmen, including a technical expert in agricultural bacteriology, are provided with sensitized plates which are exposed to the air. The spores of wheat rust floating at high altitudes are caught on the plate and analyzed. The spores have been detected at a height of 5,000 feet, and the fliers have run into clouds of these invisible organisms which have registered as many as [illegible] to the [illegible]. The spores float at an altitude and when there is a rainstorm they are precipitated and thus the rust appears in widely separated areas and [illegible]

WHEAT POOL NEWS BULLETIN

Wheat Pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by the seventy delegates assembled in convention in Calgary commencing May 29th. It was decided to make this policy retroactive. The excess earnings of the elevator system during the 1927-28 crop year will be disbursed to the Pool members who put their grain through these elevators.

The change in elevator policy was recommended to the delegates by the directors and two proposals submitted. The first proposal was to eliminate handling and service charges upon delivery of the grain to the pool elevator and deduct the actual operating cost on a per bushel basis from the final wheat pool payment. This method was adopted by the delegates after a lengthy discussion.

The second proposal was to make the usual elevator charges to pool members delivering their grain and to refund to patrons at the end of the fiscal year any excess charges over and above actual operating and overhead costs. The Saskatchewan Pool embodies this policy in the operation of its elevators.

The new policy decided upon will mean a distribution of pool elevator excess earnings during the present crop year only to those who patronize pool elevators, on the following basis (1) Through pool country houses. (2). Platform shipments to pool terminals. (3). Through non-pool line elevators to pool terminals. The incoming crop will be handled through pool elevators on an actual cost basis as described elsewhere in this article.

The purpose of this new system is to increase the volume of grain passing through pool elevators. C. M. Hall, general manager of the elevator system in addressing the delegates, strongly urges that members use their own facilities to the fullest extent. He pointed out that only by following this policy could the elevator system be able to function with the greatest economy, and the full objectives for which the system was built be realized. This coming harvest the Alberta pool will have close to 300 line elevators in operation and three terminals at the Pacific coast. In order to bring the greatest possible return to pool members with the maximum protection in weights and grades, Mr. Hall suggested that every effort to be made to have the pool grain handled through Pool elevators.

George McIvor, general sales manager, addressed the delegates and pointed out the advantage to the selling agency of having pool grain in pool elevators readily available to complete sales at any time. He stated that by placing their grain in their own elevators, Pool members can assist Pool salesmen to get better prices for their grain.

JOHN LEE, Tofield

NOTICE

Edgerton, Alberta,
May 10th, 1928

Mrs. G. P. Jones, Tofield, Alberta.
Dear Madam:

In connection with the accusation which I made against you on the 14th of April, last, of having stolen my purse and the contents thereof, which had been taken by somebody unknown to me at the time of the sale of my mother's effects, I beg to say that I regret the hasty action I took in connection with the theft of the said purpose and the contents thereof and now apologize to you for same, as I am absolutely satisfied you had not the purse or the contents thereof in your possession. I regret the publicity given you through my hasty action in having you searched and hope this explanation will fully exonerate you from all blame in the matter, as I should not have acted as I did having no reasonable grounds to do so.

Yours truly,
MRS. MAY SIMMONS.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF HERBERT RIEL HARRIMAN late of Tofield, in the Province of Alberta, Farmer, deceased

NOTICE is hereby given that all persons having claims upon the estate of the above named Herbert Riel Harriman, who died on or about the 25th day of August, A.D. 1926, are required to file with the undersigned Administrator by the 28th day of July, 1928, a full statement duly verified of their claims and of any securities held by them, and after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

DATED this 1st day of June, 1928. Official Guardian and Administrator of the Estate of Herbert Riel Harriman, Parliament Buildings, EDMONTON.

READ THE ADS—IT PAYS

INTERESTING BOOKLET

The News has received from the Dominion Department of Agriculture an attractive illustrated booklet of fifty-three pages, entitled "Crop Rotations and Soil Management for the Prairie Provinces." It gives grain rotations from two to four years, and mixed farming rotations covering five to nine year periods. There are also articles on the value of an annual crop plan, advantages of mixed farming and grain rotations, the effect of crop sequence, the effect of rotations on soil productivity, methods used in producing crops in rotation, summerfallow, stubble treatment, methods of controlling weeds, soil moisture, gumbo lands, etc. If any New's readers would like to have this book, letters should be directed to "The Division of Field Husbandry, Department of Agriculture, Ottawa, Ontario, and request made for Bulletin No. 98, new series.

The following are some extracts herefrom:

The chief points in handling a summer-fallow are to plough the land early and to keep it thoroughly cultivated throughout the season to prevent the growth of weeds. The land to be summer-fallowed should be ploughed as early after spring seeding is finished as possible and preferably should be completed before the end of June. The longer the land stands without ploughing the more soil moisture is used by the weeds and the less moisture there will be available the following year for the grain crop. Moreover, unploughed soil has a hard surface which facilitates a larger proportion of "run-off" after heavy rains than takes place on ploughed land.

Where a farmer is conducting a strictly grain farm with wheat, the chief crop, it is certainly more difficult to control weeds than where mixed farming is followed. The frequent growing of the same crop especially a grain crop makes it difficult to employ certain methods which are fairly effective in eradicating weeds. Where weeds are seriously affecting the yields of grain, and where mixed farming rotations are profitable, it may prove the best plan to change the type of farming somewhat, and to adapt on at least a part of the farm a mixed farming rotation. In those parts of the prairie where hay crops, corn and coarse grains do well the introduction of one or more of these crops will be found to be very useful in combatting weeds.

It may be of some interest to know how long weed seeds will live in the ground. The Michigan Agricultural College is now conducting an experiment to learn definitely just how many years the common weeds will lie dormant in the soil and then resume growth when suitable conditions are created. They planned an experiment in which weed seeds were mixed with sand and placed in uncorked pint bottles, buried 20 inches below the surface, and slanted with the mouth downwards to prevent the accumulation of water in the bottles about the seed. One of these bottles is removed every five years and there are sufficient bottles to continue the experiment for 100 years. The experiment has already run 40 years and it has been found that many weed seeds still germinate quite satisfactorily. After forty years in the soil, the following weeds germinated: black mustard, pepper grass, pigweed, ragweed, wild primrose, common plantain, purslane and curled dock. It is interesting to know that some of these weed seeds failed to germinate when removed in the earlier years of the experiment but did so in later years. Ragweed, in fact, failed to germinate in every trial except the last, that is, after forty years in the soil. With such remarkable results as this, who knows how long weed seeds will last?

Thinking to put the young couple at their ease the conductor remarked pleasantly:

"Did you know that the tunnel we just came through cost $12,000,000?"

"Did it?" inquired the girl. Then she added, after a pause, "Well, it was worth it."

Pat was hired in a lumber office. The proprietor was a young man and he decided to have some fun with the new hand, so Pat was left in charge of the office, with instructions to take all orders which might come in. Going to a nearby store, the proprietor called up the office.

"Hello! Is this the East Side Lumber Company?"

"Yis, sorr."

"Send me up 1,000 knot holes."

"What's that?"

"One thousand knot holes."

"Well, now, an' aint that a shame! We are just out of them. Sold them all to the brewery."

"To the brewery? What do they want with them?"

"They use them for bung holes in barrels."

Five Reasons

WHY WHEAT PRODUCERS SHOULD SUPPORT

THE WHEAT POOL

1. Because your self-protection as a producer is incomplete and ineffective if private organizations can still exploit you by manipulating prices against you.
2. Because co-operation helps to uphold the standard of living by suppressing the element of profiteering in the grain produced by your labor.
3. Because co-operation eliminates unnecessary middlemen and dividend hunting shareholders, who take a heavy toll of the wealth produced by the farm workers.
4. Because the co-operative principle of "each for all, all for each" is the workers' ideal which alone can bring economic and social justice, peace and prosperity, to all throughout the world.
5. Because the farm workers ought to concentrate their resources in co-operation instead of supporting capitalistic organizations hostile to co-operative movements.

The Nichols & Shepard COMBINE

With many new features

The Big 12 Bar Cylinder, the heaviest found in any combine, and the Man Behind the Gun, the greatest combination ever devised for getting the grain from the straw.

Balance—The machine weight, whether the grain tank is full or empty, is equally distributed on all three wheels. That means a machine free from side draft, a combine that will cut square corners, a combine that will haul truss and center in the heaviest field.

One Man Control—The operator—and only one is needed—rides high on the machine out of the noise and dirt with every control at his finger tips and with the machine and the header in full view.

This is the combine that has:

Hyatt, Timken or Ball Bearings at every main bearing point—32 in all. *Alemite-Zerk Lubrication* so that no harvesting time is lost oiling up. *Armco Ingot Iron* the great rust resisting metal in all sheet metal parts. *Weatherproof Fiber Pulleys* for all Belt Drives. *High Speed Roller Chain* on all Chain Drives. *A Sturdy Hot Riveted Main Frame* with big Trunk & Hinks wheels that stand up. *Bridge Truss* construction that will last.

This is the combine that threshes like the experience of the famous Red River Special Line. It is the combine that has had every part proved in the grain fields where they know combines.

This Nichols & Shepard Combine is offered at a new low price.

The Red River Special Line for 1928: Combines 15' Cut, 20' Cut, Prairie Type; Tractors N & S Lauson Built 20-35, 25-40; Threshers; Nichols & Shepard Corn Picker Husker; Nichols & Shepard Steam

Talk Peace To Have Peace

In no new fairly well recognized by students of international relations that one of the causes of war is to be found in the constant predictions of war as references to it. "If you want war, said someone to the long ago, "you should build warships." When nations speak talk up arms against each other. Those who make a present war are never a college president. And a mighty repertoire of peace-making they are actual causes of war, particularly among the chief causes. That is talk war and you have war.

Say speaking the conditions of this year, it is equally true that if the statesmen and leading men in all countries cultivate the habit of talking peace instead of war the world will have peace. The citizens would pressure to disarmed among peace-minded men and women, urged United States peace. "The better the prospect that war can be at last conquered, and it will come in the end, the more leaders of democracy the world over can be encouraged to take further steps for peace. As they gather from time to time of others like ours, or become the prospect that ultimately perhaps one-half the men of no more believe trade will be established.

War after all is largely a state of mind. Let the people of any community or country begin to take a pessimistic view of things and talk of hard times business depression and hard times, and it is inevitable that a depression and hard times will come. Equally true is it that when people talk prosperity and adopt an optimistic tone, a revival in business and industrial activity follows. If, instead of thinking of "the next war," and talking about it, people think and talk peace, they have rather than war will be the result.

It has been reported that the Supreme Court of the United States has retired the bond of dispute between Britain and the United States over the Behring Sea Court and the Judicial Committee of the Privy Council has settled a long dispute between Britain and Canada over the Labrador boundary. Why should not disputes between nations be settled in a like sensible way. There is quite a small particular on for the States or two Provinces to go to war over. And by no such other channels as there are for two nations to take such steps as this action.

War is a stupid business. It settles no issues. It comes about like a fight between two boys. It starts in a little group of men and a quarrel with another little group. The two groups soon know and talking to murder each other because they have a quarrel and therefore had an enemy. Then the fight starts. Then the killing begins. Then the killing starts. War between nations is evidence that the methods in these countries have not sufficient intelligence or self-control to find a way out, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this the longer is the wiser and gets the best way. There is no reason employed in the settlement.

Sir Esme Howard, British Ambassador at Washington, in a recent address said: If it can be proved to a man that if his country goes to war for any issue short of its absolute liberty or action at home, and in defence of that liberty he will in future stand a very good chance of being branded as an outcast. If he can show him that even though his country may be victorious, he will ever afterwards have his reason by 200, 300, 500 or 500 per cent, if we can make it clear to him that for the sake of some issue to which he is probably as much a stranger as risks having to give up that new Ford next month, or, even worse, that he may very probably be thrown out of work as has been the fate of millions in Europe after the last war, then perhaps he may find that a very slightly dramatic will may better himself to see that as a means of settling disputes between nations, it is either abandoned or for its state-craft is conserved, the fear of war in the beginning and wisdom.

Some people may be inclined to doubt the value of Peace Talks. Peace statements and declarations between nations making for war, but the fact is these are all factors in educating people and helping to create and develop a peace-time sentiment in all countries. And, let it be repeated and emphasized, the creation of such a peace sentiment is the strongest of all guarantees for the maintenance of peace.

Dye To Irrigation

There are now eight irrigation projects in Southern Alberta covering a total acreage of 444,686 of which 204,000 acres are irrigable. One of the principal projects is the Lethbridge Northern Irrigation District property has for some time been settled in 167 school districts and the occupied area within the grounds for the past two years. Around its population. These included 67 700 maples, and and increased by population two and 80 evergreens a half times.

Medical Aid Caravan

A medical aid caravan will circulate in through Southern Alberta this year. It has been sent out to the people of the province by the Provincial Board of Health and is to be in charge of Dr. H. T. Washburn assistant superintendent of the University of Alberta Hospital.

The team cost by the latest motor tractor is estimated at $60,000, and can deliver

Breathing School Grounds

Because of the co-operation of the Parent-Teacher Association of Medicine Hat, a number of playgrounds in beautifying school grounds in the city have been laid out. The work was undertaken by the Medicine Hat Horticultural Society, and the grounds will from now on be kept in order by the Association.

Parachute Leads Plane Safely

Invention Of California Man Proves Possible In Test

A small parachute has been landed safely from 2,000 feet by means of a huge parachute, without injury to the pilot or machine, in the sight of a large assembly of persons, it was announced here today. The experiment, performed privately at Troy, Cal., was designed to prove the possibility of using a parachute for disabled planes in cases safety of passengers, it is said. The invention, patented by E. J. McKeown, was used in the test.

The plane dropped about 2,000 feet with its motor idle when the huge parachute, more than 100 feet in diameter, opened out McKeown stayed with the ship as its speed rapidly slowed. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged except for a minor bend in the tail skid.

The parachute is the invention of Charles Broderick, San Francisco, who with numerous other airmen, attended complete satisfaction over the result of the experiment.

Special delivery stamps are soon to be issued by the Government.

A reliable antiseptic—Minard's.

Tribute To British Flag

Union Jack Made Union Flag Possible Says South African Premier

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some connection about it. South Africa gives the appeals from there says that native tribes love the flag even eloquently demonstrated at a Chemical dinner of the Transvaalian Territories which, and which is described as a native Parliament, when the Council was opened by the Governor, a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magisterial offices in the native territories. A Councillor asked the members not to discard their old friend the Union Jack, which had flown over them from slavery and which was the only flag they knew. He did not object to the Union Flag but pointed out that were it not for the Union Jack there would be no Union Flag. They might also remember that were it not for the Union Jack there would be no Canada as there is today.

FIGHTING FOR BABY'S HEALTH

In the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the welfare of baby. Either the trifles of baby's health will come on us suddenly sometimes with a mild ailment which if neglected may have a very sick baby on her hands. Baby has to be carefully looked after. That is unless she has a remedy in the house. Baby's Own Tablets are the baby for any of the many minor ailments that are peculiar to babyhood. That is unless she has a remedy in the house. Baby's Own Tablets are the baby for any of the many minor ailments that are peculiar to babyhood. Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep them in the house, for they promptly relieve baby's troubles. They are guaranteed to be without an opiate or other narcotic drug which are so harmful to the delicate system of baby. Mothers, if you value the life and health of your little one see that Baby's Own Tablets when he is ill, or better still give him as a occasional dose of the Tablets to ward off illness. The Tablets are sold by all medicine dealers, or will be sent to any address, post paid, at 25 cents a box by addressing: The Dr. Williams' Medicine Co., Brockville, Ont.

Tractors On the Farm

Western Farmers Investing Most Heavily In Tractors For Heavy Duty

There are in Canada today 71 199 farmers who have 834 231 horses in use, and 16,225 tractors. In Saskatchewan, where there are 146,781 farms, with 1,189,266 horses, and 26 367 tractors, and Alberta has 81,366 farms with 856,490 horses, and 10 520 tractors. The survey would indicate that when the horse is put in front of the tractor in Canada, the latter is in the ratio of one tractor to every 50 of the tractor has definitely arrived.

Since the children from suffering from worms cannot have been so successfully introduced into British Columbia, and will be grown for the early markets from sets imported from the Southern States. Last year eighteen acres were planted at Kelowna in an experimental way with satisfactory results. The season cured well and yielded eight tons per acre. The acreage has been greatly increased this year. The crop should begin to move to market about July 1.

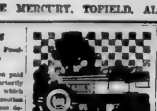
Some men are sentenced to hard labor for life and some do it of their own accord in order to make ends meet.

ECZEMA IN RASH ON HANDS

Troubled For Three Years. Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a small rash, but gradually developed and spread until it seemed to cause me I could hardly put my hands to work. I was ashamed to shake hands with anyone. My hands were terribly inflamed and disfigured. I had to wear gloves all the time. I thought nothing would help me. Then I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used two cakes of Cuticura Soap and two boxes of Cuticura Ointment I was healed." (Signed) Miss Beatrice Allen, High-gate, Ont.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.



Add to the joy of the open road—this pleasure-giving refreshment.

Progress Has Been Made

Sending Messages By Beam System Is Marvel Of Speed

What human ingenuity has done for long-distance communication was explained by J. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal Board of Trade luncheon recently. Using slides, the speaker produced a graphic description of the Imperial wireless station at Drummondville, Quebec, using an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the minute. The receiving station was built by an ops rator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless and contrasting them with the remarkably fine equipment of stations used 15 years ago as of no use today. The speaker pointed out, he said, was the result of experiments by which all the energy was directed in sending station was successfully sent in one direction thus establishing a beam of energy.

Seed Growing in B.C.

Industry On Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island of steadily increasing importance. Vancouver Island sweet pea seed sells on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed farm is at Cowichan which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed whose prominence and high quality is becoming world-famous.

When Holloway's Corn Remover is applied to a corn it kills the roots and the whole corn comes out without injury to the flesh.

R.C. Urges Bermuda Guinea

Bermuda onions have been successfully introduced into British Columbia, and will be grown for the early markets from sets imported from the Southern States. Last year eighteen acres were planted at Kelowna in an experimental way with satisfactory results. The season cured well and yielded eight tons per acre. The acreage has been greatly increased this year. The crop should begin to move to market about July 1.

When Pain Comes

What baby gets rid of indigestion very often means serious acid in the stomach. The stomach nerves have been over-stimulated and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. Genuine Milk of Magnesia contains the letters Phillips. Don't accept substitutes.

OCEAN STEAMSHIP SERVICE

White Star Line Paying Particular Attention To the Canadian Trade

The importance of the Canadian trade was a point strongly emphasized by Lord Kylsant at the annual meeting of the White Star Line held in London, Eng., on May 16th, according to cable despatches to the White Star Line in Montreal.

Lord Kylsant, chairman of the Board of Directors, and an outstanding figure in world shipping ravelled the days of 1871, when the R.M. Line Steamship Service across the Atlantic, and from that date he traced, by progressive steps, the development of the company.

The tonnage of the company, now number about 15,000, he said, "and after providing for the depreciation of the fleet, and paying the dividend on the preference shares, we recommend a dividend of six per cent. on ordinary shares and the balance carried forward.

"There was," he said, " a slight increase in the number of passengers travelling to and from the United States of which we secured a fair share," and from this point he went on to state that "we have, for some time past, been giving our most serious consideration to the important question of the construction of a new vessel to replace one of the very few remaining to maintain the position and traditions of the White Star Line in the Atlantic passenger trade."

Lord Kylsant announced that the company has under construction at present a "passenger motor vessel of over 20,000 tons which we expect to be ready for service in the early 1923. She will be not only the largest motor passenger vessel to be placed in the North Atlantic trade, but also the first motor passenger vessel to be placed in that trade."

"We have," he continued, "given particular attention to the question of the Canadian trade. In addition to our regular service from Liverpool to Quebec and Montreal we have placed the new London-Canadian service from London, Havre and Southampton to Quebec and Montreal so as to cater more especially for the South of England and continental passengers travelling to and from Canada via ports on this service.

"From Channel ports we have placed the Adriatic and the Megantic, the former vessel being the largest ship in Montreal."

After mentioning that the White Star Line have transformed the Adriatic, 26,500 tons, into a cabin steamer, thereby having the largest cabin steamer in the world, Lord Kylsant dwelt on the importance of the tourist third cabin trade. In this effort, he said, that the accommodation had enabled many with the desire to travel, but who, previously, had not been able to greatly their wishes, to realize their ambitions.

Lord Kylsant, in conclusion, said, "in carrying a larger share of the trade of inward than any other company. Passengers in this tourist category are assured comfort and good cabin accommodation at exceptionally low rate passage money for the return voyage."

In dealing with the emigration question, Lord Kylsant said that "shipping companies engaged in trans-Atlantic trade used to carry large numbers of emigrants from Great Britain and Ireland and other countries in Europe, but the United States immigration restrictions have reduced the trade to comparatively small proportions.

"The Dominion of Canada also has imposed regulations upon immigration from the continent. The flow of contingent traffic across the Atlantic has been thus curtailed and is a valuable source of revenue for vessels adapted to carry large numbers of emigrants has been greatly diminished. We hope that in time, restrictions may be considerably modified, to the boon in favor of settlers of British stock."

Mr. Derek Oldham, the English scholar, is telling a good story against himself. One day recently he went into a trunk in a trouble block and was sitting in his car practising coughing noise. He did not realize that the windows of the car were down, and he suddenly became aware that a tant-driver was looking at him in a queer way. Thinking he had a fellow-chauffeur, the taxi-man shouted out, "Lumme, I thought someone 'ad gone wrong with per exhaust!"

A man could learn a great many things if he didn't think that he already knew them.

For Hay Fever—Use Minard's.

The average man prides himself on the patience he displays until he loses it.

Swedish Air Service Safe

No Damage Or Loss In Three Years Of Operation

Three years of operation without any injury to a passenger or damage or loss to merchandise or mail is the record of AB Aerotransport, the corporation that carries on all commercial operations in Sweden. The company has just announced that during the year 623 of the 666 planned flights were completed. It is also stated by the company that it has established all volunteers of the Dominion Elections Act.

Civil Aviation In Italy

Development Is Rapid and Country Holds Third Place In World

Rome, Italy.—Italy now ranks as the third country in the world in civil aviation. It comes immediately after Germany and France, in the order given, and is ahead of England, which occupies fourth place.

By the end of 1925 Italian air routes will total 3,235 miles over which daily passenger service in either direction will be effected. The whole field of civil aviation, everywhere Italy has become Secretary for Air, has been developing at such amazing speed that many routes already have been added to the total number of air routes.

Vote Sum For League

Ottawa.—The House passed a vote of $185,956 for Canada's contribution to the League of Nations. Hon. Hugh Guthrie brought up the question of Canada's relation to the League, and pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

Rumor Is Denied

Winnipeg: Rumors in circulation to the effect that he has been offered the presidency of the University of Alberta were denied by Hon. John Bracken, premier of Manitoba. The rumors are without foundation," he declared.

Complain About Expenses

Ottawa.—Complaints of Canada House were heard in the House when a vote of $70,000 for expenditure and $30,000 for salaries for the high commissioner's office in London were under discussion. After considerable debate, the item carried.

Turks-Italian Treaty

Rome.—Premier Mussolini and the Turkish Minister of Foreign Affairs have signed a five year bilateral treaty binding Italy and Turkey to neutrality, arbitration and conciliation.

Tornado Near Kansas City

Kansas City, Mo. A tornado struck Englewood, a suburb between here and Independence, Mo. Two street cars were reported wrecked. Ambulances were sent to the scene.

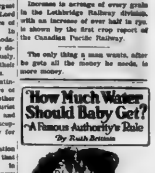
How Much Water Should Baby Get?
A Famous Authority's Rule

By Ruth Britton



Baby specializes agree now-adays, that the little one's drinking habits must have three ounces of fluid every day for each pound of baby's eight pound baby, for instance needs twenty-four ounces of fluid a day.

Baby's drinking habits are of the utmost importance to his health. Many times so much trouble and the symptoms disappear at once. You will never use cruder methods when once you learn the efficiency of this the get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid conditions. Refuse substitutes.

WOULD AMEND THE DOMINION ELECTIONS ACT

Ottawa. — Parliament will address itself next week to the consideration of the Dominion Elections Act at the report of the committee on privileges and elections, which sat during the House of Commons.

The committee, under the chairmanship of J. J. Denis, Liberal, Halifax, considered their report, the draft of several weeks of investigation into the Athabasca elections of 1926, where an inquiry by Mr. Justice Clarke, of Edmonton, established that bonuses and illegal practices had taken place.

The committee will recommend to the House that clause 9 of the report Mr. Justice Clarke discloses that the cause of the corrupt practices in Athabasca was due to the partisanship, ignorance and incompetency of certain returning officers. The auditor general should submit to the Department of Justice a full statement of the payments made to the returning officials with a view to instituting proceedings of the recovery of amounts as paid to such officials, if the law provides for such action.

It is also recommended that a special parliamentary committee be appointed next session to consider the evidence and deliberations of the present committee on privileges and elections, to study the Dominion Elections Act and to give special attention to the method of appointing returning officers and the preparation of voters' lists.

Further, it is urged that the chief electoral officer should recommend to the proper authorities that measures be taken against all violators of the Dominion Elections Act.

Rome, Italy.—Italy now ranks as the third country in the world in civil aviation. It comes immediately after Germany and France, in the order given, and is ahead of England, which occupies fourth place.

By the end of 1925 Italian air routes will total 3,235 miles over which daily passenger service in either direction will be effected. The whole field of civil aviation, everywhere Italy has become Secretary for Air, has been developing at such amazing speed that many routes already have been added to the total number of air routes.

Inspection Satisfactory

Objection To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto. — "We have examined every single objection that has been raised against the examination overseas by Canadian doctors of assisted passage immigrants and we have discovered one that will hold water," declared Dr. David Clark, assistant Deputy Minister of the Department of Natural Health, in an interview here.

Articles appearing in certain newspapers of the British press against the policy of having Canadian doctors conduct examination of immigrants were full of inaccuracies, he said.

"The cause of a decrease in immigration to Canada this year," continued Mr. Clark, "is deeper than the medical inspection policy. One of the causes that will decrease immigration from Britain, he felt, was the feeling of increasing optimism there

Replace Provincial Police

R.C.M.P. Have Taken Over Work Of Saskatchewan Force

Saskatoon, Sask.—The Saskatchewan provincial police force passes into the pages of history of the province, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan auto-driven constabulary under the direction of Inspector John Kelly, who transferred his brass contained coat to the "scarlet riders." Some other members of the R.P.P will join the R.C.M.P. ranks, but the majority will retire on the latter force, located in the Saskatchewan capital for some time, will strength: Sergt. A. Drysdale, Detective Sergt. C. K. Hildyard, and Constables T. Tennant and P. W. English. The force has a long service record in the force, dating back to the old Northwest Mounted days.

Inquiry Is Ordered

Ottawa.—The parliamentary business inquiry has approved a motion for a return showing all special immigration trains leased from January 1, 1926. The report will show the number of permits, officially issued by officers of Dominion or steamships to the number and nationality of persons, may find a solution of the problem of peace."

Appoint Conciliation Board

Ottawa.—A conciliation board has been appointed to investigate the carpenters' strike in Calgary Mr. Justice Clarke will be chairman. James H. Gordon will represent the employers, Robert Hewitt, the men. The men are asking for an increase of 12½ cents an hour.

U.S. Honors War Dead

Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington. — The White Crosses flying hills at Arlington received the homage of citizens, soldiers and marines of the national capital for the annual memorial day services. May 30, as the graves of the fallen heroes of all wars.

For the first time since he assumed the White House, President Coolidge laid the tablets on memorial day exercises outside of Washington. His address at Arlington was paid in an address near the spot where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington.

Secretary Hoover, British Ambassador, and Hon. Vincent Massey, Canadian minister took part in the exercises in Arlington cemetery where they decorated the graves and the Cross of Sacrifice erected by the Canadian Government in memory of Americans who died while serving as members of the Canadian corps.

POOR SALARIES PAID SCIENTIFIC AGRICULTURISTS

Ottawa.—A motion to go into supply in the House of Commons prompted C. C. Ljungh, Conservative, Bow River, to protest that salaries paid to men in the scientific and technical positions of the department of agriculture were inadequate.

Ljungh declared that the department of agriculture was losing the professional men because of the low salaries which were paid. He gave a comparison between salaries paid in the United States service and in the Canadian to illustrate the fact that Canada paid much less than the U.S.A.

The professional service of Canada and the Civil Service compared with that of the U.S. for men. As things now stood many Canadians went to the U.S. to take post-graduate university courses. Frequently they remained there because of the fact they could obtain more money in that country.

Mr. Costa compared salaries paid in the several division of agriculture with those paid in the geological survey. The figures he quoted showed that the salaries in the several division were lower Canada could not afford to lose her scientific agriculturists to the British provinces as was Canada's basic industry and should generally be considered important phase of that industry.

J. S. Stedman, Liberal-Progressive, Swift, declared the position of the salaries paid to scientific agriculturists should be considered in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

To Aid Mental Hygiene Research

Toronto — The Lanier Sharman Rockefeller Memorial, founded by John D. Rockefeller, Jr., in memory of his mother, has been established by the Canadian National Committee for Mental Hygiene of $150,000 to be spent during the next five years. This is conditional upon the raising from Canadian sources of an additional $250,000 during the same period.

Rumor Is Denied

Winnipeg: Rumors in circulation to the effect that he has been offered the presidency of the University of Alberta were denied by Hon. John Bracken, premier of Manitoba. The rumors are without foundation," he declared.

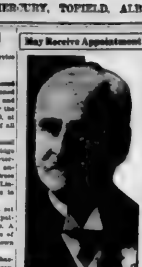
May Receive Appointment



The possibility that a Canadian judge will take the place on the permanent court of international justice of the Hague, left vacant by the resignation of John Bassett Moore, of the United States, is now openly advanced in well-informed circles at Washington, Already, it appears, the name of Mr. Justice Rinfret, of Toronto chief justice, as well-known abroad as in the United States as in Canada, is mentioned as a likely successor to the American jurist.

Bill Defeated In Senate

Government Measure To Amend Naturalization Act Thrown Out In Upper House

Ottawa. The Government bill to amend the naturalization act was killed in the Senate.

The bill would have placed authority for the granting of naturalization certificates in the hands of the secretary of state without its being necessary for the applicant to take the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to double the growing crop Western Canada has ever produced."

Has a New Mission

Premier Ming Responded To Arrange For Necessary Rainfall To Ensure Bumper Crop Next Year

Ottawa.—Premier King has a new mission. The latest request is that he should appeal himself rain makers extraordinary to Saskatchewan.

"We have had a magnificent warming time and everything is now in the ground in good shape," runs a letter from Saskatchewan, which Premier Laird read in the Senate recently "I wish you would cross the Atlantic to the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to double the growing crop Western Canada has ever produced."

Ontario Joins Manitoba

In Legal Fight With Federal Government Over Regulation Of Securities

Toronto.—Announcement has been made by Hon. W. H. Price, Attorney-General for Ontario, that the province is joining with the province of Manitoba in the latter's legal fight with the Dominion Government over the question of certain rights in connection with the regulation of securities.

Hon. Harry Mc'., Deputy Attorney-General, will leave for England June 15 and will appear before Hon. W. M. Craig, K.C., counsel for Manitoba, when the case is heard by the Privy Council early in July.

COOLIDGE MAKES STRONG PLEA FOR WORLD PEACE

Gettysburg Pa In the first speech to be delivered by a president on the battlefield, President Coolidge in ceremonial address, President Coolidge in connection with the Memorial Day exercises voiced a plea for the ideal peace that was the chief tribute he the war dead of America.

At the same time he demanded less indifference to crime in the U.S and declared what he was dead as a tendency of the legislatures to regard the problem of law enforcement as a matter of local politics. These things he said, tended to weaken the power of the federal and national people. Some points to war

He said, the one thing we want above all else for ourselves and for other nations is a continuance of peace. Mr Coolidge reviewed negotiations by the state department for the settlement of war and for arbitration treaties

The United proposal that the United States and Russia sign a treaty to renounce war was described by the President as having developed into one of the most impressive peace movements that the world has ever seen

"It is my earnest hope that success may crown the negotiations now in progress and that the bonds which have impaired the French monster a foreign affairs and the secretary of state of the U S in their joint efforts to find a solution of the problem of peace, may find a solution of the

Record During March For Canadian Roads

Railways Carry More Freight Than In Any Previous Month

Ottawa. The Canadian railways carried more freight during March, 1926, than in any previous March. Gross revenues also were the largest earned in March, exceeding those of March, last year, by $1,138,479, or 5.5 per cent. Although operating expenses were heavier than in 1925 by $1 262,226, or 8.3 per cent. but receipts were larger by $663,253. The large carry-over of grain was been an important factor in the heavy traffic and earnings of the railways during the first quarter of 1926. the movement of grain in the Prairie provinces being particularly heavy this March payroll was heavier than in 1927 by $1 607,132, and the average number of employees increased by 2 922

The Canadian National Railways increase in gross revenue, compared with March, 1927, was $7.56,717, or 6.3 per cent. for an increase in freight of four per cent. and a decrease in passenger traffic of 6.3 per cent.

The Canadian Pacific Railway gross returns for March were heavier by than 1927 by $1,35 1,518, or 8.5 per cent. Passenger and express revenues showed decreases but all other accounts were larger, freight by 12.5 per cent.

Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service 15-weekly in each direction between Toronto, Ottawa, Montreal and Rimouski, where the steamers are met, the new service cuts two days off the regular schedule. Domestic traffic between cities mentioned is also accommodated to time-saving advantage.

FLAG QUESTION CAUSE OF RIOTING AT CAPETOWN

Capetown, South Africa. Representatives of police from all parts of the Dominion were drafted into Capetown to cope with the threatening situation which developed when a demonstration, said to have been inspired by unrest among colored workers was rendered to the celebration of the 100th anniversary of the establishment of the Union of South Africa.

The celebrations was held to-day here during the first time the new national flag was flown along with the Union Jack, and Premier J. B. M. Hertzog and General Jan Christian Smuts for not present and present leader of the opposition, presided on the same platform and delivered pan-Boer speeches.

Hertzog declared there was no need when carried crowds to the streets and several nights incident occurred. Colored people were prominent in the demonstrations and noteworthy carried placards bearing mistaken the New Union flag were partially torn and, but removed. Passenger and express revenues showed decreases but all other accounts were larger, freight by 12.5 per cent.

Steps Operations Of Bogus Stock Salesmen

Ontario Government Has Put Many Out Of Business

Toronto More than one hundred members, of doubtful repute and high pressure security salesmen have been put out of business recently as the result of the drastic campaign instituted by the Ontario Attorney-General's Department when the Security Frauds Prevention Act was put into force recently.

According to the department more of the offenders have been jailed, others are out on bail pending appeal and a majority have been deported to the United States from where they came.

Receive Degrees At McGill

Honorary Degree Conferred On Five Distinguished Canadians

Montreal Honorary degree of Doctor of Laws was conferred on five distinguished Canadians at the 124th convocation of McGill University.

The recipients were Sir Wilfrid Grenfell, famous Labrador missionary; Rev. Dr. Charles Gordon, Toronto; William Reid Muir, director of the New York Zoological Park and a graduate of McGill; George Isles senior and George I. Smith senior.

Sir Arthur Currie principal, had briefly outlined the honors received from his recent illness to be present

Princes Plan African Trip

London The Prince of Wales who is to be at the head of America.

will be accompanied by the Duke of Gloucester, Prince Henry, and the royal brothers will be absent for long or five months The date for the departure has not been announced but it is their aim after visiting Mombasa, Kenya, Uganda Tanganyika, and Rhodesia, to spend Christmas at Cape-town.

Inmates Of Canadian Prisons

Ottawa. Canadian penitentiaries have at present a total of 2 700 inmates, of this number 2 39 are male and 161 are women. The total number 1 816 and in the prisons are representated. The number of Manitoba and Saskatchewan is given in answer to a question by Senator J. P. B. Casgrain.

Against Fast Time

Vancouver Vancouver residents will continue for the remainder of this year to work and play on standard time By a vote of more than four to one the citizens today voted against adoption of daylight saving time for the summer months.

Germany has a shortage of skilled labor.

The Ladies' Aid of the United church held a very successful tea and apron sale on Saturday last. The tables were laid on a national basis, and everyone could get just what they desired. The effect was both novel and effective. The ladies' did exceptionally well a large number of people taking advantage of their enterprise.

The following land deals have been transacted recently through the office of A. J. H. McCauley. All except the last one were C.P.R. quarters. Mr. Wellington Gleen purchased the S.W. qr. 7-51-14-w4; Mr. James Todd purchased the N.E. qr. 27-51-20 w4; Mr. Frank Bauer purchased the N.W. qr. 18-52-19-w4; Mr. J. H. McIntosh Jr., purchased the N.W. qr. of 17-50-19 w4. Messrs. F. J. and [illegible] Tiedeman purchased the S.E. qr. 20-51-19 w4, from Mrs. Norbury.

UNITED CHURCH OF CANADA

Sunday, June 10th, 1928

Church School, Tofield, 11:00 a.m.

Evening Worship, Tofield 8:00 p.m.

Church School Ketchamoot, 2 p.m.

Worship, Ketchamoot, 3:00 p.m.

Come, celebrate the birthday of The United Church of Canada, a church which is engaging the attention of the whole world. There will be a timely address.

Evangelistic services under accredited evangelists of the United Church of Canada will open the next [illegible] at 8 o'clock in the building formerly [illegible] store. Bright gospel songs. Worthy messages.

REV. THOM GORDON, B.A.
Minister.

W.I. NOTES

The W.I. will hold their regular monthly meeting on Tuesday, June 12th in their rooms. All are welcome at our meetings and this will be the last one until September. The Institute would like to have all the promised money for the school ground fund on this day. There are still a few who have not donated but we will be pleased to have this on Tuesday the 12th instant.

Programme.

Roll call, "Household Hints."

Paper by Mrs. Goodall of Ryley.

Report of the recent conference in Edmonton by Mrs. Thorsely.

Reading, Mrs. Pincott.

Lunch served by Mrs. Pincott and Mrs. Verge.

The high school baseball teams of Tofield and Ryley met on the local [illegible] on Friday night last. The game was a much closer one than the one played the previous week at [illegible], the score being [illegible] in favor of Tofield. Ed Hill pitched and S. [illegible] caught for Tofield while the battery for Ryley was, Anderson, pitcher, Buttler, catcher.

The station staff of the Canadian National Railway have just about completed their new tennis court. It has a good cinder bottom faced with crushed brick and being fully enclosed makes a splendid playing court.

Notice

TO ALL FARMERS OF TOFIELD DISTRICT

A Meeting

Will be held on

June 15th, at 8 p.m.

AT THE VARIETY THEATRE, TOFIELD

To discuss the advisability of having a Co-operative Rural Credits Society put into operation in this district. Arrangements have been made with Mr. Jas McCoy, Supervisor of Co-operative Credits, to address the meeting. Come and hear him, then decide for yourselves if you want a society in Tofield.

I may say I have discussed with Mr. McCoy what is being done in places where the society is in operation and find it has done a great deal of good work.

Mr. McCoy wishes it understood that he is not coming here to put something over; it is to inform the farmers of what is being done, and then they decide if they want it. He did not ask to come here, but I asked him on behalf of the farmers to come and address us.

The Reliance Store

Why Save $10.00 and Lose $40.00?

That's exactly what you do when you use anything but the best paint that you can buy on the house or barn. In saving a few dollars on the original cost of the paint for your building you are simply practicing false economy.

Use MARS-WELLS FIRST QUALITY PAINTS

And they will last from three to five years longer. They will cover more surface per gallon and will make a white mark on any other paint made. Mars-Wells Paint contains all the ingredients which are required to make a perfect paint, and the formula is printed on every can. Spend a few cents more a gallon and be assured of the best.

Mars-Wells Barn Red made from pure Linseed Oil makes a very attractive color for the outbuildings. Let us refer you to satisfied users of these paints as we have several buildings in the district finished with them. Barn paint is supplied in six different shades.

COOK WITH GAS WHEREVER YOU LIVE

The Coleman Air-o-Gas Cooking Stove is the latest in gas ranges. Can be used anywhere. See one in our store. Handy, efficient, clean and healthful.

MAIN STREET, - - TOFIELD

LOCAL and PERSONAL

Mr. and Mrs. J. B. Warner motored to the city on Tuesday.

Miss . Napier spent Wednesday in the city.

Dr. and Mrs. Low motored to Bawlf on Sunday.

Mr. and Mrs. Constantine returned from the east on Tuesday.

Mrs. T. Herndon was a visitor to the city for a few days last week.

Mrs. A. W. Wallis of Edmonton visited at Tofield over the week-end.

Miss Marion Forman spent the week end at home.

The W.M.S. of the United Church will meet with Mrs. Swift on Thursday, June 21st, at 3 p.m.

Mr. Caldwell of Killam was a visitor at the Forman home over the week end.

Miss Audrey Jobb is visiting her sister Helen, at Islay, where Miss Helen is teaching.

Mr. Martz of Duhamel, visited his sister, Mrs. Snell, for a few days last week.

Evangelists Dixon and Reid stayed at the Paridis home while conducting services at Tofield.

Mr. Harry O'Brien and Mr. St. John of Killam were Sunday visitors at the Forman home.

The Misses Ardis Wood and Ethel McClymont visited the city on Tuesday.

Mr. P. Woodhams will be in town on Tuesday, June 19th, when those desiring eye treatment may meet him at the Royal Alexandra Hotel.

Mrs. Dunn who had been visiting Mrs. Paridis returned home on Monday. Miss Ruth Paridis left with her for the holidays.

On Friday evening last, a birthday whist party was held at the Forman home to celebrate Mrs. Forman's birthday. The first prizes were won by Mr. and Mrs. Craig, and the consolations by Mrs. Davison and Mr. W. C. Swift.

Mr. and Mrs. McCann returned from Cooking Lake on Sunday and motored to the city on Monday, where they attended the funeral of the late Mr. Potter who was unfortunately drowned in Cooking Lake, and whose body Constable McCann searched for and recovered.

Mr. Fred Griswold strayed away from that fine team of black horses long enough to accompany his daughter, Mrs. L. Scott, on a visit to Claresholm, for a few days last week. They visited Mr. Scott, better known as Laurie, who is playing baseball for Claresholm.

HANNAN AND CARVER TO BUILD NEW ELEVATOR

Hannan and Carver are going ahead with their programme of elevator construction and have already let the contract for a standard elevator to be built at Shonts. Construction will commence sometime in July.

The elevator will be of 35,000 bus. capacity and the lighting, heating and power will be operated by natural gas.

TOFIELD CHAUTAUQUA COMES IN JULY

The good old summer time is here again and with it comes the Chautauqua. This year the dates are in July, though at the moment of writing we have not the exact dates at hand.

Coming in July will be much better as far as school children and students are concerned as they can enjoy the chautauqua to the full without being bothered by impending examinations.

As usual the programme will be of the very best. Talent drawn from all over will appear on the platform to instruct and entertain Tofield audiences. We have not the space in this issue for a review of the programme but suffice to say, it has the appearance of being equally up to previous years and the chautauqua people say it is better.

Reserve a week for this premier attraction. It will be a refreshing change from everyday work on the farm.

2ND OF JULY TO BE BIG DAY AT TOFIELD

At a meeting of the Tofield Town Council on Monday night of this week, it was unanimously decided to hold a sports day somewhat similar to that held last year. The day being Canada's 61st birthday, the celebration will be of a patriotic nature. There will be sports of all kinds, horseshoe tournament, races, baseball, basketball, farmers' horse race, and many other features of interest and enjoyment. Oh, yes, and fireworks. These proved a success last year, the children especially taking much delight in them. Reserve this day for Tofield. The admission to the grounds will be, as last year, absolutely free. In addition to this free coffee will be obtainable on the grounds. There will also be booths where the well known, delicacies of sports day, ice cream, peanuts and candy can be secured.

A MEETING FARMERS SHOULD ATTEND

On Friday night at the Variety Theatre a meeting of much interest to farmers will be held. The meeting has been arranged by Mr. Johnston Ferguson and is for the purpose of finding out whether or not the farmers of this district desire to form a Co-operative Credit Association.

Mr. McCoy, director of Co-operative Credit Associations will address the meeting and will give first hand information as to their workings.

This meeting is held and Mr. McCoy will be at Tofield for the purpose of helping the farmer of the district, not with the idea of putting something over, or of selling them something they do not want.

Farmers should attend this meeting as even if they are not directly interested in credits, very valuable information will be given.

W.I. NOTES

The W.I. held their regular monthly meeting at the rooms on June 12. There were twenty members present and four visitors. Mrs. Goodall and Mrs. Thorsley gave us two very helpful talks on Institute work. Mrs. Goodall on "Why we should send a delegate to a convention."

Mrs. Thorsley spoke on the conference in Edmonton. Mrs. Pincott gave us a very interesting reading which was very much enjoyed by all present. The lucky number for the casserole fell to Miss Clara A[illegible]. This number was drawn by Mrs. Lamont a visitor at our meeting. A dainty lunch was served by Mrs. Pincott and Mrs. Verge.

The Institute will have a two months vacation and we again thank you all for the help given in our recent undertaking in improving the school ground. We feel we have accomplished our scheme and the Institute wish to thank you all for your help in this.

We wonder now if the Women's Institute is worth while? or if they ever do anything for the good of the community. I think you will all say they have accomplished something worth while if you look at the school ground as you pass.

The Tofield baseball team (senior) motored to Ryley on Wednesday and played the Ryley senior team. They won their game, the score being 17—7 in favor of Tofield. Those making the journey and playing were F. Walker, c; L. Harrison Wood, p; Yakabuski, 1b; McCullough, 2b; Bissett, 3b; Calvert, s.s.; Ball, l.f.; Lawson, c.f.; Purley, r.f.

The Tofield Basketball team also played at Ryley on Wednesday and were sucessful in winning their game. We do not know the score, but the Tofield basketball girls are rounding out into a pretty fair basketball team.

The half holiday went into effect at Tofield last week, the stores closing at one o'clock on Wednesday's. Country customers are asked to bear this in mind as coming to town and being unable to do business is a great inconvenience to themselves and they can only be served by a merchant violating a bylaw, which none of them desire to do.

BARDO

The Dave Yoder family reached home Saturday night. They motored through from Kansas where they spent the winter. Miss Edna was one of the graduates in the school at Hesston this year.

Esther Soeke who attended school at Hesston last year came home last week.

Mr. A. A. King, who is on the sick list is in Edmonton this week.

V. L. Roth is putting up buildings on his farm one half mile south of the Mennonite Church, making a home for his son, Ruben, who was married this spring.

Rev. Lehman is in Idaho attending the Mennonite conference.

The J. Jacobson, T. Rorem, A. Kindley and H. Jensen families were guests of Mr. and Mrs. Haakedal on Sunday.

The Emil Rude family, Mrs. Iver Moen, S. Johnson and Sigred Eggen motored to [illegible] on Tuesday.

Emil Rude had one of the bones in his hand broken while playing ball with the Dodds team at Round Hill one evening last week.

Mr. and Mrs. Geo. Hendrickson were up from Scandia last Sunday. There was a family gathering at the P. B. Anderson home.

The Rude family were all at Emils last Sunday. The occasion being his birthday.

Mr. P. B. Anderson and Mr. Ness returned from Banff the last of the week, where they had been hoping to find relief from rheumatism.

AMISK CREEK

The Ladies' Aid of Amisk Creek decided at their last meeting to have a picnic on June 19th, Tuesday of next week. The picnic will be held at Patterson's grove near the church starting at two o'clock in the afternoon with a horse shoe tournament. There will be baseball, softball and all kinds of sport. The Ladies' Aid will have a sale of fancy work and supper will be served between five and seven. Refreshments will be served all afternoon. Everybody is invited to come and have a good time. Remember the date, June 19th.

Arthur Patterson has been suffering with rheumatism since his return from the technical school in Calgary. We are glad to report he is improving.

Mr. and Mrs. R. O. Berg visited at the Mrs. Eggen home in Bardo last Sunday.

Mrs. S. Olson entertained the Ladies' Aid on Wednesday of last week. Most of the members and several visitors were present.

Miss Clara Annabo left last week for Bawlf, where she will assist with the work at the Old People's home.

Mr. and Mrs. Sand and daughter from Ryley visited at the R. O. Berg home on Sunday evening.

Mr. and Mrs. Flaaten and Gunvald were guests at the L. Fosbaug's home in Bardo last Sunday.

Mr. and Mrs. U. Garthee from Viking were visitors at the P. Flaaten home last Saturday.

EVANGELIST SERVICES WELL ATTENDED

The evangelist services being conducted by Evangelists Dixon and Reid are being very well attended.

On the opening night (Monday) the building was comfortably filled. Rev. Dixon is a forceful and earnest speaker and delivers his message to the people in a convincing manner. Rev. Reid, leader of song adds charm to the meetings and the singing under his leadership has been hearty and soul stirring.

Both evangelists are here under the auspices of The United Church of Canada, and will no doubt leave a lasting impression for good.

Friday night will be the last meeting of this series in the Cookson building.

With school examinations so close, most students are now burning the midnight oil studying hard so as to be able to pass. Those who are not burning the midnight oil are up bright and early in the morning at their studies.

KINGMAN

Charlie Johnson was a visitor in Edmonton last Monday.

Einar Hogland of Washington, U.S.A. arrived here on Tuesday. He intends to spend the summer here.

Mr. J. K. Duttwiler has been busy unloading a carload of fence posts at the local yard.

Mrs. J. Anderson and Mrs. Christofferson spent a couple of days in Edmonton last week.

Mr. and Mrs. K. Erickson and family were the afternoon guests of Mr. and Mrs. C. R. Blychert on Sunday.

Mr. and Mrs. Roy Melvik and family and Mr. G. Sandbo were the guests of Mr. and Mrs. P. Scramstead of Camrose on Sunday.

A dance will be held in the Kingman hall on Friday, June 15th. The music will be furnished by the Hay Lake orchestra.

Mr. Soma, who bought the D. Mitchell farm last fall returned to the States on Friday to bring back his family.

There will also be a dance in the Kingman Hall on Friday, June 22nd. The music will be furnished by the famous accordeon player and violinist, Rasmus Walde and Ted Svendson of Edmonton.

An exciting game of basketball was played here on Friday evening between Tofield and Kingman. The home team won the score being 18-17.

A game of indoor baseball was played between Kingman and Coal Hill. It was an easy victory for the home team, the score being 27—13.

KETCHAMOOT

Plowing for greenfeed and breaking new land is the order of the day in our community. Almost every farmer is having new land broken.

Mr. Jim Hannan is having a half section of land broken up this summer. Messrs. Barnes, Williams and Gladue have the contract.

Mr. and Mrs. Cranston and Son while enroute from Camrose to Fort Saskatchewan stopped off on Sunday afternoon and visited Mr. and Mrs. W. A. Mitchell.

Mr. and Mrs. A. McMullen visited at the Paul McMullen home on Sunday.

Mr. Harold McMullen was called to Calgary the first of last week owing to the death of his infant daughter who only lived a few days. Friends of Mr. and Mrs. McMullen were very sorry to hear the sad news and extend to them their sympathy.

Mr. Ed Ingram returned home from Chilliwack, B.C. last week. A young friend returned with him and is now at the Mrs. Cookson home.

Mr. and Mrs. Hugh Mitchell were Sunday evening guests at the Scholtz home.

Mr. and Mrs. Maurice McGinitie has bought the quarter section of land west of Mr. Hull, formerly owned by Mr. Carlisle.

Last week was an unlucky week for some of our people, three accidents occuring. Harvey, the youngest son of Mr. and Mrs. Henry McGinitie had the end of his finger taken off by a door slamming shut on it. Muriel, the little daughter of Mr. and Mrs. Roger Ray fell off a chair and broke her arm and Chester Coombes' hired man had one side of his face badly injured by a cable breaking while pulling stumps.

A representative of the Red Cross Society of Edmonton organized a Junior Red Cross at the school last week. The children are very proud to have their own Red Cross Society, and we regret not having the little officers names.

Cholly (to shopman): "I say-aw-could you take that yellow tie with pink spots out of the show window for me?"

Shopman: "Certainly, sir. Pleased to take anything out of the window anytime, sir."

Cholly: "Thanks awfully. The beastly thing bothers me every time I pass. Good morning."

WORLD HAPPENINGS BRIEFLY TOLD

A bill introduced in the legislature by New Brunswick prohibits the erection of advertising billboards of any kind along the highways of the Province.

In the United States, Canada and Newfoundland the turkey population has paid about $50,000,000 in tribute to college tom-toms since 1918.

Canada is a epitome of the principle of Frank H Kellogg's anti-war campaign was re-stated at Washington with satisfaction and the nations would be endless wars were rendered impossible indeed.

S. McIlraith, assistant deputy minister of agriculture in the Alberta government, died suddenly following a stroke The late Mr. McIlraith was born at Lanarkshire in 1876. He came West in 1903.

Captain Thomas A. Lamb, of the Montreal "Star" staff, who has been associated with the Canadian Press since 1912 has decided to leave the service of the Canadian Press, Ltd., and has joined the staff of the Montreal "Gazette." The latter will be associated with Mr. Lamb in the work of the Canadian Press.

Mr. George Pearkes, the noted sniper who died in Toronto executed the Victoria memorial in Winnipeg either in London or Paris. Mr. Pearkes had arranged to be found in action as far apart as Leslie Nova Scotia and Chatham, New Brunswick, and was responsible for the memorial to Nurse Cavell.

W. D. Gregory, prominent Toronto barrister announced that he would not accept the "M.C." offered him by the government. This is the second time that Mr. Gregory has refused this honor, the Drury government having offered it in 1921. It was strongly that the province of giving certain barristers precedence in out of harmony with the Dominion-wide standards that generally prevail in Canada, said Mr Gregory

Wool Prospects Good

Substantial Increase In Export Of Wool From Canada

A very substantial increase is to be noted in the export of wool from Canada in the last fiscal year. This increased from 2,238,014 lbs worth $1,134,000 the year before, to 11,160,101 lbs. worth $3,149,967.

According to the Canadian Co-operative Wool Growers, Limited, wool growers in very good with the condition of the low wool trade and the shrinkage average. Foreign market conditions are also reported encouraging.

Our Busy Little Friend

Canada Holds Supremacy In Realm Of Poultry

Poultry raisers in Canada are sitting on top of the world—at least on top of the chicken world.

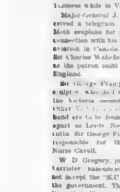
The World's Poultry Congress, at Ottawa, was a commendation of Canada's supremacy in the realm of poultry This is no mere idle boast We have the best egg laying hens in the world. We have a system of record of performance for poultry that is indeed unique and highly beneficial. Canada boasts of the champion laying hen, and what happens annual in the poultry record, perhaps, is that Canadians are always dissatisfied with and the nevermore-to-be-desired.

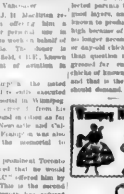
A. McIlraith, assistant deputy minister of agriculture in Alberta accompanied, the party following up a stroke The late Mr. McIlraith was born at Lanarkshire in 1876. He came West in 1903.

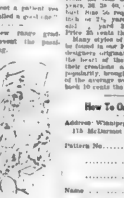
Captain Thomas A. Lamb, of the Montreal "Star" staff, who has been associated with the Canadian Press since 1912 has decided to leave the service of the Canadian Press, Ltd., and has joined the staff of the Montreal "Gazette." The latter will be associated with Mr. Lamb in the work of the Canadian Press.

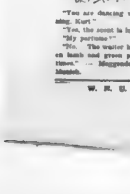
Mr. George Pearkes, the noted sniper who died in Toronto executed the Victoria memorial in Winnipeg either in London or Paris. Mr. Pearkes had arranged to be found in action as far apart as Leslie Nova Scotia and Chatham, New Brunswick, and was responsible for the memorial to Nurse Cavell.

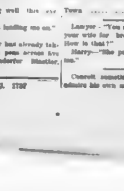
W. D. Gregory, prominent Toronto barrister announced that he would not accept the "M.C." offered him by the government. This is the second time that Mr. Gregory has refused this honor, the Drury government having offered it in 1921. It was strongly that the province of giving certain barristers precedence is out of harmony with the Dominion-wide standards that generally prevail in Canada, said Mr Gregory











PEACE RIVER CROPS GOOD

Crops in the Peace River district have made rapid growth and are showing good promise. An increase of from 12 to 15 per cent in crop acreage is reported this year in the north, largely owing to the amount of new land cleared and brought under cultivation.

EMPIRE BUILDING

WE HEAR and read a great deal these days about empire building and immigration. Only so recent as Tuesday there appeared in an Edmonton paper the heading "Non-British Influx Viewed With Anxiety."

How serious the situation is, we do not know, we do feel however, that the immigration problem (both from Canadian and British viewpoints) is too large a one to be adequately dealt with in an editorial.

From the time the Romans sent out numbers of citizens to populate foreign lands, many nations have attempted empire building. But while they all met with more or less success, none met with the success of the British. British ships, manned by British sailors have sailed the five oceans and founded colonies all over the world until now, we proudly boast of the "Empire upon which the sun never sets," for in all parts of the world there are now free commonwealths and dominions, which during the past century have made wonderful progress. There are now railroads over which run many trains, where not so long since there was nothing but a trail—and shortly before, a plain. Mountains have been crossed, rivers bridged and canals made. Progress in Canada, Australia, New Zealand, India, South and Africa has been proceedingly not only steadily, but swiftly.

But progress and development demand their toll. For instance, of what value is the finest railway in the world if there are insufficient people to use it? It costs a great deal of money to construct a railroad, and much money must go towards its maintenance, and unless there are enough people in the country to make a railway pay, the people who are there must indirectly make up the deficit. This argument holds good in many instances, but to be brief, in many of the lands of the British family of nations, quick development has overtaken population. The simple expedient that presents itself, is "get more people," but this answer raises up a flock of questions that must needs be settled before it can be accepted completely. Those of us who have spent a number of years in the West, now know that the mere calling for immigrants, taking their passage money, letting them off at their destination to shift for themselves is not a good policy. It is hard on the immigrants and their letters back home produce an unfavorable impression of the country among people who have never seen it. Numerous methods have been employed regarding immigration, the latest and most popular being the three thousand family assisted passage scheme. This is very good in its way, providing those coming in are very carefully chosen. On general principles government assisted passages are of doubtful value as regards securing the right type. The kind of men that Canada need are those men who can earn and save enough money in Britain for their passage. That in itself is an indication that they will make good in a new land. However, as the very act of immigrating entails the abandonment of association with life long friends and acquaintances, previous work and play routine and the giving up of many conveniences enjoyed since childhood, even if one does find work, there is a wrench that is felt most after the excitement of travel is over. But to those who make the move and do not find work, it is a tragedy. Those of us who have seen how temporary this condition generally is, often fail to realize the fears and apprehensions of the newly arrived immigrant without work.

All immigration from the British Isles is of an Empire building nature. Even if not realised by the immigrant when departing from Britain's shore, enroute to settle in one of the British family of nations, he is unconsciously making Britain greater. Apart from the fact that he is relieving an over burdened employment market at home and going to perhaps plow virgin fields, he is a potential wealth producer for Britain. For directly or indirectlf he will take part in the commerce of the country, which in turn through devious ways and means directly helps the British manufacturer or investor, or both.

For years we have been accustomed to look upon the settlement of a Britisher in Canada as being particularly beneficial to him. Immigration officials in Britain have spoken of Canada as "the land of golden opportunity. He has been almost taught to believe that he cannot fail to do better here than in Britain. In many cases this has proven true, but the solid fact remains that a Britisher's success in Canada is beneficial not only to himself, but to Canada and Great Britain also.

The average Briton is a home loving individual. "The stately homes of England" may be nothing more to him than a cottage in a row of similar ones, or a suburban villa by the side of the road, but what ever it is, it is home and it remains home, though the years be long that he is away. The average Britisher will not sell his birthright for talents of silver. This the country of his adoption receives later in the form of native born children to whom the land of their birth is solely and wholly their home.

THE BIBLE SOCIETY

"The Bible Society" is a well-known name in common use for that great organization more fully described as "The British and Foreign Bible Society". About twenty-two years ago the several separate branches of this society operating in Canada and Newfoundland were united into one organization known as "The Canadian Bible Society." The Canadian Bible Society is therefore simply the British and Foreign Bible Society in Canada and Newfoundland.

This Society is sometimes confused with other organizations described as "Bible" organizations. To save confusion we wish to make it clear that the Bible Society though a religious organization is not in itself a church. Neither is it a rival of the church or any branch thereof, nor is it a critic of the church. Its purpose is not Bible teaching but Bible distribution. Its object is to help the church in all its branches to give the Holy Scriptures to every human being. It co-operates with any and every agency which seeks to put the written Word of God into the outstretched hands of the people.

In pursuing this object it knows no distinction of creed or color. Its membership is composed of Bible lovers from all churches and from many schools of thought united in one endeavor to circulate the Bible over the widest possible area.

The bond of unity among the members is that confidence which they have that wherever the Bible goes it will perform God's work; nor are they disappointed in this, for from a thousand mission fields they are continually receiving the latest and greatest news of lives transformed by the entrance of God's Word. Thanksgiving springs up among the peoples with the coming of the Scriptures. And the sound of grateful voices makes its way across the world reawakening zeal and binding together all Bible lovers in this great endeavor to give God's Word to every human being.

The impulse for the founding of the Bible Society came from the little country of Wales which, in the latter part of the 18th century had experienced a great revival of religion. With this revival came a widespread demand for copies of the Scriptures. The few thousand copies obtainable from "The Society for the Promotion of Christian Knowledge" only served to increase the demand for more Bibles. Tens of thousands of people wanted Bibles who could not get them. The need pressed heavily upon the hearts of Christian workers.

It was then that God put into the heart of a "Sweet Welsh Maiden", Mary Jones, to save her small earnings till she should have enough to buy a Bible. She held steadfastly to her purpose for six long years; then came the day on which with the permission of her fond parents, Mary made her way barefooted over the hilly paths of her native land, a distance of about 27 miles, to the town of Bala, to the home of Rev. Thomas Charles, the one man from whom a Bible might be bought. Mary obtained a Bible, not because it was there awaiting the payment of her six years' earnings, but rather because when told by Mr. Charles that his small supply of Bibles had been exhausted her tears of disappointment made a refusal impossible, and gained for her a Bible which had been already spoken for.

Two years after this on a visit to London Mr. Charles discovered that the story of Mary Jones had in it the power to stir the emotions and quicken the imagination and move the will of his London friends as nothing had done before. For many years he had been longing eagerly for an adequate supply of Bibles for Wales, but it was only during this visit to London in 1802 that the idea of a Bible Society came to him. Very early one morning as he lay meditating on the Bible needs of Wales the thought came to him as a whisper from God. "Why not a Society for the supplying of Bibles, organized along the lines of the Religious Tract Society?" He arose quickly, made known the vision to his friends of like mind to himself, urged the organization of a Bible Society as a way to meet the need of multitudes in Wales whose hunger for God's Word was just as real as that of Mary Jones. His friends caught the vision and were not slow to respond. Rev. Joseph Hughes, Secretary of the Religious Tract Society, took up Mr. Charles' thought and amplified it, "Surely a Society could be formed to print Bibles at low cost for Wales, and if for Wales why not for the Kingdom, why not for the Whole World?"

Cream Shippers
This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.
If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

East Is Coming West

The recently announced decision of the General Motors Corporation of Canada to proceed immediately with the erection of a million dollar manufacturing and assembly plant at Regina is gratifying news, not alone to the citizens of the capital city of Saskatchewan but to all Westerners because it indicates that at long last the leaders of industry in the East have come to a realization of the fact that they cannot continue indefinitely to supply the rapidly growing western market from factories located thousands of miles away and compelling the western purchaser to pay greatly enhanced prices by reason of freight charges based upon the high classification imposed upon finished articles.

Western people have contended for some time now that the logical industrial development of Canada is the establishment of branch factories in the West. There was a time, not more than a couple of decades ago, when the view prevailed that the western market could be supplied not only from Eastern factories but from Eastern wholesale houses. Gradually as western population grew and the volume of business increased, branch wholesale houses were opened in Winnipeg, and since they have gradually spread all over the West, until today wholesale establishments located in all the larger western centres of population very largely supply western needs.

The same development which thus characterized the business of wholesaling and distribution must inevitably now follow in the work of manufacturing itself. Freight charges on the transportation of necessary raw materials into the West will be substantially lower than charges on the finished products, while the opening of western factories may, and in all probability will, encourage the production for use of certain raw products of the West which today lie undeveloped because of a lack of market.

The decision to locate branch industries in the West is furthermore pleasing to Western people because it indicates recognition by Eastern industrial leaders of the fact that if they are to command the support and sympathy of the West, and if past lines of separation between east and west are to be wiped out and a new national viewpoint developed, the East cannot continue to merely accept the cream of western trade and profits in years of good crops and times of plenty, but must come west and throw in their lot more whole-heartedly with the people here and, while benefitting in years of abounding prosperity, also carry their share of the burden in years of slim crops and business depression.

With wonderful activity prevailing in the work of prospecting and developing the immense mineral areas of the northern portions of the three prairie provinces, with large schemes of power development now receiving attention, …

PLANS MADE TO BROADEN WORK OF POOL

Regina.—At the final session of the third International Wheat Pool Conference held here, it was decided to broaden out the work of the International Conference. Under the new plan Co-operative Producers and Co-operative Consumers the world over may be brought together in one large co-operative body, each pool retaining its identity as an individual co-operative unit. In this connection the following resolution was passed:

"Whereas the values to the various co-operative associations of meeting in conference has been established, be it resolved that national co-operative committees be formed for the purpose of furthering such conference and that such national committees appoint representatives to the International Pool Conference Committee."

Another important conclusion to which the delegates came was, that the International Conference again next year be left to the discretion of the International Committee which has charge of arranging details of this Conference.

In explanation of the national committees' resolution it was pointed out that the present International Conference Committee is representative only of wheat pools, wheat marketing organizations. The Conference this year had been widened in its scope and for the first time representatives of certain other co-operative organizations had been admitted as delegates.

By the formation of national committees, it was further stated during the discussion on the resolution, which would include representatives from Canada, the U.S.A., Australia, and possibly later on the Argentine or any other wheat exporting country, the existing committee was of opinion that a broader representation could be sent to the International Conference. …

Not Wanted In England

Conducting Another Search For Fliers

No Evidence Of Grafting

Immigration Inquiry Report Exonerates Members Of Parliament

Ottawa.—The parliamentary immigration inquiry report was tabled in the House of Commons. The document contains little of a drastic nature, but thirteen recommendations for the improvement of Canadian immigration activities in Canada.

Evidence in detail respecting the organization of the department of immigration was heard at thirty-six meetings of the special committee which conducted the inquiry. All phases of the department's immigration and colonization work—carried on both separately and in conjunction with governmental and voluntary organizations—were examined into and the testimony of a long list of witnesses was received.

Ald. M. J. Coldwell, Regina, who made charges last summer that members of Parliament had trafficked in special immigration permits, was numbered among the witnesses.

The report contains no findings of wrongdoing or trafficking in special immigration permits by members of the Federal Parliament or others. Tabling of annual returns at each session of Parliament showing particulars of these permits granted is, however, suggested. Steps to speed up British immigration to Canada by improving the overseas medical inspection system and the granting of assistance to young Canadian agriculturists similar to that given by the British authorities to British emigrant boys feature the report. Efforts towards reduced ocean passage and railway rates are also advocated.

Pass Estimates For Defence Department

Amendment Presented To House On Cadet Training Defeated

Ottawa.—When estimates of the Department of National Defence were before the House of Commons, Miss Agnes MacPhail, Progressive, Southeast Grey, moved that a vote of $500,000 for cadet service be reduced …

Reindeer For Northern Canada

Would Supply Food For Eskimo Bands In Northern Areas

Ottawa.—Importation of herds of reindeer into the Mackenzie basin with a view to supplying food for the Eskimo bands which inhabit this remote part of Canada is being undertaken by the government.

In the House of Commons, when estimates of the department of Indian Affairs were under consideration, Hon. Charles Stewart, minister in charge of the department, told of privation which had been suffered by the Eskimo in the past and the efforts which were being made to eliminate it.

Mr. Stewart also informed the House that the department was having some trouble providing relief for Indians in the Northern territories, and declared something must be done, in co-operation with provincial governments, to provide hunting grounds outside the present reserves. If placed in competition with white men the Indians would starve to death.

CONSUMERS OF BRITAIN HAVE NO FEAR OF POOL

Regina.—At the International Pool Conference held here, a message of goodwill was brought by the delegates from the British Isles.

Four distinguished visitors from England and Scotland told the conference of the desire of hundreds of thousands of co-operative consumers in the Old Land to remove the barrier that appears to exist as between the two classes of co-operatives and each work for the other in complete confidence with the one object in view—the creation of a truly co-operative body composed of both producer and consumer.

A. W. Golightly, representing the …

PRESENTED AT COURT

Miss Ruth Draper, the American actress, caused a stir in English society when she was presented at court. In the past the understanding has been that it was useless for any actress to seek presentation while she was still actively engaged in her profession, but court officials have pointed out that the general ban on stage folks has been a dead letter since the days of Queen Victoria.

Agree On Peace Pact

No Difference Of Opinion Between Canada and Britain

Ottawa.—There is no conflict of opinion between the Prime Minister of Canada and Sir Austen Chamberlain, British Foreign Secretary, with regard to the proposed Kellogg treaty for outlawing war.

This was made clear by Premier Mackenzie King in the House of Commons, when he replied to a question put by E. J. Garland, U.F.A., Bow River.

Mr. Garland had drawn the attention of the Prime Minister to his answer to C. H. Cahan, Conservative, St. Lawrence-St. George, on May 18, when Premier King declared that it was erroneous to suggest that the British Government could not sign the Kellogg treaty without the concurrence of the Dominions.

Premier King referred Mr. Garland to his communication to Mr. Kellogg …

May Hold Exhibition Of Canadian Goods

Plan For Publicity Campaign In Britain Being Discussed

London.—Canadian products should become very well known in Britain if Parmalee's scheme succeeds. Exhibitions of Canadian products are going to be held in the near future at Birmingham, Aberdeen, Belfast, Manchester, Glasgow, Dublin, Leeds, and Bristol, and a striking publicity campaign will be put into operation. A permanent staff, composed entirely of Canadians, will be created in London so as to be ready at any moment to run exhibition campaigns on behalf of Canadian products. Canadian artists will design the stalls and posters.

Parmalee is staying two months in order to perfect the scheme, which has been welcomed by trading authorities and the British government as a noteworthy enterprise.

PROTEIN CONTENT BEST BASIS FOR GRADING WHEAT

Ottawa.—The proposal that the protein content be made the basis on which wheat be graded was dealt with by the committee on agriculture in its report submitted to the House.

It came to the conclusion that the nearest approach to an ideal index of the baking strength of wheat was by determining the variety and quantity of protein, the latter to be ascertained by chemical test. At present the baking strength is determined on the variety and percentage of hard kernels.

The report stated that so far as export trade was concerned there was not sufficient evidence as to the effect of the proposed change from the present system of grading to that of the protein test to warrant a recommendation that it be adopted, but did …

WHEAT CROP IS IN EXCESS OF ESTIMATES

Winnipeg.—The wheat crop of the current year is greatly in excess of the estimates made last fall, according to figures given out by E. D. Cotterell, superintendent of transportation for the Canadian Pacific Railway.

Up to the end of May there had been marketed on the Canadian Pacific Railway 216,370,207 bushels, while the Canadian National reports 161,000,000 bushels, bringing the total of both lines up to 380,431,207 bushels.

Allowing 45,000,000 bushels for food, seed and grist mills brings the total accounted for up to date to 425,434,207 bushels, and reports show that there are still between 15 and … bushels in the hands of farmers for marketing.

Up to the end of May farmers marketed a total of 25,495,603 bushels of all grains on Canadian Pacific lines as compared with 421,020,228 bushels last year, representing an increase of 34,475,265 bushels. Loadings totalled 171,126 cars of all grain for the same period this year as against 149,328 cars last year, showing that the Canadian Pacific is now 22,000 cars ahead of last year's figures.

The Vancouver movement has been particularly heavy, a total of 30,578 cars of all grain being loaded up to the end of May as compared with 13,798 last year, an increase of 16,780 cars. The export of grain from the port of Vancouver to the end of May amounted to 72,731,272 bushels as compared with 32,561,801 bushels last year.

CO-OPERATIVE CREDIT ASSOCIATION MEETING WELL ATTENDED

The meeting held at the Variety Theatre on Friday night last, for the purpose of discussing the advisability of starting a Co-operative Credit Association in the Tofield district, was, considering the inclement weather, well attended.

Mr. McCoy, director of Co-operative Credit Associations was present and gave a very interesting address on the subject.

The Mercury representative was unable to be present at this stage of the meeting but a story of the work of Co-operative Associations will be given at an early date. We have written Mr. McCoy for one and no doubt will receive it shortly.

Mr. McCoy left on the 9:30 train and Mr. Ferguson then spoke for a few moments, asking that those present should express themselves as to their opinion and wishes.

A general discussion then took place and a committee was formed to see if there was any desire among farmers for an association of this kind. The committee is composed of Messrs. Johnstone Ferguson, J. G. Jebb, John Warner and Mr. Harrison.

Mr. Ferguson was appointed president and Geo. Abernethy, secretary.

A number then signified their willingness to become members of such an association if one were formed, and after some more general discussion the meeting adjourned.

COLE AND ROGERS CIRCUS IS COMING TO TOWN FOR TWO PERFORMANCES

The circus is coming. There's news for you! Cole and Rogers will bring the circus and wild west offering to entertain this community on Tuesday, July 3rd, with performances afternoon and evening. They will exhibit on the usual show grounds and spread happiness for old and young in the way happiness comes only on circus days, in the circus atmosphere and in the enchanting thrall of this universally enjoyed style of amusement. In addition to the regular circus, the sideshow and the many enjoyable features common to circuses, there will be displays of horsemanship and dare-devil riding by skilled masters of the rein, spur and saddle.

And speaking of horses—there is "Pewee" with Cole and Rogers Circus and "Pewee" is a horse worth going miles to see. Here is a perfectly formed equine, standing 26 inches high and weighing only 40 pounds; mouse colored, sleek, healthy and as perfect as horse can be formed. Imagine the joy of the youngsters to see this tiny animal; guess if you can how every boy and girl will thrill with the imagination of owning, riding and petting "Pewee," their tiny friend.

But there will be troops of "regular" horses; there will be wild animals and rare denizens of the jungles and forests. There will be acrobats and athletes, men and women of skill and poise, funny clowns to make old and young forget themselves.

SPORTS DAY PLANS GOING AHEAD

The second of July is going to be a big day for Tofield if the plans of the special meeting held at the Town Hall on Monday night fully mature. And mature they will, and nothing but the weather man can put a damper upon the day.

All the good things of previous sports days will be staged to entertain and amuse and a number of things that have not been staged before.

The main change from previous announcements is that a senior baseball game will be held in the evening for which a charge will be made. There are many who wish to see a good snappy game of ball and this should meet with general favor.

The Anglican Ladies Aid will serve refreshments on the grounds July 2nd.

AMISK CREEK

The picnic that was to be held here on the nineteenth, had to be postponed on account of the rainy weather and muddy roads. The date is now set for Friday, June the 29th. The program of sports will be the same as announced with the exception of one more game of baseball. Remember the date, the 29th. Everybody welcome.

Mr. H. Olson who is working at the power plant in Calgary is spending his vacation with his folks at home in Shonts.

Mrs. Eggen and Sigrid and Selmer Johnson, Mrs. B. Ness and family were guests at the R. O. Berg's home last Sunday.

Hanson and Carver are going to build an elevator at Shonts. Some of the material is already on the ground, and construction will be commenced this week.

KINGMAN

The infant son of Mr. and Mrs. Thor Grahn died on Wednesday, June 13th. The funeral was held at Armena.

An exciting game of basketball was played here on Friday evening between the men of Roundhill and the men of Kingman. Roundhill won, the score being 26 to 22.

Mr. A. Asp motored to Daysland on Saturday.

Hans Bonses of Minburn visited his parents, Mr. and Mrs. J. Bonses for a few days last week.

Mr. and Mrs. R. D. Bruce and family and Mr. and Mrs. D. Bruce and daughter, Stella, of Minburn, visited with Mr. and Mrs. J. Bonses over the week-end.

Mr. and Mrs. Gustafson and family of Bashaw were the guests of Mr. and Mrs. C. R. Blychert over the week-end.

Mr. and Mrs. J. Nelson of Armena were Kingman visitors on Thursday.

Mr. and Mrs. T. J. Rognose and family visited with Mr. and Mrs. Hans Paulson on Sunday.

W. McIntosh is now driving a new Ford roadster.

KETCHAMOOT

There will be no Sunday school or preaching services at the school house on Sunday, June 24th. A combined service will be held in Tofield United Church in the afternoon, so let's have our branch well represented.

We were pleased to have Rev. Dixon and Rev. Reid with us on Sunday, as owing to very muddy roads few of us have been able to attend the meetings in Tofield. As Rev. Gordon was unable to be present, they took entire charge of the service.

Mr. Dick Ross being unable to work owing to dislocation of the knee, left Thursday evening for the parental home in British Columbia.

Rev. Dixon and Rev. Reid were guests of Mr. and Mrs. Harrison for Sunday dinner, in the evening they were entertained by Mr. and Mrs. Geo. Frances.

Mr. and Mrs. Sam Nemeland, Mr. and Mrs. Marsh Mitchell and family were Sunday guests of Mr. and Mrs. Chester Coombes.

The meeting of the M.A.S. was held on Wednesday afternoon at the home of Mrs. C. A. Ingram. Twenty were present including members and visitors. After the devotional and business session, Rev. Dixon gave a short talk which was very encouraging. A delicious lunch was served by the hostess assisted by Mrs. Haukedal and Miss Hannah Jensen. The visitors present were the Rev. Dixon, Rev. Reid, Rev. Gordon, Mrs. Gordon, Mrs. Currie of near Dodds, Mrs. Haukedal, Mrs. Coombes, and the Misses Hannah Jensen, Viola Lee and Enna Lawson.

We are very thankful the caterpillars were of short duration this spring. At one time, that old poem kept running through our mind. "Here I come creeping, creeping, everywhere." but the rains soon put a stop to them.

Ketchamoot annual picnic will be held this year on the fourth of July. It is not our intention to be celebrating the fourth because it is an American holiday, but simply because it falls on a Wednesday and we wish to have the picnic before Chautauqua, Edmonton fair, etc. Our old picnic grounds is being broken up this year so the picnic will be held on Mr. Wm. Lee's farm, half mile north of the Bardo station. So please keep the day to meet with Ketchamoot people. A better time than usual is being planned on July 4th.

On Friday evening little Clifford Appleby got a paper wad lodged so far in his ear it was necessary to take him to Dr. Law's and have an anesthetic given him before it could be removed.

The eighth daughter arrived at the McBeth home in Calgary recently, (two deceased.)

Mr. and Mrs. J. Bonses visited with Mr. and Mrs. E. Erickson on Sunday.

BARDO

In spite of the inclement weather on Friday evening, a good sized and appreciative audience listened to Mrs. Conquest, the radio lady from C.J.C.A. The Junior Red Cross of Bardo and Grand Forks schools sang their service song at the opening, which was appreciated both by the audience and Mrs. Conquest. In these times of co-operation, should we not join in helping the Red Cross in the wonderful work it is doing here in Alberta. If every woman who paid her dollar fee during the war (besides sewing and knitting) would send one dollar a year membership fee to Mrs. Conquest, what a help it would be to them. "Oh the good we all might do, helping just a little." Mrs. Conquest was a supper guest of Mrs. P. B. Anderson. She spent the night at the Monrad Finseth home. She is a very entertaining guest, and her visit was enjoyed by both families.

Mrs. Brenden will entertain the Ladies' Aid on Wednesday, the 20th.

The Hilrude family from Ryley were guests of A. Steen's on Sunday.

Bennie Finseth was very successful in boring a well on his farm. It is 86 ft. deep and has more than 70 feet of fine soft water.

Mr and Mrs. Rude and Miss Myrtle attended the Swedish Lutheran Picnic and Sale on Saturday.

There was no service in the Lutheran Church on Sunday as the pastor Rev. Bjelde is having trouble with his eyes and was in Edmonton for treatment.

On Sunday, the Monrad Finseth family Clarence and Myrtle Rude, were guests in the Foshaug home. Mr. and Mrs. Rude visited with Mr. and Mrs. Jensen in their new home during the afternoon.

Mr. and Mrs. Brannis from Ryley spent Sunday with the Jacobson's.

The Jacob Brenneman family returned home on Friday evening. They, and a number of relatives, were entertained by Mr. and Mrs. Harvey Brenneman on Sunday.

Mr. and Mrs. Jake Yoder, also entertained a large number of guests for dinner on Sunday.

Mr. and Mrs. Ruben Roth are living in their new granary until their home is finished. The Misses Alta Roth and Mary Lehman were their guests on Sunday evening.

Mr. Dave Roth is putting in the foundation for a new house on his farm.

The Milo Stutzman family also returned last week. They came via Idaho. Mr. Stutzman's father is in very poor health. Miss Erma graduated at Hesston this month.

Dr. and Mrs. Law are away on their holidays. Dr. Johnson of Edmonton is in charge of the practice while Dr. Law is away.

The sanitary inspector was in town on Tuesday.

HOLY TRINITY CHURCH

Sunday, June 24th
(Third Sunday after Trinity)
11:00 a.m. Sunday School.
3:00 p.m. Evensong at Logan.
7:30 p.m. Evensong.

"THREE WISE FOOLS"
Thrilling Comedy by the Martin Erwin Players at Chautauqua.

ITCHY PIMPLES AFFECTED FACE

Also On Neck and Body. Healed by Cuticura.

"Eczema broke out in pimples and affected my face, neck and body. It itched and burned so that I was all the time scratching. My face was disfigured, and my clothing used to rub against the breaking out on my body and aggravate it. I could not get any sleep on account of it. The trouble lasted a couple of months.

"I began using Cuticura Soap and Ointment and they afforded relief in about a week. I continued using them and in three weeks I was completely healed." (Signed) Miss Rosie Whitman, Beaver Harbor, N. S.

Rely on Cuticura Soap and Ointment to keep your skin clear.

[illegible] Cuticura Shaving Stick 25c.

WORLD HAPPENINGS BRIEFLY TOLD

The Government of India has accepted the invitation of Secretary Kellogg to participate as an original signatory in the proposed multilateral treaty for the renunciation of war.

Marshal Chang Tso-Lin, war lord of Manchuria, who recently was driven from Peking has died in Mukden according to unconfirmed Japanese war office advices received at Tokio.

Miss Eleanor Lodge, a sister of Sir Oliver Lodge, noted scientist, is the first woman to receive the degree of doctor of literature from the Oxford University. She is 58 years of age and a well known historian.

Kroum D. Doboff, chief inspector of hygiene and labor in the ministry of commerce, industry and labor, Bulgaria, is visiting Canada studying industrial hygiene and accident prevention.

President Gaston Doumergue, when visiting Rheims, the most bombarded city of the Great War, took occasion to approve Secretary Kellogg's anti-war pact. He said that France will associate herself with all efforts to put an end to warfare.

Viscount Byng, former Governor-General of Canada, has taken his seat in the House of Lords after 20 months delay through the dispute concerning the payments of fees incidental to his elevation to the peerage.

Captains Charles Kingsford-Smith and Charles Ulm, co-pilots of the Southern Cross, have been offered large sums to appear in theatres, but they have declined to commercialize the flight, thus following Lindbergh's example.

An air mail service between Montreal and Albany, N.Y., will probably be established in the near future according to an announcement made in the House of Commons by Hon. P. J. Veniot, Postmaster-General. He thought that the contract would be let within a short time.

Captain Darbon, who flew the first French airplane on the war front which was equipped with a machine gun and to whose experiments the adoption of machine guns in war aviation was in a large measure due, was killed in a crash near Oran in Africa.

Records Are Remarkable

Several generations of two or three Japanese families have kept records of dates when bamboo bloomed, and it is found that certain sorts flowered once in 120 years simultaneously with others which flower once in sixty years.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Each automobile worker produces more than three times as much now as he did before the war.

For Rheumatism use Minard's Liniment.

A promise is but a small outlay from which large returns are expected.

Athletes.

For sprained ligaments, bound muscles, kicks and bruises — use Minard's.

MINARD'S "KING OF PAIN" LINIMENT

Consumption Of Meat In Canada

Figures Go To Prove That Pork Is the Favorite Meat

Pork is the favorite meat of Canadians, according to a recent compilation on the meat and poultry consumption of the people of the Dominion made by the Canadian Government Bureau of Statistics. The daily consumption of meat and poultry in Canada is about 7 1-5 ounces for every man, woman, and child. This means an annual consumption of 775,130,915 pounds of pork, 654,043,623 pounds of beef, 50,191,717 pounds of mutton and lamb, 63,839,591 pounds fowl and chickens, 14,138,566 pounds turkey, 4,556,000 pounds duck, and 9,863,960 pounds geese. In addition there is an annual per capita consumption of 20.67 dozen eggs, of a total of 202,040,092 dozens. Canada's egg bill alone is valued at over $113,000,000 annually. The per capita annual purchase of meats is 84.43 pounds of pork, 69.76 pounds of beef; 9.09 pounds of poultry, and 6.11 pounds mutton and lamb. This represents half a heavy hog, a small hind quarter of beef, two chickens and a loin of lamb for every member of every household in Canada, an expenditure at average prices of the different commodities of $42.09 per person, per year. For the whole of Canada this would amount to approximately $410,172,710 exclusive of the $113,000,000 egg bill.

Winnipeg Newspaper Union Fashions

Outstanding Smartness

916

An interesting type with bolero front and deep V-opening completed with vestee. The lower edge of the bolero is finished with applied bands. The skirt at front shows the new circular fulness, the back is straight in one piece and the set-in sleeves are dart-fitted. Style No. 916 is stunning made of the two surfaces of black crepe satin, one of the new supple woollen, two tones of georgette crepe. Sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 4½ yards 40-inch, or 3 yards 54-inch material, ½ yard 20-inch white and ½ yard 32-inch striped material. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

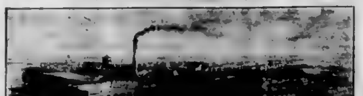
Work Of Fuel Board

The Dominion Fuel Board since its inception has conducted exhaustive studies with a view to making Canada independent in the consumption of fuel, with the result that Pennsylvania anthracite is being displaced by other fuels in Ontario and Quebec to the extent of 1,500,000 tons a year. Another beneficial feature is that a variety of fuels has established competition in the markets of domestic fuel supplies.

It is estimated that 160,000,000 people speak Russian.

STUDEBAKER PLANT AT WALKERVILLE, ONT.



The Walkerville Plant of the Studebaker Corporation of Canada, Ltd., where the Studebaker and Erskine Cars are manufactured is now a purely Canadian concern, employing Canadian labor, and using Canadian material. Studebaker and Erskine cars are becoming increasingly popular throughout the Dominion.

Studebaker To Build Canadian Automobiles For Canadians

Friendly Divorcement Of Canadian Organization From Studebaker Corporation Of America

With the announcement of a far-reaching reorganization of both administrative and manufacturing policies, the Studebaker Corporation of Canada, Ltd., has assumed a front rank position among the Dominion's largest independent manufacturers. The announcement, which indicates a friendly divorcement of the Canadian Studebaker Organization from the Studebaker Corporation of America, was issued by A. R. Erskine, president of both industrials.

The new Studebaker organization will be directed by D. R. Grossman, formerly sales manager for Studebaker in the Dominion. Mr. Grossman's title will be vice-president and general manager. Having been associated with Studebaker in Canada for the past six years, Mr. Grossman is well known to the Dominion's automobile dealers.

"The motive behind the reorganization is to be found in our desire to build Canadian Automobiles for Canadians," says the statement. "The Studebaker Corporation of Canada, Ltd., is Canadian. We will use more and more of Canada's great supplies of raw materials. Not only will our consumption of these commodities be increased, but new commodities will be added to our purchasing agent's order lists.

"We want to build automobiles for Canada and we want Canadians to approve of them. It is felt that the time has come to go ahead and no time will be lost in increasing the number of cars actually built in Canada. We hope to secure greater efficiency than has been possible in the past which will result in greater automobile values for Canadian purchasers.

"Continuing the precedent already established, the personnel of the Canadian organization will be almost exclusively Canadian. In addition, present plans contemplate that advertising and printed matter shall be prepared in Canada, and, in short, a large percentage of every dollar spent in connection with the Canadian business shall be paid to Canadian individuals and Canadian firms.

"The new arrangement will mean a gradual increase in the number of employees at the Walkerville plant. Branches are now maintained at Montreal and Calgary. These will also be greatly increased.

"This move is a result of Studebaker's faith in Canada," said Mr. Grossman recently. "We believe there will be wonderful developments in this country and through this expansion program, we will naturally become a part of those developments."

New Studebaker Organization

D. R. Grossman, vice-president and general manager.

Says Food Affects Eyes

Chicago Specialist Believes Defects Can Be Remedied By Diet

Farsightedness, which comprises 75 per cent. of eye defects, can be relieved by proper diet, according to Dr. C. A. Harkness, Chicago eye specialist.

"I have not collected positive data," Dr. Harkness said, "but from numerous observations in private practice and in clinic I believe diet affects the sight.

"A diet of such foods as milk, tomatoes, orange juice and cod livers will diminish the distorted shape of the eyeball 50 per cent. in three months.

"All children under 10 whose sight is defective are either under-nourished or underfed. Diet can restore the sight to a better degree of normality."

The Level Road

The peril of the level way is greater than the peril of the hills. There is nothing more exhausting than a dead level stretch, unbroken by change. More people break down beneath the monotony of life than beneath its changes. There is scarcely a greater achievement than the victory of the man who keeps fresh and vigorous on the level road.

There are a few things that money cannot buy, but not many people want them.

Improved Guide For Airmen

New Radio Beacon Will Chart Course For Trans-Ocean Flier

Trans-ocean fliers of the future, will be able to fly a course definitely charted by means of an improved type of radio beacon which has an absolutely fixed wave length, it has been announced at the Radio Aircraft laboratory at Dayton, Ohio.

Captain Paul S. Edwards, Signal Corps, U.S. Army, in charge of the laboratory said:

"The signal corps here have made improvements in beacons which increase its efficiency 100 per cent. over the old type."

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Biff: "Was it a bad accident?"

Bing: "Well, I was knocked speechless and my wheel was knocked spokeless."

Some women wear gloves most of the time and others have diamond rings.

Friendship and confidence are plants of slow growth.

WILL INVESTIGATE CLAIM

The claim of Madame Tchaikowsky, Russian refugee, that she is the Grand Duchess Anastasia, daughter of the late Czar of Russia, is once more under investigation. Grand Duke Andre (No. 1), is sailing to America at the request of Mrs. W. B. Leeds (No. 2), whose guest Mme. Tchaikowsky (No. 3) is, in an effort to determine her identity. No. 4 is the last photograph of Grand Duchess Anastasia before her reported death at the hands of the bolsheviks ten years ago.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

It was just a step to Canada House and a reception by the Hon. Peter Larkin, High Commissioner for Canada. We were all impressed by the appearance of Canada's headquarters in Great Britain. Overlooking Trafalgar Square, Canada House occupies one of the most commanding sites in London, and does honor to our Dominion. There was no formality, no speeches, just a friendly handshake and a few words for all in the private room of the high commissioner.

Now came the event of the day, the reception at St. James'. It was not without awe that we entered this simple stately palace of red brick after passing its castellated gateway guarded by sentries wearing the famous busby. This palace which we Canadian farmers were entering had been the home of Charles the First, and is today the scene of Levees and Privy Councils. We mounted the beautiful stairway to the Entree Room. A short wait and the Prince was in the Audience Chamber ready to meet us. The door opened. There was His Royal Highness, not seated but standing at the entrance with a smile of welcome. We were introduced by Mr. Graff who performed a feat of memory by remembering all our names.

The Prince had a handshake, a smile and a few words of greeting for every member of the party, but his friends and neighbors from Alberta were specially honored. Mr. William Sharpe, who once played the pipes at a party on the Prince's ranch, was at once recognized by His Royal Highness, who asked Mr. Sharpe if he had brought his kilt. The Prince asked Mr. C. H. Marshall how their mutual friend "T" Brown was getting on, and Mr. P. J. Tooley, of the Peace River, was questioned about Peace River problems and the probability of railway connection with the Pacific Coast. The interest of the Prince in Canada was spontaneous and real, and we were delighted with his evident regard for our great Dominion.

After the reception we were shown through the Armoury, Queen Anne's Drawing Room, the Tapestry Room, the Throne Room, and the Picture Gallery, with its Royal portraits dominated by the paintings of King Henry the Eighth at one end of the room, and Queen Victoria at the other.

Our next appointment was at Harrod's great stores where we were entertained by Sir Woodman Burbidge, head of this great firm, to lunch afterwards visiting the Provision Shop and some of the factories of this great establishment. Harrod's is perhaps the finest department store in London and its provision shop is a model for such establishments. Canadian products have a prominent place in it.

Our official day concluded with a visit to the London Headquarters of the Danish Bacon and Co-operative Trading Company through which passes a large part of the Danish bacon supplied to the British market. In a single fortnight as many as 400,000 sides have been received and distributed from this one plant. Besides acting as a distributing centre the company operates thirty smoke-houses. It was interesting to learn that a thick pitch-like substance which encrusts the walls, the result of many years' deposit, imparts to the bacon much of its aroma and flavor. The deposit is caused by the volatile oils which bacon sides exude while curing.

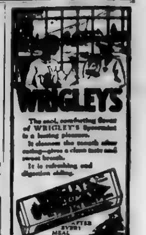
Non-resinous wood is used in the smoking process. Shrinkage during the curing process is approximately 7 per cent.

Every bacon side bears several stamps which permits the Danish Bacon Co. to trace the origin and date of killing of every piece of meat that reaches its establishment and obviates any possibility of bacon being distributed which may have been held up over long at the producing point, or shipped too soon to take advantage of satisfactory conditions. The sides are graded by experienced men who, through long association with the British market, know accurately the requirements of each of the customers of the Trading Company.

The Danish Bacon Co-operative Trading Company is an example of a combined producer-consumer co-operative organization. Half of the capital stock is in the hands of 10,000 retailers, large and small, scattered throughout the British Isles, the other half is owned by 17 Danish Bacon Factories which supply the carcases. Such an organization, bringing together as it does, a single distributing body, the producers and consumers of a given commodity, lends to the Company great internal strength.

The Company in London undertakes to accept all suitable bacon as it is shipped from the 17 factories in Denmark, and it is its proud boast that it has never refused to handle all supplies shipped to it regardless of the condition of the market.

(To Be Continued.)



SUNDAY SCHOOL LESSON

JUNE 24

JESUS THE SAVIOUR

Golden Text: "Choose you this day whom ye will serve."—Joshua 24.15.

Devotional Reading: Ephesians 2.14-17.

A Review By Means Of Allusions

Not always on the mount may we
Rapt in the heavenly vision be;
The mount for vision, but below
The paths of daily duty go.
—F. L. Hosmer.

Render to all what is due them, whether you agree with them wholly or not. Give to secular authorities the obedience which their office requires. — Dean Stanley.

Sometimes the man has been vouchsafed a vision, but he has lost himself in its contemplation. It is as if he had tarried in the mount and had never returned.—George Wharton Pepper.

Everything in Palestine [illegible] can be walled in and roofed over is shut away from the sun and the stars, and generally with a stall for traffic in photographs, picture postal cards, and souvenirs. The money-changers have got back into the temple again.—Gaius Glenn Atkins.

"In memory of the Saviour's love
We keep the sacred feast,
Where every humble, contrite heart
Is made a welcome guest."

We see Thee lifted up as a sign drawing all men unto that hopeless hill with the resistless power of Love Divine.—Martha Foote Crow.

"The Missionary Union of America once prepared spices and oils for the embalming of the work in Telugu, but where they prophesied death, there has been abundant life, and the joy of their disappointed belief has filled all Christendom."

There is a sighing in the pallid sprays
Of those old olives, as if they kept
Their pitying watch, in Nature's faithful ways,
As on that night when the disciples slept.—Katharine Lee Bates.

A photographer makes his sensitive plate, exposes it to just the ray of light that he chooses, dips it into the proper solutions, and holds it up to the light to see if his picture is there. What else did this Great Teacher do on that day but hold up these souls to the light to find out if the reflection of the Son of God were fastened there?—J. M. Stifler.

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co. have received the following letter from Mrs. Griffith, of 21 Murchison Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs,—I wish to thank you for the handy little booklet you sent me on the Care of Children. My first boy was six weeks old when I first used Baby's Own Tablets, being new to Canada, but since the first proof of their many uses in bringing up a family I have never been without them for they are worth their weight in gold. There is no trouble in getting the little ones to take them and they often prevent an illness if taken in time. My first baby is now, at the age of four and a half years, a picture of health, and my nine-months-old baby is also well and happy. They are both a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them."

The booklet to which Mrs. Griffith refers is entitled "Care Of the Baby," and treats with what a mother ought to know for baby's sake. A copy of the booklet will be sent free to anyone requesting same from The Dr. Williams' Medicine Co., Brockville, Ont.

Toronto is to have a corn-borer inspector, but what is really needed is an official to get after folks who borrow books and never return them.

Among the chief uses to which lead is put is its conversion into white lead, which is the most reliable base for nearly all paints.

Strengthened For Extra Long Mileage

Gum-Dipping, the exclusive Firestone process, impregnates and insulates every fibre of every cord with rubber, building into Firestone tires longer service by strengthening the side walls to withstand the extra flexing strain.

Let the nearest Firestone dealer put these sturdier, easier riding tires on your car now. He will save you money and serve you better.

CHAPTER XXVI Continued

Mrs. Kalinski looked very smart in her black satin tea-gown and gold embroidery that her landers had brought from the store. She took her neighbour into her confidence. "No matter what I could say, mind you! The woman said she paid seventy dollars for it once and Izy got it for fifteen. She wanted thirty, but Izy told her it was the worst thing to sell. Who was wearing tea-gowns now?—they was out of date like leg o' mutton sleeves. And all the time Izy was thinking of me. I had a red cashmere one with Watteau pleats when our Rachel was comin', and his papa says little Isaac will be served as good, even if it did cost fifteen dollars and could be sold for thirty easy. He's that good a man, and spares no expense in reason."

Mrs. Corbett brought the tea from the kitchen and filled the cups. "You and me are lucky women," she said, "to have two good men like we have. Ain't some of them the easy goin' divils, though? I don't know what to [illegible] Helmi's man, though she sticks up for him and is afraid he's been lost in a storm or drowned in a river. Poor girl,—it's a shame to see her havin' to work in a Chinks, but what could the poor girl do? Not one of these dainty ladies would have her, they all had some reason."

"If she were just a Hebrew girl, now," said Mrs. Kalinski, "one could go to the Hebrew Association of Women and they would find a place for her. We would not have any nice white girls of ours workin' in a Chinese shop and havin' to take lippy talk from every Harry, Tom, Dick, and maybe worse. Mrs. Sternberg and Mrs. Swartz are grand on that, and good girls they have found for our people."

Mrs. Corbett paused, with her saucer half way to her mouth. "Look at that now! Ain't the Jews wonderful to think of things? We've got grand societies, too, and I never once took thought of them. Sure we've got societies. They're all up to their eyes in pneumonia jackets and many-tailed bandages now, and socks for the soldiers, but they're grand women, too. When I came here first, I used to take care of the Club room at the "Y" and I used to see them there smilin' round, very civil spoken women, too, and tryin' to [illegible] the world better, and God knows it needs it. I'll go to Mrs. Bell, the old lady, and I'm glad you spoke of this, Mrs. Kalinski. Maybe we can get a decent place yet for Helmi, though if she takes the baby away I don't know what I'll do with Rose and Dan."

Mrs. Corbett went that evening, after Helmi had gone to work, leaving the baby to the watchful care of Rose, who sat in No. 18 to do her lessons.

Mrs. Bell was at home, and would speak of Helmi's case at the meeting of the Lloyd George Chapter the next day.

A week later a new place was found for Helmi. Mrs. Bell said it was an ideal place, and while ten dollars a month was very little, still it was not every place she could have the privilege of keeping her baby, and Mrs. Herriott would be very kind to her. Mrs. Herriott was young and inexperienced, and found her baby a great care. Helmi could mind the two babies and Mrs. Herriott would do the work.

Old Sam was sorry to part with Helmi, and gave her a feather fan. "You come back some day—old Sam be glad. Good girl—colly tray teaches make chop suey—come back! You come see my girl too, and have chop suey."

Helmi paid her rent at the "North Star," and had three dollars left.

The Herriott home was a six-room bungalow on 17th Street, three blocks from the car line on 13th [illegible]. It was a little house, low-roofed, square, with but little pitch in the roof, and high pillars in front, much too high for the height of the house, giving one the sensation as Helmi thought of seeing a cow getting up hind legs first. Rosie and Danny conducted her to the place, Rosie carrying the baby and Danney helping Helmi with the heavy valise.

"I hope you don't like her," said Rosie, "and then you'll come back. I'll bet her baby cries more than ours, and just when you get little Lili asleep, her kid will wake up whinin'. Well, anyway, Helmi, you can always come back, and we'll manage some way."

Helmi kissed her two good friends at the back door, but Rosie refused to go until she saw if the lady were at [illegible].

"Maybe she's changed her mind," she said speaking from her experience with ladies—"or has got help—or somethin' has happened. You can't depend on those women in the West End. Ain't that right, Dan?" They don't pay their debts, either, very good. They always say 'Come back again.' Dan collected for a tailor and he knows. They don't remember anything less than five dollars, and when they're stuck for another excuse they peep out of one of the windows to see who it is, and won't let you in."

Mrs. Herriott was in and had not engaged anyone else, and so the escort had to go home alone, which they did regretfully.

Helmi found the house in a state of siege. Confusion reigned everywhere. The invader slept in a baby carriage which filled the greater part of the living-room, and when he slept all noises were muffled. The grandmother, who had been conscripted into service, padded about in her bedroom slippers. The telephone bell was stuffed with paper. No one was admitted to the house, not even the baker.

There was a little room off the kitchen where Helmi and Lili were to sleep. It had just room enough to take in the rubber-wheeled carriage.

"Oh, I will be so glad to have someone to take this old baby off my hands," said Mrs. Herriott frankly. "He spoiled last summer for me, but I don't mean to let him spoil this one. Isn't a baby awful? I hope yours is good. Anyway, I can get out now and, believe me, I am going."

Mrs. Herriott, having shaken off family cares, resumed her place in her little world. She curled and played bridge, and went to the matinee with her friends and came home only when everything was over. She was a pretty, plump-faced girl of twenty-three who had the misfortune to be the only child of adoring parents. "Maudie is not fond of work," her mother often said; "but never mind, she'll take to it when she has a house of her own." Young Robert Herriott, who had married her with pomp and circumstance at the First Church believed the same thing.

Maudie had been in a terrible rage about the coming of the baby, but her mother fondly believed she would be attached to it when it came. "They make their own place, babies do," she said. "Maudie will be so fond of it she wouldn't take a million dollars for it when she has had it two days." But Maudie's friends agreed among themselves that they would hate to offer it to her.

The baby was now two months old, and the great fountain of mother love which the baby's grandmother had hoped for was still either non-existent or untouched. "She'll take to it when it gets a little older," she would say. "You'll see, when it gets cute Maudie will take to it."

Helmi knew that cats sometimes refuse their young, but she did not know that it could be true of human beings.

In a week the seige seemed to be lifted. Long lines of washing had been fluttering on the clothes reel; closets were tidied, floors polished, the "old" baby put on a regular way of living. Mrs. Herriott had won the Ladies' Points competition at the rink, and her friends had told her she was looking years younger.

One night, when the Herriotts were going for a drive, Mr. Herriott wanted to take Helmi, too, and her baby. "That girl hasn't been out of the house since she came," he said. "Ask her to come, Maudie."

[illegible] finger on a neatly carmined lip. "Hush, Bob," she said, "don't spoil her, leave well enough alone. Come on, we'll take the Bunnings—they have no kids to want to come. Hurry, Bob!"

(To Be Continued.)

The British custom of serving 4-o'clock tea in business offices is fast "taking on" in Canada. Many Canadians, as well as British-born, executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English teas. Sold by all grocers, in bright, clean aluminum.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

May Abandon Geneva

Rumors Are Revived That League May Move To Another Capital

Rumors that the League of Nations may be transferred to some other European capital were renewed recently at Geneva when it was learned that the league had not succeeded in acquiring a site deemed necessary for the proposed league palace.

It appears that the English woman who is proprietor of the villa where league delegates have been housed for years is adamant in her refusal to sell the property. This has given a new impetus to those advocating taking the league out of Geneva and installing it in Vienna or elsewhere.

Canada Comes Second

According to word from New Zealand, that country claims a world leadership in per capita possession of dairy cows with 53.1 per hundred of population. Canada, according to the table, ranks second with 40.4 per hundred, followed by the Irish Free State with 40.0 per hundred. Australia has 20.9 cows per hundred of population.

Human nature's funny. No sooner does a man "get on his feet" financially than he wants to get off them physically.

A reliable antiseptic—Minard's.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Cancel Grants To Class "B" Fairs

As Federal Aid Withdrawn, Support Should Come From Provinces

Some discussion took place in the House at Ottawa, and criticism offered over the cancellation of federal grants, under the department, to class "B" fairs. Hon. W. R. Motherwell, minister of agriculture, explained that grants had been made to class "B" fairs during the war as a war measure. This aid had been discontinued, as they were not entitled to federal aid. They should get aid from the provinces. During the past few years, Mr. Motherwell said, he had noticed several provincial governments had increased their grants to class "B" fairs in anticipation of cancellation of aid by the federal government.

"Class "A" fairs were receiving federal aid, and while only $50,000 was granted as federal aid before the war, the amount now totalled $345,000 annually.

A large number of the members took part in the discussion, several of them expressing their opinion that the smaller fairs did as much, if not more, for agriculture generally than the big ones.

Alfred Speakman (U.F.A., Red Deer) believed in the encouragement of educational fairs, with good livestock and agricultural exhibits, in place of those fairs specializing in side shows.

M. McLean (Liberal, Melfort) spoke in favor of aid to the smaller fairs in the agricultural districts.

Another Reform In China

Ruler Of Honan Province Forbids Binding Of Women's Feet

Women of Honan are to totter no longer on tiny bound feet. Marshal Feng Yuhsiang, the revolutionary ruler of the province, has not only prohibited binding the feet of young girls, but also has ordered that the feet of their mothers and grandmothers must be loosed from their bonds.

This abolition of "lily feet," which Chinese for generations have considered among [illegible] greatest charms, but which appear as cruel deformities to most orientals, is to be accomplished by persuasion if possible, but by direct official action if necessary. A propaganda against footbinding is being carried out in women's meetings, in newspapers and wall posters.

To enforce his edict Marshal Feng has established a "Bureau for the Liberation of the Feet of the Women," whose agents make house to house bound feet are found are to be punished. Agents are promised a bounty visits. Heads of households in which of $2.50 for every 100 sets of discarded foot wrappings they turn in, and one month of the campaign brought in more than 23,000 sets.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Eclectric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Late Threshing In Alberta

Estimates That Nearly Thirty Million Bushels Of Grain Threshed In Spring

Alberta's farmers, whose wheat was left in the field unthreshed all winter did not fare badly. In most cases, they made money through the fact that they could not sell their grain until this spring, since wheat, for example, increased in price from 20 to 23 cents a bushel. A local grain man estimated that nearly 30,000,000 bushels of grain were threshed in Alberta during the last part of the winter and this spring.

DIARRHŒA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhoea and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

OGDEN'S CUT PLUG

Soothing— yet a man's smoke

COOL AND FRAGRANT

Save the Valuable "POKER HANDS"

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The [illegible] Dental Society

TOOTH STRAIGHTENING

Your child has "crooked teeth," and wisely, you are thinking of his future and are not content to let this condition persist.

Irregular teeth are in a sense, a deformity and often mar one's natural attractiveness and indeed, in many instances may also lead to general systemic disturbances.

Now, can anything be done by way of correcting this mal-occlusion?

A great deal, especially if treatment is commenced while the child is still young.

Each case, of course, presents its own problems with their special solutions but in the main, your dentist, or the orthodontist who specializes in this branch of dentistry will correct this condition by making use of metal bands and bars which your child would need to wear continuously for some little time, the period of wearing being determined by the severity of the case in hand.

But you wonder, perhaps, how a tooth can be moved when fully erupted, encased as it is in dense and seemingly unyielding bone.

However, it is simply a matter of making use of a natural physiological process whereby bone tissue is resorbed and broken down in advance of a properly applied and persistent force thus permitting the tooth to move bodily through its supporting bony structure.

Then is tooth straightening a painful process?

Not in the least where too rapid movement is not attempted.

And when should it be commenced?

Many operators like to take the case in hand while the child still has the temporary set, and generally at about the eighth year when success is more easily and quickly secured.

Then of course where treatment is delayed the case becomes progressively more difficult of correction because the muscles and tissues are becoming more or less fixed. When early adult life is reached, tooth straightening is not advisable except in the very simple cases.

Alberta Telephones

An increase of 134 exchange stations and 93 rural stations, or a total of 247 new stations in operation during the month of April, 1928, is reported by the Alberta Department of Telephones.

Two French engineers have invented an aerial torpedo for transporting letters and packages at a speed of nearly 300 miles an hour.

"Do you think that Doris is fitted for the battle of life?"

"Well, she ought to be, she's been in four engagements already."

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Carol: Does your husband gamble?

Jo: Not in an objectionable way. He nearly always wins.

Travelling at the rate of two miles a minute it would take an aeroplane nearly 23 years to reach Mars.

Minard's Liniment for insect bites.

Little Helps For This Week

"He that hath a pure heart shall receive the blessing from the Lord."—Psalm xxiv. 4, 5.

O God! the pure alone
E'en in their deep confessing
Can see Thee as their own
And find the perfect blessing;
Yet to each waiting soul
Speak in Thy still, small voice,
Till broken love's made whole,
And saddened hearts rejoice.

How does Jesus make men pure? He made Himself one with our human nature that He might heal and bless it through its contact with His divinity. He folded it around His eternal presence. He made it His own. He made it a power which could quicken and restore us, and then by the gift of His Spirit He bound us to it. He robed us in it, and henceforth Christian humanity became conscious of a Presence before which the unclean spirit cannot but shrink away.

Cute in a Baby—Awful at Three—and it's Dangerous

by Ruth Brittain

Thumb sucking does look sweet in a baby but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit: irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for [illegible] H. Fletcher's signature on the wrapper so you'll get the genuine.

The magistrate must have been entitled that this Chinaman was a Christian. Some times a Chinaman wishes to be sworn by having a chicken's head cut off or having his ton, "Are you a Christian," he is some written on a piece of paper, plied, "He no Christian, me Pr-ship

which is then set on fire. It is reported of an Edmonton Chinaman, who was to be sworn that in reply to the Judge's question he said "No, me Christian, he no

The Power of The Pool
Lies In Volume Control
The Canadian Wheat Pool Now Handles ONE FOURTH of the World's Exportable Wheat Surplus.

The Wheat Pool has given ample evidence of its usefulness to wheat growers since last harvest. Faced with the handling of a damaged crop and with a large increase in world production, the Pool has been successful to a considerable degree in preventing disastrous slumps. Every wheat farmer in Western Canada owes a debt of gratitude to the Wheat Pool.

The power of the Pool lies in its control of volume. Every bushel placed in the Pool means greater strength. The organization needs YOUR assistance.

The ideal of co-operation is working together for the common good. It is opposed to any system that makes a profit on the result of the labors of the producer. Its operations means more wealth for all the producers.

Co-operation is not only a sentiment but an economic necessity. Let the hearts and minds of our farmers become enthused with its ideals and thereby insure hope for the economic future of agriculture.

Those who have not signed the Second Series Wheat Pool Contract gains nothing by delay. You only contribute to the welfare of an organization that has proven that best friend the farmer has ever had.

EDITORIAL

If you are going to celebrate Fathers' Day we would suggest that you begin by letting the old boy sleep late. Then he is sure to wake up with a grouch. There will be no hot water for his shave and the Sunday paper which you have let the kids have to keep them quiet will be in a mess. Give him cold fried eggs for breakfast and the day will be utterly ruined.

If you think of Tofield as "a high priced town" just remember folks that Ryley are selling each other here high prices are there and how low they are here. It's human nature.

This is a great age for motions and slogans but the best slogan human nothing without assembling pretty substantial to back it up.

THEIR TROUBLE Immaterial is the one thing the modern young people want. That accomplished they will be alright.

H. G. Carrier says that since he has had his McCormick Deering Tractor, he is thoroughly convinced that it is the tractor of the age.

Jim: "This hot-

ter is no strong it walks over to the coffee and says "How do you do?" Jass: "Yes but the coffee is too weak to answer."

Mr. T. W. Jacobs was last in our office and having but a nine foot stiff heath cultivator of a last year we asked him how he liked it. Mr. Jacobs said that if he couldn't buy such or one like it, all the money in Tofield wouldn't buy that one from him Last year he didn't plow a furrow, but cultivated 160 acres and had an excellent crop.

EMPIRE BUILDING
(Continued from last week)

IF THE proportion of British emigrants to Canada is alarmingly small; if, as we have read "the British race seems to have lost its adventurous and pioneering spirit"; if the governments of Great Britain and Canada desire on the one hand, to relieve an over burdened labor market in Britain and on the other hand to increase the population of this country, the field is wide open for suggestions as to how this can best be done.

There are three prime factors in the problem, the British government, the Canadian government and the prospective emigrant, and because it lies within the power of the prospective emigrant to serve the purpose and further the interests of the two governments, he or she is the most important of the three. Therefore to solve the problem the two governments must combine forces in such a way as to make it desirable for the prospective emigrant to do what they wish him to do, which is to come here, live here, and help develop this country with British ideals of citizenship and enterprise.

Voluntary exile is not adventure. At the present time it is comparitively easy for individuals and families to come to Canada from Britain. We will not say it is too easy, because the desire is to get good settlers, and good settlers procured by an assisted passage scheme is that much gain. But though it is easy for persons of limited means to get into Canada it is very difficult for them to get out. Rail and boat fares from the prairie provinces to Great Britain are such that it require years and years of saving on the part of the average settler before he or she has sufficient to finance a visit to the scenes of earlier life. Can one wonder then, that the prospective emigrant is slow to hearken to the voice of the immigration agent. He or she sees in emigrating to Canada, voluntary exile. Of course there are many who do go back and forth every few years, but for the most part the coming to Canada is a complete severance with Great Britain.

If some scheme could be put into force whereby settlers could be transported (if they so desired) from Canada to Great Britain and return, say, every five or seven years, it might change the viewpoint of the prospective emigrant. His severance with the old land would not be absolute, yet he would be building up the new.

To suggest that the combined governments of Great Britain and Canada provide free transportation from Canada to Great Britain and return to British settlers who have spent some years in Canada, is to raise a laugh, yet after all the problem is one for the mathematician. Every week the British government is spending a great sum of money on relief due to an over crowded labor market; every week the Canadian government is paying a deficit on a government owned railroad and losing much money in taxes due to lack of population. We could go on and present an argument in favor of this suggestion by using figures, but we will be content with making the sugge-tion. It is made in relation to the subject of empire building and the reported lack of Britishers entering the country. It is a plan in use in all government services, navy, army, diplomatic and civil service and could, we believe, be used with profit in empire building.

Of course it could not be made retroactive.

"THE DAYS OF REAL SPORT"

WE ARE evidently now entering upon what can be rightfully called the days of real sport. Just a week or two away, Tofield will hold its sports day, which this year will be more in keeping with the day last year than some of the previous sports days. It will be a day chiefly for children, though the parents too, will be able to spend a very enjoyable day in town. Then there are the sports of all kinds, junior, intermediate and adult, baseball, basketball, horseshoe tournament and many other things to make the day an enjoyable one for old and young. The chief departure from other years will be that there will not be so much senior baseball. There will however, be a game of senior ball in the evening, for which a charge will be made. Entrance to the grounds will be free during the day and free coffee will be obtainable at noon.

Right on the day following a circus is coming to town with the usual complement of wild and trained domestic animals. There is nothing just like a circus to thrill the juvenile mind and no doubt many youngsters, as well as grownups will be looking forward to its coming.

Then in a short while the big brown tent of the chautauqua will make its appearance here. The first meeting has already been held, and the ticket selling campaign partly marked out.

A day or more at the Edmonton fair will be enjoyed by quite a number also, and what with a number of country picnics thrown in for good measure, the coming days are going to be, for a good many people, days of real sport.

The Nichols & Shepard COMBINE

With many new features
The Big 12 Bar Cylinder, the heaviest found in any combine, and the *Man Behind the Gun*, the great combination over devised for getting the grain from the straw.
The Sieves—The machine weighs, whether the grain sack is full or empty, is equally distributed on all three wheels. That means a machine free from side draft, a combine that will cut square corners, a combine that will heed steer and easier in the heaviest field.
One Man Control—The operator—and only one is needed—rides high on the machine out of the mire and dirt with every lever and rod at his finger tips and with the machine and the header in full view.
This is the combine that beats them all.
This is the combine that threshes like the separators of the famous Red River Special Line. It is the combine that has had every part proved in the grain fields of Western Canada by leave combines.
This Nichols & Shepard Combine is offered as a new low price.

PLACE NAMES OF ALBERTA

The Mercury is in receipt of an interesting booklet published by the Geographic Board of Canada. It contains as far as possible the origin of the various place-names in the province. Tofield, is listed as having received its name from Dr. Tofield Ryley, from a former official of the railway. Bardo from Bardo in Norway and so on.

The following introduction to the book is interesting reading.

The history of Alberta is summarized in its place names. The name of the province itself recalls the happy auspices under which it came into being. The Marquis of Lorne was Governor General of Canada at the time and the name was given by him as a graceful tribute to his wife, H. R. H. Princess Louise Caroline Alberta, fourth daughter of Queen Victoria.

In token of the love which those has shown
For the wide land of freedom, I have named
A province vast, and for its beauty famed,
By my dear name.

There are names which reach back to the days when the buffalo herds swarmed over the prairie and the Indians were monarchs of all they surveyed.

There are names which recall the rivalry of fur trading companies in their quest for beaver skins; names which shed light on the toils and struggles of the pioneer settlers, their hopes and aspirations, disappointments and successes.

The place-names of Alberta may be divided conveniently into two groups, those which existed before the coming of the full tide of immigration and those which have originated since that date. The origin of the Canadian Pacific Railway reached the western boundary of Alberta in the autumn of 1883, and, as the building of the railway increased the rapidity of settlement with a consequent multiplicity of new names, this year forms a convenient point of division for the study of the names of the province.

The earliest names are to be found on the maps of Astor Arrowsmith and his nephew, John Arrowsmith. The Arrowsmiths enjoyed the confidence of the Hudson's Bay Co. who transferred to them all information respecting discoveries made by officers of the company. The first Arrowsmith map of North America was published in 1795 and was "described by Permission to the Honourable Governor and Company of Adventurers of England Trading into Hudson Bay. In testimony of their liberal Commensation. Numerous editions of this great map were printed, particularly between 1795 and 1825. It was Aaron Arrowsmith, too, who prepared the map to illustrate Sir Alexander Mackenzie's "Voyages," published in 1801. John Arrowsmith compiled many maps for the Imperial Government including the important ones showing the discoveries of the British (Government) explorers, Captain Palliser and his colleagues, between 1857 and 1860. Also noteworthy for names is the map prepared by Davin Thompson, of the North West Company, in 1813 and 1814.

Attention may be called to one name on Aaron Arrowsmith's map. It is that of Edgecoal creek, known today as rosebud river. Concerning this Arrowsmith says "Great quantity of coal in this creek." This is the first published reference to the existence of coal in Alberta, the abundance of which is betokened by such names as Anthracite, Carbondale, Colliery, Coal Valley. Incidentally, they may be noted the use at this early date of the word creek, the universal name in western Canada today of streams called brooks in Great Britain.

A Calgary correspondent recently sent the following to a late issue of the Canadian Bar Review. Recently a Chinese client consulted his solicitor about an assault. As the solicitor was leaving the City the same day he gave the Chinaman instructions to go to the police station and lay a charge. On the solicitor's return the client called to report. Asked if the summons had been issued done to get it issued he said, "Me said it had. Asked what he had 'smellum Bible.'

Cream Shippers
This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.
If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.
YOURS FOR 200,000
THE TOFIELD CREAMERY

The Safest car of them all to drive and Soundest of all to buy!
McLAUGHLIN-BUICK owners enjoy the highest degree of safety it is possible to build into a motor car—because today's McLaughlin-Buick embodies every recognized safety factor, developed to a unique degree of efficiency.
The double-drop frame—pioneered by McLaughlin-Buick—provides a lower center of gravity, as well as maximum headroom, road-clearance and all-round roadability.
McLaughlin-Buick mechanical, external-contracting four-wheel brakes—*the world's safest type* — act instantly, release instantly, are always ready for any emergency.
The famous McLaughlin-Buick Valve-In-Head six-cylinder engine surpasses all others in flashing pick-up and tremendous power reserve—assuring constant safety in touring, in traffic and on the hills.
McLaughlin-Buick is soundly built, thoroughly dependable, unrivaled in value—the safest car of them all to drive and the soundest of all to buy.

"Safety First" on the Highways

The phenomenal growth in the number of motor driven vehicles on the highways of this continent constitutes one of the most amazing developments of modern times. The motor car has in fact, completely revolutionized modes of living in the space of a very few years and, equally so, has ushered in an entirely new era in the history of transportation.

It is not necessary to even enumerate the many changes which the general use of the motor car has brought about. These changes are patent to everyone. The result has been, of course, to likewise create entirely new problems which did not confront, and were never dreamed of by the people of a couple of generations ago.

The motor car has forced governments and municipalities to completely re-organize plans and the work of road building because what was regarded as an excellent road for horse drawn buggies and wagons is quite obsolete in these days of motor traffic. The result has been to compel huge expenditures upon all governmental authorities, not only in the construction of a much higher standard of road, but in annual maintenance charges in order that such roads shall be kept up to that high standard, and shall be available for use at all times in all weathers.

In large cities the multiplicity of cars has created congestion and traffic problems of the most difficult kind, and the number power and speed of modern cars not only an hourly danger to each other and their occupants but to all pedestrians. Laws governing rates of speed, laws prohibitive of glaring headlights for night driving, and innumerable rules of the road in an effort to regulate this enormous and ever increasing traffic, have been passed. Many of these enactments were experimental and found ineffective. Amendments to laws have followed amendments in rapid succession, yet the toll of accidents and violent death mounts steadily higher and higher.

The fact might as well be faced, it must be faced, that only through the practice of the principle of "Safety First" by the people themselves,—all the people,—can the civilization of today really control this modern juggernaut which the inventive genius of this generation has brought into being and to such a high state of power and efficiency.

Legislative enactments and arrests and fines for violation of these laws will not, and can not meet the existing problems. Public sentiment and the public conscience must be aroused against those who habitually and wilfully disregard the laws and regulations passed in the interests of all people. The speed maniac, the man who persists in flashing blinding headlights in the eyes of all other car drivers, the crank who considers it an insult and a reflection upon himself and his car to allow any other car to pass him on the road, the crazy fool who not only disregards all safety precautions for himself but who is callously indifferent to the fate of others and the common "roadhog" who ignores everybody's rights and selfishly arrogates whatever he desires to himself, all these enemies to the welfare, enjoyment, rights and even lives of others, must become taboo throughout the land and be ostracized by his fellow citizens in the community.

Every driver of a car should keep constantly in mind that it is a powerful machine he has in his control, and that the safe way is the sane way. Common sense will prevent accidents. Apply it. There is not only the law but an etiquette of the road. Observe it. Protect person and property, your own and the other fellow's.

Two controllable factors enter into accident prevention on the streets and highways, your car, yourself. Always observe, among others, the following simple rules for safety:

1. Keep your car right; see that the brakes, steering gear and headlights are in perfect working order.
2. Keep your eye on the road and your hands on the wheel.
3. In passing traffic, see ahead.
4. If a "road-hog" tries to pass you, let him.
5. Entering main streets and highways, stop and listen.
6. Don't rush through nor "loaf" in heavy traffic.
7. Signal before you slow down, stop or change your course.
8. Look before you back up.
9. Obey the "Stop" signal.
10. Watch your "Step." Don't "step" on the gas, the train will win.

Continues Best Seller

Over Two Million Copies Of Bible Sold Last Year

The Bible continued to be the world's best selling book in 1927, establishing a new record of [illegible] copies, says the annual report of the American Bible Society.

Copies were published last year in 166 different languages and dialects, and the first complete Bible in the [illegible] language of the 2 [illegible] native of the Belgian Congo was issued by the Society.

There are 150 convicts serving life terms in prisons of Canada.

Norse Celebration In Winnipeg

Great Interest Being Taken In Reunion To Be Held Shortly

Of its kind, the Norse celebration to be held in Winnipeg this year is expected to be the largest gathering of the summer. Their kith and kin to the number of twenty-five thousand from the central western States will come and an equal number from western Canada.

Men prominent in Norse circles, descendants of pioneers on both sides of the International line, are displaying a very active interest in the reunion. Among the prominent speakers will be Governors Christianson, of Minnesota and Sorlie, of North Dakota. Far off Norway is sending a delegation to participate in the Norwegian Sangerfest, and official delegates from that country will comprise representatives of the government, church and various civic bodies. The week of July 5-11 will mark the occasion for the festival. In connection with this festival will be the annual convention of the Norwegian Danish Press, of America. This will bring to Winnipeg some fifty newspaper and magazine editors, prominent in the association.

"Hi there," bellowed a policeman to an inebriated citizen, "you can't stand there in the street."

"Yes, I can orficer," retorted the citizen proudly. "Don't you worry 'bout me. I been standin' here an hour an' ain' fell off yet."

Young Bride: "I want a piece of meat without any gristle, bone or fat."

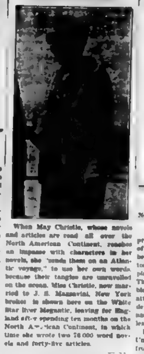
Butcher: "Lady, you don't want any meat—you want an egg!"

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for [illegible] and [illegible] other [illegible] and I must [illegible]. I felt different after the first dose. I have been told this last [illegible] months that I [illegible], although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young." Mrs. McKAY, [illegible] Lowther Ave., Toronto, Ontario.

SEA STRAIGHTENS ROMANTIC TANGLES



When May Christie, whose novels and articles are read all over the North American Continent, reaches an impasse with characters in her novels, she "sends them on an Atlantic voyage," to use her own words, because their tangles are unravelled on the ocean. Miss Christie, now married to J. S. Mazzavini, New York broker, is shown here on the White Star liner Megantic, leaving for England after spending ten months on the North American Continent, in which time she wrote two 75,000 word novels and forty-five articles.

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Is Enriched

The most urgent need of all who suffer from any form of indigestion is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food it takes. New strength is given to weak stomachs by Dr. Williams' Pink Pills because they purify and enrich the blood. This accounts for the speedy relief in stomach disorders that follows the use of this medicine. The value of this medicine in cases of indigestion is shown by the case of Mrs. George W. Johnson, Loquille, N.S., who says:—"I have no hesitation in recommending Dr. Williams' Pink Pills. I was greatly distressed with indigestion. Always after eating I suffered from pains in the stomach and other distressing symptoms. I tried different remedies, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills, which I readily did, and I am feeling very grateful ever since to the person who gave me the advice. The very first box helped me and before I had taken a half dozen boxes I was restored to my former good health and all traces of this distressing trouble disappeared. It is now about a year since I took the pills, and I have not been troubled with indigestion since. I have taken every occasion to recommend Dr. Williams' Pink Pills to those in need of a medicine and shall continue to do so."

A little booklet, "What To Eat and How To Eat," will be sent free to anyone asking for it. You can get the pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British Columbia Hop Yield

Yield For 1927 Double That Of the Year Previous

A total yield of 1,425,875 pounds of hops was secured from 1,037 acres in British Columbia in 1927. This was practically double the 1926 average, substantially the largest yield in the history of the industry. At an average price of 32 cents per pound the crop was worth $456,280. In 1928 an additional 232 acres of hops in the province came into bearing.

Pretty Cashier: "I think I need a holiday for the sake of my health. My beauty is beginning to fade."

Manager: "What has put that idea into your head?"

Pretty Cashier: "The men are beginning to count their change."

The gross area of the United States is 3,026,789 miles.

Druggist Gave Her Very Good Advice

Miss Ruth Horowitz, Bronx, N. Y., writes: "Having been troubled with indigestion caused by constipation for several months, my druggist advised a purely vegetable laxative pill.

I can safely say that since I am taking them, and only one each night, I feel like myself again and can eat most anything without fear of an attack."

CARTER'S LITTLE LIVER PILLS

University Of Alberta

New Laboratory and Greenhouse To Be Erected This Year

Increased accommodation is being provided this year in the department of field crops at the University of Alberta by the erection of a new laboratory and greenhouse for the study of plant pathology and plant breeding. This additional space will make possible the carrying out of a co-operative attack by the university, the federal department of agriculture, and the national research council on the problem of root-rot diseases.

Dr. A. W. Henry, formerly of the University of Minnesota, on his return from Europe last fall, joined the staff of the department of field crops and will lead the plant pathological work at the university. Dr. G. B. Sanford, of the federal division of botany, will have charge of the Dominion laboratory of plant pathology, and Dr. O. S. Aamodt, of the University of Minnesota, has been appointed to take charge of the work in cereal breeding. Dr. Aamodt will spend the summer in Europe, mainly at Cambridge and Svalof, and will take up his work at the university in the fall. Professor J. R. Fryer will continue in charge of forage crop breeding. Disease resistance is one of the main qualities being sought in the plant breeding work.

Newest Town In Northland

Cranberry Portage, Manitoba, Important Point On Flin Flon Railway

Cranberry Portage, which sprang into being almost overnight, is the North Country's newest town, and citizens believe it is destined to be one of the most important points on the Flin Flon Railway.

A month ago there was nothing there except railway construction offices and warehouses. Today it has a population of 100, with two hotels and a number of other thriving business establishments. A board of trade is being organized and soon there will be a mayor and regular municipal organization.

Within a mile of the town work is going forward on a number of mining claims.

Trained Fire Fighters For British Columbia

Experts Will Combat Fire Menace In Salmon Arm Section

When the fire menace again sweeps through the forests of the Salmon Arm section of British Columbia this summer, it will be combatted by men trained for just that emergency. The fire-fighting will be done by experts and not by novices.

The reason for that is that the men who will be employed in fire-fighting this season have literally gone to school again and have studied the most approved methods of reducing the hazard and beating the flames when they once get under way. Special subjects were taken up each day and included the study and demonstration of approved methods of disposal of slashing.

Ship Muskrat To Europe

What is believed to be a record for muskrat shipments from Canada has left on board the Canadian Pacific vessel "Beaverdale," bound for Antwerp. It consists of 149 muskrats, the foundation stock for muskrat ranches in Germany, Finland and France. The consignment was made up of 74 pairs and operated at a muskrat farm at Lindsay, Ontario.

For Burns and Scalds.—Dr. Thomas' Eclectric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

A going clock is one that has been wound up, a going concern is one that hasn't been.

For Hay Fever—use Minard's

Victim Of His Invention

Radium Paint Inventor Is Slowly Dying Of Poison

The New York Times says that Dr. S. A. Von Sochocky, inventor of the radium paint which is said to have doomed five New Jersey women to a slow death, is a victim of his own invention. The paper says that, although the doctor was reticent to talk about himself, marks of the inroads of illness were plainly evident. His front teeth are gone and his fingers up to the second knuckle are black, the result of radium necrosis.

The doctor has frequently risked his life in recent years to treat friends with radium.

Dr. Von Sochocky brought to this country with him several years ago the formula for the radium paint. He became an official of the U.S. Radium Corporation in whose plant the five New Jersey women are said to have acquired the radium poison.

They recently made a settlement with the company for $10,000 each, a life-time annuity of $600 each and insurance for their relatives when they die.

Recipes For This Week

(By Betty Barclay)

ECONOMICAL PUDDING

- 1 quart water.
- 1 teaspoon salt
- 1 cup pearl tapioca.
- 1 teaspoon vanilla.
- 4 tablespoons butter
- 1½ cups brown sugar

Cook tapioca in water until transparent. Add other ingredients. Bake one-half hour.

LEMON DROP COOKIES

- 1-3 cup butter.
- ½ cup sugar
- 1 egg
- ¼ teaspoon soda
- 2 tablespoons hot water.
- ½ tablespoon lemon juice
- Grated rind 1 lemon
- ¾ cup flour

Cream butter, add sugar, gradually, and egg, beaten until thick and light, soda, dissolved in hot water, lemon juice, grated lemon rind, and flour. Mix well, drop from tip of teaspoon onto buttered baking sheet, and bake in a quick oven.

To make crisp cookies, use one and one-half cups flour when mixing; chill thoroughly, roll very thin, sprinkle lightly with sugar, cut out, and bake.

20,000 passengers have been carried by one commercial airplane company, without a single accident.

Much of the experience a man gets comes too late to benefit him.

PRAYER BOOK REVISION AGAIN MEETS DEFEAT

London.—By a vote of 266 to 220 the House of Commons again rejected the revised prayer book of the Church of England.

The vote, coming after two days' close debate on which the attention of the nation had been focussed, recorded a majority almost identical with that in the previous rejection last December, when the vote was 247 to 205.

The revised prayer book after rejection last December was altered by the bishops, and after the approval by the church assembly, was submitted to Parliament.

Again in an appeal issued by the Archbishop of Canterbury, and the Archbishop of York, supporters of the measure were told that the new responsibility laid upon the bishops is very grave and a plea was made "for quietness, for a little patience and for abstention from any angry or unkindly words."

The speech of Sir Wm. Joynson-Hicks, home secretary, was the highlight of the efforts of the opponents of the revision. The minister, a [illegible] evangelical, who led the opposition last December, declared the House was being asked to "revoke its own decision" and inferred that the church was resisting Parliament's decision. He asserted the book was essentially the same as the one rejected last December.

Lord Hugh Cecil and Premier Baldwin were outstanding among the speakers in favor of the revision.

The premier stated that difficulties must follow any decision, but he believed those which would face the church if the measure was rejected would be infinitely the more formidable.

Mr. Baldwin said he felt an adverse vote would weaken the hands of all those in authority in the church for a considerable time to come and give immense impetus to the very forces which those who were opposed to the new book desired to curb. It would also, he said, hinder the religious progress of the country.

The House of Commons wore a demeanor of gravity as it entered upon the second and final day of the debate.

The aged Archbishop of Canterbury, the Archbishop of York, and the Bishops of London and Southwark were prominent among the prelates who looked on from the Peers' Gallery, while the ordinary galleries were again crowded.

Conference a Success

First Annual "Farm Women's Week" Held At Saskatoon

Saskatoon.—Close to 150 delegates attended the first annual "Farm Women's Week," at the University of Saskatchewan. The conference, arranged by the United Farmers of Canada, Saskatchewan section, in co-operation with the University of Saskatchewan, was a most successful venture, and is the first of its kind held in the province and, so far as is known, in Canada. As much of the business of the program concerned only the United Farmers' Organization, some of the sessions were closed to the press and public.

Mrs. Emmeline Pankhurst Dead

Noted Suffragette Leader Passes Away In London

London.—Mrs. Pankhurst, noted suffragette leader, died here Thursday morning at the age of 69.

Mrs. Pankhurst, in later years, took up the cudgels against Communism, while her daughter Sylvia goes on, more energetically than ever, advocating the teachings of Lenin.

Miss Christabel, the eldest of the two girls, is tremendously interested in religion.

Danish Aviators Killed

Copenhagen.—Three Danish aviators were killed after leaping from a naval seaplane which exploded while they were flying over Copenhagen. The airmen, a pilot and two cadets, leaped from the plane but their parachutes failed to unfold and they fell on the roofs of houses, being killed outright. Their machine crashed in a densely populated area and injured a boy.

A statue of William Shakespeare, cut in glass and over 24 feet high, has been made for a London Park.

Appeal Was Rejected

Privy Council Gives Decision On Alberta Coal Case

London.—The decision of the Privy Council judicial committee rejecting Alberta's appeal in the coal mining tax case has the effect of depriving that province of large revenues which it had hoped to collect on the production from coal mines. The Privy Council upholds the [illegible] of the Supreme Court of Canada that Alberta mine owners tax act of 1923 which placed a tax on every ton of coal mined in Alberta is ultra vires of the province.

The province's test case was launched against the Caledonian Collieries, Limited. The judgment of the Privy Council states that it is undisputed that though the tax was called a tax on gross revenue such gross revenue is really an aggregate of the sums received from the sales of coal and is indistinguishable from a tax on every sum received from the sale of coal.

The judicial committee agreed with the judges of the Supreme Court that the tax was not a direct tax. Some attempt had been made in the argument to support the tax on the ground that it was analogous to income tax, but it was pointed out that there were marked distinctions between a tax on gross revenue and a tax on income which for taxation purposes means gains and profits. There may be considerable gross revenue but no income taxable as income tax in the accepted sense.

The appeal was therefore dismissed.

U.S. Farmers Complain

Say Canadian Competition Is Dangerous Factor In Agrarian Development

Seattle.—Canadian competition in grain growing has become a "dangerous factor" in the agrarian development of Washington, J. Carl Laney, state secretary of the farm bureau, testified at the Interstate Commerce Commission farm hearing. Agrarian representatives appeared before the commission recently, urging the necessity of lower export grain rates.

Supported by voluminous exhibits, Laney gave a comprehensive comparison of farming conditions between the grain districts of Western Canada and Eastern Washington. He asserted that aid given farmers by Canadian railways and the government was attracting growers from Washington to Canada.

With cheap land, low taxes, low grain rates and fertilizer, Alberta ranchers can not only raise grain at a cost of several dollars an acre lower than those of Washington, Laney said, but they can reach both their eastern and western markets at a much less cost.

Laney said the average cost to the Canadian farmer including everything until the grain was placed at elevators was $14.70 an acre, whereas on the American side of the border line it was $20.50.

He added that with such a wide spread in their favor the Canadian grain growers were rapidly driving Eastern Washington wheat from the export market.

Searching For Bodies Of Kamloops Victims

Eight Of Twenty-Two Have Already Been Recovered

Port Arthur, Ont.—A tug and launch have left here for Isle Royale to conduct a further search for bodies from the steamer Kamloops, which was lost off the Island last December.

The expedition has been organized by Captain H. J. Bryan, of Kingston, brother of Captain Bryan, of the Kamloops, and is financed by him and relatives of other missing ones among the crew of the Kamloops. It is proposed to patrol inland as well as along the shore line. Eight bodies of the 22 on the boat have already been recovered.

Beatty On Trip To England

Quebec.—E. W. Beatty, K.C. president of the Canadian Pacific Railway, and Sir Herbert Holt, president of the Royal Bank of Canada, have sailed for England. While on the other side Mr. Beatty will let a contract for a new steamship of the Empire class, to be used on the Pacific Coast routes. It is tentatively arranged that Mr. Beatty will visit Stanley Baldwin, British premier.

India Ready To Renounce War

Washington.—The Government of India has accepted the invitation of Secretary Kellogg to participate as an original signatory in the proposed multi-lateral treaty for the renunciation of war.

Ice Delays Seaplanes

Machines Ready For Survey Of Conditions At Port Churchill

Ottawa.—Ice on the small lakes in the vicinity of Port Churchill is holding up the dispatch of the two Canadian Air Force seaplanes which are in readiness to fly to the Hudson's Bay port for the purpose of surveying the break up conditions there.

It was stated at the Department of National Defence that the two planes are at present at Cormorant Lake, North of The Pas, and are awaiting favorable conditions before proceeding to their destination. The duty of their pilots will be similar to that which has occupied the Hudson's Straits air patrol last year, to observe the movement of ice out of the Churchill River and through the inlet on the shore of which Canada's Northern port will be constructed. This year a wireless station will be [illegible] equipment and machinery for which will be taken there some time next month.

HARVEST HELP FROM BRITAIN IS SUGGESTION MADE

London.—"The Canadian harvest will soon be due. Why not an arrangement between the Dominion and Home Governments and all the parties most likely to help for 10,000 Britishers to be provided with work during the coming harvest in Canada?"

William Lunn, M.P., of Rothwell, makes this suggestion in the Yorkshire Evening Post. He is an ex-chairman of the Overseas Settlement Committee, and still a member of that body.

"In July last year," he proceeds to say, "an arrangement was almost arrived at for 10,000 to go to Canada, of whom 5,000 would be miners. The conditions were to give cheap passages, guarantee employment at not less than 4 to 5 dollars a day, and to assist in bringing those back who could not find permanent employment.

"One lady promised to pay the expenses for 150 South Wales miners, and others were prepared to help with smaller numbers. Just when everything was in order for the project being carried out, it unfortunately fell through.

"No doubt three out of four would settle permanently in Canada. Those who seriously desired to return should be helped in cost of passage home," he said.

These 7,000 or 8,000 who make their homes in Canada would become [illegible]. Then they would be likely to nominate their wives, sweethearts, sisters, brothers, and in many cases, their fathers and mothers.

"That is the most satisfactory way of populating the Dominions. Here is the pebble which, if thrown into the pond, will begin the circle which is likely to enlarge and enlarge to enormous dimensions.

Cannot something be done, and done soon? asks Mr. Lunn, in conclusion.

PRESIDENT OF THE I.O.D.E.

Mrs. John A. Stewart, of Perth, Ont., was elected national president of the Imperial Order Daughters of the Empire at the annual meeting in Toronto. She succeeds Miss R. M. Church, of Toronto, and sister of T. L. Church, M.P., who is retiring from that office after three years of work in the order.

Report Shows Big Increase

B.C. Department Of Agriculture Announces Gain In Production

Victoria, B.C.—Agricultural production in British Columbia in 1927 is valued at $76,999,269, the highest sum on record, and an increase of $5,437,000 over 1926, the Department of Agriculture announces.

Substantial gains were made in livestock, poultry products, dairy products, fodders, honey, hops and wool, while decreases were noted in fruits, vegetables and grains.

Imports of agricultural products from other provinces in Canada were valued at $16,646,702, against $17,437,350 in 1926, while imports from foreign points increased from $3,622,011 to $5,503,064. Exports of agricultural products for the year amounted to $10,025,726, an increase over the previous year of $1,617,095, or 19.22 per cent.

Alberta Pool Making Interest Payments

Farmers Are Receiving Amount Due On Elevator Deduction

Calgary.—The Alberta Wheat Pool is issuing cheques covering the payment of six per cent. interest due on the elevator deductions from the crops of 1924 and 1925, it was stated at the offices of the pool.

The total payment amounts to $87,101.03. In instances where the interest does not total the sum of one dollar, no payment is being made.

The six per cent. interest is paid on a total of $1,345,344 which was the total deduction for elevator purposes from the 1924 and 1925 crops.

Is Successful Candidate

Toronto.—Miss E. Silver Dowding, lecturer in botany at the University of Alberta, is the successful candidate for the annual scholarship awarded by the Canadian Federation of the University Women's Clubs.

HE DID IT IN ONE

Robin Bell-Irving, of Powell River, B.C., the first amateur to make a hole in one on the Jasper Park Lodge Golf Course. He accomplished it at the fifteenth, which has a name that speaks for itself—the Bad Baby. Incidentally, he is the first player, amateur or professional, to do the Bad Baby in one.—Canadian National Railways Photograph.

Westerners Win Scholarships

Alberta and Saskatchewan Students Will Pursue Technical Studies

Quebec.—Chosen as the most outstanding and valuable member of the Canadian Society of Technical Agriculturists, Prof. H. M. Maguet, professor of geology and chemistry at the Oka Agricultural College, of the University of Montreal, was unanimously awarded the fellowship prize at the closing session of the agriculturists here.

The $600 scholarship prizes, gift of the T. Eaton Company were awarded to R. H. Bedford, of Alberta, to study soil bacteriology at McGill University, Montreal, and R. C. Russell, of Saskatchewan, to study plant pathology at Toronto University.

It was officially decided that the convention of the agriculturists next year will be held at Winnipeg.

Cattle Shipped To England

Over Three Hundred Head Sent From Calgary Recently

Montreal.—The first shipment of cattle on the hoof to leave Canada for over a year arrived in Montreal at the East End stockyards over the lines of the Canadian Pacific Railway, on its way to England. Over 300 head of cattle were in the train of 17 cars, averaging 18 animals to a car, with a stockman aboard for the care of every 25 cattle that made the trip direct from Calgary to Montreal.

The shipment is being accompanied by Francis Burns, of Calgary, and Arthur Hillard, veterinary surgeon, who supervises the health of the stock from Calgary to Birkenhead, together with a staff of stockmen under Archie McGinness, foreman.

Will Form Pool

New Westminster, B.C.—Fraser Valley poultry men and women at a meeting here decided to form an egg and poultry pool in British Columbia. A committee was appointed to nominate a committee representing all poultry sections of the province which will draw up a constitution.

SIR A. CURRIE NEW PRESIDENT CANADIAN LEGION

St. John, N.B.—General Sir Arthur Currie was elected president of the Canadian Legion of the British Empire Service League at the second annual Dominion convention here.

Following the announcement of his unanimous choice a telegram of congratulation was dispatched to the former leader of the Canadian troops in France, coupled with the wish for a speedy recovery to health.

Lieut.-Gen. Sir Percy Lake was named immediate past president.

The importance of not bringing boys and girls of tender age, unaccompanied by parents or guardians into Canada was stressed in debate as was also the necessity of setting before foreign immigrants Canadian ideals before they could be corrupted by communistic teachings.

A. E. Moore, Manitoba, was re-elected national chairman and presided during the deliberations, when many resolutions were brought in by delegates of the various provinces. Some of the most important of these—to the Dominion as a whole—were submitted by the committee on immigration and colonization, headed by P. Shelton, of Regina.

The recommendation of this committee includes a complete Dominion survey of the immigration and settlement problem, the barring of Orientals from Canada's shores and the banning of Communist literature and publications in this country.

The report of the immigration and land settlement committee [illegible] was adopted, recommends that every effort be made by the government to have at least 50 per cent. of all immigration from Britain, that persons who are not prepared to accept Canadian citizenship in peace and war be not encouraged to come to Canada, that every effort be made to prevent the location of non-English speaking peoples in large blocks and that "free passages to British boys and girls when accompanied by parents or guardians, should be confined to those who have attained the age of 17 years and over."

The sections of the report recommending that provincial commands urge the branches to organize committees to survey the farm employment possibilities and settlement in their districts, and for a closer co-operation between the British and Canadian legions for a better selection of men suitable for settlement in Canada were adopted as presented.

BOARD REFUSES APPLICATION OF LIVESTOCK MEN

Ottawa.—The application of the United Grain Growers Limited, of Winnipeg, Man., and other agrarian and livestock organizations in the West for suspension of the Canadian Pacific Railway tariff effective June 23, 1927 on livestock shipped from Western Canada to Pacific coast points in the U.S., has been rejected by the Board of Railway Commissioners.

This is the judgment of the board which is issued, together with a minority report, by Hon. Frank Oliver. Commissioners S. J. McLean and C. Lawrence expressed the opinion following a lengthy examination that the application should fail, while Commissioner Oliver's view is that the railway tariff should be cancelled.

The application of the livestock organizations involved the question whether under special circumstances set out, rates on double deck movements of hogs to specified points in the Pacific coast states of the U.S. from Alberta should be computed on the minimum of 21,000 pounds or whether there should, in addition to current rates, be a charge on the actual weight in excess of this minimum.

Plan Speaking Tours

Premier King and Hon. R. B. Bennett Will Visit West

Ottawa.—The speaking appointments for the Prime Minister in Western Canada are not yet final though it is known that he will leave Ottawa on July 28. Mr. King will likely address meetings in Winnipeg and Brandon, and possibly some other place in Manitoba.

On August 10 the Prime Minister will open the Prince Albert National Park and between that date and August 16, he will visit several places in his Prince Albert constituency. Mr. King will then return direct to Ottawa. He will probably be accompanied by a member of his cabinet.

Hon. R. B. Bennett has mapped out an intensive speaking tour that will carry him to both Eastern and Western Canada during the summer months.

After visiting Renfrew, Ont., on June 21, he will leave for La Prairie, Que., where he is to speak on June 23. From Monday, June 25, to the following Saturday he will visit a number of points in Quebec's Eastern townships.

The Conservative leader goes West in July to be in Calgary in time for the stampede and is scheduled to return to Oshawa, Ont., for a speaking engagement there July 23. A tour of the Maritimes is planned for later in the summer.

Forke Will Tour West

Minister Of Immigration To Visit Western Canada Shortly

Ottawa.—Hon. Robert Forke, Minister of Immigration, will visit Western Canada this summer on immigration matters.

Mr. Forke's trip will carry him through to the Pacific Coast. The itinerary of Mr. Forke has not yet been arranged, but the likelihood is that he will leave Ottawa within the next three or four weeks, visiting all the important Western cities. A definite announcement of his program will be available shortly.

Mr. Forke probably will seek provincial co-operation in immigration work as recommended in the report of the parliamentary immigration inquiry presented during the recent session of parliament.

Presented With Diplomas

Quebec.—Dean H. Barton, of MacDonald College, Ste. Anne De Bellevue, Que., Dean A. Howes, of Alberta University, and L. P. Roy, of Quebec, were presented with diplomas of Bachelors in Agricultural Science, by Laval University, at a reception tendered the delegates attending the eighth convention of the Canadian Society of Technical Agriculturists, by the University. The presentations were made by Mgr. Amedee Gosselin, rector of the college.

Death Of W. B. Sifton

Brockville, Ont.—In the presence of members of the family, Winfield B. Sifton, second son of Sir Clifford Sifton, died at his residence, Assiniboine Lodge, 15 miles west of here. Death was directly traceable to a severe case of cerebral hemorrhage three years ago, there having been a recurrence of the illness at his home here Sunday night.

U.F.W.A. NOTES

The regular meeting was held on June 15th at the home of Mrs. J. R. Warner. In spite of the muddy roads and pouring rain about twenty-five members and visitors were present. After the business of the meeting was disposed of, Mrs. D. W. Warner of Clover [illegible] gave a talk on her trip to Europe as a [illegible] of the party of Canadian [illegible] Marketing tour [illegible] Europe last winter.

Mrs. Warner's description of the many wonderful places she visited was such that her audience felt that listening to her was almost as good (and far more comfortable) than making the trip [illegible]. She was given a very hearty vote of thanks for her kindness in coming from her home to address the local.

The next meeting will be held at the home of Mrs. Dodds on Thursday, June 28th at 2:30 p.m. The meeting will take the form of a picnic, consequently there will be no papers given.

CHAUTAUQUA MEETING HELD ON TUESDAY

On Tuesday night at the Town Hall, the organization meeting for the 1929 Tofield chautauqua was held, Miss Davis, chautauqua advance agent being present.

Miss Davis pointed out that the program was wonderfully good and that all along the line interest was keen in chautauqua programs.

Nominations for president were [illegible] for, and J. Chapman was nominated. He demurred a little but he was too good a man on the job last year to pass up this year [illegible] the 1929 president.

Mr. Craig is the new secretary. Mr. Craig has had experience of this this work before and is going to make a first class man for the job.

Grounds committee and advertising committees were named and some other routine business done.

Ticket selling will soon be under way and as usual we pass the suggestion that you buy your ticket early.

JUNE—JULY PRICES—CANADIAN Chicks. Pure Bred to Lay. Thousands hatched every Monday, Tuesday, and Wednesday [illegible] tested, trapnested and Official Inspected Flocks. Good Chocolates

That "Sweet Tooth" nature gave us was not a mistake. We need and are the better for having "sweets." No more popular or delicious way of eating sweets has been devised than by eating good candy—but it must be good, not glucose and saccarine.

Our chocolates are of the best quality, pure cocoa and cane sugar, manufactured by the foremost manufacturers in the Dominion. Many kinds and many "centres." A pound or a half pound of chocolates make a splendid, yet inexpensive Sunday treat—and they are good for you too.

Summer Needs—Sunburn Lotion—Mosquito Lotions—Fly Poisons (all kinds)—Eye Shades, Etc.

July 2nd Tofield's Big Day

IF WEATHER MAN IS GOOD—CROWD WILL BE HERE

SPORTS FOR OLD AND YOUNG

Next Monday, July 2nd, there will be a general trek towards Tofield from farms for miles around. People will come in cars, in buggies, in wagons, on horseback, and probably a few will come in on foot. Tofield's anual sport's day will draw them here.

The day will be replete with events throughout. Commencing in the morning with a decorated parade, it is planned to have something doing every minute so that a full day's enjoyment may be enjoyed.

There will be plenty of baseball with men and boys playing whom you know. Men and boys playing for the love of the game and not for money. Come, pick your favorites and cheer them on. There will be some horse races, foot races, bicycle race, etc., and a full line of kiddies sports.

A notable feature of the day will be an address by Prof. Ottewell of the University of Alberta. Prof. Ottewell will choose his own subject and one may rest assured it will be an interesting one. He is exceptionally well qualified and none should miss hearing him. Those bringing their own lunch may procure hot coffee at noon free.

In addition to the other sports there will be a horse shoe tournament. This game, while not new, is very popular just now, so much so, that the Edmonton Exhibition directors have placed a tournament among their attractions. Judging by last years experience at Tofield, there are quite a number of experts in this district and and next Monday should see them all out and in form.

In the evening at 7:30 there will be a picture show at the Variety Theatre, featuring Ken Maynard in "Gun Gospel," and this will be followed by a dance.

There will also be a dance in the curling rink. This will be a real old time dance, those attending dancing the dances of thirty years ago. This will be both unique and enjoyable.

And the fireworks! At ten o'clock at night on the exhibition grounds there will be a grand display of fire works. Few people can resist the charm of fireworks so be on hand at that time and see them.

Oh yes! and the admission to the grounds is free throughout the entire day. Baseball games, sports, etc. can all be seen free of charge. Come one! Come all.

LOCAL and PERSONAL

Mr. McCullough, B.A., and Mr. Swift, M.A., visited Edmonton on Wednesday.

Mrs. Hannan has been ill with tonsilitis this week. Her many friends will be pleased to hear she is recovering.

Leonard P. Woodhams, eyesight specialist will be at Tofield on Wednesday, July 4th. Mr. Woodhams was prevented by bad roads from coming last time, but he will be here on Tuesday, as if the roads are bad, he will come by train.

Mrs. Pincott is leaving on July 8th, for Passadena, Cal., for a visit of about two months duration with her sister.

Mrs. T. Hyndon visited her daughter, Mrs. Church, of Wainwright, last week. She returned home on Sunday.

Word has been received that Rev. Nugent Wilson, the Anglican minister here some years ago, will sail for Canada this month. He will visit the Pacific coast, and on his return will stop off at Edmonton and Tofield. Many friends of the Rev. Nugent Wilson will be pleased to see him once again after his several years sojourn in England.

Mr. Geo. Strange and Miss Skiner A.T.C.M., of Edmonton, were visitors to the Worton home on Sunday.

Mrs. Marts of Duhamel, is visiting her daughter, Mrs. Snell.

Mr. and Mrs. B. C. Lovell arrived in Tofield on Wednesday. Mr. Lovell's health has apparently not improved during his sojourn away from Tofield.

Mr. and Mrs. Hay visited Edmonton on Wednesday.

Mr. and Mrs. McLaughlin visited Edmonton on Wednesday.

Miss Helen Jobb arrived home from Isley, where she has been teaching. Audrey, who has been visiting her for the past two weeks, accompanied her home.

WEDDING ANNIVERSARY CELEBRATED

On Thursday Mr. and Mrs. Ward celebrated their twenty-first wedding anniverary. A very enjoyable evening was spent playing bridge. The guests found their partners by finding authors and the books each had written. The guests presented Mr. and Mrs. Ward with a beautiful boquet of American Beauty roses. A delicious lunch was served by the hostess which was thoroughly enjoyed by all. After lunch an original song was sung by Mrs. Ward, the guests joining in on the chorus, in honor of Mrs. Constantine who is leaving town. Mr. and Mrs. Carey entertained with songs and Mrs. Pincott gave readings in dialect, all of which was enjoyed by those present. The prizes were won by Mrs. Constantine and Mrs. Beirnes and Mr. Hammond and Mr. Pincott. The evening closed by wishing Mr. and Mrs. Ward many more years of health, happiness and prosperity.

Mrs. Gordon is at present unwell. Her many friends will wish for her a speedy recovery.

Evangelistic meeting will be held at the Mennonite Church, near Tofield, commencing on Wednesday, June 27th and lasting until Sunday evening, July 1st. There will be services each evening. Rev. S. C. Yoder, President of Goshen College, Goshen, Indiana, will conduct the services. Everyone welcome to attend.

The evangelistic services recently held by the Rev. Dixon and the Rev. Reid, were brought to a close on Sunday night at the service at the United church.

The two weeks campaign here by these capable ministers, coming as they did under the auspices of the United Church of Canada, will no doubt be fruitful of much good. They were very zealous in their work and lost no opportunity of delivering their message.

On Monday morning Rev. Dixon left for Ireland to visit his home, and Rev. Reid left for Vancouver, which is his home.

AMISK CREEK

Remember the picnic at the Amisk Creek Church next Friday, the 29th. We are all wishing for nice weather for that day.

Doris and Godon Watt came all the way from Seattle, Washington, last week to visit with their grandmother, Mrs. I. H. Olson and other relatives, during their vacation.

Mrs. S. Olson's grandchildren, two boys from Edmonton visited at her home at Shonts last week. Mrs. S. Olson accompanied them to the city last Friday, returning on Saturday.

Mr. and Mrs. E. A. Moen attended the Young People's Meeting in Bardo Church last Sunday evening.

Mrs. R. O. Berg spent several days in the city last week consulting the dentist and visited at the Mr. and Mrs. P. J. Aas home, formerly of Amisk Creek.

Mrs. C. Kjosrong, Mr. A. Erickson and Carl, started on a trip to Grand Forks, Minn., last Wednesday. They are motoring all the way.

The Aasmo family visited at the Berg's home last Sunday.

Mrs. H. Haugen from Vancouver and Mr. A. Hillerud from Bellingham, Wash., were visitors at the Flaaten home on Friday of last week.

Mrs. Johannah Eggen and E. Hauglund from Bardo. Alice and Mr. R. O. Berg visited at the Aasmo home last Sunday.

Mrs. P. O. Flaaten visited at the O. Kirkelund, M. Finseth and T. Anderson homes in Ryley last Sunday.

LINDBROOK

The recent rains have brought the crops along fine here lately and barring accidents there should be a good crop here this year. We see that the "bossies" are also doing their bit, quite a lot of cream being shipped out now. Quite a few are busy clearing and breaking new land so take it all in all, things are progressing in Lindbrook.

Mrs. E. Hooper and Mrs. R. Richards of Edmonton were the guests of relatives in this district for a short holiday.

Mr. and Mrs. F. Kortzman gave a dance at their home last week which was well attended and enjoyed by all present.

The school exams are in full swing now, and if the optimism of the pupils is anything to judge from, the whole lot should pass, for they seem pretty confident of themselves.

Mr. Warren Panter of Edmonton, spent a week with his friend, Lyndon Hooper, of Lindbrook. Mr. Panter was his roommate at the Royal Alexandra Hospital at Edmonton, both suffering from the same complaint, but both are nearly O.K. again now.

BANKER FAREWELLED

Last Friday night the citizens of the town gave a farewell supper, sponsored by the Golf Club, to Mr. and Mrs. Constantine on the occasion of their departure to Drumheller. About 67 ladies and gentlemen were present.

Mr. Joseph Rogers, the master of ceremonies, performed his duties admirably. Toasts were drunk, and numerous speeches made which all testified to the undoubted popularity of the guests of the evening. As a token of the esteem and affection in which Mr. and Mrs. Constantine are held, a handsome Tea-Wagon was presented to them; and Mr. Constantine in a short speech expressed their appreciation of the gift and good wishes and their regret at leaving Tofield.

The ladies served a delicious lunch and contributed to the success of the evening by an original farewell chorus. Mrs. Pincott delighted all with her recitations and Mr. Cary sang a solo which was much appreciated.

A very pleasant time was brought to a close with the singing of "Auld Lang Syne."

A review of the Co-operative Credit Association Act, will appear in an early issue.

KETCHAMOOT

Everything seems to be set for a good time ahead, exams will be over this week, crops and garden looking fine, with plenty of moisture for some time. Roads have been dragged and are in good condition for motoring and chautauqua and picnics are being eagerly looked forward to.

Several have been over to inspect Mr. Peter Lorbekmo's aeroplane which is parked close to our district, we expect to hear the buzz of the engine one of these days. We wish Mr. Lorbekmo a successful flying season.

Mr. and Mrs. W. K. Mitchell visited Mr and Mrs. A. McMullen on Sunday.

Miss Hannah Jensen returned home on Saturday after assisting Mrs. C. A. Ingram for two months with the spring and early summer work.

Mr. and Mrs. Joe Sutton were Sunday guests of Mr. and Mrs. Chas. Whillans.

Mrs. M. Ingram of Tofield is spending a few days at the different homes of her children.

Mr. and Mrs. Geo. Shaw and son, returned to their home in Calgary last week after spending several weeks at the Henry and Joe Sutton homes. Mr. Shaw is a brother to the two Mrs. Suttons.

Ketchamoot people are going ahead making preparations for their big picnic next Wednesday, July 4th. Remember the place on the Wm. Lee farm just a short distance west of the house. Cars will meet the train as it is a little too far for little children to walk and we want everybody happy. Chicken dinner will be served cafeteria style at noon; ball games, all kinds of races, ladies' tug-o-war, etc. Everything free except the diner and refreshments and then you get your money's worth. Everybody welcome.

KINGMAN

Mr. and Mrs. K. Erickson visited with Mr. and Mrs. J. Benson on Sunday.

Mr. and Mrs. T. J. Regnans and family motored to Dried Meat Lake on Sunday.

Mr. and Mrs. P. Reynold of Prince Rupert spent a few days with Mr. and Mrs. W. Jardie last week.

Mr. and Mrs. T. Grahn spent a couple of days in Edmonton last week.

The International Bible students will hold a lecture in the Kingman hall on Sunday, July 1st at 3:00 p.m.

Mr. and Mrs. T. Horte and Mr. and Mrs. A. Johnson visited with Mr. M. Eidie on Sunday.

Mr. and Mrs. P. Reynolds and Mr. and Mrs. W. Jardie were the guests of Mr. and Mrs. E. Erickson on Saturday evening.

Mr. and Mrs. R. Molvik and family visited with Mr. and Mrs. Chas. Lindberg on Sunday.

Mr. and Mrs. Shultz and family spent the week end with Mr. and Mrs. C. Tollefson.

A dance will be held in the Kingman hall on Friday, June 29th. The music will be furnished by the Hay Lake six piece orchestra.

The crop prospects in the district are very bright and a bumper crop is anticipated.

Mr. and Mrs. W. Jardie and Mr. and Mrs. P. Reynold were the guests of Mr. and Mrs. W. Hartchen on Tuesay.

Mr. Jonas Anderson went to Ferintosh on Monday to do carpenter work.

WORLD HAPPENINGS BRIEFLY TOLD

By an order-in-council the Saskatchewan Gasoline Act 1928, has been amended to exempt all railway companies operating in Saskatchewan from payment of the tax.

Last year 61,000 British subjects from the United Kingdom were helped by the Government to settle overseas, states the Overseas Settlement.

Negotiations for trade treaties with several foreign countries, including Newfoundland, will be entered by the Canadian Government during the present year.

Dr. Otto Hamman, a figure in German political life and chief of the press bureau of the foreign office from 1894 to 1911, is dead at the age of 76.

The equal franchise bill giving women the vote at the age of 21 under the same terms as men passed its third reading in the House of Lords without discussion.

More boots, more parsnips, more oats, more flax and more wheat are produced annually at the Saskatchewan prison in Prince Albert than in any other penitentiary in Canada.

At Philadelphia the seaplane PN-13, carrying a useful load of 2,000 kilogrammes (approximately 4,000 pounds) broke the world's altitude record by ascending more than 13,000 feet.

A new five-cent air mail postage rate, to be effective August first, is announced by Postmaster-General New, of the United States. A five cent air mail stamp has been authorized.

Dr. Fridtjof Nansen, famous Arctic explorer, told the International Congress of Aerial Arctic exploration that in 1929 he intends to make an extended polar flight in a dirigible airship. He said this ship was now being constructed in Germany.

Pet Trout In Mountain Lake

Experiment In Fish Culture Is Done Successfully In Jasper Park

Speeding Up Mail Service

Letters From British Isles Delivered From One To Four Days Earlier

Letter mail from the British Isles and Europe will be brought from one to four days quicker to Canada through the Canadian Air Mail Service, recently inaugurated.

The Canadian Post Office Department, following successful experiments made last year has entered into contracts for the conveyance of mail by air, to and from trans-Atlantic steamers. Incoming steamers are met at Rimouski on the River St. Lawrence and letter mail is taken off and despatched by airplane to Montreal, Ottawa and Toronto. Mails for western points are carried in the plane to Toronto and from there sent on by train.

The advance in delivery is from twenty-four to seventy-two hours, depending on the time of arrival of the steamer, train connections, etc.

On outgoing steamers a supplementary despatch is given to business correspondence by direct air service from Toronto, Ottawa, Montreal to Rimouski, where this mail is placed on a steamer sailing from Montreal or Quebec several hours previously. In this way a supplementary despatch is given to letters which would otherwise have had to wait the next outgoing steamer sailing perhaps three or four days later.

Although the Air Mail Service as at present operating is primarily intended to speed up the transmission of European mail, advantage is taken of the existing service to carry specially marked inter-city mail between Ottawa, Montreal and Toronto. No extra postage is charged on letters carried by the air mail.

Red Cross Editorial Contest

Congratulations Are Extended To the Winners In Both Daily and Weekly Sections

Congratulations are now being widely offered all over Canada to those who have won prizes in the recent editorial contest inaugurated by the Canadian Red Cross Society for the best editorials published in the daily and weekly press of the Dominion, to celebrate the centenary of Henri Dunant and the founding of Red Cross for the world.

Prizes have been awarded to: Robert Henderson, of the St. Thomas Times Journal, St. Thomas, Ontario, for the best editorial published in any daily paper, while Miss May Stuart Clendenan, of the Farmers' Advocate, London, Ontario, took the leading place in the weekly paper section in English. The other bright and clever people who won honors and prizes were: Second for dailies, H. B. Christie, The Expositor, Brantford, Ontario. Third, Miss Kenneth M. Haig, Manitoba Free Press, Winnipeg, Manitoba. It is worthy of note that Miss Clendenan is the present president of the Canadian Women's Press Club, while Miss Haig is a past president.

Prizes for the weekly papers in English: second, C. J. Allison, The Asquith Record, Asquith, Saskatchewan. Third, C. W. Peterson, The Farm and Ranch Review, Calgary, Alberta.

For the French section, prizes were awarded respectively to Adjutor Savard, La Patrie, Montreal, P.Q., J. M. Estival, Le Soleil, Quebec, P.Q., and to Charles Gautier, Le Droit, Ottawa, Ontario.

The judges for the English section formed into an adjudicating committee headed by Dr. James W. Robertson, chairman of the Central Council of the Canadian Red Cross Society were Dr. Lorne Pierce, Editor, the Ryerson Press, Toronto; J. F. B. Livesay, general manager, Canadian Press, Toronto; J. M. Elson, Canadian Author's Association, Toronto; Professor G. M. Wrong, History Dept., University of Toronto.

For the French section the adjudicators were: Mr. Leon Lorraine, of the Commercial High Studies School, ...

Saskatchewan Anti-Tuberculosis League

Movement To Have Free Treatment Of All Patients At the Public Expense

The annual meeting of the Saskatchewan Anti-Tuberculosis League was held at the Sanatorium, Fort Qu'Appelle, on Thursday, June 14th.

In addition to the routine business Mr. A. B. Cook, the president and managing director, briefly outlined the work of the League to date, and stressed the imperative necessity of extending the activities of the League along preventive lines, such as the examination of known "Contact Cases." He pointed out that at present no funds were available for this work, and that it had been decided this year to proceed with the sale of Anti-Tuberculosis Christmas Seals as was done in the other provinces of the Dominion and in the United States, where funds for both curative and preventive work are largely raised by this means.

Mr. J. J. Lamb, Secretary of the Municipal Hail Insurance Association, and Mr. J. G. Knox, of Tuxford, Reeve of the Rural Municipality of Marquis No. 191, were elected to the Board of Directors to serve for a period of three years.

Two resolutions passed at the last Annual Convention of the Saskatchewan Association of Rural Municipalities, dealing with free treatment and examination of school children, were read to the meeting and discussed. In view of the fact that resolutions had also been passed by the United Farmers, Saskatchewan Branch, and by the Independent Order of the Daughters of the Empire, endorsing the principle of free treatment, these resolutions were heartily endorsed by the meeting.

It was resolved that the Legislature be petitioned to amend the Sanatoria Act ...

BRITISH TRADE AND FOREIGN COMPETITION

Sir Charles Sykes, former coalition Liberal member of the British House of Commons, is concerned over foreign competition and its effects on British trade.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

The next morning saw us out even earlier. At 6.30 we were viewing the Snow Hill Police Station adjoining Smithfield Market, the finest police station in Great Britain, yet, notwithstanding its modernity, spaciousness and hygienic advantages and the interesting pictures of lovely ladies which we found in the policemen's recreation room, none of us really wished to stay.

From this last word in police stations we went to the smoke houses and provision establishment of Messrs. George Bowles Nicholls & Co. Ltd., where we were shown sides of bacon from twelve countries, including Canada. Mr. George J. Nicholls, Managing Director, compared the various qualities. Canadian bacon, he said, was placed fourth in public favor. First English, then Irish, next Danish, and then Canadian. Comparison was also made with butter, cheese and eggs. Two Chinese eggs six years old were broken and shown to be perfectly "fresh" so far as edibility was concerned. Both had large yolks and were examples of what eggs should be. A good deal was learned from Mr. Nicholls regarding the requirements of the British market and whose remarks brought forth many questions from the party.

We were now taken in hand by the Central Markets Committee of the Corporation of the City of London, who showed us Smithfield Meat Market and Spitalfields Fruit and Vegetable Market including the extensions which are being made to the latter at a cost of $10,000,000. We had scarcely time to reflect upon the history of this seven-hundred-years-old market-place, the largest meat market in the world, except to recall here that Wat Tyler was slain by Sir William Walworth in the presence of King Richard II., and that it had been the scene of the burning of Protestant martyrs, for soon we were travelling through aisles of meat which never seemed to end. There were 5,000 tons upon the hooks. All this ...

... afternoon to a session with representatives of the Provision and Grain Trades of London, under the auspices of the London Chamber of Commerce. Here we listened to plain talk on both sides which brought forth information of the greatest value. An eventful day concluded with an evening at Drury Lane, the largest and most famous of London's theatres, where we saw "The Desert Song," one of the most successful musical shows ever presented in London.

SUNDAY SCHOOL LESSON

JULY 1

THE EARLY LIFE OF SAUL

Golden Text: "Remember also thy Creator in the days of thy youth."—Ecclesiastes 12:1.

Lesson: Deuteronomy 6:4-9; Philippians 3:4-6; Acts 22:3, 27, 28.

Devotional Reading: Psalm 119:33-40.

Explanations and Comments

The Religious Training Of a Jewish Boy, Deuteronomy 6:4-9. Jehovah is the one absolute God. He must be loved with all the heart, soul and strength. The commandments must be laid to heart, must be taught to children, must be constant subject of thought and conversation everywhere and at all times—at home, and when on the way, in the evening on lying down, and in the morning on rising. They must be bound upon the hand for a sign, and worn as bands (frontlets) between the eyes. This "sign" was worn upon the arm in much the same way as children tie knots in their handkerchiefs, or change rings on their fingers, to remind the wearer of something he should not forget.

"Lord God of hosts, be with us yet,
Lest we forget—lest we forget."
—Kipling.

This was the teaching of Deuteronomy, and we may be sure that this was the instruction which Paul received while a lad in his father's house at Tarsus.

"Oh, if our children all were brought
Betimes to God and duly taught
His law to honor and obey,
Pre-eminently blest were they; ..."

Modern Miracles

"What is the matter with you?"

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XXVI. Continued.

When they were in the car, Maudie finished the conversation. "Helmi is doing well, but don't fuss her up by taking her out. They get to know too much. Now Mrs. Bell when she spoke to me said I would have to get some one to wash; Helmi wouldn't be able ...

... Plains. His boy was with them, as good a boy as ever stepped." But he would go "a chip off the old block." He had been in South Africa in the War, was mentioned in despatches, too, but nobody knows anything about it now. The world soon forgets. These soldiers will be forgot, too, for all the bands are playin' for them now.

Helmi was not unhappy. She had pleasure in her work and in caring for little Lili, who grew lovelier every day. The Herriott baby was a heavy jowled child who slept well and cried profoundly. "Has she taken to it yet?" the grandmother asked, each time she came.

... will do for Lili, so get out all the fireworks and get them ready."

Plump and pink and white, with a baby smile, was Maudie Herriott, the petted child and wife, but hard and cruel as any toothless old crone.

Both mothers rode in the ambulance to the hospital, and strangely enough it was Mrs. Herriott who became hysterical when the nurse took her baby from her.

The brown-eyed nurse who had received Lili read the misery in Helmi's white face and patted her shoulder kindly. "I do not think your baby will have it very hard; she is a lovely little thing and looks quite strong. Don't worry over her, because we have splendid success with our babies here. She will have every care, I promise you. No, she will not fret much."

Helmi kissed her hand with a rapt look in her eyes, but she could not speak. Her heart would have broken when she saw Lili carried into the fever ward away from her with a door shut between them, if the kindly touch of the nurse's hand had not been laid on her shoulder. The hand was warm, human and strong, and its touch went with her when she went down the dark stairs to the ambulance which waited at the door.

Mrs. Herriott was weeping violently, but Helmi sat tight-lipped and pale, but tearless. The red cross on the frosted glass of the ambulance door held her eyes with gruesome fascination; to her excited imagination it seemed as if it were painted with blood.

When returning they were stopped at First Street by the closing of the black and white gates, for the after...

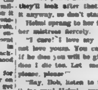
"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound



When Capt. Malcom Campbell completed his world's record automobile drive at Daytona Beach, his first request was for a cup of "good, strong tea." The courageous Captain would have enjoyed Red Rose Tea because it is a blend of choicest Assam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Sold by your grocer in clean, bright aluminum packages.

Dog Discovers Valuable Mine

Strange Incidents Recalled In Connection With Mineral Discoveries

One of the richest copper strikes on Vancouver Island was made by a dog according to Harry Tanner, well-known mining man, who has just returned from a prospecting trip.

Tanner's dog was a companion on one of his trips and sought to rival his master in the discovery of "float." One day on the West coast of Vancouver Island, Tanner heard his dog barking persistently and went to see what it was all about. To his astonishment he found the dog scratching around a rich out-crop of copper ore which development proved to be one of the richest strikes on the island.

The story of the donkey which discovered the famous Bunker Hill and Sullivan mine in the Coeur d'Alene Idaho district, has often been told ...

The Unseen World

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published By The Rexall Drug Stores

GREENSTAIN

You are anxious that your child should have nice white teeth, and you are endeavoring to get him to form the habit of daily care with perhaps good success.

But you notice a dark greenish stain on his teeth, right next to the gum, and which persists in spite of careful brushing.

This, then is greenstain, and is commonly found on both the temporary and permanent teeth of children, being generally confined to the labial upper teeth, well up towards the gums.

The greenish color is due to bacteria present which find lodgment in these areas afforded by the remnant of a dead cuticle which often persists after the eruption of the tooth.

Where "greenstain" is permitted to remain for a considerable time upon these surfaces, the enamel will be found to be "etched" or roughened by dissolution due to an acid which these bacteria produce. Unfortunately, this injury to the tooth substance is permanent.

Now, you can readily understand that these roughened areas will hold food particles and epithelial matter such as are found in a mouth where brushing is neglected—and with resultant decay.

The removal of greenstain had better be left to your dentist who, by employing some abrasive such as pumice, would be able also to smooth and polish these areas and thus check further deposits of this nature.

So, not only, as you see, should greenstain be removed for appearance sake, but also as a prophylactic measure in the prevention of decay.

The Two Jims Weekly

Vol. 1 | Wednesday, June 20th | No. 4

Published in the Interests of the People of Tofield and District by Carver & Hannan, Editors.

EDITORIAL

If you are going to celebrate Fathers' Day we would suggest that you begin by letting the old boy sleep late. Then he is sure to wake up with a grouch. There will be no hot water for his shave and the Sunday paper which you have let the kids have to keep them quiet will be in a mess. Give him cold fried eggs for breakfast and the day will be utterly ruined.

If you think of Tofield as "a high priced town" just remember folks in Ryley are telling each other how high prices are there and how low they are here. It's human nature.

This is a great age for mottoes and slogans but the best slogans means nothing without something pretty substantial to back it up.

THEIR TROUBLE

Immaturity is the one thing the modern young people must overcome. That accomplished they will be alright.

E. O. Currie says that since he has had his McCormick Deering Tractor, he is thoroughly convinced that it is the tractor of the age.

Jim: "This butter is so strong it walks over to the coffee and says 'How do you do?'"

Jam: "Yes but the coffee is too weak to answer."

Mr. T. W. Jacobs was just in our office and having but a nine foot stiff tooth cultivator of a last year we asked him how he liked it. Mr. Jacobs said that if he couldn't buy another one like it, all the money in Tofield wouldn't buy that one from him. Last year he didn't plow a furrow, but cultivated 140 acres and had an excellent crop.

THE JUST KIDS SAFETY CLUB

The Edmonton Journal is to be both congratulatedl and commended upon the organizing and creating enthusiasm in this new organization. The idea of safety and the pledge taken by the children, cannot fail to prevent one accident, and it is quite possible that it may prevent many accidents.

This instance is a clear example as to how a large and widely circulated newspaper may become a public benefactor. The Journal has become particularly apt at this. The marble and jacks competition, the oratory competition, both served their purpose, but this safety idea is the best of them all. Moreover, it is building up a good will for the paper that miles and miles of political wrangling could never hope to do.

In case there are any of our readers who have not read or heard of this new club, we will briefly mention its aims. It is a club for "kids" only. They take a pledge to "look up and down the street before stepping off the sidewalk on to the road. They receive a button, which they proudly wear and on which is "J.K.S.C." "I'm Careful." At time of writing over 20,000 "kids" had joined up, and they are still coming.

The safety idea is further driven home in the child's mind by the devoting of a special comic to this purpose, and there are few "kids" who do not read the funny section.

The General Motors are building a large plant at Regina. Mike McCusker says this should induce Mr. Ford to establish one at Tofield.

STRANGE MALADY ATTACKS ALBERTA HOGS—MANY DIE

Calgary, June 25th.—The outlook with respect to hog cholera in central and southern Alberta grows more serious every hour. Reports are coming in that cholera has been present in Rockyford and Delacour, while there is grave suspicion that herds at points dotted all over the country are also infected.

In the herd of over 220 head owned by B. Singh, a Hindoo hog feeder close to Turner Siding, south of Calgary, slaughter has already commenced. The dominion veterinary authorities declare that possibly one half of this herd will have to be slaughtered.

Carcasses found to be free from the disease will be released for sale. All others will be buried at once. Compensation at the rate of not more than $15.00 a head for grade and $30 for purebred animals is being paid to the owners by the dominion government.

Calgary, June 25th.—Reports of a mysterious malady affecting hogs at several points in the province, moved officials of the health of animals branch to vigorous action during the weekend.

From Stettler it was reported that a farmer named Otto Klotz had found 82 animals dead out of 89, and equally alarming discoveries had been reported over a wide area, according to officials of the dominion livestock branch. Although no official declaration had been made on the malady in Alberta, by Sunday evening considerable anxiety was felt by officials, as a serious outbreak of cholera had already been reported from points on the Pacific coast and numbers of cattle had been imported from the United States during recent weeks.

Immediately it became known that suspected hogs had passed through the Calgary yards, restrictions were placed on trading by officials, and a quarantine was declared as far as hogs were concerned.

During Saturday, 43 animals distributed by United States interests among farmers in the Olds, Carstairs and Didsbury districts were ordered back to Calgary, where they were inspected and despatched to a segregation farm for observation. It was also learned on good authority that there was a possibility that all farms known to have received deliveries of hogs from United States points recently would be segregated.

Farmers finding numbers of their hogs lying dead in their pastures have in several cases notified the provincial police, under the impression that poison had been used. Examination by veterinarians and by the provincial analysts had discovered no evidence of poison however, and as evidence of cholera has been lacking, the cause of the deaths had been a mystery.

An Aberdonian and a Yorkshireman foregathered in Hull. They discovered they were both thirsty, but naturally neither of them had any money. A bright thought struck the Yorkshireman. "I know a barmaid who is very forgetful. If you engage her in conversation, she can't remember being paid or not. I'll go in and see if it'll work." In he went and in a short time he came out to find Jock patiently waiting. "Weel, hoo did ye get on?"

"Fine, Jock, you try it on." In Jock went, and after ordering his glass of whiskey, he engaged the barmaid in an interesting conversation, and after ten minutes had passed he casually remarked, "Ah, weel, I'll hae to be going. Whit about my change?"

Cream Shippers

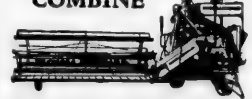
This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

YOURS FOR 300,000

THE TOFIELD CREAMERY
Alex Ross, Manager

The Nichols & Shepard COMBINE



With many new features

The Big 12 Bar Cylinder, the heaviest found in any combine, and the Man Behind the Gun, the greatest combination ever devised for getting the grain from the straw.

Balance—The machine weight, whether the grain tank is full or empty, is equally distributed on all three wheels. That means a machine free from side draft, a combine that will cut square corners, a combine that will haul truer and easier in the heaviest field.

One Man Control—The operator—and only one is needed—rides high on the machine out of the noise and dirt with every control at his finger tips and with the machine and the header in full view.

This is the combine that has:

This is the combine that threshes like the separators of the famous Red River Special Line. It is the combine that has had every part proved in the grain fields where they know combines.

This Nichols & Shepard Combine is offered at a new low price.

The Red River Special Line for 1928: Combines 15' Cut, 20' Cut, Prairie Type; Tractors N & S; Threshers; Nichols & Shepard Corn Picker Husker; Nichols & Shepard Steam

In clean, bright Aluminum.

Signs Of A Better Era

The period of prosperity now so generally prevalent throughout Canada and the United States and the marked rise in industrial activity in all lines all over this continent and which is being felt to a steadily increasing extent in Great Britain and other European countries, seems to present to some ill-informed minds and agitators an opportunity to once again revive the old "strike" weapon. When times are hard, business depressed with large numbers of men unemployed and anxiously seeking work, the agitator urging men rejoicing in employment to "strike" has a hard row to hoe, but when business is brisk, the vast majority of men employed, and an increasing demand for labor the agitator sees his opportunity to make trouble.

Fortunately both employers and employees have learned from past bitter experiences that industrial warfare does not pay any more than does war between nations, the victor suffers almost as great damage as does the vanquished, and the general public which after all is the greatest sufferer is now more and more inclined to sternly oppose the calling of a "strike."

Relations between the bosses on the one side and the men on the other have been bettered and become more cordial in recent years through a realization of a truth, which ought to have been recognized long ago that in the final analysis their interests are common. Employers today do not regard their men as mere machines, but as real and active partners in the success of the business in which they are jointly engaged, and the average workman today recognizes that his employer has huge problems and difficulties to face in successfully administering and maintaining his business in a highly organized and fiercely competitive world field.

Recently an attempt was made to induce all the employees of the Toronto Street Railway system to go out on strike to enforce a series of demands made by them. To tie up the street railway system in a city like Toronto would be a public calamity resulting in great inconvenience to everybody and an enormous loss to the entire community. The Toronto street railway is municipally owned,—that is, it belongs to all the people. The management pointed out that to meet the men's demands would necessitate an increase in fares. This brought the issue right home to every resident, and particularly to all classes of workmen in the city who are among the principal users of the cars. Had the system been privately owned, people would probably have felt that any increased expense to meet the men's demands could be met out of profits and that any increase in fares was unnecessary, but in a municipally-owned system, operated to provide service rather than to accumulate profits, the statement of the management was accepted not as a bluff, and that either increased fares or operating deficits to be made up out of increased taxes, must result.

So, when the matter of calling a "strike" finally came to a vote of the street railway employees, the men themselves rejected it by a ten to one vote in favor of arbitration, a very healthy indication of sane thinking on the part of the men and of the present trend of public sentiment.

Another Toronto labor incident may be cited as indicating the newer and more reasonable point of view now actuating labor men. Structural steel workers on three of the largest buildings in the city went on strike to compel their employers to establish a closed shop and employ only union men, which would be a reversal of the Company's policy during the last forty years of making no distinction between union and non-union men but treating them all frankly and alike. The steel workers have sought to induce other branches of the building trades to go on strike in sympathy with them, but without success, and even the International Union, it is understood, refuses to endorse the attitude of the strikers.

The fact is becomingly increasingly evident that in this age the bludgeon methods of war are growing more and more in disfavor no matter in what direction or cause they may be employed. People are becoming more insistent all the time that causes of dispute whether between nations, or in the industrial arena, or between individuals be settled through the orderly processes of law and arbitration, and not by flying at each other's throats and engaging in combat in which countless thousands of absolutely innocent persons are made to suffer.

Alberta's Coal Resources

Official Figures Place Total At Over a Billion Tons

An estimate of Alberta's coal resources, made recently by the International Geological congress, places the total at 1,035,629 million tons, according to figures received by the provincial government. This is 14 per cent of the world's coal supply, 72 per cent of the British Empire's resources, and 87 per cent of Canada's resources.

The mines presently operating in Alberta are capable of producing 15,000,000 tons annually, and it has been estimated that if this production were increased 100 times, that the available supply would not be exhausted for 18 centuries.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes: "I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1925."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

A Non-Inflammable Fuel

Invention Of Russian Engineer Has Been Successfully Demonstrated

Fire prevention in the aeroplane is still a problem of the greatest importance. One solution lies in the production of a non-inflammable fuel which can be utilized in the present conventional type of aircraft engine.

A Russian engineer, Makoniane, is reported to have achieved success in this direction. By a secret chemical process he is able to convert heavy mineral and vegetable oils into a light liquid fuel which is non-inflammable outside the engine. It can be used in the ordinary carburetor-type internal-combustion engine and will deliver more power for a given weight. These claims are said to have been demonstrated by a variety of official tests.

First Surgeon—"Are you going to operate on this patient?"

Second Surgeon—"I'm afraid to, there's something the matter with him."

Grapes grown in Holland and Belgium can be sent by water to London at a much lower cost than similar fruit grown in the south of England can travel by rail.

The physical and mechanical properties of Sitka spruce and its availability in long straight-grained pieces have made it the most valuable timber for aeroplane construction.

An enemy knocks a man down, then a friend proceeds to kick him.

For Hay Fever—use Minard's.

Obtains Second Place

Blind Student At Brantford Successful In Essay Contest

Obtaining second place among 20,000 contestants all over the Dominion in a recent essay contest, a blind boy student at Ontario School for the Blind, Brantford, will receive congratulations of the acting minister of education, Hon. W. H. Price, conveyed by Dr. A. H. U. Colquhoun, deputy minister, to Supt. Race. Ernest Pallpott, writing upon the subject, "Laura Secord, the Woman Who Made Confederation Possible," attained the highest place but one in this large field, and, in addition, three other pupils of the school received special prizes.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use Of Dr Williams' Pink Pills

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these Mrs. W. F. Tait, McKellar, Ont., who says: "I am one of the willing ones to tell you of the great benefits I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could only sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I had never felt better in my life. It is several years since this happened and I have had no return of the trouble since. I may add that I recommended the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In England and Scandinavian countries traffic keeps to the left, in most other European countries, to the right, according to the National Automobile Club.

A primitive people have been discovered a few hundred miles south of the Mediterranean, living in holes in the ground.

Let Gum-Dipped Tires Save You Money

Only in Firestone tires can you get the advantages of the exclusive Firestone Gum-Dipping process by which every fibre of every cord is insulated with rubber which prevents internal heat and friction—the greatest enemy of tire life.

This is the reason why Firestone tires give thousands of extra miles. They cost no more than ordinary tires. See the nearest Firestone Dealer.

RED CROSS AS FAIRY GODMOTHER

A Radio Tale Of the Far North Of Alberta

In the far north of Alberta stands a little house in the woods, looking like Wendy's House in the Never-never Land for Lost Boys. Here dwelt a Scottish settler, his wife and family, and with them the grandparents and their family. Times had gone hard with the pioneers from the Land o' the Heather. Crops had failed, and the cold of Canada seemed intense, even to their brave Scottish blood.

Food was none too plentiful, clothing was scanty and bedding bare. The young wife, already a mother of several bonny looking bairns, was expecting to present to the land of her adoption that greatest gift of all a new Canadian.

Prospects looked bad to this Scottish family, friends were far away over the seas and the hills of their native land. To whom could they turn in their time of trouble?

Neighbors were few and far between, but kindly and considerate as all Westerners are. In one German home there was a Radio, a new toy that was proving not a plaything but an ever present friend. It gave the latest news of the day to the people of the far northland. Music was theirs, and song and speech. Then one day there came a new feature, a voice telling of the great Red Cross and what it was doing to build a better and healthier Canada.

Suddenly the blue-eyed German smiled. "Mitigating suffering," said the voice, "wherever found." Other phrases came clearly over, "Helping the Settler, cheering the new comer, sending relief, caring for Mothers and Babies." Then the smile grew wider, for here at their own doors was just such a case as the Red Cross was able to succour.

The Golden Rule was put in action at once and through the neighborliness of a German friend a fine new Scottish-Canadian was born under the Red Cross flag.

Golf Week At Jasper Park

Events At Jasper Park Lodge Golf Course, Jasper, Alta., September 8th to 15th Inclusive

Saturday, Sept. 8th (Morning) — Handicap match against par, eighteen holes. Players allowed three-quarters of medal handicap. Entrants may arrange their pairs. (Afternoon) Ladies' handicap — Match against par.

Monday, Sept. 10th (Morning) — Inter-Province and State competition. Teams of six players from provinces or states. Total of medal round of all contestants for 18 holes to be counted. Individual prizes to winning team members. (Afternoon) — Mixed foursome matches against Bogey, 50 per cent. of combined handicaps.

Tuesday, Sept. 11th (Morning) — Jasper Park Lodge Silver Totem Pole Trophy. Qualifying round eighteen holes. Gold medal for best qualifying score. Silver Totem Pole Trophy to winner of first sixteen. Suitable trophies to winner fo second and other sixteens. (Afternoon) —Ladies' qualifying round.

Wednesday, Sept. 12th (Morning) Jasper Totem Pole Trophy. First round, eighteen holes; all flights. (Afternoon)—Ladies' first round; all flights.

Thursday, Sept. 13th (Morning)— Jasper Totem Pole Trophy. Second round, eighteen holes; all flights. (Afternoon) Mixed foursomes — Medal round.

Friday, Sept. 14th (Morning) — Jasper Totem Pole Trophy. Semi-finals, all flights. Men and ladies. (Afternoon)—Mixed foursomes — Match against C.D.G.U. par ¾ of combined handicap.

Saturday, Sept. 15th (Morning) — Jasper Totem Pole Trophy. Finals; all flights. (Afternoon)—Ladies' putting competition. 5 p.m.—Prize giving.

The winner of the first 16 in the Totem Pole Trophy competition will receive a reduced facsimile of the trophy, which will be his permanent possession. The trophy itself, upon the giving of bond, may be held for a year by the club from which the winner enters.

Send Beavers To Scotland

Canada has donated a pair of live beavers to the Zoological Society of Scotland. These little animals, captured and conditioned in Jasper National Park, were transported to Montreal and placed aboard the S.S. Cairnish. Their destination is the Zoological Gardens at Edinburgh.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

The number of persons employed in road construction in Canada in 1926 reached a total of 26,071, and was greater than in any of the past seven years.

For Rheumatism use Minard's Liniment.

Care For Your Hair With Cuticura Soap

And Cuticura Ointment. Before shampooing anoint the scalp with Cuticura Ointment, letting it remain on over night when possible. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A clean, healthy scalp means good hair.

Cuticura Shaving Stick 25c.

Seventh British Dominion

Palestine In Line For This Position Says Jewish Leader

That Palestine would eventually become a seventh British Dominion was the prediction made by Dr. Schmary Levin, Jewish leader, who opened the United Palestine Appeal for Western Canada recently.

"Great Britain is in Palestine to stay," declared Dr. Levin. "Her mandate will only be withdrawn when the Jewish nation shall have established itself as one of the commonwealths of British nations. Great Britain needs Palestine as the keystone country in the Near East and as a guardian state of the Suez Canal. In fact, she needs the Jews fully as much as they need her," he asserted.

Dr. Levin reported that the crisis which Palestine had recently undergone was almost over. Jewish settlers were making a striking success in agriculture. Oranges produced on Jewish farms were obtaining 20 per cent. higher prices than those from other countries.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

A Land Of Farm Owners

Western Canada is a land of farm owners, according to census revelations. In Manitoba more than 81 per cent. of occupied farms are inhabited by their owners; in Saskatchewan over 77 per cent. and in Alberta over 75 per cent.

Honored Earl Of Asquith

Southern Mountain Peak and Western Town Named After Him

The name of the late Earl of Oxford and Asquith is likely to live not only in history, but in geography, for two places on the map were named in his honor during his long term of office as Prime Minister.

The first such honor was paid Mr. Asquith by Sir Ernest Shackleton, who named a newly-discovered peak in the vicinity of the South Pole, Mount Asquith. The second was the bestowal of his name on Asquith Town, in Saskatchewan.

Announces New Discovery

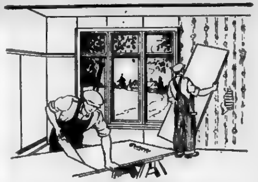
Artificial Teeth Can Be Made Without Plate, Says Toronto Dentist

Dr. F. W. Barbour, Toronto dentist, announced a remarkable discovery in which false teeth are made to stay in place by means of suction called "marginal retention," for use on either the upper or lower jaw. By this the vulcanite plate formerly covering the palate of those who had artificial upper teeth and which used to interfere with diction, and the sense of taste, will be done away with, relieving considerable discomfort to the wearer.

London's smallest elementary school is a tiny classroom near Praed Street, where the children whose homes are canal barges receive instruction whenever they are in the district.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

A street car goes much faster when you are running to catch it than after you have caught it.



Nail GYPROC right over Old Walls

GYPROC Advantages for Farm Buildings

Easy to use.
Low cost.
Workable as lumber.
Cannot warp, bulge, crack, shrink or burn.
Takes any decoration.
Resists heat and cold.
Vermin proof.
Eliminates repairs.
Ideal for lining garages, poultry houses, barns, grain bins, and other farm buildings.
Especially suitable for converting attics and basements into extra rooms.

How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing Gyproc right over the old, unsightly wallpaper. When you've decorated with Alabastine your home will be as attractive and comfortable as any home can be.

Use Gyproc for partitioning off extra rooms, renovating attics and basements, and making grain bins, stables and other farm buildings fire-safe and vermin-proof. You can put it up yourself—easily, quickly and at a substantial saving.

Gyproc Joint Filler applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.

EXPECT RETURN OF RESOURCES TO COME SOON

Ottawa.—There is every prospect that the present year will see important developments in the financial relations between the Dominion and all the provinces as affecting the subsidies which are annually granted. The matter, it is known, has been under consideration already and will be further considered when, during the summer months, negotiations occur with the western provinces respecting the return of their natural resources.

Similarly, the subject was a most important feature of the agenda of the Dominion-wide conference last fall.

It is understood that the Dominion government is anxious to have a specific delimitation of its spheres and those of the provinces and to avoid overlapping even to the extent of federal subventions of local works. The grants for highway improvement are not being renewed while the aid to technical education is also lapsing.

Saskatchewan's public lands have been so extensively alienated that it is likely to claim in addition to the return of what remains of its domain the full subsidy of $1,125,000 per year to which it was entitled when it has a population of 800,000.

For such a concession by the Dominion government the outlook is not unfavorable.

Will Aid Canadian Ports

Grain Commissioners Promise Support To Vancouver and Other Ports

Vancouver. The Board of Grain Commissioners of Canada, will exert every effort to aid the port of Vancouver, and keep Canadian grain moving over Canadian railways and through Canadian ports. Vancouver has in its few years of grain experience developed the grain handling facilities to a science and has proven capable of handling any quantity turned Westward.

These sentiments, together with a note of warning that United States ports and transportation interests looked with eager eyes on the grain crop of Canada, were expressed by Leslie H. Boyd, chairman of the Dominion Board of Grain Commissioners, here. The occasion was the banquet celebration of the 80,000,000th bushel of grain given by the Vancouver merchants' exchange. More than a hundred grain and shipping men attended, the guests including besides Mr. Boyd, James Robinson, and Matthew Snow, and Secretary Rathbone of the Board of Grain Commissioners.

Col. R. D. Williams, president of the Vancouver Merchants' Exchange was chairman and in a speech to the 80,000,000th bushel gave a resume of the history of the local trade.

"I am not given to prediction but I feel quite sure that Vancouver will pass the 120,000,000th bushel mark during the 1928-29 season," declared F. R. McD. Russell, chairman of the Vancouver harbor board.

Given Command In India

General Chetwode Appointed Chief Of General Staff

London. General Sir Philip Chetwode, member of the army council, has been appointed chief of the general staff in India. He succeeds Lieut.-Gen. Sir A. Skeen, who had served under the commander-in-chief Field Marshal Sir W. R. Birdwood, since 1926.

Gen. Chetwode was the author of the military plan by which Field Marshal Sir Edmund Allenby pursued the offensive in Palestine during the war. Up to last year Gen. Chetwode was commander-in-chief of the Aldershot command. He is 59 years old and served throughout the war.

Public Schools To Teach Piano

Port Arthur, Ont. Pupils at the public schools will be given the opportunity, at the opening of the fall term, to take piano lessons as part of the school curriculum. It has been decided by the Board of Education the Canadian Bureau for the Advancement of Music being authorized to make the necessary arrangements.

Memorial To Coal Miner

Lethbridge, Alta. Plans are progressing rapidly for the unveiling here, July 18, of the memorial cairn in honor of Nick Sheran, Alberta's first coal producer, who in 1872 opened out the first mine on the banks of Belly River.

Tragedy In Belgrade

Two Members Of Serbian Parliament Are Killed By Radical Deputy

Belgrade, Jugo-Slavia.—Infuriated by frequent interruption and the refusal of the opposition to withdraw insulting words, Punica Ratchitch, Radical deputy, drew a revolver during a session of the national assembly and fired all six rounds into the group of opposition members.

Paul Raditch, nephew of Stefan Raditch, the peasant leader, was killed, Stefan Raditch himself seriously wounded. The Croat deputy Dr. Basaritchek, was so gravely wounded that he died on his way to the hospital.

Dr. Pernar and two other deputies, Grandja and Jelasitch, also received bullet wounds of a dangerous nature.

This was the culmination of fierce controversies and hand-to-hand fights which have recently taken place in the Jugo-Slav parliament. The crime is considered the most terrible since the memorable assassination of King Alexander and Queen Draga, just 25 years ago this month. It has thrown the whole of Jugo-Slavia into a ferment of excitement.

Parliament had scarcely opened this morning when the opposition, led by Stefan Raditch, began its obstructionist tactics against the government's legislation in the forefront of which is ratification of the Nettuno convention with Italy.

At the height of the angry debate Stefan Raditch, turning to the government benches and shaking his finger, shouted: "You are not men; you are swine!"

Privy Council Ruling Important To Dominions

Judgment Rendered In Regard To Writ Of Habeas Corpus

London.—A judgment of grave constitutional importance to His Majesty's subjects in Britain and the overseas Dominions has been rendered by the judicial committee of the Privy Council on an appeal from Nigeria.

In effect, Their Lordships decided that although by the Judicature Act, various courts have been combined into one high court, each judge of that court still has jurisdiction to entertain an application for writ of habeas corpus either in term time or vacation, and he is bound to hear and determine such application on its merits, notwithstanding any previous judicial findings.

This principle must apply to the Supreme Court of Nigeria, they said in allowing the appeal of Eshugbayi Eleko, native chief, from a decision of the Nigerian Supreme Court which had found that Mr. Justice Tew, of Nigeria, had no jurisdiction to entertain Eshugbayi's motion for a writ of habeas corpus.

Tribute For Pilot

Credit For Latest Atlantic Flight Given To Stultz

London.—Talking to London's assembled newspaper men recently, Miss Earhart declared firmly and emphatically that during her brief stay in England she did not want to be the subject of "hero worship."

"I have done nothing to merit it," she said.

"It is because I am a woman that I have been forced into the spotlight. The credit for the success of the flight is due to Stultz. He controlled the plane practically throughout and was just splendid."

"Hints" With Cruisers

Warsaw.—The Government has ordered three light cruisers to anchor in the mouth of the Vistula as a gesture to Danzig that Poland will brook no interference with her development of merchant marine. This action followed recent difficulties with Danzig Port and Customs authorities, who refused to allow several Polish freighters docking or anchoring facilities at Danzig piers. Danzigers protest that the ships are a menace, and constitute a danger to the safety of the city.

Will Make World Tour

Minneapolis.—James W. Davidson, author, explorer and diplomat, a resident of Calgary, Alta., has accepted appointment as special representative of International Rotary for a tour around the world to visit clubs already organized in some countries and survey other countries not yet in Rotary.

Attending Authors' Convention

Toronto.—A contingent of Toronto members of the Authors' Association will attend the annual convention in Calgary which opens July 4, including Dr. Charles G. D. Roberts, the National president E. M. Hardy, the National secretary and J. M. Elson.

Had Narrow Escape

Window Cleaner Clings To Sill On Third Story Until Rescued

Winnipeg. — Clinging desperately with his fingers to a window sill on the third storey of the Grain Exchange building here, Steve Halsum miraculously saved himself from death. He was cleaning windows and was adjusting his safety belt when the heavy steel sash fell, knocking him off the space. As he plunged downward he caught the sill just before the sash crashed down on his fingers, crushing them badly. He held on with all his strength until his plight was discovered and he was rescued.

Caught In Snowstorm

Colorado Tourists Marooned At Summit Of Pike's Peak

Colorado Springs, Colo.—Twenty-five tourists have been rescued from the summit of Pike's Peak after being marooned there for 24 hours by the worst spring snowstorm to visit this region in several years.

Several children were in the group, which had been isolated by great heaps of snow which covered the upper regions of the 14,000-foot mountain. Word of their plight was brought here when telegraph communications were restored and a snow plow fought through the drifts and reached the stranded tourists.

EFFORTS MADE TO PUSH WORK ON H. B. ROAD

Ottawa.—Work continues to be pushed on the Hudson Bay Railway, with considerable grading in progress. Whether the road will be finished by the end of 1929, as anticipated, cannot yet be said, but all efforts are being made during the season to finish those parts that can be worked on.

The northward course of the road occurs at Mileage 356 (from The Pas), a few miles northeast of Kettle Rapids. From there the railway will run almost due north to Fort Churchill, avoiding contact with Fort Nelson altogether. Churchill is at Mileage 512, which would indicate that 156 miles of steel still remain to be laid.

With regard to the Fort Churchill itself, officials of the department of railways recall that when Hon. Mr. Dunning was asked as to his policy respecting real estate speculation there, he declared that the government had expropriated all lands on the east side of the harbor, where the dock works will be constructed. Compensation for this will be decided in the exchequer court in due time.

Most of the land for the townsite of Churchill was the property of a settler named Beach, who established himself there and homesteaded many years ago. He is now dead, but his heirs are scattered throughout Canada and they will be recompensed for the expropriations.

The loss of the dredge off the Labrador coast last year may delay the harbor works for some time. Throughout the winter a great deal of material was salvaged at Port Nelson and forwarded to Fort Churchill by motor-tractor, other material has been floated up the bay.

An aeroplane base will be established within a few weeks as soon as the ice conditions in the immediate vicinity of Fort Churchill have become such as to enable the department of national defence 'planes now at Cormorant Lake, north of The Pas, to make the trip to the port.

B.C. PROVINCIAL ELECTIONS

Hon. John D. MacLean, of British Columbia, who will lead the Liberal party in a test of strength in July, when a general election will be held. Premier MacLean who is a native of Prince Edward Island, succeeded to the chieftainship of the provincial Liberal party on the death of the Hon. John Oliver last year.

Scottish Youths For Canada

Inspector Comes To Dominion To Study Conditions Here

Toronto.—James M. Maltman is relief inspector of the Glasgow, Scotland, parish council. Interest in migration problems affecting the old country has brought him to Canada for the purpose of studying conditions as they have to do with youths who come out under the land settlement act.

"There are 8,000 people in our parish receiving relief," he said. "We quite appreciate that migration to Canada is not a solution to our problem, but we do feel that many Scotch lads, after they are hand-picked, tested and trained in farm work, may make good settlers for Canada.

"We are most particular as to what type of boy we train and never accept those who have been in a reformatory or are of doubtful character." He brought out with him 30 youths who are already placed on farms in the Dominion.

Storm Takes Heavy Toll

Tornadoes Cause Death and Destruction in Southwestern States

Kansas City, Mo.—Three more deaths and millions of dollars of property damage were added to the toll taken by storms in the Southwest.

Tornadoes again visited communities in Oklahoma, and high winds, floods and hail scattered destruction in sections of Kansas and Missouri.

The three deaths reported recently, brought the total dead to 12 and more than a score of names were added to the long list of injured.

The Red Cross reported 2,290 persons homeless, many of them destitute.

New Settlers Coming

London.—The families of 30 soldiers will be settled in Canada next spring under the new scheme of land settlement for military and naval families, it has been announced. The age of the head of the family will not exceed 40 years except in particular circumstances where the family is regarded as very desirable, in which case the age limit will be raised to 45 years.

Trade Treaty Signed

Vienna, Austria. — A treaty of amity and trade between the United States and Austria has been signed by Chancellor Seipel and United States Ambassador Albert Henry Washburn.

WILL GIVE CANADA HELPING HAND

Photograph shows a happy group of young women who arrived in this country recently for domestic work, positions having been assured them, before leaving the Old Country.

They arrived in Montreal after a pleasant voyage on the Canadian Pacific Steamship "Melita" with the ship's conductress, who is seen in the centre of the group, and who advised them that it were better to work for a salary and be independent than just to work at keeping house.

Must Make Restitution

Chicago Mayor and Three Others Owe $1,732,279 To City Treasury

Chicago, Ills. Mayor William Hale Thompson, Michael J. Flaherty, George F. Harding and Percival B. Coffin, public administrator and three real estate experts, were found in circuit court to have conspired together in hiring the real estate men to do special work under the last Thompson administration at a cost to the city of $1,732,279. Judge Hugo Friend ordered the defendants to make restitution of that sum to the city treasury.

The court, terminating the two two year old suit, found the conspiracy had a two-fold purpose, "financing the political activities of the Thompson administration, and for the private benefit of the members of the conspiracy."

Says Navy Best Defence

Preserves Unity Of Empire Declares President Of League

Saint John, N.B.—Treaties and pacts could never take the place of the "sure shield" the navy—declared President Sam Harris, Toronto, before the annual meeting of the Navy League here. The unity of the Empire, he said, depended on the naval defence. He asserted Canada should pay a fair share towards protection of its overseas trade.

The session was taken up with a presentation of the financial statement of the organization, which showed the League with highly satisfactory resources. Endowment fund securities amounted to $435,000. Surplus in the general fund, December 31, 1927, was $19,721.55, it was reported.

Lynching Is Condemned

Population Of Texas City Is Stirred Over Outrage

Houston, Texas. Stirred by the first lynching here in 50 years, municipal, county and state officials joined in an intensive search for eight unmasked white men who took Robert Powell, 24-year-old negro slayer, from a hospital cot and hanged him from a bridge.

The fact that the lynching took place while the national political spotlight is turned on the city caused officials particular concern and quick steps were taken in an effort to fix responsibility.

An appropriation of $10,000 was voted by the city council for an investigation by a committee of six, two members of which are negroes.

NOBILE PARTY RECEIVE RELIEF AFTER LONG WAIT

King's Bay, Spitzbergen. General Umberto Nobile and five of the crew of the lost dirigible Italia were found on an ice floe by Major Maddalena, Italian aviator. He dropped them guns, ammunition, food and cigarettes, while the castaways danced joyfully about their desolate encampment. Maddalena was unable to make a landing.

This first relief for the Italian explorers came twenty-six days after their dirigible, returning from a flight over the North Pole and weighted with ice, suddenly descended, smashed the gondola in which Nobile and eight of his crew were riding, and carried the remainder in the unmanageable balloon northward before a gale.

The S-55, a huge seaplane, was sent from Italy by the Italian Government in the belief that its wide cruising radius would be more useful in the search than the smaller seaplanes furnished by the Swedish and Norwegian governments.

The S-55 was manned by Maddalena, Lieut. Cagna as co-pilot, with radio operator Abelli and Mechanic Sergeant Rampini, who had come with the 'plane on its flight from Italy.

All Europe, moved for days by the dramatic plight of Nobile in hearing and seeing relief 'planes overhead but being unable to give them position, tonight was anxiously waiting for word from Amundsen.

Captain H. Riiser-Larsen returned from his fourth reconnoitering trip over the ice without having seen anything of Nobile or the other two parties of the Italia's crew.

Larsen said the radius of flight of his machine was too small and suggested an icebreaker be sent to North Cape to rescue the three men of Nobile's crew who left him in an attempt to walk to the mainland.

The rescue ship Braganza is unable to advance further toward the east because of packed ice.

BRITISH PRESTIGE AMONG NATIONS IS MAINTAINED

Minneapolis.—England not only has maintained her prestige among nations, but will yet become mightier, Sir Donald MacLean, member of the coalition cabinet and former Liberal whip in the House of Commons, told delegates from the British Empire to the International Rotary Convention here.

Speaking before a British Empire dinner Sir Donald told his countrymen that England in conjunction with the United States and Canada could make the future destiny of the world one worthy of Christian civilization.

He maintained England made a remarkable recovery from her ills and he defended the "dole" system.

"It is an entire mistake to suppose that the best days of the old country are over," Sir Donald said. "On the contrary, the people who lost eight hundred thousand men in the Great War, who brought the pound sterling to look the dollar square in the face, who restored the gold standard and brought her general credit to a status almost equal to pre-war days, are people who are confident and efficient."

Sir Donald said he was interested in noticing the erroneous impression in the United States of the "dole" system. This was a misnomer he said, as unemployment pay came out of the national system of insurance workmen alike contributed, to which the state, employer and "When the worker drew his unemployment pay it was no charitable "dole" but a sum which he earned honorably."

May Be Lost In North

Fear Entertained For Missing Trapper In Northern Alberta

Edmonton, Alta. — The hazards faced by the men who go into the northland in quest of furs is once again exemplified by reports from northern detachments of the Alberta Provincial Police reaching Edmonton headquarters.

A telegram received from Constable Baynes of Fort Fitzgerald, says that fears have been expressed for the safety of Walter Renner, a trapper from the northernmost post in Alberta. The trapper is now long overdue, and a party headed by the constable are on the trail in search of the missing man.

In his lonely shack on the Athabasca river 70 miles down river from the town of Athabasca, John Wickstrom, 70, old-time trapper, was found dead in his bed. It is thought that he peacefully passed away in his sleep.

Planning Westward Flight

Trip Not Yet Properly Accomplished Says Harry Lyon

Sydney, N.S.W. Harry W. Lyon, the American navigator of the trans-Pacific plane "Southern Cross," announced that when he and his fellow countryman, James W. Warner, the plane's radio operator, returned to the United States, they would prepare for a flight from Ireland to America. He added that they would invite Captains Charles Kingsford-Smith and Charles Ulm, the Australian pilots to participate in it.

Lyon contended that the westward crossing of the Atlantic had not yet been properly accomplished.

Will Visit Winnipeg

Winnipeg, Man. Winnipeg will be honored by a visit from Lord and Lady Willingdon, Saturday, July 7, when his Excellency has consented to formally open the Norse celebration in River Park, according to information received by J. S. McDiarmid, M.P., who has been in communication with Rideau Hall.

Used New Route

Ottawa. A radio greeting from Hon. James O'Grady, Governor of the Island of Tasmania, to the Prime Minister has been received here. The Antipodean governor's message was sent in connection with the recent inauguration of beam wireless between Canada and the Australasian Dominions.

Wins Coveted Medal

Portland, Ore. Sir Robert Philips, of Edinburgh, president of the British Medical Society, was awarded the Trudeau medal, most coveted prize offered to scientists fighting tuberculosis. The award was announced at the convention here of the National Tuberculosis Association.

ALL SET FOR A SUCCESSFUL CHAUTAUQUA

The stage is all set for the most successful chautauqua Tofield has ever had. The committees under the presidency of J. W. Chapman and his working partner, Mr. Craig, secretary, are about ready to let loose the ticket sellers upon the community. And a ticket admitting you to eleven first class programmes for three dollars is a good buy. You cannot get such entertainment value anywhere else.

The programmes which taken together, are too lengthy to permit of a full review here, are planned in such a way that they will cater to every taste. They range from the Russian Cossack Chorus, and the Shohan Concert Co., to the Punch and Judy Show.

There are lectures, both entertaining and instructive and two very good plays as well.

The slogan to live up to is "Buy your ticket early," for then it is possible for the committee to keep up with the accounting.

Remember the dates July 11th to 17th.

THE CIRCUS IS COMING!

The menagerie with Cole & Rogers circus is the pride of the show. From all climes have been assembled beasts and birds; skilled trainers have "broken" some of them to do amazing tricks and stunts. There are many which the skill of man could not subdue—they will be on view in steel cages, sleek and shiney in their hides and furs.

Acrobats and athletes, men and women of skill and poise, on horseback or swinging in the air; funny clowns to make old and young forget themselves in spontaneous laughter; dogs, ponies and domestic animals doing cute and almost unbelievable tricks—everything to amuse and delight old and young is promised in the program of entertainment Cole & Rogers Shows will bring to town.

FOR SALE.— Two cows, bred to farrow about September 1st. Apply to C. R. Burchard, 'Phone 1912, Tofield. 21p

Good Chocolates
That "Sweet Tooth" nature gave us was not a mistake. We need and are the better for having "sweets." No more popular or delicious way of eating sweets has been devised than by eating good candy—but it must be good, not glucose and saccarine.
Our chocolates are of the best quality, pure cocoa and cane sugar, manufactured by the foremost manufacturers in the Dominion. Many kinds and many "centres." A pound or a half pound of chocolates make a splendid, yet inexpensive Sunday treat—and they are good for you too.
Summer Needs—Sunburn Lotion—Mosquito Lotions—Fly Poisons (all kinds)—Eye Shades, Etc.

Now Comes Chautauqua

AMISK CREEK

The picnic held here last Friday was a success in every way. The weather was very nice and a fairly large crowd gathered together. The Ladies' Aid obtained good prices for their fancy work, etc. And the sports were well attended.

Emil Wangard and Eddie Steen won the horse shoe tournament. Ryley won the baseball game from Shonts, the score being 11—8. The Shonts girls beat the Ryley girls in softball, by a large score. Everyone enjoyed themselves and the proceeds will go towards a new basement for the church and other repairs.

Mr. and Mrs. Hillrud entertained a large number of friends and relatives last Sunday in honor of Andrew Hillrud, a brother of Hans Hillrud, and Miss Hillrud, a neice of the family from Bellingham, Wash., who are visiting here for a short time. Andrew Hillrud was lucky enough to have his birthday on the 1st of July, so the party was more appropriate on that account. Mr. Andrew and Miss Hillrud received as a token, a sum of money. A dandy lunch was served and everyone had a very nice time.

Mr. and Mrs. J. Blackburn and children and Miss L. Blackburn, from Lavoy, attended the picnic held here last Friday.

Mr. and Mrs. A. Haugen visited at the A. Patterson home last Sunday.

Mrs. L. Olson and Olive left for a short visit in Saskatchewan last Saturday.

Tofield's Big Day a Great Success

LARGE CROWD CELEBRATE DOMINION DAY ON MONDAY

With splendid weather conditions in its favor, Tofield's Dominion Day Celebration went forward on Monday morning like clockwork. There was some apprehensions prior to the day—even up to noon of the day—that the circus coming on Tuesday might have a detrimental effect on Monday's attendance. It may have kept a few people away, but very few, the attendance being very gratifying to the committee responsible for the day's doings.

As announced the doings commenced with a decorated automobile parade from the Canadian National Railway depot in the morning. There were some very nicely decorated cars, both pleasure and commercial. The prizes were won by Mr. A. B. Clutterham and Mr. M. C. Hammond.

There was a junior ball game in the morning between Bardo and Tofield Trail Rangers and the country lads caried off the honors to the tune of 9—8.

Lunch was then served.

After lunch, Professor A. E. Ottewell of the University of Alberta, gave a splendid address, emphasizing the historical importance of the day. Prof. Ottewell traced the development of confederation in an exceptionally interesting manner and was given much applause at the end of his address.

The horse races followed and while not numerous were of a high standard. And they were real races—won by the winner by the smallest of margins. In the free for all, Joe Pruden took first prize and Leslie Glover second. In the pony class, Westlake took first prize and ——— Sutton second.

The foot races were then staged, the following being the winners:

Boys under 6—Wilfrid Currie, Russel Bearisto; Kennie Baptist.

Girls under 6—Marjorie Johnson, J. Walker; Edna McMann.

Boys under 8—Henry Hicks; Arnold Swift; Raymond Hull.

Girls under 8—Coleen Gladue; F. Walker; ———Bearisto.

Boys under 10—Sam Turzanski; John Swift; J. Bailey.

Girls under 10—Kathleen Ingram; Isabel Robertson; Jean Munroe.

Boys under 12—Sam Turzanski; Walker; Keneth Gordon.

(Turzanski disqualified having run in previous race.)

Girls under 12—May Lepine; Helen Shultz; Beatrice Baptist.

Boys under 14—William McCarthy; C. Gray; Oscar Ackley.

Girls under 14—Mary Druce; Mary Burnett; Geogina Craig.

Girls 18 and over—Mrs. H. Hicks; ——— Wierenga; Mrs. Gladue.

Boys Bicycle race—1 ——— Gray; 2 F. Munroe; 3 J. Ackley.

Men's race—1 F. Brenneman; 2 ——— McGinitie; 3 Albert LaRoche.

Girls three legged race—Mary Burnett and Georgina Craig; May Lepine and Hazel Foss; Beatrice Baptist and Mamie Craig.

Wheel barrow race— ——— Glover and Mike Turzanski; 2 ———; 3 Billie McCauley and Jack Whyte.

Three legged race for boys—1 Norman Glover and Mike Turzanski; 2 Charlie Edwards and H. Swinton; 3 K. Munroe and Bob Martin.

The horse shoe tournament created much fun, a large number of entries being made. There were also quite a number of spectators. The finals were played out between McHeffey—Stroud and Bailey—Gladwin partnerships. Fred McHeffey and George Stroud won first place and Jack Bailey and Sherwin Gladwin second.

The afternoon baseball game was witnessed by a large crowd with support from the side lines much about equal. Logan and Tofield intermediates were lined up and it was anybodys game up till the last moments of play.

In the early stages of the game, Tofield went ahead and in the first few innings gained a lead of several runs. Logan, seeing the game slipping away from them settled down to real ball and by the sixth or seventh inning were well out in the lead. The game then took a turn in the home boys direction and one by one (not a merry-go-round) they added runs until at the end of the game they were a bare one run to the good. The game could not have been more even and the spectators got quite a thrill as the Tofielders crept up the ladder to victory.

Ball and Phillips were the battery for the locals and Tiedeman pitched for the visiting team.

The score was 13—14.

Logan — Tiedeman; White; Lennie; E. Tiedeman; Craig; White; Phillips Mahaffey; Whillans.

Tofield—Werton; Bewick; Ball; Penmore; Kalmia; Martin; Werton; Phillips.

The evening baseball game between Lakeshore and Ketchamoot, was as close as one could wish for. Two runs to the good for the winner with the bases loaded when the last ball was thrown kept the fans on their toes until the last minute.

Ketchamoot won this game from Lakeshore, both teams playing pretty fair ball throughout and at times exceptionally good ball.

Lakeshore — Moss; McLaughlin; C. Lennie; Googlain; Sauer; Tiedeman; Chapman; Cunningham; Blacklock.

Ketchamoot Sears; Lee; R. Lee; Mitchell; Williams; Francis; Brennon; Ingram; Rude.

The picture show at the theatre at 7:30 was presented to a crowded house and the dance immediately following was well attended also.

The fireworks, which for convenience were displayed on the plot of land just north of the telephone office were watched by practically everyone in town at that time. The display which was a very creditable one was arranged and put off by Mr. Tebo, (at least it looked like him in the flare light.)

Special mention should be made of the old-timers dance. This, while a new innovation, was a huge success. Gay couples of fifty, sixty, and (quietly now) seventy, danced with carefree abandon and they and the onlookers thoroughly enjoyed themselves.

With the two dances, one in the curling rink and one in the Variety theatre breaking up at about two in the morning, thus ended Tofield's 1928 sports day.

On the whole the day can truthfully be said to have been a success and the various committees in charge of the doings are to be congratulated.

Mention might be made of the stalwarts of the Tofield Curling Club Building Committee who took the opportunity to put in another hard days work to help decrease the debt on the new curling rink. We are pleased to say that their efforts were successful and that the debt was considerably decreased by their efforts.

WEDDING

The marriage took place in the First Presbyterian Church at Edmonton on Tuesday, July 3rd, of Dolina Catherine Thompson, second daughter of Mr. and Mrs. Wm. Thompson of Tofield, to Mr. Carl D. Blake, eldest son of Mr. Charles Blake, also of Tofield. The Rev. Thomas Tait officiated, and only immediate relatives and friends were present.

Mr. and Mrs. Blake will make their home on their farm four miles east of Tofield.

LOCAL and PERSONAL

Mr. and Mrs. Ross and family, Clifford Hesterington and Miss Edwards visited Innisfail over the holiday.

Miss Alma Bethel, now of High River, is visiting at home for a week or so.

Mr. and Mrs. Wood of Calgary spent the week end at the Beirnes homes.

Miss Lerett Ross Spent Sunday and Monday at the D. E. Ball home at Red Deer.

Mr. and Mrs. W. C. Billman and Mrs. M. Wood motored to Edmonton on Saturday, returning the same day.

Miss M. Carter, of Camrose, visited friends in town over the week-end.

Mr. J. Carter was in his accustomed place directing the athletic events on Monday. He came from Holden for this purpose, and Mrs. Carter accompanied him.

Mr. and Mrs. R. Wilson and family spent Monday in the City.

Miss Clara Abbott leaves on Tuesday to attend the summer school at the University of Alberta.

Mr. and Mrs. Abbot and Miss Clara, Mr. and Mrs. Letourneau and Dorsey, and W. Swift spent the week end at Buffalo lake.

Miss Elsie Kendall teaching at Ponoka was home at Tofield for the holidays.

Frank Wood, of Viking, spent the holidays at his home in Tofield.

Relatives from Calgary were visiting at the Beirnes' home over the holidays. Arthur Beirnes accompanied them back to Calgary, where he will attend the stampede.

Mr. and Mrs. Carver spent Sunday in the City.

Mrs. Lamont's sister was a visitor at the Lamont home over the week end.

Miss Irene Secord who has been teaching away, returned home on Sunday.

Mr. and Mrs. Art Dinney are visiting at the Sherlock home. Mrs. Dinney was Miss Mildred Sherlock.

Mrs. M. C. Hammond spent several days last week in Edmonton, returning on Saturday.

The Misses Eva Clutterham and Nettie Neal, nurses in training in Edmonton hospitals, visited their homes here on Monday.

Miss Edith Riley, nurse in training at St. Mary's hospital, Camrose, is home on a three week's vacation.

Mr. and Mrs. Tebo motored to Wetaskiwin on Tuesday.

Ted Paridis, who is working in the athletic goods department of the Hudson's Bay Store in Edmonton, was home over the week end. Reg. Bearisto, who have been visiting Ted, returned with him.

Mrs. Wallis and children are residing at Tofield for the school vacation period.

W. Swift was a visitor to Camrose on Wednesday, returning with a new Ford.

Miss Mollie Blain, who has been working in the Tofield Farmers' Supply Co. store left for her home at Wainwright on Sunday, where she has accepted a position on the Alberta Government Telephone staff.

Miss Hilda Nomeland, who has been working in New Norway for the past three months, returned home on Saturday, for the summer months.

Miss Marion Forman, who has been teaching at Killam, is home for the summer holidays.

A number of tennis players from Tofield journeyed to Camrose to play in inter-town games, last Wednesday.

Mr. C. H. Rowe will return to Tofield and assume the managership of the local branch of the Bank of Montreal here. Mr. Rowe, is well known throughout the district and his return will be hailed with gladness.

MIKE TURZANSKI HIT BY CAR

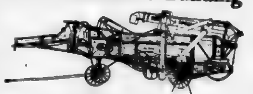
While riding a bicycle on a road leading into town and turning a corner, Mike Turzanski was hit by an automobile driven by Mr. Ralph Olson. The place where the accident occurred is at the junction of two roads, the view of oncoming traffic being obscured by bush.

Mr. Olson as soon as he realized the boy was hit, stopped at once and brought the boy into town for medical treatment. It was found he had a broken arm and a broken leg.

He was taken to an Edmonton hospital on the evening train.

Mike was in an automobile accident a year or so ago, when he then sustained a broken leg.

80 Years of Successful Building



of Threshing Machines

The 1928 Red River Special Line represents the result of 80 years of continuous building of Threshing Machines by the Nichols & Shepard Company.

Only by keeping faith with the farmers and threshermen of America has it been possible for this company to grow from a small blacksmith shop in 1848 to its present great factory with branch houses in every grain growing center.

And what a machine this year's machine is!
The finest, fastest, cleanest thresher ever offered to agricultural America. Hyatt Roller Bearings at every main bearing point — Alemite-Zerk Lubrication — a great new feature, Weatherproof Fiber Pulleys on every high speed drive, Armco Ingot Iron in all sheet metal parts, Bridge Truss Construction, French & Hecht Wheels, all in a thresher built around the famous 4 Threshermen.

These famous 4 Threshermen, The Big Cylinder, the Man Behind the Gun, the Beating Shakers, and the Steel Winged Beater are the greatest combination ever devised for getting the grain from the straw.

WORLD HAPPENINGS BRIEFLY TOLD

The new German dirigible LZ-127, may make a trip to East Asia by way of California.

Miss Mercedes Gleitze, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. J. A. Robb, Minister of Finance.

The King has approved the appointment of Sir John Middleton as Governor-General and Commander-in-Chief of Newfoundland in succession to Sir William Allardyce whose term has expired.

The University of Wisconsin, at Madison, gave recognition to the attainments of its most celebrated former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Fritz Von Opel's rocket car, the Rak-3, was wrecked but not until after it had attained a speed of 154 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visitor, Sir Offri Atta, blue-black potentate of Akim Abuakwa, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy to the amount of $100,000 on any aircraft piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year, as frontiers of civilization move forward, it is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled $112,762, compared with $130,7[illegible] in 1926. With the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Noises

The distance to which a man's voice will carry depends upon many different circumstances. The condition of the atmosphere is one: damp will slow down the sound-waves, while a dry, crisp air will forward them easily. Wind is another factor — so is the height of the speaker in regard to the number of objects, rocks and so on in front of him. The number of competing noises also has to be considered. Under ordinary circumstances few voices will carry intelligibly much over a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance, a voice will carry for over a mile. And a song as rendered from a mountain top, was once heard at a distance of four miles.

Question Of Relationship

In a recent court case at Toronto a nice question in relationships was propounded. The plaintiff, a woman, was testifying against a chauffeur. "Isn't he your brother-in-law?" she was asked by counsel. "Didn't you say he was?" "No. I said he was my husband's sister's husband's brother." The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor walks an average of 16 miles a day in the course of his duties, a shop assistant eight miles, a waiter 12 miles, and a tram conductor seven miles.

Raw recruits are probably so called because they are not accustomed to fire.

Mistress: "Is there anything we require from town?"

Maid: "Yes, the china will not last us over Sunday."—Kasper, Stockholm.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

New experiences awaited us the following day when as guests of the Port of London Authority we were taken to see something of what London's handling facilities are. It was not possible to see more than a small part, for the Port of London in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example the imports and exports passed through the port in 1926 totalled in value $2,500,000,000 and included [illegible],000 bushels of wheat. In the same year [illegible] tons net register of shipping entered and left the port. Walking through one set of showrooms, ten acres in extent we visited the Ivory Room where we were astounded to see a perfect specimen of pre-historic mammoth tusks 11 feet long weighing 163 pounds and having an estimated age of 50,000 years. In the State Room $[illegible] worth of pepper was stored and an interesting exhibit was a 28 lb. weight floating in a bath of mercury. The Wool Room which contained a number of bales of Canadian wool stores in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Iodine Room holding 20,000 small hide-bound kegs of iodine every one worth $500. The hide covering is necessary because of the rotting effect of iodine which destroys the wooden kegs in a comparatively short space of time.

But the thrill of the day came when we explored a portion of the Port's wine vaults. Before descending to the cellars we were handed oil torches fastened to the end of staves. Torches such as these have been used for 120 years. The temperature of the vaults never varies from 60 degrees, yet the only means of regulating it are incandescent lights, and the amount of sawdust on the floor. Fungus produced on the roof of the cellars by the fumes of the wine is a curious characteristic. In the brandy vaults this fungus is absent. Twenty-two thousand pipes of wine each worth $500 can be accommodated in these vaults which have twenty-eight miles of metal runways apart from the vast stores of spirits contained in other vaults not included in the day's itinerary.

Again in the open air we boarded a launch en route to the S.S. Minnewaska, where we were due to lunch as guests of the Port, under the chairmanship of Lord Ritchie of Dundee. The novelty of luncheon on this beautiful ship, surrounded by great liners from almost every country in the world made a deep impression. This was followed by a river trip back to London.

In the evening we were the guests of the Empire Marketing Board at dinner in the Hyde Park Hotel and had an opportunity of learning at first hand the valuable work being done by this organization to encourage the consumption of products produced within the Empire. The sum of five million dollars per year has been placed at its disposal by Parliament to further the marketing of Empire products. The Board is a non-party body and includes representatives of the Dominions and Colonies. Agricultural research is also an important phase of its work. The chairman, on the occasion of our visit, was Lord Lovat, the Under-Secretary of States for the Dominions, who told us something of the work of the Board, which was further explained by Sir Halford Mackinder, chairman of the Imperial Economic Committee.

The next day's programme provided one of the most interesting mornings of our stay in London. This was a visit to the Tower, a grim fortress which we entered with mixed feelings, for here and on Tower Hill perished some of the most renowned men and women of their day. Here the beautiful Anne Boleyn was beheaded; and here Lady Jane Grey saw the headless body of her husband carried past her on the morning when she knew that she was to die. In it Sir Thomas Moore, Archbishop Cranmer, Sir Walter Raleigh and the little Princes met their tragic fates, and though these things happened in the days gone by, one feels the Tower to be sinister still. Even in our own time was it not chosen as the place in which the spies in the Great War should meet their doom?

We were admitted by Yeoman of the Guard "Beefeaters" who still wear the quaint uniform which was adopted in the time of Henry VII. We were shown the Bloody Tower where the bones of the two murdered Princes were found and the room (reconstructed), in which Sir Walter Raleigh when a prisoner wrote his History of the World.

In the White Tower we saw the chamber in which Guy Fawkes and his fellow-conspirators were tortured in 1605. Here too were the apartments occupied by Queen Elizabeth when she herself was a prisoner in the Tower. We saw the block and execution axes, one of which has a nick in the blade where it struck the neck of a victim. And then, how close to our Canadian hearts it came, we saw the cloak on which Wolfe died on the Heights of Abraham.

Many quaint forms are still retained in the administration of the Tower. The gates are shut at night to the accompaniment of ancient ceremonial and after midnight no one may enter the precincts without giving the password.

In one of the strong rooms of the Tower there repose the Crown Jewels, including the crowns of King George and Queen Mary, a display of treasure which amazed us all.

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for a fortress. One of the most interesting features of the Tower is the portcullis, said to be the oldest one in existence in working order.

On our way to the Tower we stopped at St. Paul's Cathedral, Sir Christopher Wren's masterpiece, but, owing to the grouting operations on the piers which support the great dome, it was not possible to see its interior to advantage, most of it being boarded up and inaccessible. Thus, we did not see the crypt or enter the Whispering Gallery.

Nothing But the Best

Out-at-the-heels but still luxury-loving, Constantinople demands only the latest and newest models in automobiles. Some 11,000 second-hand cars are standing idle, waiting in vain for purchasers.

STALWART HEBRIDEANS

Three stalwart crofters, all over six feet in height, who left the Hebrides where they "scratch a bare living by tending sheep," to settle in Ontario. They reached Canada last week in high spirits. The picture shows some cabin boys comparing their stature with the settlers aboard the liner Letitia, on which the Hebrideans arrived in Canada.

Recipes For This Week

(By Betty Barclay)

FRIZZLED BEEF FOR HOT DAYS

Melt butter in hot frying pan, add dried beef, and stir until it browns and curls. Add more butter for cream sauce. Add flour and stir until well blended. Add milk gradually until desired consistency is obtained. Stir to avoid lumps.

Use the proportion of 2 tablespoons of flour to 1 cup of milk. If the dried beef is too salty, soak for 10 or 15 minutes in cold water, drain thoroughly and dry by parting between folds of clean, dry cloth. Have dry before adding to melted butter. Serve on toast if you wish.

ORANGE AND RHUBARB SAUCE

2 pounds rhubarb.
2 oranges.
1½ cups sugar.
1 tablespoon granulated gelatine.
1 tablespoon cold water.

Wash rhubarb, cut into inch pieces, peel oranges, removing membrane with peel, and cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and bake about one hour. Dissolve gelatine in cold water, add to rhubarb mixture, and when cool, fill individual pastry shells with sauce, and decorate with whipped cream, forced through pastry bag and rose tube.

Came From Many Lands

Common Vegetables Were Not Used Few Centuries Ago

Vegetables did not form part of a meal a few centuries ago, as they do today. In those days the dishes consisted mainly of flesh, fish or fowl.

Potatoes were introduced into England by Sir Walter Raleigh from Virginia, over 300 years ago. They did not, however, come into general use till the beginning of last century, when they were—very wisely always cooked in their skins.

The Romans knew the onion, turnip, cauliflower, and cabbage, to which last vegetable they ascribed the quality of preserving them from drunkenness.

Cucumbers are said to have originated in India, and were known to have been introduced into China 200 B.C.

The carrot came from Greece, and the English name is derived from a Greek word meaning "root."

SUNDAY SCHOOL LESSON

JULY 8

SAUL AND STEPHEN

Golden Text: "Be thou faithful unto death, and I will give thee a crown of life."—Revelations 2.10.

Lesson: Acts 7.54, 8.3; 22.3, 4, 19, 20; 26.4, 5, 9-11; Galatians 1.13, 14.

Devotional Reading: Psalm 116.12-19.

Explanations and Comments

Stephen's Arrest and Defense, Acts 6.8 to 7.56.—When the Greek speaking Jews who were temporarily or permanently staying in Jerusalem attempted to dispute with one of the leaders among the disciples of Jesus, they found this man, Stephen, more than a match for all their logic and religious philosophy. Their original hatred of him, as a man full of faith and of the Holy Spirit (Acts 6.5), and therefore full of grace and power, then turned into cunning malice. They resorted to calumny, raised up false witnesses against him, seized him and brought him before the Sanhedrin.

From Stephen's defense, 7.48, it is evident he had correctly taught that God could be worshiped not only in the temple, but everywhere. As was true with Jesus (Mark 14.58), Stephen's words were distorted by false witnesses; he was accused of teaching that Jesus of Nazareth would destroy the honored temple, and would change the revered Mosaic laws. Fearlessly, Stephen undertook his defense. Rehearsing the ancient history of Israel, he skilfully showed that God's revelation to His people had been progressive, that theirs was a spiritual religion, and that God had no need of an earthly temple. At first, apparently fascinated by the clarity and truth of his words, his hearers were silently attentive, but as they caught the drift of his argument they displayed signs of anger which Stephen could not fail to see.

If, before the coming of the violent end which he saw approaching, Stephen was to apply his words to his hearers he must speak quickly. "Ye do always resist the Holy Spirit," he cried boldly. "Of the Righteous One ye have become murderers!" At once they "were cut to the heart"; they "gnashed on him with their teeth," that is, only by a "brute-like grinding of their teeth" were they able to restrain their unreasoning rage. But he, still filled with the Holy Spirit, saw "the heavens opened" (a familiar Jewish figure of speech signifying one's insight into divine things) "and the Son of Man standing on the right hand of God"; and, in apparently utter disregard of the frenzied fury around him, he told of what he saw.

Alone a man can stand up for his right; but he must organize to find new rights to stand up for.—Oshawa Times.

Canada's Flying Clubs

Eleven Already Established and Ten More Being Organized

Hon. J. L. Ralston, Minister of National Defence, has opened the new flying field of the Granby Light Aeroplane Club, Granby, Que.

Canada now has 11 light aeroplane clubs, extending from Granby, Que., to Victoria, B.C., with ten others in process of formation. Fourteen Moth 'planes have already been allotted to these organizations by the Government under the conditions governing the issue of these machines. Additional to the Granby club, those already formed and with whom agreements have been signed by the Minister of National Defence are:

Montreal, Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.

Clubs in process of organization are located at:

Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peterboro, St. Catharines and Walkerville, Ont.

Alberta Act Invalid

Privy Council Upholds Ruling Of Supreme Court Of Canada

Both the appeal of the province of Alberta and the counter appeal of the Dominion of Canada from a Canada Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is a provincial or Dominion right were dismissed without costs by the judicial committee of the Privy Council. The case involved the validity of the Ultimate Heir Act of the legislature of Alberta.

The judgment of the Privy Council upholds a ruling of the Supreme Court of Canada that the Ultimate Heir Act of Alberta is invalid. The Act provides that where a person dies without legitimate heirs, certain of the property goes to the University of Alberta.

Receives Large Salary

Chief Harpooner Earned $33,000 In Nine Months' Whale Hunt

Few occupations tax the nerves of man more than whale hunting, but few occupations pay better. When the whale-hunting fleet recently returned from the Antarctic after a nine-months' cruise, the chief harpooner had earned a "normal" income of $33,000. In addition to this sum he had a contract granting him $20 for each whale he killed. During the nine months he killed 300 whale and his extra income amounted to $6,000. Hardly one man in a thousand may hope to be a really good harpooner. It is upon his ability that the result of the expedition largely depends, and though his profit may seem high, it is modest compared with the profit he brings to the expedition.

Changes Name Again

Peking Will Be Known As Peiping Meaning "Northern Peace"

The nationalist government political council has decided to change the name of the historic Manchu capital, Peking, to Peiping, meaning "Northern Peace."

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "it is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

Should Be Popular

Aerial tea parties every Friday afternoon throughout the summer have been arranged by the Imperial Airways, to enable Londoners and visitors to see the Metropolis from the air. A big 21-seater aeroplane will cruise above London for about 30 or 40 minutes, and tea will be served.

"Now, children, are you telling fairy stories?"

"No. We are discussing the divisibility of the atom and the statistics of bankruptcy!"—Lustige Kolner Zeitung, Cologne.

POPULARIZING THE ST. LAWRENCE ROUTE

The fast maiden voyage of the Canadian Pacific liner "Duchess of Bedford," just put into the service of the St. Lawrence route as the finest of a quartette of 20,000 ton Canadian Pacific steamers has called wide attention to the increased popularity of the St. Lawrence route.

In addition to the "Duchess of Bedford" three other "Duchesses" will shortly be commissioned and this fleet of Cabin Class steamers will constitute the largest ships to call at Montreal. Their time schedule is so arranged that it is now possible to breakfast in Liverpool on one Friday and in Montreal the following Friday—an unique service for the St. Lawrence.

Excellently appointed and furnished, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liner compare her accommodations very favorably with first class ships.

Six hundred feet long, two-funnelled, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. Sidders, R.N.R., whose 21 years in the service of the Canadian Pacific Steamships have taken him through the seven seas. He was formerly in command of the "Minnedosa" and "Montroyal," having been in charge of the latter vessel on several cruises through the West Indies—a feature to be repeated by the "Duchess of Bedford."

THE MERCURY, TOFIELD, ALBERTA.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

PAINTED FIRES

NELLIE L. McCLUNG

Copyright, Canada, 19[illegible]

CHAPTER XXVI.—Continued.

The next day Helmi went to the North Star Rooming House, walking wearily up the stairs to No. 19.

Mrs. Corbett opened the door to her as she had four months before, and again the anguish in the girl's face told its own story.

"My God! Helmi, is she dead?" asked Mrs. Corbett.

Helmi sat down before she answered.

"Is that all? Sure that's nothin'; every child takes scarlet fever. They're grand at the Isolation Hospital. I know big Miss Shaw up there, as grand a girl as ever went on rubber heels. Cheer up, Helmi, the little pet will be all right, please God. I thought the gypsies had stolen her by the look on your face, and I'm glad it's nothin' worse than scarlet fever."

"My man has gone to the war," said Helmi brokenly; "I saw him on the train. He did not see me—he does not care about me."

Mrs. Corbett paused. This was a harder complication than the illness of little Lili, and for a moment even this determined optimist was floored—but only for a moment.

"Well, sure, when he's there you know where he is, and it's noble of him to go, Helmi, remember that. Now here, dear, take a cup of tea. Yes you can; a person can always take a cup of tea, no matter who's gone, and it makes life look a little brighter. Drink it down, dear, and have another. You look better now. Don't get down to mourning, Helmi; there's nothin' happened yet that can't come right, remember that: and your darlin', blessed child with God's blessin', will come through the fever just the way we all did, and your man will come back again."

"But he doesn't want me any more. . . . I know now. The magistrate has turned him against me. I said I would kill that man, and I will."

"No, dear, no; you mustn't talk of killin' anyone. God will deal with the wicked in His own good time. You come with me to the Army and you'll find comfort in God's love. No killin', though, Helmi, that's bad. And see, dear, I was forgettin' there's two letters for you just came yesterday."

Helmi took them eagerly and opened one. "It's a mistake," she said, listlessly. "See, there's money in it. No one would send me money. It has been opened too, and sealed up again."

Mrs. Corbett took it out of her hand. "It's for you, right enough," she said; "here's your name on it. It's a separation allowance for fifteen dollars from Arthur Warner, Engle Mines."

"I do not know anyone called Arthur Warner," said Helmi.

"Well, he knows you, and that's better anyway, he wants you to have the money, and you're a fool if you don't take it. Read the other one—maybe it will tell."

Helmi opened it and read. It was the letter Jack had opened at Engle Mines. Helmi read it aloud to Mrs. Corbett. "I know now," she said. "He is a good man, that Mr. English. I will take the money—he means good by me."

"Sure he does," agreed Mrs. Corbett; "he seems like a good fellow, a good Englishman, and there's nothing finer in the world. Now Helmi, dear, I want you to lie down in Rosie's bed and have a good sleep, poor child. Now you'll be havin' trouble with your breasts, cuttin' off the baby so suddint, so I'll run in and borrow Mrs. Kalinski's breast pump—she's the grandest woman that for a neighbor, for she has everything from a boot-jack to curtain stretchers. You see in their business they get all sorts, and he gives her the run of the store—but have your sleep now, honey."

But Helmi's thoughts were not of sleep. She had a duty to perform, and which she had no desire to evade. One great purpose dominated her heart and cried aloud for fulfilment. The money which had come to her had made it possible. When Mrs. Corbett came back, Helmi was gone.

CHAPTER XXVII

Dr. St. John lay one evening on the chesterfield in his den, before a cheerful wood fire. Eva was entertaining her Wednesday night "Bridge," and tinkles of laughter, high-pitched and nervous, shot through the velvety murmurs of conversation.

The doctor had listened to such conversation many times, and knew the little razor-sharp points of antagonism it held and which seemed to pop out like needles from a squeezed pin-cushion, thin, sharp, unexpected, for the temper of the guests was uncertain. They had no community of purpose—they were pursuing no particular trend of thought, they were time killers, sensation hunters. He knew the very odor of the room—sachet powder, cigarette smoke, flesh of women too scantily clad, perfume heavy and exotic, a sweet smell, yet not wholesome—like good apples wanting air.

The doctor could see it all like a picture. The dark brown background, shot through here and there with little flashes of pale lightning that began in nothing and ended in nothing, led nowhere. Eva's friends met, chattered, parted, met again. No one wiser or better, more inspired to nobler living. They were doing nothing wrong—it was even worse than that, he thought—they were doing nothing.

The doctor recalled that it was Wednesday night. His mother always went to prayer-meeting on Wednesday night. How Eva would laugh if anyone mentioned prayer-meeting. And yet human nature was the same. But somehow it was getting off the track. His mother had spent years on a treadmill, her days laid out for her in regular lines. Work stared at her from morning till night, and she did it, and held her head above it all. She was always sweet-tempered, interesting, sympathetic, Eva having nothing to do, did nothing, and doing nothing, degenerated, grew shallow, selfish, cross-grained and hard.

In his struggling days Dr. St. John had dreamed of having a house like this and a wife who would help him by her sympathy and understanding. But something had spoiled his dream. He had the house and the practice, and some one to spend his money, but—.

In some ways he had been to blame—he had been too easy, indulgent and foolish. Eva and her friends laughed at him, he knew. The ease with which Eva was able to deceive him furnished many a good story for the lively company which sat the bridge tables.

It was when his mother came to visit him a year ago that the doctor began to see Eva as she was. He had tried to imagine what she would be like when she was as old as his mother, who at sixty-five was as alert and eager-minded as ever, doing many of the things she had wanted to do all her life. To Eva she was a puzzle. How could anyone get such joy from going to the New Year Rally of Sunday School Children? Or why did anyone get up early on Sunday morning to go for a walk? Eva's studied politeness toward his mother irritated him, and it was a relief when his mother went over to Miss Abbie's to finish her visit. So passed another dream. He had so often thought of what a pleasure it would be to have his mother visit him. She was such a good sport, his mother.

Another matter was weighing heavily on the doctor's mind. More surgeons were needed at the front. Why should he stay here at ease? Dr. Brown, his young partner was seriously considering the matter. Dr. Brown had a wife and children—a wife who loved him. Dr. Brown had said that he would go, he being the younger man. That did not matter. Dr. Brown was needed here more than he, who had no one depending on him. Eva would be happier without him so long as the money held out.

These thoughts occupied the doctor's mind as he lay listening to the commotion across the hall. The first year of their married life, when he began to see that Eva had no intention of entering into his life seriously, he was sorely hurt. He had had dreams of domestic happiness since he was sixteen, and it is the loss of a dream that hurts the most. Now he was still hurt, but he was critical. When criticism begins to fill the mind the tenderness of love is over.

(To Be Continued.)

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She is working out now in a store and walks three miles every morning and back in the evening."—Mrs. Mary Vance, 44 Lingan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—Mrs. Alfred Ouellette, Pinewood, Ontario.

Heart Not Automatic Pump

Simply Controls Flow Of Blood Says German Specialist

The heart is not an automatic pump sending blood to all parts of the body, as generally believed, says Dr. Mendelsohn, a famous heart specialist of Germany. The organ, he says, is simply a governor to control the orderly flow of the blood, this current being due to the constant outgo and intake of liquid caused by chemical action in the body cells. He further declared recently that the heart, a small muscle the size of a man's fist, "could not possibly be capable of driving the tenacious mass of blood through the entire body."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Eclectric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Most Sensitive Device

Valuable Information On Blood Circulation Gained Through "Geiger Counter"

The "Geiger Counter" is an exceptionally sensitive device which is able by means of ionization produced to count the electrons which may enter it from any cause. It may be attached to a loudspeaker of conventional type and a loud noise will be heard as each electron enters. A use of it almost as spectacular as the instrument itself has recently been made by Dr. H. C. Blumgart, of the Boston City Hospital. Dr. Blumgart injects an infinitesimal quantity of radio-active material into the arm of a patient, and with this counter traces the time for this material to be carried back to the heart and to the arm. He thus obtains valuable information on blood circulation.

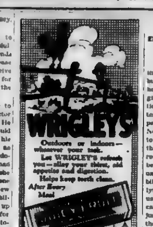
Had New System

Employer: "I trust you are not the kind of workman who drops his tools and runs when the whistle blows."

Applicant: "Oh, no sir, I always have my tools packed away long before the whistle blows."

An Old Superstition

Two persons who wash their hands in the same water, or who dry their hands on the same towel are likely to go begging together, Sussex folk will tell you; but in the north of England, they say to do this signifies a quarrel.



Take Census Of Animals

National Park At Jasper Teeming With Wild Life

A census has been taken of the wild animals in Jasper Park, which constitutes a sanctuary for wild life over 5,000 square miles in extent.

Park wardens have for some years periodically estimated the numbers of the large wild animals in Canada's national parks. Heading the list at Jasper Park, there are, according to approximate estimates, some 15,000 Rocky Mountain sheep, an equal number of mule deer, 5,000 to 6,000 caribou, 3,000 to 5,000 moose, 2,000 to 3,000 Rocky Mountain goats, 15,000 elk and 2,000 to 3,000 black, cinnamon and grizzly bears. For the smaller animals no figures are available, but there are large numbers of beaver, otter, fisher, marten, mink, muskrats and porcupines.

The wild life of Jasper Park is indicative of what may be found in the other great Canadian national parks of the Rockies, Banff, Yoho, Kootenay and Waterton. Together, they measure close to 10,000 square miles, an area of mountain scenery and protected wild life two-thirds as great as all Switzerland, and almost as large as Belgium.

Royal Air Force Band

Will Be Heard At Western Points During the Summer Months

The band of the Royal Air Force, now on a three months' tour of Canada and an engagement at the Canadian National Exhibition at Toronto, is the youngest among the first-class bodies of military musicians in Britain.

The band, under the leadership of Flight-Lieutenant Amers, will play for a week at the fairs at Brandon, Man., Calgary and Edmonton, Alta., Saskatoon and Regina, Sask., and for two weeks at the exhibition at Toronto, late in August. In the interval, between the western fairs and the opening of the Canadian National exhibition, the organization will give concerts at Victoria and Vancouver, B.C.; Seattle, Wash.; Lethbridge, Alta., and Winnipeg, Man., as well as other cities, and finally will reach Montreal and Quebec.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Little things frequently annoy a man—small boarding-house steaks, for instance.

Eczema Formed Painful Blisters Cuticura Healed

"Eczema started with a fine rash on my arms. Later it formed blisters about the size of a bean which were full of water and very painful. It burned and was so sore I could [illegible] touch it. The weight of a cup in my hand would fairly make me cry out with pain. I had my hands and arms tied up from the ends of my fingers to my shoulders. Sometimes it kept me awake for hours.

"A friend recommended Cuticura Soap and Ointment so I sent for a free sample. I purchased more, and in about three weeks I was healed." (Signed) Miss Emily B. Davis, R. R. 3, Northwood, Ont.

Keep your skin clear by using Cuticura Soap, Ointment and Talcum for daily toilet purposes. Touch pimples and itching, if any, with Cuticura Ointment, bathe with Cuticura Soap and hot water.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Believe It Or Not

Electric Light Burned Unseen In Scotland For Twenty-Two Years

How a light in an unknown room in a theatre at Glasgow, Scotland, burned unseen for 22 years, has just been reported. When electrical engineers were asked to give quotations on overhauling the lighting system a certain line of conduit disappeared in a wall, and the trail ended. Nearby was a locked door the key to which had been lost. No one from the manager to the call boy could remember that the door had ever been opened. It was forced. The unknown room had been used by billposters, and according to a poster lying there the place had not been used since 1906. A 16-candle-power carbon lamp was burning brightly just as it had evidently been left by the last occupant of the room. The report adds that when the manager estimated the cost of the wasted light off 40 watts for 22 years he fainted.

Arresting Decay In Wood

New Treatment Being Used May Make It Imperishable

A new tool has been invented for the purpose of giving logs a "hypodermic injection" to preserve them. This new scientific method is being used to inject into telegraph poles a spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life. This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished buildings of wood can be erected that will be as imperishable as structures of stone, brick, or steel while the cost will be much less. The effect will be that of transmuting wood into rock.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative but do not gripe. They are soothing, but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home and once a mother has used them, for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who says:—"I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTHACHE

As a child you may have thought a tooth solid right through just as a piece of ivory which it resembled.

Then one day you noticed that when something sweet got into the "hole" in a tooth, it hurt a little but this soon passed away.

So you kept "mum" for fear you would have to go to the dentist.

Until, one night you wakened your parents with crying and announced between sobs that your tooth was "hurting."

Now what had happened? Within each tooth is a chamber that is filled with soft tissue-blood vessels and nerves, and the decay which is a disease process had been steadily progressing towards the "inside" until the soft tissue had become infected by the disease bearing organisms.

Then nature had rushed to the defense to combat them by sending into the tooth a greater supply of blood, containing millions of little warriors called "Phagocytes". Some of these burst through the vessel walls to attack the organisms and with this increase of blood there was a swelling of the tissue, causing increased pressure on the nerve endings which signalled to headquarters, and so pain resulted.

And, just as in battle, as the fight wages, the wires grow hotter—so the nerves signalled more furiously, crying loudly, until by and by the fight was over and the wires cooled off and the pain was stilled and you were so glad that it was over, that you forgot to wonder how it stopped.

Little Helps For This Week

"His compassions fail not, they are new every morning."—Lamentations iii. 22, 23.

New every morning is the love
Our waking and uprising prove;
Through sleep and darkness safely brought,
Restored to life and power and thought.

New mercies each returning day
Hover around us while we pray,
New perils past, new sins forgiven,
New thoughts of God, new hopes of heaven.

—John Keble.

Each day, each week, each month, each year is a new chance given you by God. A new chance, a new leaf, a new life, this is the golden, the unspeakable gift which each new day offers to you.

—Frederic W. Farrar.

Two copies of every act of the British Parliament are printed on vellum. One endorsed with the royal assent, is kept among the rolls, the other goes to the record office.

Don't Make a Toy Out of Baby —Babies Have Nerves—

By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep, yet it contains no drugs or opiates. It is purely vegetable, the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

MAMMOTH PAGEANT AT EDMONTON EXHIBITION

The mammoth pageant at the Edmonton exhibition, July 16 to 21, depicting the ever-welcome stories of "Mother Goose and Cinderella," will be staged on a grand and lavish scale by a specially selected cast of [illegible] people with the support of a children's chorus of 200 voices. The tales of Mary, Mary, Quite Contrary, Red Riding Hood, Old King Cole, Little Bo-Peep, Little Boy Blue, Jack Spratt, Simple Simon, Old Mother Hubbard, Alice in Wonderland, Little Miss Muffet, The Old Woman Who Lived in a Shoe and Cinderella, will be represented in a truly fascinating manner.

Another stellar attraction on Thursday, July 19th, will be the Alberta Amateur Band Contest. Bands from [illegible], Camrose, [illegible], [illegible], Lacombe, Wetaskiwin, Cold Lake and Halkirk have entered to date and the contest will be judged by Flight Lieutenant Amers, leader of H.M. Royal Air Force Band, which will be the leading musical feature of the Exhibition, giving two performances daily in front of the Grand Stand.

The races this year will offer splendid fields of the fastest runners in Western Canada in a six day program of races. Platform attractions will include a fine series of vaudeville acts and a scintillating display of fireworks will be given each night, following the conclusion of the Grand Stand performance. Midway attractions will again be in the capable hands of Johnny J. Jones.

A horse shoe pitching tournament, starting Tuesday and concluding on Friday, is arousing great enthusiasm and a big team hitch demonstration on Tuesday morning, under the capable supervision of E. C. Hallam, of Oliver Farm, will be of much interest to all farmers.

A special railway rate of a fare and one-third for the round trip will be in force for the period of the exhibition from all stations in Alberta and Saskatchewan. Free camping space is provided for out-of-town visitors and particulars in this regard may be obtained from the exhibition office in the arena, Edmonton.

THE PATTON-NEWELL ARTISTS
Lowell Patton pianist and dramatic reader with Fenwick Newell, tenor.

CHAUTAUQUA NEXT ON THE LIST OF SUMMER ATTRACTIONS

Coming with what many people have declared to be the best program ever put on this Chautauqua [illegible] chautauqua organization will be here next Wednesday ready to give their first program. The two gentlemen in the top picture will present a program of exceptional merit. Mr. Fenwick Newell, we believe, has visited Tofield on a previous occasion and at that time delighted the audience with his singing. Mr. Patton is a reader of outstanding merit and together, they present a program that is well balanced.

The lower picture depicts a scene from the presentation "A Night in Hawaii." This is a character program of Hawaiian music and songs. The [illegible] effects of this program are very beautiful also, enough electricity being required that would be sufficient to light four or five Tofield stores.

Then there are combination lecture and musical programs, two plays, and several concert programs.

The Russian Cossack Chorus will be a musical treat as also will the Sheehan Concert Company. Among the lecturers, is Dr. Tehyi Hsieh, noted Chinese economist. This gentleman will be able to give a story of China such as few others can give it. China, Europe, South Africa, America has been lived in and studied by Dr. Hsieh, and he comes with a well filled mind of intensely interesting material to give out in his noted lecture.

Ticket selling is now under way and extra special effort is being made this year to put the 1928 chautauqua over without a deficit. President Chapman and Secretary Craig are working hard toward this end and all will wish them every success.

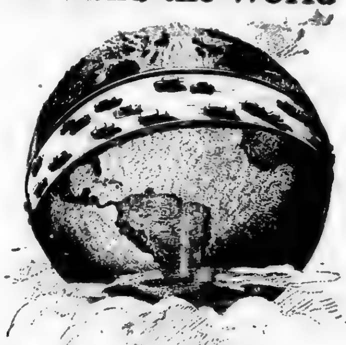
125 Times Around the World



IN pursuing its policy of consistent progress—in its continual search for new ideas . . . in its constant development of better cars . . . General Motors not only maintains its great International Research Laboratories and hundreds of skilled engineers, but also operates the first, largest and most completely equipped automobile proving ground in the world.

Here, on the vast fourteen-hundred-acre tract of the General Motors International Proving Ground, every type of road is duplicated, every condition of driving is reproduced. Here all makes of General Motors cars are constantly being subjected to the most searching tests. Here every principle developed by General Motors engineers is put to proof . . . every detail of each test car's performance carefully and closely checked. Here years of normal use are crowded into a few months of continuous, gruelling operation.

A typical example is offered by Chevrolet. Since the opening of the General Motors Proving Ground, Chevrolet cars alone have piled up over three million miles of testing . . . a distance equal to 125 times around the world.

In the countless millions of miles that General Motors cars have covered on the General Motors Proving Ground, there has been one great purpose kept in view . . . to improve, by constant testing, the quality and worth of every General Motors product.

Every Canadian buyer of a General Motors car gets a car built in Canada by Canadians to meet Canadian conditions of road and climate . . . a better car and a greater value because General Motors uses so freely and unsparingly its unequalled facilities for testing and research . . .

With better General Motors cars at the end of the journey, millions of miles is not too far to go.

Cream Shippers
This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.
If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

INGRAM SCHOOL PICNIC

A very enjoyable afternoon was spent at the Ingram School on Friday, June 29 when Miss Thomson gave a picnic for the children.

The visitors were Mrs. Cookson, Mrs. Sandborn, the Misses Mable Thomson, Esther and Estella [illegible]. About noon the little group gathered in a shaded plot on a neighboring farm where they enriched a table on the grass. A dainty lunch and refreshments were served which everyone did full justice to. A special cake was made to honor the occasion and was decorated with the name of the school, the date it was built 1916 and the present date.

After lunch the time was spent on races of all kinds, jumping contests and etc. Prizes were awarded by the trustees for all who won races. There were also prizes given for good conduct, Bertha Gladue; improvement in writing, Verna McIsaac; and highest percentage for the year's work, Thora Haugen.

About two o'clock all joined in and stirred up old memories by singing, "Hookey" and "School Days." After wishing one another and their teacher a pleasant vacation, the children departed for home.

NEW BANK MANAGER

Mr. C. H. Rowe, who from 1918 until 1920 was the manager of the Merchants Bank of Canada in Tofield, is returning to this community to take charge of what is now the local branch of the Bank of Montreal. Mr Rowe left Tofield early in 1920 to take charge of the Merchants Bank branch at Wainwright, and after that Bank was taken over by the Bank of Montreal he continued there for a time and was then transferred to the management of the Trochu branch, which position he has held until his present appointment. Mr. J. A. Constantine, whom he succeeds at Tofield, has been promoted to the management of the Drumheller branch.

"When you were in Europe did you see the Rock of Gibraltar?" "Yes, but it is not what it used to be." "Huh?" "No, the insurance ad was gone."
—Cornel Widow

SMOOTH WORK

A fashionable lady went into a store and made a $10.00 deposit on an expensive fur coat giving orders for it to be sent to her home at such an address, when the balance would be paid. In due course the coat was delivered. In response to the deliveryman's knock a head was put out the door and the lady stated that she was not dressed but to hand the coat in and if it were satisfactory she would hand over the money. The coat passed through the door, which was then closed. After waiting for some time the deliveryman endeavoured to let the occupants know that he was still on the outside. Not obtaining any response he notified the police. A search was made and the house found to be entirely empty. Inquiries solicited information that the lady had secured the house by making a $15.00 deposit on account of rent. Nothing was ever subsequently heard of her. Rather an inexpensive way of getting a coat worth several hundred dollars.

There are Two Sides to this Story

MOST people think of their Chevrolet dealer as a NEW-CAR dealer . . partly because of the large number of new Chevrolets which they see on the streets.
But, while new car sales are the Chevrolet dealer's biggest reason for being in business, they form only one side of his activities. He must not only sell cars but he must also exchange them.
Every good, successful Chevrolet dealer must also be a good, successful Used Car dealer.
From his experience in selling Chevrolet cars, he knows motor-car values . . . He knows that it is just as important for him to sell a Used Car as a new car . . He knows that Used Car buyers have a right to as much for their dollar and are entitled to as complete satisfaction as new car buyers . . He knows that satisfied Used Car owners will eventually become prospects for new cars . . He knows the value of good-will.
In short, our business as Chevrolet dealers depends on our reputation as used car dealers. That is why you are sure of a square deal and a sound dollar-for-dollar value, when you buy a used car here

Big Features found in no other Low-Priced Six
AMONG the scores of advanced engineering features that contribute to the impressive quality of the New Series Pontiac Six, there are three advancements worthy of special notice . . three important features found in no other six at Pontiac price.
First, the New Series Pontiac Six offers the smart styling, the luxurious comfort, the rich appointments and the staunch construction of bodies by Fisher.
Second, the New Series Pontiac Six engine embodies the new G.M.R. (General Motors Research) cylinder head, which uses ordinary gasoline to achieve amazing smoothness and silence with economy of operation.
Third, Lovejoy Hydraulic Shock Absorbers, standard equipment on the New Series Pontiac Six, provide an ease of riding that makes the roughest roads seem smooth.
Here are three big features that no buyer of a six in Pontiac's price class can afford to overlook. Even if the New Series Pontiac Six offered no other exclusive advantages, it would still hold its position as the world's finest low-priced six.
Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the bitter experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations,—the very country in which the idea originated,—came as a rude shock to all lovers and advocates of peace. It discouraged Europe, reawakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on gaining new adherents, and, with each succeeding success in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Charta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind;

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czecho-Slovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at (——————).

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at (——————), and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties hereto."

That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No loopholes are left, and should any nation signing this treaty ever again resort to war it would become as never before, an outlaw among the nations.

Substitutes Cards For Pistol

Affair Of Honor In Czecho-Slovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czecho-Slovakia, judging by the method adopted by a business man ...

"Why not settle the affair at cards?" another man suggested. The men agreed, and sat down at the card-table to play for a stake of $1,500. The business man won.

MINARD'S "KING OF PAIN" LINIMENT

URGE WHOLESALE SOCIETY TO COVER ALL OF CANADA

Lloydminster, Sask.—By a unanimous vote the congress of the Co-operative Union of Canada in session here, went on record as being of the opinion that the time had arrived for the establishment of a wholesale society covering the whole of Canada. ...

Another resolution was approved, providing for the appointment of a committee to investigate the practicability from the view point of economics, of a Canada-wide wholesale society, an organization for the three prairie provinces only, as well as other factors having a direct bearing on the whole question of consumers' co-operation.

BARDO

The Bardo and Grand Forks school closed a successful years work on Friday. The Misses Carey Brecken and Betsy Ness have gone to attend Summer School at Edmonton. Miss Myrtle Rude is in Edmonton helping to mark grade eight papers. Miss Mable Jevning is spending a few days with friends in the city

The meetings held in the Mennonite Church last week were well attended and full of interest. The congregation Sunday morning numbered 227. Prof. Yoder went from here to Carstairs where the yearly conference is now in session. Six or seven cars went from here

There was a family reunion at the Jake Yoder home on Tuesday evening when about fifty were present. Ice cream and other good things were enjoyed.

On Saturday afternoon the Misses Borghild, Foshaug, Betsy Ness, Carey Brecken and Anna Jevning, sponsored a pre-nuptial shower for Miss Sigred Eggen, at the Foshaug home. About 29 guests were present. The bride to be received many beautiful and useful presents. The girls served a lunch of ice cream and other dainties.

Andrew Hillrude and his sister from Oregon who are visiting relatives and friends here and at Ryley, were given a surprise party at the Hillrude home on Sunday afternoon. Those from here who attended were the Rude, Steen, Jacobson, Finseth and Kindiey families and Mrs. Eg-

The Jacobson family and all the Rude children were dinner guests in the C. J. Rude home on Sunday.

Announcement has been received here of the marriage, on Sunday, June 24th, of Mr. Harold Kent Lewis (Formerly of Tofield and Bardo, and Miss Dorotha Mabel Jackson in the M.E. church at Gresham, Oregon. Harold's many friends here extend congratulations.

Mr. Will Stauffer is building a new house.

RABBITS FOR SALE.—A quantity of purebred Chinchilla rabbits, about four months old. Suitable for breeding purposes.—Apply to E. H. Hopgood, Tofield. 24p

LINDBROOK

Congratulations to Mr. and Mrs. Bailey jr., on the birth of twin boys last week. Both mother and babies are doing fine and the boys as fine a pair as can be seen.

The stork also visited the home of Mr. and Mrs. Norman Ellis last week leaving a boy, both mother and baby are doing well. Will see you later for the cigar, Norman!

Mr. Elmer Lindberg took an auto trip to Calgary with his friends the Anderson's who were amongst Lindbrook's first settlers.

Mr. A. Gill and family and Mr. H. Stine and family are on a motor trip to Banff via Calgary, this week.

Miss I. Wilde left for B.C. and her sister Miss M. Wilde arrived here last week to take her place on the farm here.

Mr. Fred Wilde is breaking on section one for Mr. Donald McCowan.

THE TOFIELD MERCURY

Vol. X., No. 22 Wednesday, July 11th, 1928 $1.50 Per Year. To U.S. $2.00

The Misses Annie Swift, Margaret McCauley and Ruth McLoughlin returned home from the camp at Fallis on Thursday morning.

Robt. McGuire visited Edmonton over the week end. His brother Edward accompanied him on his return to Tofield.

Mr. J. D. Hannan returned home on Sunday after conducting a sale of school lands in the southern part of the province.

The second annual church parade of the 49th Battalion Association will be held in Edmonton on Sunday July 22nd. The parade will assemble at the memorial hall at 10:00 a.m.

The tennis court at the C.N.R. station is a very popular place these summer days. Very conveniently located, it is generally occupied even during day time, while in the evening it is never vacant.

Mr. Skitch of the Alberta Government Telephone staff is now on holidays.

Miss Marion Forman left on Wednesday evening for Vancouver and Victoria.

The Snell children left this week for a visit with their grandmother, Mrs. Martz of Duhamel.

Mrs. Constantine left for Drumheller by way of Edmonton on Monday.

Miss Ruth Paridis, who is staying with Mrs. Sinclair of Edmonton, was home for the sports day.

Mr. Alfred Lane motored from Los Angeles and is visiting his sister, Mrs. E. Googin.

Geo. Agnew visited the City on Wednesday. George has just recently returned from a trip to the Pacific coast.

LOCAL and PERSONAL

Miss Hazel Moore of Jarrow is visiting at the Lovell home.

Miss Gladys Hagues of Wainwright is visiting Miss Rita Burnett.

Miss Olive Olsen is visiting at Burnett's during chautauqua.

Mr. and Mrs. Hubbard of Portland, Oregon is visiting at the Jacob home.

W. H. Worton spent a few days in Hay Lakes on business this week.

Mrs. E. Hicks and Mrs. Barden visited Provost this week.

Mrs. J. Carver is visiting Mrs. Carver sr., of Edmonton.

Mr. Spence is relieving at the C. N.R. depot during vacation period.

Mr. McMahon of Stettler is relieving at the bank.

Miss Alice Paridis, who is teaching at Clyde is home for the holidays.

Dr. Johnson left for Provost today, where he will practice. Dr. Law returned yesterday.

Mrs. W. Wallis of Edmonton is visiting at the Wallis home here this week.

The Mercury was in error when it made the announcement of the car parade awards last week. E. Rogers' car and not that of A. B. Clutterham, was awarded a prize.

Miss Napier and Miss Noland returned from the coast on Sunday evening. Mrs. Noland, who accompanied them on the outward journey, is staying longer.

Mr. A. B. Evenson left on Thursday morning for Stony Plain, where he will visit relatives for a day or so; he will go from there to Calgary, and then on to his home near Manyberries.

Mr. A. B. Evenson, who has been teaching at Tofield for the past three years has resigned and expects to attend university this coming term. Mr. Hughie Landie has been engaged in his place.

Mrs. Roberts and daughter, and Mr. Robt. Wagmore, of Calgary, visited at the Wallis home last week. They left on Friday for Edmonton, enroute to Calgary, where Mr. Wagmore will ride in the Calgary stampede being held at Calgary this week. Mr. Wagmore also takes part in a number of western pictures.

WEDDING OF LOCAL INTEREST

Yauch—Wiggins

A very pretty but quiet wedding was solemnized at the home of Mr. and Mrs. J. H. Mills, Olds, Alberta, on Saturday, June 30th, when their neice, Mariam Jeanetta, daughter of the Rev. M. E. Wiggins and the late Mrs. Wiggins, became the bride of Mr. Charles Edward Yauch, B.S.A., eldest son of Mr. and Mrs. Willis Yauch of Olds.

The ceremony, which was performed by the bride's father, assisted by Rev. T. R. Armstrong, took place under a tastefully arranged arch of white, peach-coral and robin's egg blue.

The bride, who entered the room on the arm of her father to the strains of Mendelssohn's wedding march, played by Miss Elsie Stock, looked charming in a period gown of robin's egg blue georgette over pink crepe-de-chine. Her bouquet was of Madame Butterfly roses.

Miss Harriet Peterson of Rosetown Saskatchewan, who acted as bridesmaid, was lovely in a gown of peach-coral georgette. She carried pink carnations and mauve sweet peas.

Mr. Edward Phillips, B.S.A., of the Olds School of Agriculture, supported the groom.

Little Marion Swingle in a dress of Nile green organdie and carrying a basket of sweet peas, made a dainty flower girl.

During the signing of the register, the bride's sister, Mrs. Orvin Swingle sang "At Dawning." Later Miss Stock rendered "O Promise Me."

After a buffet luncheon, the bridal couple left on an extended motor trip through the mountains. Upon their return they will reside in Olds, where Mr. Yauch is a member of the staff of the Olds School of Agriculture.—Calgary Albertan.

Editor's Note.—Many of our readers will remember Miss Mariam Wiggins, who lived at Tofield with her parents, the Rev. Wiggins being pastor of the Methodist Church at Tofield, leaving here in 1918.

HAROLD LEWIS WEDS

Lewis—Jackson

An attractive wedding took place at the Methodist Episcopal church, Gresham, Oregon, recently, when in the presence of 125 guests, Miss Mabel Jackson, daughter of Mr. and Mrs. C. E. Jackson, became the bride of Harold Lewis, the Rev. H. V. Wilhelm officiating by use of the impressive ring ceremony.

The altar rail was twined with woodland greenery, while the fernery filled with mock orange blossoms, and baskets of roses, formed a fitting background for the picture.

Preceding the ceremony George Mason sang, "Until" and "I Love You Truly", accompanied at the piano by Miss Dorothy Cooper.

To the strains of the "Bridal Chorus" from Lohengrin, played by Miss Cooper on the organ, the bridal party entered, the bride on the arm of her father who gave her in marriage. The bride was preceded by her bridesmaid, Miss Fern Lewis, a sister of the groom. Stafford Dowsett attended the groom as best man. The ushers were Edward Weatherill of Portland and Horace Wihlon.

The bride was dainty in a frock of rose beige flat crepe, lace-trimmed, with picture hat of the same shade. She carried a bridal bouquet of pink roses and white sweet peas. Her bridesmaid wore a gown of yellow georgette and a picture hat to match, and carried an arm bouquet of roses and sweet peas.

Following the ceremony a reception was held on the lawn at the home of the bride's parents.

The newly wedded pair left for a brief motor trip to Rainier National Park and the sound cities.

Both young people are held in the highest regard by a host of friends who are united in best wishes for their future happiness.

Editor's Note.—Many will remember Harold Lewis who lived at Tofield for a number of years, and will wish him and his life's partner, all the good things that life holds forth.

KINGMAN

Mr. and Mrs. Oscar Thompson and family, and Mrs. George Welch, spent last week at Cold Lake.

Lily Erickson arrived home from Edmonton last week, to spend the holidays.

Miss Gladys Horte is spending a couple of weeks holiday with Miss Ina Lofgren of Hay Lakes. Miss Vivian Horte is visiting with her aunt and uncle, Mr. and Mrs. George Qually, of Hughenden.

Miss Dorphy Thompson is visiting in Edmonton with her cousin, Miss Dorphy Scramstead.

Einor Hogland left for Grande Prairie on Wednesday.

The Horte, Rogness and Melvik families spent Sunday in Camrose.

Miss Lillian Lindberg visited on Sunday with her friend, Miss Viola Erickson, of Armena.

T. J. Rogness left for Winnipeg on Wednesday to attend the Norse celebration on Wednesday.

Mrs. A. Asp and family of New Norway, arrived here on Tuesday to join Mr. Asp, who has been manager of the U.G.G. elevator for the last four months.

KETCHAMOOT

July 9th.

Everything was ready for the picnic which was to be held on the fourth of July, when early in the morning it started to rain, it was then postponed until Thursday but still it continued to rain until Friday, which was very discouraging owing to having the ice cream on hand which had to be shipped back meaning quite a loss to the M.A.S. However, the rain did a lot of good to the crops and we have had so many successful picnics we can stand one disappointment.

Mr. and Mrs. J. Younie and family and Mr. and Mrs. D. H. Mitchell came down from the city the latter part of last week for a few days visit with relatives.

Miss Margaret Mitchell returned home on Monday after spending a week of her holidays with relatives in Edmonton.

Mr. and Mrs. A. McMullen visited at the Hull home after services on Sunday.

Miss Marjorie Lee is home for her vacation after a years term of school near Wainwright.

We regret losing one of the Holland families. They left last week for Ontario.

Miss Annie Bruhs of Shonts visited a few days with her sister, Mrs. Henry McGinitie.

The Misses Irene Rude and Hazel Sears are spending a few days of their holidays in Edmonton; also visiting friends outside the city.

Miss F. Fawcett visited friends a few days in Edmonton last week.

Mr. Martin Lawson went to Coronation on the first of July and was pitcher for the ball team.

Mrs. Ernest Brick and little son of Edmonton spent a few days the first of the week at the J. H. Ingram home.

Messrs. Angus Mitchell and Clinton Blake left last week for the Peace River district.

Miss Hilda Nomeland is clerking two weeks in a store at New Norway, after which she expects to spend the rest of the summer at the home of her parents.

Mr. Charley Nashman our Syrian neighbor returned home last week, after spending two years at his old home in Syria. He was accompanied back with a wife and little baby.

Mr. and Mrs. Geo. Lawson, daughter Edna and son Martin and Mr. Harold Smith were guests of Mr. and Mrs. Herman Lawson on Sunday afternoon.

Miss Wierenga of Tofield, recently of Holland is assisting Mrs. Sam Stirrit with the work in the house.

Mr. and Mrs. Wesley Ingram were Sunday guests of Mr. and Mrs. J. H. Ingram.

The Wm. Lee family are building an addition on to their house.

Misses Mabel and Mildred Lawson left on Saturday, June 30th for a trip to Flint, Michigan, their old home and also visit their brother Milford and other relatives.

Don't forget the dance in Kingman on Friday, July 13th. Music by the Hay Lakes orchestra.

BARDO

A number of relatives from Grand Prairie came last week to attend the Johnson—Eggen wedding. They were the John Johnson family, (Mrs. Johnson is a sister of the bride) Ralph Johnson, brother of the groom, a sister, Mrs. Meyard and her little daughter and Mrs. Wekved, a niece. The marriage will be solemnized at the Lutheran Church at noon, July 11th. Mrs. Brecken entertained the Johnson and Eggen families on Sunday.

Those from here who attended the conference at Carstairs returned home on Friday evening.

The little daughter of Mrs. Nora Stauffer was sick and under the doctor's care last week, but is better. Mahlon Bender who has been on the sick list is able to be up again.

Mr. Lovell of Tofield was a Bardo caller on Sunday.

The Iver Moen family and Mr. Moen's cousin and the Finseth family were guests in the C. J. Rude home on Sunday.

This being Camrose week, the Bennie Anderson family, Clarence and Nora Rude and Miss Foshaug, were among those from here who attended the services there on Sunday. Martin Hagen also attended.

Miss Irene Rude is spending a few days with Miss Margaret McGregan at Cardiff.

Mr. Martin Eide left on Tuesday evening for Grande Prairie for a two week's visit with his children.

Mr. and Mrs. Ruben Eide and Arthur Moen, who were overtaken by the heavy rainstorm on Sunday evening, spent the night at J. Jacobson's.

Robert Barrecloth accompanied by Joe Eide and Axtel Prestbekmo motored to Banff the last of the week for a two weeks vacation.

There was a Tofield reunion at the F. Lewis home in Gresham, Ore., a short time ago. Quite a large number of those from Tofield were present.

WORLD HAPPENINGS BRIEFLY TOLD

Royal Canadian Mounted Police in all parts of Saskatchewan are carrying on a vigorous campaign to remove firearms from the possession of Indians.

The International peace congress at Warsaw ended its session by strongly emphasizing the conference's appreciation of the Kellogg proposal to outlaw war.

Minister shipping in Manitoba for the first six months of this year reached a record-breaking figure, according to the monthly statement of the Federal Bonding Institute.

His Majesty King George is quite fit for Abergeldie Castle which he and his two predecessors King Edward and Queen Victoria have used for so long for an annual sojourn.

A. H. Gee Smith, the prominent young Canadian scientist of Toronto and Yale universities has been appointed assistant professor in the University of California. Dr Gee is only in his middle twenties.

Negotiations for an organization of the Marconi and Eastern Telegraph Companies are reported to be coming to a head and an announcement is expected shortly if it understood. The negotiations include the government wireless system.

We passed through both Houses. The House of Lords is much more like than the House of Commons. At the end are the thrones of the King and Queen. The throne on the right is that of the Prince of Wales in the Commons' seats are shown the Speaker's chair, the places occupied by Mr Baldwin, Mr Churchill, Mr. Ramsay MacDonald, Mr Lloyd George and other Front Bench men of the day.

Westminster Hall, dating from William Rufus, is another historic memorable as having been the scene of the trials of Sir William Wallace, Charles I, Warren Hastings, and the Seven Bishops. There are many plates marking the spot where the famous trials took place, and also where the bodies of Edward VII. and William Ewart Gladstone lay in state.

There is no nobler building, nor one that visitors from Overseas could be more to see than Westminster Abbey. It is built in the form of a cross, 512 feet in length and 200 feet wide across the transepts. Every English King since Harold has been crowned in Westminster Abbey. The mortal remains of kings, soldiers, sailors statesmen poets and literary men of England lie there. Among the objects in the Baptistry is the stone over the grave of the Unknown Warrior. The coffin mold is said to be brought from the battlefields.

The beauty of the Abbey, as is also then its historical associations, filled us with wonder and awe. The tomb of Henry VIII., forming the eastern wall, is the finest example of the work of the Tudor Gothic style of architecture. A superb fan-tracery ceiling, full of matchless beauty is its crowning glory. Within the Abbey is the Lady Chapter House, an octagonal room of noble proportions. The House of Commons was here more than 500 years ago. Near the Chapter House is the Chapel of the Pyx with the seven-locked door where the King's treasure used to be kept, and on the door human skin still remains. The most gruesome evidence of the days when torture was used to get the truth is here.

In the Chapel of Edward the Confessor we saw the Coronation Chair and Stone of Scone, said to have been the Coronation Stone of the Scottish kings from time immemorial and first carried off by Edward I. in 1297. There is the tomb of this King and Queen in this chapel and the sanctuary of Edward the Confessor, erected by Henry III. in 1269, originally a golden shrine decorated with jewels and golden images of the saints. Queen Plasmath and her sister Mary lie side by side in the north aisle of the Henry VII. Chapel.

Little did we think as we gazed at the tombs of the Tudors that we returned from Denmark, there would be brought into the Abbey the body of the Empire's best beloved soldier or that as finished we should be by our humble tribute on his tomb!

Our four days' itinerary in London completed, we left in the evening for Paris, there to entrain on the morning's flight. I found it pronounced marvellously well. Regarded as "Festival" Agent irritable tactics used on her in this epic feat of epic and epoch-making. It had a perfect crossing every way usually rutted North Sea. No time was lost at Aalsberg, for before 11 p.m. we were in our pullmans bound en route for Copenhagen, most of us too sleepy to hear the train move on and off the rail ferries as we crossed the Great and Little Belts which interrupt the journey by night a.m. we were settled in our new quarters, the Hotel Cosmopolite, making that space of adventure which seems inseparable from a foreign land.

Had we did not feel foreign long in Denmark. The keenness and dryness of the air reminded us of Western Canada. Here too was a merry, arm people who appreciated stoves! Nevertheless we were not prepared for the welcome, the brotherly welcome, Sir Hughes Hallett, secretary of the General Agricultural Council, Mr. Hansen, the Council's behalf, were for the French discussion on Danish agriculture which took place followed, to our astonishment, by the presentation of a wealth of statistics on every department of Danish agriculture. But the frankness and gentlemanly of this proceeding were explained. "We are today looking forward to a still keener competition on the world market, but being, as we are, descendants of the old Vikings, we are looking for the

"Have you a book called How to Fight the Increasing Cost of Living?"

"Yes, but it has gone up in price."—Pele Mele, Paris.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

Before leaving for Denmark it was our privilege to lay upon the base of the Cenotaph, in Whitehall, a wreath of poppies in tribute to the Empire's Glorious Dead. We met briefly with Honorgards Avenue of the Commonwealth, and Mr. Amery, Secretary of State. The latter used the occasion of every Premier and was ratified by Mr William Duff of Regina, Manitoba, and Mr. J. F. Augustine of Alberta, visitors during both of whom had been on the war. Mr Amery then laid it at the feet of the men who we stood bare-headed and in silence. This was our second pre-war duty, for yesterday took the memory of which, whatever else in life may be forgotten, can never fade.

We had time for a call at Ottawa House and Westminster Abbey. One of the most striking features of the beautiful Parliament buildings is the tower. The Victoria Tower above the royal entrance is said to be the highest square tower in existence. The site of the Houses of Commons was occupied by an ancient palace which from Edward the Confessor to Henry VIII was the chief London residence of the reigning sovereigns. The present buildings are from between 1840 and 1852 and cost $15,000,000. They cover eight acres and contain 1,100 rooms and two miles of passages.

We passed through both Houses. The House of Lords is much more like than the House of Commons. At the end are the thrones of the King and Queen. The throne on the right is that of the Prince of Wales in the Commons' seats are shown the Speaker's chair, the places occupied by Mr Baldwin, Mr Churchill, Mr. Ramsay MacDonald, Mr Lloyd George and other Front Bench men of the day.

Westminster Hall, dating from William Rufus, is another historic memorable as having been the scene of the trials of Sir William Wallace, Charles I, Warren Hastings, and the Seven Bishops. There are many plates marking the spot where the famous trials took place, and also where the bodies of Edward VII. and William Ewart Gladstone lay in state.

There is no nobler building, nor one that visitors from Overseas could be more to see than Westminster Abbey. It is built in the form of a cross, 512 feet in length and 200 feet wide across the transepts. Every English King since Harold has been crowned in Westminster Abbey. The mortal remains of kings, soldiers, sailors statesmen poets and literary men of England lie there. Among the objects in the Baptistry is the stone over the grave of the Unknown Warrior. The coffin mold is said to be brought from the battlefields.

The beauty of the Abbey, as is also then its historical associations, filled us with wonder and awe. The tomb of Henry VIII., forming the eastern wall, is the finest example of the work of the Tudor Gothic style of architecture. A superb fan-tracery ceiling, full of matchless beauty is its crowning glory. Within the Abbey is the Lady Chapter House, an octagonal room of noble proportions. The House of Commons was here more than 500 years ago. Near the Chapter House is the Chapel of the Pyx with the seven-locked door where the King's treasure used to be kept, and on the door human skin still remains. The most gruesome evidence of the days when torture was used to get the truth is here.

In the Chapel of Edward the Confessor we saw the Coronation Chair and Stone of Scone, said to have been the Coronation Stone of the Scottish kings from time immemorial and first carried off by Edward I. in 1297. There is the tomb of this King and Queen in this chapel and the sanctuary of Edward the Confessor, erected by Henry III. in 1269, originally a golden shrine decorated with jewels and golden images of the saints. Queen Plasmath and her sister Mary lie side by side in the north aisle of the Henry VII. Chapel.

Little did we think as we gazed at the tombs of the Tudors that we returned from Denmark, there would be brought into the Abbey the body of the Empire's best beloved soldier or that as finished we should be by our humble tribute on his tomb!

Our four days' itinerary in London completed, we left in the evening for Paris, there to entrain on the morning flight. I found it pronounced marvellously well. Regarded as "Festival" Agent irritable tactics used on her in this epic feat of epic and epoch-making. It had a perfect crossing every way usually rutted North Sea. No time was lost at Aalsberg, for before 11 p.m. we were in our pullmans bound en route for Copenhagen, most of us too sleepy to hear the train move on and off the rail ferries as we crossed the Great and Little Belts which interrupt the journey by night a.m. we were settled in our new quarters, the Hotel Cosmopolite, making that space of adventure which seems inseparable from a foreign land.

Had we did not feel foreign long in Denmark. The keenness and dryness of the air reminded us of Western Canada. Here too was a merry, arm people who appreciated stoves! Nevertheless we were not prepared for the welcome, the brotherly welcome, Sir Hughes Hallett, secretary of the General Agricultural Council, Mr. Hansen, the Council's behalf, were for the French discussion on Danish agriculture which took place followed, to our astonishment, by the presentation of a wealth of statistics on every department of Danish agriculture. But the frankness and gentlemanly of this proceeding were explained. "We are today looking forward to a still keener competition on the world market, but being, as we are, descendants of the old Vikings, we are looking for the

PRINCESS ELIZABETH

Britain's most popular little lady Princess Elizabeth, daughter of their Royal Highnesses the Duke and Duchess of York.

Northern Patrol

Mounted Police To Patrol the Arctic in Special Cruiser

Canada's "Far North," that long stretch of hinterland served by the Mackenzie River and the western Arctic, is to have this year a fascinating detachment of ten men of the Royal Canadian Mounted Police, including a wireless operator, for patrol and other work in northern waters.

Their home will be a 95 foot seagoing auxiliary schooner with 150-horsepower engines and a cruising speed of eight knots an hour.

The boat, which has been named "St. Roch," w.s completed in May and will have Vancouver for her home school island, headquarters of the Mounted Police in the western Arctic. She will carry provisions for the island as well as equipment for her crew.

Wool Lower Fares For Harvesters

Ask Special Rates As a Means Of Providing Help Where Needed

Special railway rates between inter-provincial points as a means of providing a more fluid harvest labor supply in the West was advised at a conference in Winnipeg of United Farmers of Manitoba, the Federal Government employment service, the Board of Trade and the Provincial Government.

Further recommendation was that the railways grant reduced fares to rail tickets so that the labor supply could step off in Manitoba and later proceed to Alberta and Saskatchewan, where the harvest is later.

Standard Grades For Honey

The Canadian Government is engaged in plans for establishing standard grades for honey. Exports of Canadian honey have increased 200 per cent. in four years and now amount to over one and a half million pounds annually.

DELEGATION OF ROTARIANS

Here is the largest delegation of Rotarians ever to have Europe for the North American continent, and who chose to travel by the St. Lawrence route and through Canada to attend the 19th Rotary International Convention at Minneapolis. There were 350 in the party, and they represented 16 nations. Inset is Capt. E. F. Dunmore, commander of the White Star liner "Alberic," holding a Chinn Rotary wheel presented to him by Rotarians from Cancho-Sirvalda, as a memento of the voyage. The photograph was taken on Alberic on which the delegation travelled.

SUNDAY SCHOOL LESSON

JULY 15

THE CONVERSION OF SAUL

Golden Text: "Faithful is the saying, and worthy of all acceptation, that Christ Jesus came into the world to save sinners." 1 Timothy 1.15.

Lesson: Acts 9.1-19a; 22.6-16; 1 Corinthians 15.8-11.

Devotional Reading: Psalm 116.1-4-6.

Explanations and Comments

Saul the Zealot, Acts 9.1, 2. The "But" indicates the contrast between Philip's zeal in advancing the gospel, which Luke has just recorded in Acts 8, and Saul's zeal in recording it. By means of a vivid contrast, Luke shows us how Saul's presence brought terror to the hearts of the disciples when he hunted. The first, yet breathing threatening and slaughter against the disciples of the Lord. Breath—Saul, desiring a threatening and slaughter, desired the Greek term there warmth the breathing. It is as if Saul were living only for the slaughter. In his effort to give expression to his outraged thoughts concerning the disciples.

From the high priest Saul had personally obtained letters in the synagogue in Damascus, which permitted him to arrest believers of Christ, whether men or women, and bring them bound to Jerusalem. At Jerusalem the captives were to be brought before the Sanhedrin for trial. Henry Drummond puts the situation in a striking way: "In the days Pharaoh's heart the Egyptians out the kim to reverse the meaning of the Lord's order of the hated sect, and go into all the world and preach the gospel to every creature."

There are similarities between the course of Paul and that of Peter (Acts 9.32-11.18). Both of the Apostles visited Damascus. He was the organizer of the Christian churches in which the Believers maintained their position against the Jewish persecution. Peter was the pioneer in the work of war for gospel. The Outlook and Independent comment of incendiary judge who bestowed that people who "turn the world upside down" have come to his city also. In the latter sentence Luke refers to them about plots against the Sacred state, to refute four false charges of its foes, and so to advance the cause of Christianity. Jason and as undoubtedly he hoped—brought—the Greek term for Saul, a Christian. Communist Jasticiates is his religious fanaticism. One of its most singular and significant products was the Greek Universal and cruel tyranny, Diarchiasy."

Tragedy Of the Arctic

Eskimo Mother Perishes In Attempt To Save Children From Drowning

A tragedy of the Arctic in which a mother sacrificed herself that she might save her children from drowning was described by Captain Bernier, master of the steamer Ungava, just back from a cruise along the Labrador coast.

The accident occurred near Ripulet, an Eskimo boy and his two sisters, aged four and five, were in a canoe when a large floe broke away and drifted out to sea with the unfortunate children.

The mother saw the predicament of her children and, in the strong current caught the drifting floe and swam after it. The brave mother, managed to keep their heads above water by clinging to the ice while her body remained in the water. The only one available, and with a rope which to him set out to the rescue.

In the face of almost insurmountable difficulties the brave mother took the children from the icy water and started for shore, forced to take constantly to keep the fragile craft afloat.

Just as safety was almost assured the wooden raft, held by only one hand at the bottom, broke in two in the hands of the baler and before they could reach shallow water the whole raft sank beneath them. All were drowned.

Erecting Country Elevators

A Busy Season Ahead In Construction Grain Elevators In Alberta

This season will witness a greater deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the larger harvests which are expected. Another company which has just announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the firm plans to erect six new elevators each with a capacity of 10,000 bushels.

Good For Paving Purposes

By means of actual tests a road construction it has been definitely established that the bituminous mode of Northern Alberta can be successfully employed for paving purposes. As the present supply of these roads is practically unlimited, their presence and use appear to have solved the problem of permanent paving and road construction in the western province.

Big Power Development

Development Of 70,000 Horsepower On Churchill River Is Promised

Initial development of 70,000 horsepower at Island Falls, on the Churchill River, is promised in an announcement made by the Churchill River Power Co., Ltd., a company allied with the Whitney interests in developing the Flin Flon mining properties and which supply power to the Flin Flon.

While the initial development is not on the scale or some of the bigger power projects on the continent, even in its first stages, the power plant at Island Falls will be by far larger than any now existing in Saskatchewan.

At present Regina has the largest power plant in Saskatchewan, with a capacity of 20,500 horsepower. The one to be built at Island Falls, even at the start, could supply ten times as much. Ultimately a development of 140,000 horsepower is contemplated. The Green town there warrants the belief that it is to be if final water conditions in this effort to give experience in the navigated thoughts concerning the discipline.

From the high priest Saul had personally obtained letters in the synagogue in Damascus, which permitted him to arrest believers of Christ, whether men or women, and bring them bound to Jerusalem. At Jerusalem the captives were to be brought before the Sanhedrin for trial. Henry Drummond puts the situation in a striking way: "In the days Pharaoh's heart the Egyptians out the kim to reverse the meaning of the Lord's order of the hated sect, and go into all the world and preach the gospel to every creature."

There are similarities between the course of Paul and that of Peter (Acts 9.32-11.18). Both of the Apostles visited Damascus. CHAPTER XXVII. (Continued)

Jack, Dr. John would not have been critical of his wife if she had chosen to follow another profession. He would have liked that. He did not believe that every woman had to be born in the domestic mould, making the time to and training shirts—anyone could do that! But nursing—the Northern Light gold teh-wahp or a wife—how he teased it! And how that craving was slowly turning to resentment. Other men had wives—he had a queen of chatter, a bundle of kindness, a bright player, a tea drinker!

The telephone rang.

"Yes, it is Dr. St. John. Who is speaking?"

"Jack—Jack Dora."

"Dora's brother? On your way through? Come along, yes, we are at home—I'll drive down for you in only thirty minutes. Grand Trunk? I'll be there—yes. Stop will cause, by."

The Doctor hurried into the living-room and spoke to Eva. "Jack is at the station. Get on your things," he said, "my car is at the door. Leave the crowd here."

"We will all go," cried one girl with very bare shoulders; "I want to see Elva's good-looking brother. She'll give him a regular send-off."

The crowd arose flutteringly, all chattering. There was something particularly irritating to the doctor in their idleness, their gaiety, their lack of responsibility. "Stay here," he said curtly; "Jack Dora has no desire to be met by a crowd of strangers. He knows no one, nothing. He wants to see his sister."

Eva turned on him indignantly. "Well, I like that," she said. "Behave, a station is a public place—anyone can go. Come on, kids, every one of you."

The Doctor took his wife's arm with a suddenness that surprised her and said, "Hurry Eva—have you no sense?"

"You have no right to be rude to my friends," said Eva, pettishly, "when they were on their way to the station; you noted abominably just now."

"Oh forget it!" the Doctor said, and try to get a serious thought in your mind for once. Your only brother is going to war and the chances are against your ever seeing him again. Have you nothing to say to him? Forget that insulting gang for half an hour. Their feelings are not hurt."

Eva looked at him in speechless amazement.

Jack had hoped that he might see his sister and the doctor alone. He wanted to tell his sister about Hetzel. The boy's heart craved companionship—he must tell someone. That the whole crowd swarmed around him with their incoherent gaiety, their senseless chatter, and the few minutes he had to himself was all too short. Jack was furious, and it was against Eva that his rage was directed. Here was her only brother going away, and she had not a serious thought in her head, not one loving, personal word for him.

The Doctor took Jack's hand on the last as they stood at the steps of the train. "I am going over too, Jack," he said, "it is going to be a long fight, and we will all be needed. I cannot stand back and see other men go. I am proud of you, Jack. Is there anything for you?"

A great impulse to tell the Doctor came to Jack but the conductor was calling and the train bell was ringing.

It was I could have had a good talk with you, sir," he said, "but there's no time."

"Well, what have you to say?" she asked him, with the queenly manner that she could assume.

"Nothing," he answered, "only that it is time you were in bed."

"Do you mean to my that, after making my guests—"

"I mean that down his book. "It was a good talk—but I'm sorry I spoke to you as I did. I am tired and worried, and I should have stayed here and let you and me a long alone. They don't know Jack and they have no right to. They remain in the station because it was something to do, something to relieve the dullness of their vacant minds. I told you to hurry if you wanted to see Jack alone. Now you may be sorry but over it as you like. I am tired trying to understand you, and have come to the conclusion that there is nothing to understand. In fact you have been remarkably consistent. You have always been selfish. What you wish to take because the first one you have always considered. You are entertaining in the crew, and felt it a capsize that marks him for a blood stain. Well, I've done with you. Eva is welcomed by the northern shore, and I am quite certain that it would very soon become the most boring thing in the world to anyone who hasn't a talent for it. To idle accidentally needs real talent. I love to dream of silence, imagine a succession of lazy days with no household cares, no work, not even a letter that must be answered, or a book that must be read. As a dream it is delightful. But as a reality wouldn't it be awful?

The strangest club existing in London is run to help those who have been in prison and do not intend to go there again; it is aptly named the "Run Straight Club."

HOW TOOTHACHE STOPS
In conclusion we find a fight progressing between the invading organisms and nature's little warriors, the phagocytes.
Then what decides the tide of battle?
Should the invaders not have rendered too great headway, the phagocytes in the pulp with the chances are that the little warriors will win the day, and the tooth get well, especially if the tooth cavity were cleaned of all decay, by this means destroying the hosts of the invading organisms. Nature needs assistance at times you see.
Proof that this aid be not forthcoming, the attacking organisms pour through the breach in increasing numbers, and discharges their poisons, while nature making a desperate effort to stem the tide rushes her little warriors into the cruller in such vast numbers as to prove her own undoing. Result—that the tiny blood vessels within the pulp chamber become congested resulting in acute throat pressure That Relieves the throbbing pain and is the constricted opening which serves as both entrance and exit to the pulp chamber. Consequently, the flow of blood outward is impeded, pressure increases and unbearably stopped, and pulp strangulation ensues.
Thus the pain, the fear and the gallows-look of little martyrs in an unequal fight with infection are explained. Now the pulp death the pain ceases But in the meantime the damage is done.
For the invading hosts, finding in the pulp their long sought refuge at least and moisture for their propagation, and having destroyed the vitality and pour through the exit of the chamber into the tissues surrounding their poisons, as well as other bacteria from the mouth, and the abscess is born.

RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat, when sickness and suffering are largely hard on little Diarrhoea, Dysentery, Cholera and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on guard to prevent these troubles, or if they come on suddenly fight them. No other medicine is of such aid to mothers during this trying month as Dr. Low's Teeth and Health. The Tablets are a mild but effective laxative, and will prevent summer complaint, or check the trouble, if it has come on suddenly without it. The Tablets are sold by all druggists, or by mail at 25c a box from The Dr Williams' Medicine Co., Brockville, Ont

Region College Extension

Tenders are being called for the construction of the Regina College Extension. The completed unit this year with auditorium capacity of 800. It will be built of Tyndal stone and moves brick in the Tudor collegiate style.

Sour Stomach

Airman's Greatest Foe
Weather Conditions Seven Hundred Thing To Overcome
Seemingly there is only one thing to stand in the way of the complete triumph of the science of aviation—weather. It is probable that planes can be made so that under ordinary conditions they will be as safe from breakings as the ordinary railroad train or automobile. They cannot be made fool-proof but under ordinary more of proper regulations the fools can be kept on the ground.
The advance in aviation within the last two years has been marked. Accidents are diminishing and long distance flights have proved that a smooth plane can "stand up" in severe storms. There are storms, however, which no plane can encounter and live. However, it is possible to avoid them except when investigating over the vast ocean spaces.
Fog is one of the enemies of the aviator. Long continued foggy conditions will hold up air traffic indefinitely. Today however, experiments are being made to fog-dispeling. Sir Oliver Lodge believed at one time that he had found the answer to the problem of doing away with fog but his experiments ended in failure. Others are at work on the problem, and science, never daunted, generally succeeds in everything that it undertakes to do unless the everything happens to be known in advance to be impossible under natural laws.

Little Helps For This Week
Prescription
"But yr. brethren be not weary in well doing."—Thessalonians II 13.
Life is not living
Just for living
Life is not dreaming
All the short way
It is living for others
To help and be helped
It is helping your brothers,
And trusting in God
—Hondley.
Life is made up, not of great sacrifices or duties, but of little things in which smiles and kindnesses and small self-denials and unselfishness win and preserve the heart and secure comfort.

Co-operation Rather Than Discord

It has been one of Canada's greatest misfortunes that periodically throughout its history campaigns have been inaugurated having for their object the division of the people into rival camps divided by lines of racial and creed difference. Probably no one thing has in the past operated quite so disastrously to retard the growth and national development of Canada. Time and time again when some large national question was up for decision the issue turned not on the merits of the question and the national policy involved but upon some petty race and creed cry. One of the outstanding cases which is still fresh in the public mind was the Reciprocity election of 1911 when in the last two weeks of the campaign, Ontario was swept by one of these insidious cries and tens of thousands of voters were stampeded from support of their economic convictions in favor of freer trade and wider markets.

Throughout his long career, both in private and public life Sir Wilfrid Laurier pleaded and strove for unity and concord among all classes of the Canadian people. Hon. Mackenzie King is worthily upholding the same cause and it is gratifying to note that Hon. R. B. Bennett as leader of the Conservative Party in the Dominion is throwing the whole of his eloquence and influence in the same direction. Speaking at Magog in the Eastern Townships of Quebec last month Mr. Bennett said: "He who sows seeds of discord and distrust in racial and religious matters is a greater enemy to Canada than one who came with an armed force. You cannot develop a country by ill-will, hatred or contempt." A few days later at Coaticook, Mr. Bennett used these words: "The application of the Golden Rule in the life of a nation is quite as important as it is in the life of an individual," and he added that anyone who "in the heat of an election sought to raise old animosities, to sow seeds of discord, must not forget his responsibility for such unjust action."

Here in Western Canada it is absolutely vital to the welfare of the country that such words be heeded. To an ever increasing degree the people of the West are looking to and relying upon co-operative movements and enterprises to solve the economic problems of the country. To date these have attained a marvellous success in a comparatively short space of time. This has been accomplished by all classes, all creeds, people of all racial descent in town and country working together. There has been no lines of demarkation in the upbuilding of these large co-operative organizations. The Wheat Pools of the West, for example, could never have attained their present proportions and power had any such foolishness as so often enters into political campaigns been allowed.

The unfortunate fact remains that if the people of a Province or Community are ... [remainder illegible at this resolution]

SUMMER COMPLAINT

ITALIAN AIRMEN ESTABLISH NEW DISTANCE RECORD

Rio Janeiro, Brazil.—A new distance record for sustained flight was completed when Captain Arturo Ferrarin and Major Carlo P. Delprete, Italian airmen, landed on a little beach ten miles north of Natal, Brazil, some 4,600 miles from their take-off at Montecelio Field, Italy.

They brought their big seaplane, Savoia-64, in which they had previously established a world record for duration flight, to the land after a flight which took them across the Mediterranean, through the Strait of Gibraltar and then southwest over the Atlantic via the Cape Verde Islands.

An hour and twenty minutes after landing the fliers resumed their flight, heading for this city, but were later forced to descend again at Recife.

Stormy weather with heavy clouds put the fliers in peril in the last hours of their effort and radio reports received here indicated that they had difficulty in maintaining their bearings after they reached the coast of Brazil.

Goes Over Niagara Falls

Jean Lussier Successfully Performs Daring Stunt

Niagara Falls, N.Y.—For the third time in history man conquered the mighty Niagara when Jean A. Lussier, 36-year-old French-Canadian now living at Springfield, Mass., went over the Horseshoe Falls on the Canadian side in a specially constructed rubber ball while a crowd of 150,000 people lining the river banks on either side, cheered and applauded him.

The start was made from Cayuga Island, about three miles above the falls, at 2.20 o'clock and Lussier was rescued from the bridge eddy below the falls at 3.20 o'clock by William Hill, daring riverman, alone in a rowboat. At first it was feared the giant ball might be carried downstream into the rapids. Lussier plunged over the brink at three o'clock.

When Hill reached the ball it was right side up and it was a matter of only a few minutes until it was towed to shore and opened.

The first to greet Lussier with a resounding smack on his cheek was his sister, Madame J. P. Coutiere, of Sherbrooke, Que.

The only bruises Lussier suffered in his perilous journey were of minor nature. There was a small mark ...

Regrets Appointment Of Viscount Byng

SLATED TO RETIRE

Hon. Frank Oliver, Dominion railway commissioner, appointed to the board in 1923, is stated to retire this fall, it is reported, because he has reached the age limit of 75, even though he will have served only one-half of his ten-year period.

Food Shortage In Russia

Soviets Buying Huge Amount of Grain in Baltic

London, England.—Huge purchases of wheat on the Baltic Exchange by Soviet Russia are reported in London, traders here expressing the opinion that the movement indicates a severe scarcity of food in Russia.

The quantity in Liverpool for spot cash amounts to between 150,000 to 200,000 tons, and Baltic London brokers expect Russia to buy almost as large a quantity again.

The prices agreed to without negotiations thus far have been uniformly as much as 60 cents per quarter above the market rate, which is felt to indicate a tremendous immediate demand for grain.

London brokers say they have reports of long bread queues and a painful shortage of food in Russia which, before the war, was one of the world's largest exporters of grain.

Russia has not bought such supplies of wheat since the winter of 1919-1920.

Conference at Ottawa has Been Satisfactory, Says Manitoba Premier

Ottawa.—"The conference has been satisfactory," declared Premier John Bracken, referring to the deliberations that have been in progress here between members of the Manitoba Government and the Federal Cabinet.

Weekly Newspapermen Meet

Officers for Coming Year Elected at Edmonton Convention

Edmonton.—H. B. Anslow of Campbellton, N.B., was elected president of the Canadian Weekly Newspapers' Association at the concluding session of the annual convention here. E. Roy Sayles, of Renfrew, Ont., was re-elected secretary-treasurer.

Invitations for next year's convention were received from the maritimes with Halifax or St. John as the venue, and from Regina and London, Ont. No decision was arrived at, the choice being left in the hands of the executive.

Additional officers elected were as follows:

Directors: Maritime Provinces—H. S. Anslow, Windsor, N.S.; Don Fraser, New Glasgow, N.S.

Quebec—George Legge, Granby; A. Girouard, Thetford Mines.

Ontario—Lorne A. Eedy, St. Mary's; A. W. Marsh, Amherstburg; F. A. J. Dawes, Carleton Place; J. A. MacLaren, Barrie; George Mitchell, Hanover; Port George Lake, Timmins; Fred Elliott, Alliston; W. A. Dry, Dunnville; D. Williams, Collingwood.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Battleford; S. J. Dornan, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

LOEWENSTEIN MEETS DEATH IN FALL FROM PLANE

London.—Captain Alfred Loewenstein, Belgian multi-millionaire capitalist, one of the world's richest and at the same time a romantic figure in finance, went to his death when, as it appears, he inadvertently stepped overboard from his private plane when it was flying over the English Channel, and fell into the sea.

The British Air Ministry announced that the Belgian Croesus had been drowned.

Loewenstein, according to the Air Ministry statement, set out from London late Tuesday night for Brussels in his palatial machine, one of the most luxurious ever built. At the time of the strange mishap, he is believed to have been moving from one compartment to another and in doing so opened the wrong door, stepping outward, he plunged into space.

Another passenger on the plane ...

... events in his life and many unique habits in his every-day labor. He dictated letters while shaving, his meals were occasions for discussion of business with men powerful in finance, from morning until night and often times far into the night he had secretaries and stenographers at his elbow while he carried on his business.

Aviation was one of his greatest hobbies and it became one of his greatest business assets.

Insect Menace Slight

Winnipeg.—"There has never been a year when the west was so free from insects of all kinds as the present," declared Arthur Gibson, Ottawa, Dominion entomologist, on arrival here en route home from a tour of inspection of the west. There was no sign anywhere of any insects harmful to crops, he stated.

H. B. ROAD TO BE COMPLETED FOR SEASON 1930

Ottawa.—That the Hudson's Bay Railway will be completed to Churchill for the season of 1930 is the confident belief of the engineers. It is unlikely however that the harbor itself will be completed as early as the railway line and a real test of the new northern route to the sea will not be possible for three or four years.

Some 1,500,000 cubic yards of sand, gravel and boulders must be dredged from the bay before ocean-going vessels can dock at Fort Churchill and take on cargoes of grain and other products of Western Canada destined for the world's markets.

Aids to navigation, direction finders and terminal elevators and docking accommodation for half a dozen vessels loading or unloading simultaneously must be established before the success or failure of the Bay route as a factor in Canadian foreign trade and transportation can be determined.

When the terminal of the railway was changed from Port Nelson to Fort Churchill an additional 154 miles of trackage was involved, the distance to Churchill being that much greater. The engineer anticipates that eighty miles of that will be graded and steel laid by December of this year, while by December 1929, steel will be laid right to Fort Churchill and the whistle of the locomotive will be heard across the Bay. This will enable the government to rush supplies by rail for the development of the harbor.

Planning Farm Credits System

Fire In B.C. Mine

SAY IT WITH SONGS

Probably what has ever been the largest crowd to say goodbye to a departing individual, omitting royalty, was recognized at the North Toronto Station of the Canadian Pacific Railway, recently when two thousand members of the Toronto Exhibition choir sang "Bon Voyage" to their leader, Dr. H. A. Fricker, upon his leaving for England and Europe.

About an hour before the departure of the train, the station was densely packed. Eleven special street cars and one hundred automobiles were used for the transportation of the group.

Drawn up at the platform the two thousand choir members sang with great effect as the train carrying Dr. Fricker started on its eastern journey.

CHAUTAUQUA OFF TO FINE START

To-day (Wednesday) the 1928 Tofield chautauqua gets under way. Given fine weather, one of the most successful chautauquas we have ever had is anticipated.

The attendance at the first programme was very encouraging and the programme itself wetted everyone's appetite for more.

Bubbles was a comedy play, and how the people did laugh. Teeming with funny incidents, one laugh followed the other until it was a regular gale of laughter.

There are ten more excellent programmes coming and any who have not already bought a season ticket should do so without delay as it is a one yearly chance to witness such high grade performances at such a low cost.

The Russian Cossack Chorus, "A Night in Hawaii" the Shehan Concert company, as well as other musical numbers and quite a few lecturers, are coming as well as the stage play "The Three Wise Fools."

RABBITS FOR SALE.—A quantity of purebred Chinchilla rabbits, about four months old. Suitable for breeding purposes.—Apply to E. H. Hopgood, Tofield. 21p

TOFIELD BALL TEAM WIN SECOND PRIZE AT VEGREVILLE

On Wednesday of this week the Tofield nine played in the big baseball tournament at Vegreville. The first game was played between Vegreville and Viking, Vegreville winning this game. The second was between Mannville and Tofield, Tofield winning this game. The final game between Tofield and Vegreville was played at night and was won by Vegreville by the score of 13—10. This gave Vegreville first money and Tofield second.

The following were on the Tofield line-up.

Lance Umphries, Martin Lawson, "Happy" Oslund, Alfred Oslund, Sweeny, Geo. Bisset, Bert Calvert, Watson, Frank Ball. Ambrose Yakthuski also accompanied the team.

CHAUTAUQUA PROGRAMME GOOD ALL THROUGH

The 1928 Chautauqua as far as Tofield is concerned is a thing of the past. The programmes were very well attended and very much enjoyed. Following ten or more previous visits the chautauqua organization had a hard task to excell other years as regards the quality of the programs given. This, however, we believe was done, many of the people with whom we have spoken having thus expressed themselves.

Eleven programmes takes a great deal of reviewing, and as practically all our readers read the advance notices and were also present at the programmes, a full review will not be attempted.

It will be pleasing information to many that the Canadian Chautauqua will be back again next year. There was a small deficit for the guarantors to make up this year, but this has been done and over one hundred persons have guaranteed its return next year.

FOUND—On July 10th, an automobile tire and rim. Owner can have same by proving property and paying for this advt.

LOCAL and PERSONAL

Born.—To Mr. and Mrs. Joe Jonet on July 17th, a son.

Born.—To Mr. and Mrs. Tenchi on July 17th, a daughter.

Mr. and Mrs. G. P. Jones wishes to announce the wedding of their daughter, Mary, to Mr. Arthur Kinney, which took place in Aberdeen, Wash., U.S.A. on July 14th.

Bud Hannan returned from a trip up the McKenzie river, last week.

Mrs. Kendall is visiting at Edson and also Edmonton for a few days.

Miss Eloise Wallen is holidaying with her cousin, Miss Hazel Preston of Radway Centre.

Miss M. Wood left for Edmonton and Red Deer on Wednesday morning where they will spend their holidays.

Miss Alma Bethel returned on Friday to High River. Miss Myrtle Bethel returned with her and will stay a week.

Mr. and Mrs. Geo. Brace and Jimmy left for Vancouver, Victoria and other coast points on Tuesday morning.

Mr. and Mrs. H. Rogers and Max left this week for a vacation trip to Pacific coast points.

Mrs. McCauley and family, Mrs. Firth and family and Miss Thelma Jobb are holidaying at Cooking Lake.

Mrs. Snell left last Friday for Duhamel where she will visit her parents.

The Canadian National Railway ran a special train to the city and return on Thursday, for the benefit of exhibition visitors.

Mr. and Mrs. C. H. Rowe and family arrived in town on Sunday and we understand, will take up residence in the house vacated by Mr. Constantine. Mr. and Mrs. Rowe needs no introduction to the people of Tofield, they having spent several years here before. There many friends are pleased to see them back.

Quite a large number of town folk and also a large number of country folk visited the capital city this week. To most of them of course, the exhibition was the main attraction. Up to time of writing, the weather has been ideal for the fair and visitors went by both rail and road. So many went that we are unable to give a complete list.

The announcement has been made of the forthcoming wedding of Mr Edward Brice, B.A., of Edmonton, and Miss Yvonne Jeannette Gilders Young, daughter of Rev. and Mrs. James Young, also of Edmonton, which will take place at Edmonton on August 2nd. Mr. Brice is well known to many Tofielders, he having made periodical professional visits here for fifteen or more years, and they in company with his host of Edmonton friends, will wish him and his bride all the good things that life holds forth.

NEW ELEVATOR FOR TOFIELD POOL NOW ERECTING

As an indication of the amount of grain grown and wealth produced in the Tofield district, the elevators now completed and the one in the course of construction are a fair example.

For quite a number of years, Tofield had two elevators, a very small one and a standard size one. About 1913 or 1914 the standard size one was taken down and moved elsewhere, which left the district with but one elevator. A year or two ago, an elevator was erected at Bardo, which is in the Tofield district, and last year two elevators, the locally owned one and a line company one was erected.

Now comes one being erected by the Alberta Wheat Pool. The new elevator, which will be of standard size, will be up-to-date and will stand just west of the station.

There are quite a number of men employed erecting it and progress is rapid. The men are sleeping in tents pitched near the property.

"Do you think that Professor Kidder meant anything by it?"
"What?"
"He advertised a lecture on 'Fools.' I bought a ticket and it said 'Admit One.'"

POPULAR LOCAL YOUNG COUPLE WED

The marriage took place on Wednesday, July 11th, at the Bardo Lutheran Church, of Miss Sigred Eggan, daughter of Mrs. I. Eggan of Bardo, to Mr. Selmer Johnson of Tofield.

The church was prettily decorated in pink and white and the ceremony was performed before an arch of green interwoven with pink and white flowers.

The bride was charming in a gown of white georgette and a wedding veil. She carried a shower bouquet of pink roses and white carnations. The bridal party entered the church to the strains of the wedding march played by Mrs. Iver Moen. The bride was attended by the Misses Carrie Brechan, Anna Jevning, Magda Anpolo, and Borghild Foshaug, while Ralph Johnson, Ingolf Brechan, Edward Steen and Ingval Ness were best men.

After the ceremony a reception was held at the home of the bride's mother.

Mr and Mrs. Johnson are spending their honeymoon at Banff.

U.F.A. NOTES

The regular meeting was held on June 28th at the home of Mrs. Dodds. About thirty-five ladies were present. Delegates were appointed for the annual convention of the Federal Constituency Association to be held in Lamont on July 23rd. These were Mrs. T. E. Seale and Mrs. B. F. Wildman. A dainty lunch was served picnic style. The next meeting will be at the home of Mrs. Jas. Francis on July 26th. The roll call will be answered with recipes for salads and Mrs. Myrtle Seale will read a paper on Canadian authors. Reports of delegates will also be heard. Mrs. Murray, Mrs. Lee, Mrs. Warner and Mrs. Wildman will serve tea. Visitors always welcome.

IMPORTANT NOTICE

I will be leaving for Eastern Canada the coming week, and while I am away, patrons will please 'phone Mr. J. W. McMullen regarding orders and information. Mr. E. A. Moen will attend to the shipping.

I wish to take this opportunity of thanking the many patrons of the livestock pool and upon returning from my vacation I hope and expect to give still better service.

A meeting of the Co-operative Credit Assn. will be held on Friday night at the Town Hall at 8:30. All farmers are invited to attend.

JOHNSTONE FERGUSON

KINGMAN

Miss Dorothy Sframstad of Edmonton, visited with Miss Dorphy Melvick last week.

T. J. Rogness arrived home from Winnipeg on Monday, after a weeks visit.

Howard Simonson of Edmonton is visiting with relatives in Kingman.

Mrs. P. Vold and family, and Mrs. Norgard, of Bardo, visited with Mrs. T. Horte on Tuesday.

Hymie Rodnunsky of Edmonton is spending part of the school holidays with relatives here. Mr. P. Rodnunsky arrived on Wednesday for a short stay.

Mr. and Mrs. Andrew Johnson attended the wedding of Sigrid Eggen and Selmer Johnson in Bardo, on Wednesday.

Mrs. E. Erickson and family, and Mr and Mrs. W Hartschen and family motored to Camrose on Thursday.

Mr. and Mrs. Joe Munson and family of Camrose, spent Sunday with Mr and Mrs. C. R. Blyckert.

Mr. and Mrs. Hokanson, and T. Olson of Edmonton, visited for a couple of days last week with Mr. and Mrs. E. Erickson. Harry Erickson returned with them, to visit for a couple of weeks with the Hokanson boys.

Mr. and Mrs. T. Horte and three children spent Sunday in Camrose.

Mrs. Thor. Grahn is staying with her mother, Mrs. Nelson of Armena, who is ill.

Sunday visitors at the Andrew Olsen home were Mr. and Mrs. Ed Tullefson and family, Mr. and Mrs. Gilbert Tullefson, Mr. and Mrs. E. Erickson and Mr. and Mrs. Nordfelt.

Mr. and Mrs. A. Asp and family are visiting for a few days with relatives at Daysland.

Mr. and Mrs. Thor Thorsen and family of Okotoks, are spending two weeks vacation with friends and relatives in Kingman.

Sunday guests at the Andrew Johnson home were Mr. and Mrs. J. Johnson and family of Grande Prairie, Mr and Mrs. Pete Eggen, Mrs. Eggen, Sr., and Mr. and Mrs. Emil Rude, of Bardo.

The basketball game between Kingman and East Bittern Lake on Friday evening, resulted in a win of 23 to 6 for Kingman.

KETCHAMOOT

The chautaqua was enjoyed by many in our community but owing to so much breaking being done many were not able to attend but those that did were well satisfied in fact thought it was better than former years.

Mr. and Mrs. Percy Sutton and Alice Simmerson returned home from their motor trip from Portland Oregon last week. They were accompanied home by Mrs. Tim Brocke and daughter.

Mrs. Annie Johnson returned from William Lake, B.C., the first of the week, where she had been visiting at the home of her son, Malcolm.

Mr. and Mrs. Maurice McGinitie and Mrs. John McGinitie are away on a two weeks holiday visiting relatives in Montana.

Charlie Sears is nursing a badly cut hand the results of the car accident last Saturday night.

Mr & Mrs. McMullen, Mrs Graves and family and Miss Alice Proctor motored up from Calgary on Tuesday.

Mrs. G. W. Sears, Mrs. T. D. Ferguson and little son were guests of their mother and grandmother, Mrs. M. Ingram during chautauqua week.

Miss Hazel Sears returned home on Sunday after a week holidaying in Edmonton and Namao.

Mr. and Mrs. Herman Lawson and family motored to the city on Wednesday to attend the Edmonton exhibition for two days.

Mr Tim Brocke held preaching services at the school house on Sunday evening.

Mrs. J. H. Ingram and daughter Kathleen are spending a few days in the City visiting relatives and taking in the exhibition.

Mr. and Mrs. Chester Coombes and family returned home on Sunday after a few days holiday visiting Mrs. Coombes relatives at St. Paul de Metis, they also visited the Owen home at Vilna.

NOTICE

Hannan & Carver's Elevator at Tofield, is now open full time under the managership of Mr. George Bissett. Mr. Bissett is well known to grain growers in this district, and will be pleased to meet them at his new stand.

WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Copyright Act is likely to be revised at the next session of Parliament in line with the copyright convention which has just ended at Rome.

As a site for the farms and homes of Sweden's youth, the Peace River District and the vast stretches of the Canadian north will be studied by a commission from Sweden.

The Dominion bureau of statistics reports 844 accidental deaths in Canada credited to automobile accidents in 1927 against 606 in 1926, an increase of 12.6 per cent.

A check of $1,000 has been received by Commander Richard E. Byrd from Charles A. Lindbergh as his contribution to the fund being raised for the Byrd Antarctic Expedition.

Veteran of the South African War and the Riel Rebellion, and former assistant commissioner of the Royal Canadian Mounted Police, Lieut.-Col. F. J. A. Demers, 63, died suddenly at Edmonton.

Against the wishes of Marshal Foch, a bronze equestrian statue of himself was unveiled at Cassel, Northern France, before a throng that included many notables of France headed by Premier Poincare.

In accordance with a custom established shortly after the war, about 1,000 London school children made a pilgrimage to Shorncliffe Garrison Cemetery and decorated the graves of Canadian soldiers.

Fifty-three million dollars of Dominion of Canada war loans which mature in October will be paid in cash, Hon. J. A. Robb, minister of finance, states that these obligations would be met out of money in the treasury.

The fears of war pensioners that the British Government intends to reduce pensions because of the decline in the cost of living since they were granted have been allayed by Sir William Joynson-Hicks, home secretary.

Omnibus lines are still a favored method of transportation in London and several large European cities.

Many a man fails to recognize his duty when he sees it.

"My lover is coming for me in a car. I hope he can steer with one hand." —Journal Amusant, Paris.

Was President Of Alberta University

Dr. Wallace Of Manitoba Has Exceptional Attainments

Dr. R. C. Wallace, whose appointment to the presidency of the University of Alberta was officially announced recently, is at present head of the department of mineralogy and geology of Manitoba University and commissioner of mines for the province.

A man of exceptional erudition, Dr. Wallace came to Canada in 1910 from Scotland. In that year he became lecturer in geology and mineralogy and was appointed professor in that department.

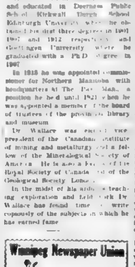
He was born in Orkney, Scotland, and educated in Deerness Public School, Kirkwall Burgh School, Edinburgh University, where he obtained his first three degrees in 1901, 1907 and 1912 respectively, and Goettingen University where he graduated with a Ph.D. degree in 1907.

In 1918 he was appointed commissioner for Northern Manitoba with headquarters at The Pas, Man., a position he held until 1921 when he was appointed a member of the board of trustees of the provincial library and museum.

Dr. Wallace was elected vice-president of the Canadian Institute of Mining and Metallurgy and a fellow of the Mineralogical Society of America. He is also a fellow of the Royal Society of Canada and of the Geological Society, London.

In the midst of his arduous teaching, exploration and field work Dr. Wallace has found time to write copiously of the subjects in which he has earned fame.

Winnipeg Newspaper Union Fashion



A New Frock For Afternoon Or Evening Wear

Unusually attractive is this chic frock of youthful charm. The two-piece flared skirt is joined to a foundation and the bodice is gathered at the lower edge to give the modish bloused effect. Three bands of material or lace are arranged at the hips and there are tucks at the front of the neck. Ribbon forms the collar and is also used on the long dart-fitted sleeves. The sleeves may be omitted and a ribbon girdle added for evening wear. No. 1675 is in sizes 16, 18 and 20 years. View A, size in 18 (36 bust), requires 3¼ yards 39-inch, or 3 yards 54-inch material, and 4 yards 2-inch ribbon. View B, 18 (36 bust), requires 2¾ yards 39-inch material, 5 yards 3-inch ribbon, 5 yards 3-inch lace. Price 25 cents the pattern.

The State of Yucatan, Mexico, which is known to historians and archaeologists as the seat of one of the highest civilizations in the western world, is now boasting that it is the world's greatest producer of henequen, from which binder twine is made.

"I don't even know if I'd have enough work for you to do."

"Oh, that wouldn't matter, provided the pay was satisfactory."

Germany under Bismarck in 1881 was the first country to undertake unemployment insurance.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued).

The culmination of this eventful day in Denmark's capital was a reception and high tea at the house of Mr. E. Millington Drake, the British Charge d'Affaires, where, as cohosts with him, we entertained Mr. Madsen Mygdal, the Danish Prime Minister and other representative Danes. Sickness prevented the expected appearance of Prince Axel who sent, however, a message of greeting to the Canadian visitors. The speeches of the Charge d'Affaires, the Prime Minister and our leader, Mr. Arheil, during this delightful evening, were broadcast and heard all over Denmark, as we found out later in the tour. This was the first broadcast in Denmark from a private house. Never before had we found ourselves co-partners, on foreign soil, with the official representative of the British Empire and never did we feel more proud of that Empire and Canada's share in it.

On our second morning we were away by 8.30 to visit the 125-acre farm of Mr. Carl Jensen en route to the Langager Co-operative Dairy, a typical small dairy serving about 150 farmers, where we found a warm welcome and a friend of Canada, the manager, Mr. Larsen, having a son, Mr. Axel Larsen, in Winnipeg. At Mr. Jensen's farm we were introduced to Danish red cattle and a splendid example of the better class Danish farm house, more like the home of a retired gentleman than that of a farmer actively engaged upon his land. We had been told that the renaissance of Danish agriculture began with the break-up of the Danish villages and the placing of the farmer's house upon his farm. And here was an excellent example of the change which has given to the Danish countryside a picturesqueness and character all its own.

Our next stop was Frederikssund Bacon Factory, a co-operative concern formed thirty-three years ago with a supply of 300 pigs a week. It now has a weekly supply of 2,500 pigs, handles eggs from 8,000 poultry farmers and has paid off all loans incurred in the building and re-building of the factory. As we saw the live pigs coming in to the factory we were astonished at their uniformity, but still more at the uniformity of the bacon sides which they produced, a tribute to the educational work that has been done among the farmers. It was interesting to observe however that at the time of our visit only 20 per cent. of the sides were grading No. 1, 45 per cent. No. 2, and 35 per cent. No. 3. In the summer the number of firsts runs somewhat higher, up to 25 and 30 per cent. but the grading is very close indeed.

We were fortunate in meeting the director of the factory, Mr. F. L. Bleck, who has been in charge since its inception. He is probably the best informed man in Denmark in the bacon business. He is secretary of the committee which meets weekly to fix the prices to be paid for hogs by the bacon factories throughout the country, and chairman of the committee which fixes the prices to be paid for eggs by those bacon factories handling them. It is worth noting that Mr. Larsen, president of the factory, counts it a poor a year when he fails to make less than $5,000 net profit from his own farm. His worst year showed a net profit of $2,000.

This informative visit was followed by a tour of Frederiksborg Castle, founded by King Frederik II, but now a national museum of historical portraits and paintings arranged in rooms furnished in keeping with the various periods. Here we saw the finest relief ceiling in Europe but the outstanding memory which we all brought away with us was of two pictures of more recent date. The one portrayed the burial of the Danish flag by the inhabitants of Schleswig-Holstein at the end of the war with Germany in 1865 and the other the welcome by the restored province to the Danish King when, after the Great War, he visited his reclaimed subjects and the buried flag, now brought forth to the light of day was presented to him. Passing through the province the King picked up a child and placed her on the pommel of his saddle. In this position he carried her with him through the scenes of rejoicing, tears of joy, it is said, coursing down the royal cheeks.

From the castle we passed to what was perhaps the strangest feature of the tour in Denmark. This was the People's High School at Frederiksborg. What, we had been asking ourselves, was the secret that the Danes possessed that seem to make all Danes brothers, in a sense, not to be observed perhaps in any other nation. How did they co-operate so whole-heartedly and yet preserve their individuality. We believe we found it that afternoon, when Dr. Frederik Begtrup spoke to us on the Danish Folk High School. Here was a school attended, in winter, by young men, and in summer by women in the adolescent period, a school free from inspection, where examinations are unknown, a type of school which is often owned by an individual, but where supported in part by State funds is nevertheless in no way answerable to the State as to its curriculum. What object could there be in such a school? Here is the answer. Schools like these do not exist for the imparting of knowledge, but for the development of understanding. The fare at schools such as these is plain, the life Spartan. The pupils rise at 6.45. The masters are fired by high patriotism and high ideals. Waken the soul of the young man and woman, says the Folk High School, and there will result perception of the deeper values of life which will stand the pupil in good stead in all the crises of life. The practical values need not then be stressed, but will be understood and appreciated in their natural relation. If then co-operation has arisen among the Danish people, it has grown of itself, not because it was stressed but because it seemed the natural solution to the problem that existed. Whatever may be forgotten in the memories of the trip or grow less defined it is certain that the spirit of the Folk High School will be remembered. Mr. Begtrup revealed himself as the personification of the teacher who is born, whose heart and soul are in his work, and whose work will live when he and his are gone.

(To Be Continued.)

What is more satisfying after the bridge game than a cup or two of Red Rose Tea? Millions of Canadians prefer it to any other because of finer flavor, remarkable strength and dustless purity. Put up in aluminum—the only material which completely protects good tea.

Industries In British Columbia

There are now 4,128 industrial establishments in the province of British Columbia with an annual payroll of $159,959,520, an increase over 1918 of 300 per cent. The principal industries of the province are lumber and shingle mills, mining, salmon, halibut and herring fisheries, foundries and structural steel works, sugar refining, shipbuilding, pulp and paper, clothing, food products, glass and rubber.

Mrs. Moses: "Vat would you like for your dinner, Abie—mutton or venison?"

Mr. Moses—"Mutton, my dear. Mutton is sheep, but venison is 'dear'."

Don't be afraid to speak out loud. The world is too busy to listen to whispers.

An Irish philosopher says that we can only get the things that are beyond our reach by striving for them.

"What is the first thing that turns green in the spring?"

"Christmas jewellery."

DEMOCRATIC STANDARD BEARER

When the Democrats in national convention at Houston, Texas, chose Governor Alfred E. Smith of New York, as their standard-bearer in the coming November presidential elections, they picked the most formidable campaigner available against the Republican nominee, Herbert Hoover, secretary of commerce in both the Coolidge and Harding cabinets. Here is a recent portrait of the New York governor and his wife.

SUNDAY SCHOOL LESSON

JULY 22

SAUL'S EARLY MINISTRY

Golden Text: "Straightway in the synagogues he proclaimed Jesus, that He is the Son of God."—Acts 9:20.

Lesson: Acts 9:19b-30; 11:19-30; 12:25; Galatians 1:15-18.

Devotional Reading: Romans 12:1-8.

Explanations and Comments

Paul's Preparation In Arabia For His Ministry, Galatians 1:15-18. Luke says nothing about Paul's stay in Arabia, but Paul writes in his Epistle to the Galatians: "When it was the good pleasure of God to reveal His Son in me, that I might preach Him among the Gentiles, straightway I conferred not with flesh and blood, neither went I up to Jerusalem to them that were apostles before me; but I went away into Arabia; and again I returned unto Damascus. Then after three years I went up to Jerusalem." It was a voluntary novitiate, a period of reflection and restraint during which the truth which he had been so abruptly called to preach might be assimilated and clarified. Paul may have gone as far as Mount Sinai, yet it is possible that he went no farther than the desert region near Damascus, which might somewhat loosely have been known as Arabia. Like Jesus at the beginning of His public ministry before entering upon His work, Paul went into the wilderness to fight his inner battles and think his problems through.

"The soul," said Robertson, "collects its mightiest power by being thrown in upon itself, and coerced solitude often matures the moral and mental character marvelously." It was into the solitude of Arabia that Paul passed after the dazing revolution on the Damascus road, and there in the stillness the great solidifying of new character was made, and the new establishing of his life in God."—Robert E. Speer.

Urge Early Adoption Of New Calendar

Treaty Will Be Drafted and Nations Asked To Sign

Universal adoption of a 13-months calendar, each month with 28 days, was tentatively set for 1933 by the national committee of calendar simplification which met at Washington.

The committee, headed by George Eastman, kodak millionaire, of Rochester, N.Y., is unofficial, but was created by Secretary Kellogg at the suggestion of the League of Nations.

The recommendations of the American committee will be considered with others, by the league. A treaty will be drafted and the leading powers of the world asked to sign.

Ten sub-committees were named by Eastman to investigate the attitude of industry, commerce, finance, transportation, science, labor, agriculture, journalism, social and educational organizations toward worldwide acceptance of the 28-day 13-month calendar.

Eastman said as far as he had studied the situation no objections have been registered against the reform movement. He expressed the belief that it would take at least five years to put it into effect.

The 13-month calendar was originated by Moses Cotsworth. The 13 months would account for 364 days in the year. The 365th day would follow after December 28th and would be called Year Day.

Leap Day, February 29, would be inserted as June 29 every fourth year. Under the new calendar all national holidays would be celebrated on Monday.

Deceived Enemy Subs

Dummy Battleship Commanded By Oldest Naval Officer On Active Service

How the oldest naval officer on active service deceived enemy submarines with dummy battleships while the real ships were actively engaged hundreds of miles away is recalled by the death of Captain W. B. Forbes, R.N., of Quenington, Gloucestershire.

When the war broke out Captain Forbes, who was 80, was living in retirement in Ireland. He volunteered for active service and was given command of a dummy ship called "No. 6," stationed in Loch Ewe.

In 1915, when in his 70th year, he was given command of a fleet of dummy battleships in the Aegean. He sailed in a reproduction of H.M.S. Tiger called "No. 14," with three other cleverly designed dummies.

These queer craft appeared off Gallipoli in the early months of 1915, dodging and deceiving enemy submarines.

Eventually the imitation Tiger was torpedoed, but instead of her guns, sinking they rose to the surface and floated away with their tremendous turrets of wood.

Her commander so admirably handled the situation that the only men lost were four killed by the explosion.

THE WONDERS OF RADIUM

Although Widely Used It Is Still Something Of a Mystery

When medical men first used radium in surgery, our knowledge of that uncanny element was of the slightest. Even now, when so much can be achieved by its aid, this radio-active body (so called because of the radiations it is perpetually throwing off), is something of a mystery.

It is continually firing off the atoms of which it is composed—a kind of non-stop high explosive in miniature. It takes twenty-five years for one per cent. of a radium mass to disintegrate. Therefore the radio-activity of a pure radium preparation continues for an average of 2,500 years, and when it can disintegrate or break down no further it ends its days, so to speak, as a lump of lead.

This wonderful element occurs in small quantities in certain mineral deposits, of which the richest are in the Belgian Congo.

In its metallic state, radium is a pure white metal which changes quickly when exposed to air and reacts with water. Hence, for curative purposes, it is always prepared and used in the form of a salt, usually as bromide of radium.

The use of radium as a curative agent was discovered by accident. A French scientist put some tubes containing radium in his pocket and carried them about with him for some days, when he discovered that his skin was burnt. This suggested the use of radium radiations to kill certain living cells or tissues considered harmful to man. But medical reports on these results were confusing. Accurate details of the nature of the disease treated, the method of application and the dosage used were lacking. Doctors could not with confidence recommend its use, so it fell into disrepute.

Then the Medical Research Council took the matter up and made an extended and co-ordinated inquiry into the medical uses of radium, especially in cancer and kindred diseases. The results of their work are to be seen in the vastly improved methods of applying radium today.

Many Forgetful People

In four months, this year, more than $59,000 worth of jewelry has been left in taxicabs in New York. Forty-five packages of jewels, besides clothing, brief cases, luggage, umbrellas, canes and other articles were found by drivers after their fares had departed.

There is no duty on the wool that the candidates pull over the eyes of the voter.

The President of the United States who served two non-consecutive terms was Grover Cleveland.

NELLIE L. McCLUNG

Copyright, Canada, 1925

CHAPTER XXVIII.—Continued

The willows that grew beside the river were blushing as the sap rose, green, yellow or red according to their kind and the roads began to whiten with the fuzz from the aspens.

But, on this twenty-fifth day of April there arose out of the west a sheer black cliff of cloud into the boundless blue—a thick, deep cloud, in which silent lightnings played, and as the day went on, it showed up higher and higher into the sky until at three o'clock it was ready to cover the sun.

During this time the heat had not abated. The air grew heavy and oppressive. It was the sort of a day when horses break into foamy sweat and people feel cross-grained, clammy, irritable, and full of aches and pains which they attribute to the weather.

The edge of the cliff had a whitish color at four o'clock, when the sun had gone under, and all the trees were standing still expectantly, as if bracing themselves for something which they were unable to help.

In the gathering gloom the houses in Bannerman, grouped around the station, looked more than ever like cats about to spring. The clouds are rolling now, with white lines on their billows, and there is a distant rumble of thunder, like the roar of a faraway city.

All day the rain clouds threaten and thunder growls, but it is not until night has fallen that the change comes. The crows that have been sitting like birds of ill omen, humped up on the trees, fly further back into the bush, as if in dread.

On the train coming to Bannerman sits Helmi, very pale, very determined, with a purpose so terrible she does not look at her fellow-passengers, for the fear is on her that they might divine her errand and try to dissuade her from it. She has made a vow of vengeance, and she will keep it. Why should she spare the man who has wrought so much evil in her life? There is a burning, torturing pain in her heart that only revenge can ease, and as she sits at the window looking out into the gathering storm, she gloats over the scene. She will come in upon him as he sits at his littered table—the musty, grimy old man, who kept so safely the lying newspaper, guarding it, hoarding it, to do her harm. Other things he lost in the confusion and untidiness of his ugly den, but this he treasured safe, and showed it to her Jack, poisoning his mind against her—and now her Jack had gone overseas angry and bitter—to be killed,—and little Lili, when the fever came on her, had no home where she could be nursed back to life—no home, poor little precious Lili, with her silky brown hair and soft little caressing lips.

The fever in her breasts when she thought of Lili burned like a thousand red hot needles, until the perspiration broke in beads on her face. She would see the color fade from her enemy's face when fear gripped his wicked old heart. She had thought of it often since she saw Jack's face gliding, gliding away from her . . . she would see the color go in patches from his face, and he would beg for mercy when he saw the gleaming barrel of the revolver—beg and whimper and call upon his God.

Wild strains of blood in Helmi's heart were crying to her to strike and not to spare, and the pain, the horrible drawing, twisting pain around her heart grew more maddening every moment, and in every pang and spasm that tore her was a tongue that cried "Revenge!"

Once Helmi thought of God, when a flare of lightning lit up all the countryside, revealing farm houses ghostly white, and bending trees that crippled before the rushing wind. God! a lot He cared. God was with the magistrate and let him live secure while her Jack went out with a bitter heart to die and little Lili tossed in her fever with no mother to comfort her!

Helmi had ceased to reason and ceased to fight—she only felt. The primitive passions were ablaze in her. She had been robbed of her mate and her child. Red murder gleamed in her eyes.

When the train stopped at Bannerman the storm was at its height. The wind had the whine of stretched wires in it, and whistled across the deserted platform with a horrible hissing sound. The night was inky black, with bursts of lightning blinding her eyes, and continuous bellows of thunder, like a hundred fire engines roaring past, shutting out every other sound. Helmi knew her way as if by instinct. In the lightning's revealing flashes the house she sought was easily found. She was breathing now like a person with pneumonia, her nostrils quivering like a wolfhound's when he has the quarry at bay. The revolver was in her hand, and in each flash of the lightning it gleamed like a blinding searchlight. Each chamber was loaded, for Helmi intended to do her work completely.

She reached the verandah steps, remembering the one that was broken, carefully making no noise, and stood at the uncurtained window looking in. The man she sought sat at his table with a glass and bottle beside him. A roar of thunder made the bottle tremble on the tin tray and rattled the bricks in his chimney. He started and looked toward the window, though Helmi had made no sound.

Helmi moved a step nearer and tapped on the glass. She wanted him to know—to see. She wanted to see the cringing fear—she wanted him to beg plead. He came over to the window, and he must have seen her face, white and awful in the darkness, for he reeled back in fright with a scream of horror.

Then came a crash—a shuddering, sickening crash with blinding blue lights that seemed to strike at Helmi's eyes like a thousand furies. There was a sound of crashing timber and a confusion that flung Helmi to her knees. When she opened her eyes and looked through the window she saw her enemy lying dead on the floor—his face livid, his eyes wide open, full of terror . . .

When Helmi came to herself she was running through the storm on feet shod with fright—running as if all the fiends of the night were in pursuit, the sky opening and shutting with dazzling lights and blinding darkness, night voices screaming and louder than all, her own heart pounding in her ears.

Sometimes she fell, rising to her feet again, sometimes she felt a sudden blow, as if a crushing tree had struck her as it fell, but always her fear drove her on.

She had no sense of fatigue as she ran on and no plan of flight; but a strange homing instinct led her in the direction of Eagle Mines. Even in her hysteria and frenzy her feet carried her toward the little house where she had been loved and secure.

Then came the rain, a furious pelting rain that seemed to fall in drowning sheets of water. Every time the heavens opened with the bursts of thunder another downpour drenched the earth.

Suddenly Helmi was aware that some animal was running beside her, and in a flash of lightning she saw the sable collie, her breast showing ghostly white against the blackness of the night.

The nearness of something warm and living gave Helmi courage, and, falling beside the dog she clasped her arms around it in a sudden passion of weeping. The animal licked her hot face soothingly, whimpering softly, and with strange comfort, in its almost human tenderness. Her wet clothes hung on her now like heavy weights. The dog ran on ahead with encouraging barks and Helmi, following, begged the animal not to leave her alone in the darkness.

A great weariness came over Helmi now, and a growing fear that her strength was leaving her, but the dog was bounding back to her every few moments and urging her as plainly as a dog could to come on a little farther.

Suddenly at the mouth of the cave, black and terrible, the dog stopped and pulled her by the hand. Helmi followed blindly into the midnight blackness, into which even the lightning could not penetrate. She found something soft beneath her feet, and, stooping down, found a bed of hay, dry and comfortable, and on it she fell, grateful to be out of the lashing fury of the storm.

The storm still roared in her ears, and the fury of the rain filled the cave with a sound like a roaring cataract.

(To be continued)

The Perennial Flower Border

Can Be Made to Add Beauty to Western Homes

The perennial flower border can be made to add charm to the homes in the west. The season of 1927 is reported by the superintendent of the Morden Experimental Station to have been almost an ideal season for herbaceous plants. A bountiful covering of snow over a straw mulch proved an effective protection and the plants came through the winter in good condition, practically no losses being sustained. In seasons of good rainfall such perennials as the Spiraea, Astilbes, Phlox and Trollius, do particularly well. Delphinium and Paeonies thrived abundantly and bloomed profusely. The conspicuous June-flowering Eremurus Robustus produced blooms eight feet high. The Shasta Daisy, a new introduction, did splendidly. It produces large flowers continuing to bloom over a long period. A particularly fine effect was produced in the border by a combination of Delphinium and the old Yellow Mullein. Some effective lilies such as Willmottiae, Henryi, Batemanniae and Saponaria, produced very lovely results.

Studying An Ocean Floor

Studying under the sea is an innovation in university teaching introduced by Prof. J. T. Pearson of the University of Miami, Florida. Twelve students, garbed in bathing suits and all wearing diving helmets slipped into the briny deep, took their positions comfortably on the sandy bottom and observed how Prof. Pearson gathered specimens of sea life.

The bamboo holds the record among plants for quick growth. It has been known to grow two feet in 24 hours.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH IS LONGER

Your child had tooth-ache one night and you were able to relieve his suffering by applications of oil of cloves to the cavity, and when the pain had subsided, you congratulated yourself that the trouble was ended.

But in the morning he awoke to find that the tooth was sore to bite upon, and longer than the others, so he said.

Now, he was right, for in a sense the tooth was longer than its fellows. Just what happened?

Each tooth is suspended in a soft tissue sac which acts as a cushion between the tooth and its bony socket, breaking the jar when the tooth is in use.

And the inflammation which caused the tooth to ache, has spread from the pulp to this sac (or pericementum) which is richly supplied with blood vessels, thus, with the accompanying rush of blood, the sac has become swollen and so thickened.

Actually then, it does lift the tooth in the socket a trifle permitting it to hit the opposing teeth before the others come together.

Now, of course this needs attention, not only because of the dangerous sequelae from the inflamed condition if allowed to progress further but also for the reason that Sonny will do all his chewing on the "well side" in his endeavor to avoid using the sore tooth.

This continued long enough, will form a habit making for a one-sided muscle development and leaving the teeth on the "sick side," because of this disuse more prone to decay.

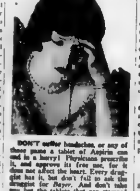
Further, should one or more of these deciduous teeth be allowed to remain in such condition as to cause pain when used, the food will naturally be bolted and a harmful habit formed which it may be difficult to correct later.

Drone Does It

One of the latest mechanical devices in this mechanical age is the new switch which floods an air port with light at the sound of an approaching aeroplane. The drone of the aeroplane motor is used to start a sympathetically-tuned reed vibrating; as the aeroplane approaches, the low note of its motor sets the reed in vibration, and the reed in turn switches on the powerful lights.

No vegetable has a higher content vitamin "A" than spinach, weight for weight fresh spinach is a little richer than butter in this substance.

Gossip is a beast of prey that devours its victims while they are alive.



DON'T suffer headaches, or any of these pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

Horses and Tractors

There are 6.8 horses to each farm in Manitoba, and a tractor to every 4.6 farms in the province. Each Saskatchewan farm has 10.2 horses and there is one tractor to every 4.7 farms. In Alberta there are 10.8 horses to each farm and one tractor to every 7.5 farms.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or will be mailed on receipt of price 25 cents per box by The Dr. Williams Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Small Town Large Name

Llanfairpwllgwyngyllgogerychwyrndrobwllllantysiliogogogoch is the name of a very small town on the island of Anglesea, off the coast of Wales. Reduced to English it means Church of St. Mary in a hollow of white hazel near a whirlpool and near St. Tysilios Church which is near a red cave.

Corns cannot exist when Holloway's Corn Remover is applied to them, because it goes to the root and kills the growth.

Suitable Air Ports

Municipalities Must Consider Size Of Machine To Be Accommodated

Every municipality from coast to coast has the matter of building an airport under consideration or has completed arrangements for an airport. Letters reaching Canadian Aviation indicate that adequate provisions for the expansion which will be necessary within a very short time have in many cases been neglected.

Municipal officials should be advised that a landing field suitable for instruction planes and even for small transport machines will be totally inadequate for the accommodation of the large type of machines which will constitute the standard equipment of the large air transportation companies.

A city with landing facilities unsuitable for this type of machine cannot be included in the plans now under consideration by the transport companies. Inadequate landing facilities will just as surely prevent a municipality from being included as a port-of-call by large transport machines as would a harbor 20 feet deep exclude ships with a 30-foot draft.

Municipal officials should co-operate with the department at Ottawa and furthermore secure the services of a competent airport engineer, so that they will not only get on the air map but will find themselves in a position to stay there.

Surveying With Explosives

Earthquakes manufactured by engineers are being used in surveying the right-of-way of the proposed Turkestan-Siberian Railway. Explosives are set off under the ground and the resulting vibration accurately traced so that the character of the underlying strata may be determined. A special seismograph traces the vibrations on photographic paper with an accuracy that could not be attained by other methods.

Mamie—"He's got a lot of culture, hasn't he?"

Mae—"Yes, but it's all physical."

Little Helps For This Week

"Now therefore keep thy sorrow to thyself and bear with a good courage that which hath befallen thee."—Esdras x. 15.

The patient heart,
That bears its heavy cross apart
And still makes known
Its burden unto Christ alone,—
To this one His sweet spirit brings
Most dear and gracious comfortings.
—Mary Bradley.

It is not in vain that you are called to pass through great trials and sufferings. They never leave you what they found you. God forbid they should. But how you bear them, what they lead you to do and to feel will vary according to your own attitude to them. Their trend and purpose are towards those two poles of duty, God and humanity, but it is our weakness and fault that often we do not read aright their meaning. Suffering may leave us hard, selfish, and complaining, or it may lead us into the mysteries of Providence, and into the very fellowship of God.
—Theodore T. Munger.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Eclectric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Eclectric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

Sandy: That car I bought from you won't go.

Salesman: Well, sir, you said you wanted one that wouldn't use much gasoline.

Minard's Liniment for Insect Bites.

All universities have faculties, including the faculty of asking exam-questions which some students can't answer.

"How Much Water Should Baby Get?" A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays that during the first six months babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable, the recipe is on the wrapper and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

CO-OPERATIVE CREDIT ASSOCIATIONS

IT HAS been our intention for the past week or two to give a brief outline of Alberta Co-operative Associations, but partly owing to having so many other things to attend to and partly because information such as would be suitable for general reading is not easy to procure, we have not done so.

Even now, we have little to offer in the way of information as to how the co-operative credit associations are working out elsewhere, and can only in a very general manner, describe what they are.

In brief, a co-operative credit association is a company of not less than fifteen farmers who have agreed to purchase stock in the association to the extent of not less than one hundred and fifty dollars. The payment of stock may be made in installments, but at least twenty per cent must be paid with application.

Members of the association are entitled to make application for loans which application is considered by a board of directors composed of members of the association.

The Provincial Government assists an association by guaranteeing funds as the circumstances warrants, a provincial supervisor of co-operative credit associations already having been appointed. This supervisor, guided by much dealing with farmers assists the applicant by advice and suggestion along various lines for the applicant's financial benefit.

The idea of a credit association, as we understand it, is to help the man who is morally sound, but who may through no fault of his own have run into financial difficulties. This rather crudely expresses it, as the regular and well to do intermittent users of borrowed capital form the majority of association members. But a credit association, so we understand, is inclined to be a little more lenient in its attitude towards the borrower than an out and out financial organization could afford to be.

One feature of interest in connection with associations is that a borrower from an association forfeits his privileges under the exemption act, and in the event of failure to pay, the association may claim, by due process of law, all he has.

A short time ago, Mr. McCoy, who is at present Supervisor of Credit Associations in Alberta, was at Tofield, and spoke on this subject. At that meeting a committee was formed to find out whether organization was desired here. Mr. Johnston Ferguson is heading that committee and anyone desirous of getting further information, should apply to him.

!NOTICE! to Wheat Pool Members

The Second Series Contract contains a clause which provides that on and after August 1, 1928, any member desirous of renewing his membership under the Second Series Contract will be required to pay the sum of $2.00.

Joining The Wheat Pool Is Good Business

A Toronto Business Man, Owner of Alberta Farm Land, Says He Would Not Think of Staying Out of the Alberta Wheat Pool.

J. T. Todd, general manager of the J. T. Todd Lumber Company, Toronto, Ontario, is the owner of a large tract of land in the Crowfoot district in Alberta. He is a staunch member of the Alberta Wheat Pool. In fact, so interested is Mr. Todd in the Pool's development that he is endeavoring to persuade non-Pool neighbors to join the organization.

In a recent letter to a neighbor at Crowfoot, Mr. Todd says:

"I have often wondered if you had joined the Wheat Pool. If you have not, I believe if you will consider this matter seriously you will find it is much to your interest to be a member of the Pool. As you know the Pool is only the farmer in business for himself, and the more support the Pool has the better it is going to do for all of us. It is simply a cold-blooded proposition so far as we are concerned and we, like everyone else in business, want to get as much for our labor and wheat as we can. This is a day of co-operation and not only the farmers are doing this but the largest industries, such as automobile and steel, are doing the same. The people in the steel and automobile business are considered to be the brainiest in the world and they are only following the lead which the farmers have pointed out to them during the last five years. Stores are also doing the same.

"I believe if you will consider this matter from your own best interest and the best interests of the community and farmers at large you will decide that YOU CANNOT AFFORD NOT TO BE A POOL MEMBER. I would not think of being out of the Pool myself and I just purchased 320 more acres of land this spring, and as you know, 200 acres of that is now broken and will be in crop next year. All of my land is in the Pool, and in fact, if I had ten times as much land as I have it could be handled in no other way than through the Pool.

"I would like to see you and all the other fellows in the Crowfoot district members of the Pool. If enough would come in we could have an elevator at Crowfoot and that is what we want in time. I believe that with the way the movement is growing we will eventually have it."

Sign A Wheat Pool CONTRACT Now

WHEAT POOL NEWS BULLETIN

The cut-off date for deliveries of wheat from the 1927 crop to the Alberta Wheat Pool is Monday, July 16th. That will be the last day that wheat will be received for the 1927 pool. Cars of wheat billed out on that day and street wheat delivered on that day at country elevators will be included in the 1927 pool. All wheat received after that date goes into the 1928 pool.

The Board of Directors of the Alberta Wheat Pool have decided to allow 6 per cent interest on commercial reserve accumulated by the organization. This interest will date from August 31st, 1927, and the payment will be made as soon as possible.

Lord Rodney who farms a thousand acres of land in the Edmonton district has signed a wheat pool contract. The Duke of Sutherland's 7,000 acre farm at Brooks has also been placed under a Second Series Contract.

FIRST AID IN CASES OF POISONING

As with many other emergencies in life, the treatment of a case of poisoning is largely a matter of common sense, of keeping one's head and of seeing that others do so too.

To send for a doctor is of course one of the first and most important steps to be taken in a case of poisoning. But a doctor may not be found at once, and meanwhile life may go. It need not do so in many cases if the person in charge knows what to do. It is not expected that all should know the antidote to every poison, but all should know the general principles involved.

If it is a case of attempted suicide, no bottle, half empty or full should be thrown away. The same applies to vomited matter and everything else the doctor may want to see when he arrives. Do not leave the patient alone.

There are two general rules to follow: Get rid of the poison, administer the antidote. If the poison has been taken by mouth as it usually is, empty the stomach. Induce vomiting by tickling the throat or by giving an emetic of one tablespoonful of mustard to one half pint of warm water, or two tablespoonfuls of salt to the same quantity. When the stomach is empty give the antidote. Although most antidotes are peculiar to certain poisons, there are some so called general antidotes. One of these that can be had at a moment's notice is albumin in the form of the white of an egg. Give two or three whites in a glass of warm milk. Another general antidote is soap which may be dissolved in four times its bulk of hot water, the patient being made to swallow the thick suds in large quantities.

Always remember that the patient may be on the verge of collapse and that the treatment must not be so heroic as to exhaust him unnecessarily. He should be warmly covered, allowed to drink plenty of barley water, and if throat and mouth are inflamed relief can be obtained by sucking gum.

Free booklets on first aid may be obtained from the Red Cross Society 408, Civic Block, Edmonton, Alta.

Issue Regulations for Tourist Camps

Regulations governing the operation of tourist and recreational camps in Alberta have recently been passed by the Lieutenant Governor in Council and are now being prepared for distribution to the owners or operators of such camps and to the secretaries of all health organizations in the province by the Provincial Board of Health. Posters displaying these regulations are also being sent to the operators of camps.

"Waterhole" Re-named "Fairview"

The Town of Waterhole in the Peace River country, it is announced, will known in future as Fairview and will occupy a site some five miles from its present location. The townsite of Fairview which has just been laid out is at the end of steel on the extension of the Central Canada Railway being constructed southwest of Whitelaw. The new name is said to be a happy choice as the town in its new location will command a view over a wide stretch of country across the Peace towards Spirit River.

Social Hygiene Lectures at Sarcee Camp

During the week of July 1st to 8th a new feature of social hygiene work in the Province was established by F. T. Cook lecturer for the Provincial Department of Health, who conducted a series of lectures and moving pictures at Sarcee military camp.

The military authorities co-operated in the work to the extent of providing places for the meetings and lending their moral support to the movement with the result that the meetings were well attended and it is felt that a great deal of good was accomplished. It is hoped that this work under the direction of the Department of Health may become a regular feature in future military [illegible]

Dr. R. C. Wallace Named as University President

The appointment of Dr. R. C. Wallace, Professor of Geology at the University of Manitoba to the presidency of the University of Alberta to succeed Dr. H. M. Tory who recently resigned to become chairman of the National Research Council of Canada has been announced during the past week by Hon. Perin Baker, Minister of Education, in the absence of Premier Brownlee.

Dr. Wallace brings to the position of President not only a high degree of scholarship, but also a wide experience in administrative work outside the usual field of university activities. During the past few years he has held the post of Commissioner of Mines for the Province of Manitoba, and he is also a past president of the Canadian Institute of Mining and Metallurgy. It is felt that Dr. Wallace's training and experience along geological lines will be of considerable value in connection with many of the problems relating to the development of Alberta's mineral and other resources.

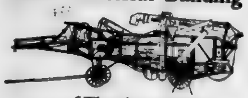
80 Years of Successful Building



of Threshing Machines

The 1928 Red River Special Line represents the result of 80 years of continuous building of Threshing Machines by the Nichols & Shepard Company.

Only by keeping faith with the farmers and threshermen of America has it been possible for this company to grow from a small blacksmith shop in 1848 to its present great factory with branch houses in every grain growing center.

And what a machine this year's machine is! The finest, fastest, cleanest thresher ever offered to agricultural America. Hyatt Roller Bearings at every main bearing point — Alemite-Zerk Lubrication—a great new feature, Weatherproof Fiber Pulleys on every high speed drive, Armco Ingot Iron in all sheet metal parts, Bridge Truss Construction, French & Hecht Wheels, all in a thresher built around the famous 4 Threshermen.

These famous 4 Threshermen, The Big Cylinder, the Man Behind the Gun, the Beating Shakers, and the Steel Winged Beater are the greatest combination ever devised for getting the grain from the straw.

Identifying the "Finest of Low Priced Sixes"

THE Pontiac emblem, now a familiar sight on every highway, is the distinguishing mark of the world's finest low-priced six.

It identifies the smoothness of Pontiac's Six-cylinder engine, with its new improved G-M-R cylinder-head . . the enduring qualities of Pontiac's sturdy chassis . . the easy-riding comfort of Pontiac's Lovejoy Shock-Absorbers . . the countless refinements of engineering and construction that spell "quality" in a motor-car.

And, just beside the hood of the New Series Pontiac Six is another symbol of a fine automobile . . the "Body by Fisher" emblem, with all that it implies of luxury, craftsmanship and stylish beauty. Pontiac is the lowest-priced six which can claim the distinction of "Body by Fisher".

Whenever you see the familiar "Indian Head" emblem, and say "There goes the New Pontiac Six", you are identifying, beyond doubt, the world's finest of low-priced sixes. P-14-7-28C

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

The Victory Tower of the Dominion Parliament Buildings at Ottawa, from which the stirring message of the carillon rings forth.

EVERY TWO MINUTES OF EVERY BUSINESS DAY · · · SOMEONE IN CANADA BUYS A NEW GENERAL MOTORS CAR

SINCE the days of Confederation, General Motors of Canada Limited has been supplying Canada with transportation. Each year as requirements have multiplied, the scope of General Motors service has widened . . the quality of General Motors cars has steadily improved. Each year more Canadians have looked to General Motors for better automobiles, until now, every two minutes of every business day, someone in Canada buys a new General Motors car.

These cars are bought by people you know . . by people like yourself . . for the very reasons which would guide you in the choice of a car.

They are bought because they are the product of the most progressive organization in the world's most progressive industry . . because they reflect the General Motors policy of constant advancement . . because they are *better* cars. . .

They represent the latest developments of the world's leading automotive research laboratory, offering these developments to the public as soon as they become available. They are proved in advance, at the expense of General Motors, not the public. They are better cars because they are Canadian cars.

And they embody greater value because of General Motors money-saving methods of quantity buying and volume production.

This popularity of General Motors cars holds more than a passing interest for the Canadian car buyer . . for General Motors utilizes increased demand to reduce production costs and to offer still more outstanding automobile value. GM-1928

The Immigration Problem

Probably no single question affecting the national life of Canada has called for and received greater attention within recent months than the subject of immigration. It has been debated in church assemblies, Labor Unions, by ex-service bodies in Parliament and Legislatures, in the press and upon the public platform. Committees have spent weeks and months studying the problem and have presented reports. The net result is that the Government is to be advised and urged to adopt this policy and that policy, each one equally destructive of the other.

On the one hand there are those who contend that only those immigrants who will engage in agriculture should be allowed to enter the Dominion and that all others, laborers and those who naturally locate in cities and large centres of population should be excluded. Others would throw the doors wide open to all classes providing only that they leant be healthy both morally and physically able and willing to work and content to abide by and uphold the laws of the Dominion

Then there are those who would draw a purely racial line of demarkation. They would entirely exclude the so-called "yellow" races; they would bar the negro, they would put a stop to the admission of immigrants from the countries of southern and central Europe in a word they would greatly restrict all immigration except that of people born and bred in the British Isles and speaking the English language

Still another group places the chief emphasis upon the religion of immigrants. They are opposed to those of other religions than their own Even if the immigrant be from the British Isles they have slight welcome for him unless he also be of their religious faith

So the Government is told that only agriculturists should be admitted into the Dominion and then only provided they are of the white race, and of certain religious faiths shall from British Isles, and speak the English language Provided they are of British descent, such immigrants might also be admitted to Canada from the United States

To begin with no Government under the British flag and having the slightest regard for that cardinal British principle liberty of conscience will recognize or enforce any bar to immigration based on the religious convictions of the intending immigrant. To do so would be abhorrent to the great mass of the Canadian people and would be equally shocking to the world that Canada was no longer British

It is equally true that an overwhelming majority of the people of Canada, and this includes all Governments, would like to see a large increase in immigration from the British Isles Every possible effort is put forth to accomplish this result Why is it, then, that the annual inflow of British immigrants is not much larger?

There are many reasons, but a few may be cited The number of the British agricultural class is not large and the surplus available for emigration is practically negligible British agriculturists can be well employed at home

In the British Isles the women largely outnumber the men. Some millions of British women are condemned to spinsterhood. For this and other reasons they are invading many employment fields formerly occupied by men and the necessities of the war gave a great impetus to this movement

The effect is seen in the rapidly declining birth-rate In England and Wales the birth-rate fell last year to 18.7 per thousand of the population as compared with 24.1 in 1913, the last year before the war In other words, this birth-rate has declined one-third in the short space of fifteen years There is not, therefore the same tremendous urge to emigrate as we have seen in years gone by

As a matter of cold fact, the birth-rate is declining among all the white nations It has long been declining in France. It is declining in Italy, Germany the United States, Canada. Observers and students in Great Britain unlike some in Canada, do not appear worried over the inter-mingling of the white people of different nationalities, but they do entertain some fear that with declining birth-rates almost universal among the peoples of the white nations the white race will lose its supremacy and world leadership. They foresee the day when the yeoto law of the United States will be numerously enforced, let alone a surplus to emigrate

Notwithstanding the difficulties in the way and the many conflicting views that prevail it is agreed by most Canadians that this Dominion is in need of a much larger population. A population which is not being provided by natural increase as a result of the prevailing low birth-rate If immigrants are to come to Canada or to be increased then there must be some compromise effected between those who insist on agricultural settlers only, and those who would admit other able bodied workers, also compromise between those who would admit only those who would serve to swell the ranks of their particular religious denomination, and some compromise on the terms that qualify to speak English is the hallmark of good citizenship and the only guarantee of success

The man who says what he thinks will hear many things that he dislikes

TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's Vegetable Compound

Asbestos Mines, Quebec —"After the birth of my second child I was always tired, nervous, irritable, nervous and weak and had headaches, backaches and terrible pains every month. I suffered three years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and soon felt like a new world of good. I would not be without it in the house now, and have another six bottles in. I recommend it to every woman I know." — Mrs. T. BARRITT, Box 154, Asbestos Mines, Quebec.

W. N. U. 1743

The Ministry Of Agriculture

Hon. Mr. Motherwell Signally Honored By the Province Of Quebec

The honor conferred upon Hon. W R Motherwell, Dominion Minister of Agriculture, by the Quebec provincial government, must surely be a particularly gratifying mark of distinction At the recent convention of the Society of Canadian Technical Agriculturists, the province of Quebec bestowed the order of Commander of Agricultural Merit upon Mr Motherwell.

Many instances in the past have been honored for having achieved great things in war and in diplomacy Mr Motherwell's distinction has been won in the realm of the plowshare rather than of the sword Millions of blades are annually unsheathed in Canada under the energetic sage of the minister, but they are blades of wheat Instead of the rattle of musketry and the boom of cannon, the concerning of Mr Motherwell's army is marshalled by reapers, tractors and threshing machines It is his boast to honor such a generalship of peace.—Ottawa Citizen.

WAS VERY DELICATE

New Health Came Through Using Dr. Williams' Pink Pills

Mrs. Chas of Miller, Lourdes, N.S., says that for more than a year she has reason to be thankful for what Dr Williams' Pink Pills did for her She says "I was a very delicate girl, growing to womanhood when I first found benefit from Dr Williams' Pink Pills I suffered from headache cramps and pains every month and did not seem to get strong and well at all One day when I was very sick and discouraged I asked my self this question "Why not try Dr. Williams' Pink Pills? I have seen what they did for a friend of mine" So I sent and got a few boxes and I began their use and I soon found that they were helping me By the time I had taken them all I felt an altogether different girl My pale cheeks and lips resumed pink and pains. Then a few months later I was taken down with la grippe and was left very weak for six weeks. Again I started taking Dr Williams' Pink Pills, and again they brought me good health, for I have since been able to attend to all my own work, as you see I have to have a good health, and I depend upon these pills to keep me on Now I always recommend Dr Williams' Pink Pills to any of my friends who may be sickly."

If you are suffering from any complaint due to poor, watery blood or weak nerves, begin taking Dr. Williams' Pink Pills to-day and note how your strength and health will improve. You can get these pills through any dealer in medicine, or at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canada's Mining Industry

The enthusiasm in the ever increasing mineral enterprises of Canada is now over 706 millions of dollars, and the net increase during the past decade of products of the mines exceeds one-third of the total investment. During the past five years $130,000,000 has gone into the mining industries of Canada.

Miller's Worm Powders are sweet and palatable to children, who crave the sweetness of Miller's Worm Powders, will certainly bring worm troubles to an end. They are a thoroughly reliable and stimulating medicine, correcting the disorders of the stomach that the worms cause and imparting a healthy tone to the system most beneficial to development.

Linen Aeroplanes

Metallized linen, or some such fabric, may bring about a complete change in the construction of aircraft. It has a tensile strength of over 14,000 lbs per foot width, and is very light An aeroplane built of this material weighs, yet considerably stronger, could be constructed from such a fabric, it is said, while petrol tins for an Atlantic flight could be made of metallized material lighter than the thinnest aluminium.

Recipes For This Week

(By Betty Darling)

CREAMED PEAS

1 can peas drained or
2 cups fresh peas.
2 cups milk.
4 tablespoons flour
4 tablespoons butter.
1 teaspoon salt. Pepper.

Make cream sauce by melting the butter, add the flour to make a smooth paste. Add the milk, one-half at a time, stir to avoid lumps Add seasoning and peas. Heat in double boiler until the peas are thoroughly warmed.

ORANGE PENN HEELS

1 cup flour.
½ teaspoon baking-powder
½ teaspoon salt.
2 tablespoons butter.
1 egg.
2 tablespoons sugar
½ tablespoon orange juice
Grated orange rind.

Mix and sift flour, baking-powder and salt, rub in one tablespoon butter, or other shortening, and moisten to a dough with milk. Roll thin; spread remaining butter, sprinkle with sugar mixed with orange juice and rind, and roll up like a jelly-roll Cut in rolls, and place, cut side up, in buttered muffin-pans, sprinkle with remaining sugar, and bake in a hot oven. When small and dainty, these are good for afternoon tea.

Nothing As Good For Asthma

Asthma remedies come and go but every year the sales of the original Dr. J. D. Kellogg's Asthma Remedy grow greater and greater. No further evidence could be asked of its remarkable merit. It is forever. It is always at the same unvarying quality which the sufferer learns and soon learns to know Do not suffer another day. Get this splendid remedy today.

A Labor Saving Machine

New Device Relieves Glasses At Rate Of Ten a Minute

A device which washes, sterilizes, dries and polishes drinking glasses at the rate of ten a minute, has been invented by a young Canadian.

A tumbler placed on a spindle, is embraced both inside and outside by revolving rubber squeegees. As the spindle is made to rotate by an electric motor, a flow of fresh sterilized water is played over the entire surface of the glass. The glass is then transferred to a second spindle, on which it is dried and polished by a similar pair of squeegees. In addition to saving labor, the machine is said to reduce breakages to a minimum.

Know Her Guinea

Most guineas are pretty much alike to the average man, but the guinea purposes from South-western Texas, which is only one real onion and that is the variety that grows in the sandy dirt of that State. To give the sales of the Bermuda Texans listing near the Rio Grande have for their native onions a woman recently arrived in New York with a trunkful which she turned over to the chef of the hotel where she stayed. She let it be known that the Texas onions were to be served with dinner each evening. They failed and learned, and she could hardly have the dishes brought her, they were so pale. Her face was badly disfigured. The onions lured near two years.

I read an advertisement for Cuticura and sent for a sample. Before I purchased some and at the end of three months she was healed.—(Signed) Mrs. Homer Reynolds, Nash Stream, N. H., March 22, 1927.

Cuticura Soap, Ointment and Talcum are ideal for daily toilet uses.

Cuticura Soap shaves without mug.

Train Searches For Bumps

English Railway's Method of Measuring Where Tracks Need Attention

A mysterious train travels on the main lines of the Great Western Railway, England, and yet it does not appear in any time-tables, and never stops to pick up passengers

Its duty is to search for bumps in the permanent way and runs are made from Paddington and Newport The coaches consist of rolling stock of various kinds fitted with different bogies

An observer stands over each bogie and when he feels the slightest jolt he releases a splash of white-wash on the track as a guide that the spot needs attention. Various colored washes are used, such as green red white, blue and yellow, each signifying different kind of fault

A machine in the back of the train makes a graph of all the jolts, and on the return journey skips are made to examine the line where wash has been dropped. Experts then take measurements and notes for future repairs.

Sunburn? Use Minard's Liniment.

PIMPLES LASTED OVER 2 YEARS

Very Large and Painful. Healed by Cuticura.

"My daughter's face was covered with pimples that were hard, very large and red. They festered and were so thick that you could not see a pin's head between them. She had them over two years. I read an advertisement for Cuticura and sent for a sample. Before I purchased some and at the end of three months she was healed."—(Signed) Mrs. Homer Reynolds, Nash Stream, N. H., March 22, 1927.

Cuticura Soap, Ointment and Talcum are ideal for daily toilet uses.

Every Home Needs Minard's Liniment.

Bingo Trophy To Canada

Joe Wright, Toronto, Wins Diamond Sculls At Henley

For the second time in history the Diamond Sculls, premier event for amateurs of amateur scullers in the world, was won by a Canadian, when Joe Wright, of the Argonaut Rowing Club, Toronto, defeated R. Y. Lee, of Worcester College, Oxford, in the final heat by a full length.

In avenging his unlucky defeat of 1927, the 21-year-old Argonaut oarsman still takes the premier amateur single sculls to Canada for the first time since 1904 when Lou Scholes, of Toronto, won the honor.

The Torontonian from whom victory was snatched by a misfortune in last year's final against Lee, accomplished his revenge 42 seconds faster than Lee's time last year, when the Canadian craft met disaster in 10 feet from the finishing point.

Ever since Wright's defeat in 1927, when he showed his superiority over Lee only to lose the race when his oar became entangled in a punt rope when he was within a few yards of triumph, the Argo sculler had expressed his determination to vindicate himself. It was his hope that the draw would keep Lee and himself in different halves so they would be enabled to become pitted against each other in the final race.

Captain Lou Scholes, of Toronto, was the only other Canadian to win the Henley singles classic, doing the event in 1904. Wright is the son of Joe Wright, Sr., famous old Argo coach, and who was a famous double sculler in his younger days Joe Wright, Sr., now an alderman for Toronto, was formerly a rowing coach at several universities in the U.S.

Caring For Edison

Canadian Government Wishes Over People In Newfoundland

North America, one must assume, has got its affairs into very good order when, at a meeting of the Commonwealth, the Canadian Government imports reindeer to supply food for Newfoundland in the days of starvation in distant and desolate regions along the Mackenzie River. Not the agreement part of this vast territory lies outside the attention of authorities Very little Canada knows of either Eskimos of the North, or Labrador with a massive mustache and dash in the face. Yet even the nomads along the Arctic Ocean are under observation.

A University dramatic society intended to let Bernard Shaw that they would perform his plays whether he would grant permission.

His reply was brief: "You can't, but you may."

The Family Physician.—The good doctor is always worth his fee. But it is not always worth what he asks. The one just when you want him, in such cases, commonly suggests the use of reliable home remedies, such as Dr. Thomas' Eclectric Oil, which is wonderfully effective in easing inflammatory pains and in healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

X-Ray Prevents Smuggling

A terror for smugglers is at the new electrical clinic which has been opened in Baker Street, London It is a new stereoscopic X-Ray apparatus from Germany which will show exactly what is in the box full of goods or any article lodged in a human body. Packages or anything made of wood could be X-rayed, thus saving customs officers unpacking them.

Here is a treat that can't be beat! Delicate and pleasing as a confection

Peppermint Flavor

Slenderness and Health!

Everyone feels the need of a tonic at this season. Nothing is so good as Wincarnis in a wineglass of cold water. Wincarnis is better than cod liver oil, better than malt extract, better than tonic wine. Wincarnis is a delicious tonic wine.

Liquor Problem in Australia

New South Wales Will Vote On Referendum September 1st

New South Wales will come to grips with the liquor problem when it votes September 1 on a referendum offering the option of continued open sale of liquor and prohibition.

If prohibition is defeated the Government will review the whole position with a view to adopting a course which will effectively minimize the liquor traffic now, according to Hon. T. J. Ley, minister of justice.

Meanwhile the Government is being waited upon by deputations demanding everything from drastic new dry legislation to a moderate form of Government control, such as prevails in some provinces in Canada.

No child should be allowed to suffer from worms when prompt relief can be got in a simple but sure remedy—Mother Graves' Worm Exterminator.

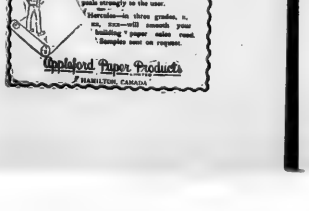
Artificial Wool

London Evening Standard says he learns that a fine quality of artificial wool, for using the despair of research scientists, now is an accomplished fact, and shortly will be manufactured on a large scale at a low cost

After a Shave.

After a shave, lotion your face with Minard's. Soothing and cool. Excellent for cuts.

MINARD'S LINIMENT



RESCUE EFFECTED OF MEMBERS OF THE ITALIA CREW

London.—Despatches received here from Virgo Bay and from Rome indicate that the members of the Italia crew, former companions of General Nobile, who have been in desperate need of help, were rescued by the Russian rebel ship Krassin, and that three other men, apparently members of a dog sled expedition to rescue the Italia crew, have been sighted.

This news, coupled with the news from Northeast Land, that Finn Malmgren and Zappi had been rescued after 42 days of wandering on Arctic ice and the body of the latter identified, has been received, constituted the most successful day of rescue operations since the dirigible Italia crashed May 25, after a flight over the North Pole.

Battling her way through a desert of broken ice, the Krassin has pushed her nose to the point far off Northeast Land where a tiny tent painted red marked the camp of four members of the crew of the wrecked dirigible Italia.

The starved, frantic men who had battled starvation and freezing temperatures since May 25, when their aboard, it was announced in advices from Rome.

The second group sighted was believed to be the party men who set out by dog sled to find the missing Italia crew and were lost. It was believed this party was under the command of Captain Dora, an explorer, who set out with two companions.

The Krassin ploughed her way to the Virgin Bay after a terrific struggle against the elements, which at times reached hurricane force. Ice conditions were described as the worst ever encountered by the vessel in her many years of service in the Arctic.

The Russian ship at the time was steaming nearly the exact spot where the Italia crashed on May 25, hitting one of her crew, injuring two seriously, and drifting away in a mist which at times obscured the vessel.

The survivors in the Virgin Bay group who were rescued, were identified as Lieut. Viglieri, Italian navy navigator, Giuseppe Biagi, radio operator, who had kept the group in touch with the world; Filippo Trabaui, engineer; and Professor Behounek, Czech physicist.

The group had been sending radio messages to the Krassin reporting their growing discouragement and it was believed the Soviet ship had such grave condition that only speedy medical attention would save their lives.

Meeting in Regina Of Noted Barristers

Representatives Attending From England, France, Irish Free State and U.S.

Regina.—Preparations for the most brilliant assemblage of legal talent ever held in Canada are under here. Next month, the 13th annual meeting of the Canadian Bar Association will be held in this city, with headquarters in the Hotel Saskatchewan.

From the Maritimes and the Pacific Coast, surrounding points as well come for the yearly conference From France, Great Britain, the Irish Free State and the United States, representatives of other legal bodies will be present to add zest and lustre to the great meeting The convention will last three days, August 29, 30 and 31.

Hon. Mr. Justice W. F. A. Turgeon, president of the Canadian Bar Association, will be in the chair when the meeting opens at 10 a.m. on August 29. He was elected at last year's annual meeting, held in Toronto.

Climber Conquers Mount Scott

Philadelphia Man With Three Companions Reach Summit

Jasper Park Lodge, Alta.—For the first time in the history of mountaineering the peak in Jasper National Park, named after the pioneer of Indian Affairs in the Canadian Northwest, has been conquered. The feat was accomplished on Sunday by Dr. J. Monroe Thorington, of Philadelphia, noted alpinist and author of "The Glittering Mountains of Canada." With him were Dr. Max Strusia, also of Philadelphia, a member of both the American and the Italian Alpine Clubs; William Hain, south, of Newhaven, Conn., and Julian Hillhouse, of Newton, Conn. The altitude of Scott is 10,826 feet.

Lord Byng's Appointment

Is Considered Measure To Restore Confidence In Police Force

London.—The appointment of Viscount Byng, of Vimy, as commissioner of Metropolitan police, announced by the government to have been a measure to restore confidence in the police force, was sustained in Parliament when a labor motion of censure was defeated, 231 to 166.

Sir William Joynson-Hicks, the Home Secretary, in making the announcement, declared that no shadow was the public faith in the police department that he had reluctantly called upon Lord Byng because the force needed, not re-organization, but re-inspiration.

Labor's opposition to the appointment of Lord Byng was based on the ground that it might lead to militarism the forces. This Sir William disliked.

Worcestershire Actor and Miss Milan Widower, the woman Labor member, although deploring on the propriety of Lord Byng's appointment found themselves in unison in expressing satisfaction at the resignation of Sir William Horwood, the retiring commissioner, who, they said, had tried to drive policewomen from the force and whose policy under his care were concerned had been rescinded.

Lord Byng's appointment was announced a few weeks after the dismissal by Ramsay MacDonald, premier, against Miss Irene Savidge and Sir Leo Money, who were arrested in Hyde Park for soliciting, during Sir Savidge's examination the accusation was made that the police had used the third degree methods.

Cruiser Dauntless Relocated

Will Be Placed In Halifax Drydock Within Few Months

Halifax, N.S.—The British light cruiser "Dauntless," which hung up for a year on a ledge of rock at the entrances to Halifax harbor on July 8, 1927, and which was the object of strenuous preparation by the wrecking crew of the Halifax shipyards Ltd., is expected to be placed in dry dock in the harbor and tied up in the piers of the Halifax shipyards Ltd. at her berth in the drydock, and will be kept afloat by the compressed air pumps which were installed on her decks a week ago and which have been kept going continuously ever since.

The Dauntless will be placed in the drydock by the Halifax shipyards, where, it is estimated, the repairs will be kept 200 men busy for months. It had been ascertained early that the rocks had torn a 50 foot hole in the cruiser's bottom.

Thousands of persons gathered on the Halifax harbor front when a rock crusher contract that only speedy medical attention would save their lives.

Toronto Mail Robbery

Five Men Under Arrest Charged With Complicity

Toronto.—Five men are under arrest here charged with complicity in the robbery of the Canadian National Railways mail car at the station in the early hours of June 20, when $30,000 was stolen from C. D. Draper, chief of police. One woman is held on a charge of vagrancy and another as a material witness.

Although it has been generally believed that the gang that made arrests had been made confirmation has not been obtainable from the police.

Finlay McLeod, Sr., 48, of Toronto; Everett McMahon, 23, banker of Detroit, and John Brown, alias Sullivan, 26, Toronto cigar store clerk, are charged with robbery. Finlay McLeod, Jr., 24, Toronto newspaperman, and Jack McLeod, 42, of Toronto, son and brother respectively of Finlay McLeod, Sr., face charges of receiving stolen goods.

Wide Tariff Proposals

Intercolonial Tariff Proposals

Ottawa.—Hon. James Robb Minister of Finance, has left Quebec for a holiday in Ireland. While there he will look into the new tariff proposals of the British State and he is expected to take up with William Cosgrave, president of the executive Dominion Government entering by Ireland the provisions of the Canadian preferential tariff on Empire goods, subject to reciprocal treatment for Canadian goods on the part of the Free State.

To Study Canadian Methods

London.—With the object of studying commercial undertakings and industries in Canada and the United States, fifty representatives of the National Chamber of Trade and Commerce, have left Southampton for Montreal. His stay will be spent making a tour of the last commission.

Might Be From Tropics

Unusual Exhibit Will Be Seen At Edmonton Exhibition

Edmonton.—Grapes, sorghum, sugar cane, soy beans and tobacco. Such a list reads like the exports of some tropical island, or at the very least, the products of a southern state.

Visitors to the Edmonton Exhibition will have the opportunity of checking up on the list, for the products mentioned will be included in the entry from the C.P.R. Irrigation Development farm at Brooks, Alberta, which will be staged in the Agricultural building

Throughout the week fresh supplies of the products quoted will be brought to Edmonton from Brooks in order to keep the display fresh and attractive.

Successor Not Named

Manitoba Government Has Not Filled Dr. Walker's Position

Winnipeg.—No decision as to who will succeed Dr. R. C. Wallace, of the University, as commissioner of mines and natural resources has been reached by the provincial government.

Dr Wallace was recently given the post of president of the University of Alberta, and has relinquished his position as head of the geology department of the university of Manitoba to take over his new post sometime in September.

MANITOBA TO OBTAIN CONTROL OF RESOURCES

Government Will Be Formed In Winnipeg Next Month

Under the agreement the vexed question of financial adjustments is left to a committee which will be appointed by the Federal Government and the representatives of that of Manitoba. The two governments have agreed on the following personnel for the committee: Dominion commission: Hon. W. A. Turgeon, Chief Justice Supreme Court of Appeal; Hon. T. A. Crerar, of Winnipeg; and Charles M. Bowman, of Ottawa.

Mr Crerar occupied the post of minister of agriculture at Ottawa for some time and was also leader of the Progressive Party. Mr. Bowman is a director of the Mutual Life Insurance Company, of Canada.

Mr. King announced that these gentlemen would be appraised immediately of the agreement and that they would be invited to accept appointment.

WEST'S NEW PLAYGROUND

Prince Albert National Park, Sask., 2,500 miles north of the city of Winnipeg, is to be opened officially on August 10, bequeathing to the people of Western Canada one of the finest playgrounds on the continent for hunters, enclosing 1,500 square miles of forest, lake and stream, where all is to be found that goes to make a holiday memorable.

Prince Albert National Park lies about 50 miles north of the city of Prince Albert, which is served by many lines of the Canadian National Railways. A fine motor road runs from the city to Lake Waskesiu, in the heart of the park, where the opening ceremonies will be performed by the Rt Hon W. L. M. King, Premier of Canada. Provincially on August 10, bequeathing to the people of Western Canada one of the finest playgrounds on the continent for hunters, enclosing 1,500 square miles of forest, lake and stream, where all is to be found that goes to make a holiday memorable.

A J Cook, secretary of the Miners' Federation in Great Britain, who is the centre of the latest industrial disturbance in the old country. He bitterly attacks the industrial peace policy of the Labor government, and in return the Miners' Federation has declared him while the Welsh Trades Union council has indicted him for disloyalty He is familiarly known as "Scissors" Cook

Prize List Drafted

Big Wheat Classes In World's Grain Show Awards

Regina, Sask. For the purpose of laying out a prize list for the World's Grain exhibition and conference to be held in Regina in 1932, a tentative classification has been prepared by a special committee nominated by Hon. R. H. Motherwell, Dominion minister of agriculture The committee is composed of J. A. Mooney, of Regina; L. H. Newman, C.S.T. Bredt, Hepburn, and C. H. Clark, all of Ottawa.

Exhibits of special classes the committee has in mind provision for $202,500 in prizes, six classes of wheat with $100 000 in prizes, two classes of oats, with $20,000 prizes; five classes of barley, with $15,000; two classes of flax, $2,000, five classes of rye, $3,000; four classes of buckwheat, $2,000; four classes of corn, $10,000; one class of rice, $2,000; two classes of millet, $3,000; one class of red clover, $1,000; one class of alsike, $1,000, one class each in sweet clover, timothy, brome grass, mangels and turnips, $500 each.

Hold Memorial Service

Brussels. An impressive memorial service for Captain Alfred Lowerstein was held in the Church of St. Michael and St Gudule A tall catafalque surrounded by candles had been erected in the nave of the church and the choir was draped in black. Madame Lowerstein, the son and members of the Lowerstein family were present as well as many persons prominent in Belgian life.

Marketing Surplus Wheat

Carry-over Of 1927 Crop May Be 60,000,000 Bushels

Fort William, Ont. A welcome revival in the movement of western grains and lumber for the coming harvest were main features of the June report of H. A. Orwell, statistician to the board of railway commissioners. A marked improvement developed toward the end of June in the marketing of the exportable surplus of Canadian wheat with the result that bake shipments increased substantially.

The increase in lake shipments was most welcome as providing storage space for most of the grain to come forward from western points

Lake shipments during July are expected to be quite heavy and will make room for the stocks at present in country elevators at interior points which must be shipped out to make room for the new crop.

At the end of June there were 70,000,000 bushels of wheat in store in the western division. Forty-two million bushels is brought to Fort William, and 28,000,000 had been sold and used for seed and another 30,000,000 bushels had been shipped out of the division Allowing for what was on hand on July 31 there would thus appear the net total of the 1927 wheat crop already accounted for is more than 120,000,000 bushels

It looks as if the carryover at the close of the present season would be very close to 60,000,000 bushels unless exports during the present month far exceed expectations.

The Manville Tragedy

Verdict Somber In Held As a Material Witness

Edmonton.—Developments in the Manville tragedy in which four people—the Becker farm were shot to death, were the arrest of Vernon Becker and the discovery that a British army rifle of .303 calibre was missed from the home of C. F. Stevenson of east, with $20,000 prize; five classes of barley, with $15,000; two classes of flax, $2,000, five classes of rye, $3,000; four classes of buckwheat, $2,000; four classes of corn, $10,000; one class of rice, $2,000; two classes of millet, $3,000; one class of red clover, $1,000; one class of alsike, $1,000, one class each in sweet clover, timothy, brome grass, mangels and turnips, $500 each.

Hold Memorial Service

Brussels. An impressive memorial service for Captain Alfred Lowerstein was held in the Church of St. Michael and St Gudule A tall catafalque surrounded by candles had been erected in the nave of the church and the choir was draped in black. Madame Lowerstein, the son and members of the Lowerstein family were present as well as many persons prominent in Belgian life.

PREMIER KING WILL VISIT WEST EARLY IN AUGUST

Ottawa A tentative schedule for the western trip of Premier Mackenzie King was issued from the office of the prime minister It is not Premier King's speaking schedule and he will not deliver speeches at the points mentioned. It is his reverse speak in Prince Albert is now contemplated where he attends the opening of the Prince Albert National Park and also the Prince Albert exhibition. His stay at the latter city of Prince Albert will comprise two days

Premier King will leave Ottawa on Thursday, August 2, arriving in Winnipeg the following day He will leave Winnipeg on Sunday, August 5 arriving in Brandon on Monday the same day Lieut Governor Brandon will reach Dauphin the same day August 7 and remain there until 9 pm

From Dauphin it proceeds to Prince Albert arriving there at on the morning of Wednesday, August 8 and leaving there on the evening of the same day Lieut Governor Brown will meet the party at Melfort and be advised that the question to be put to the ministry of pensions

Offered Home in China

Gives Urban Opportunity To Establish National Home

London.—An opportunity to build a national home in China is to be suggested to the city in Palestine was offered by the minister of the interior at Peking says a despatch from Peking to The London Daily Express

The offer was made as a result of representations made by the Chinese authorities of the application of a Zionist delegate who arrived in Peking and requested permission to collect funds for Palestine

"I do not propose to breath the proposal. I welcome the proposal and I wish to bring it to a successful conclusion."

Paris. The Council of Ministers has approved foreign minister Briand's reply to Secretary Kellogg's proposals to outlaw war which France formally agrees to sign.

It is reiterated that the reply while fully explaining France's viewpoint, does not put the explanations in the form of reservations

Awarded Medal Of Merit

Ottawa.—Constable Percy Lord Cormack, of Fort Saskatchewan, Alta., has been recommended for the medal of merit by the Boy Scouts' Association for his work for the Boy Scout movement over a period of seven years.

Lindbergh's Plane Catches Fire

Salt Lake City, Utah. — Col. Charles A. Lindbergh's plane caught fire on the field here, supposedly from a flooded carburetor, just as he was about to take off. P. Noonan, Lindbergh's mechanic, seized a fire extinguisher and put out the flames.

Hinchcliffe Case

Discussed By Press

Several Outspoken Articles Have Appeared In British Papers

London. The inquiry of the state of Mr. Hinchcliffe's death on the 9th of November by the gull of Lord Inchcape in connection with the disappearance of Miss MacKay, is the best late in company with Captain Walter Hinchcliffe, in an attempt to fly the Atlantic, while the family of Captain Hinchcliffe is not provided for has been the subject of many comments on newspaper articles lately and was brought up in the House of Commons by Major P. B Maxine Conservative, Twickenham South

Sir Samuel Hoare secretary of state for air said he understood Captain Hinchcliffe had received his full pension and disability retirement pay in connection with his war service

Major Maxine then suggested that Sir Samuel should make representations to the proper authorities that adequate provision should be made for Captain Hinchcliffe

Sir Samuel Hoare replied that as Hinchcliffe did not belong to the Royal Air Force, the matter was not in the hands of the air ministry and he advised that the question be put to the ministry of pensions

Credit Situation Stable

Halifax, N.S. — The credit situation is stable throughout the whole Dominion in every line of business," declared Hon. Dr. Beckett, general manager of the Canadian Credit Men's Trust Association, at their annual convention Mr. Beckett said that last years failures under the bankruptcy act have been reduced in eight years and that a remarkable development was the process from the Atlantic to the Pacific

Alberta's Prosperity

Alberta's prosperity is clearly reflected in a surplus of $279 763 announced by the Provincial Treasurer, Hon R. G. Reid—a surplus more than $200,000 in excess of the original estimate. The present figure is a record one of the province

BAD STORM HITS TOFIELD

After a very hot day a hail storm, accompanied by thunder and lightning hit Tofield on Thursday night last. The storm was about one hour's duration but rain continued long after the storm itself had subsided. Quite a little hail fell and some damage was done, quite a number of claims for hail insurance being made the following morning.

Mr. Harold of the C.N.R. station staff left for a vacation of several weeks duration last week. He will spend his holidays at the Pacific coast.

The boxing match advertised to take place on Saturday night at the curling rink, will not be held at that place, as officials of the curling club declare. It is quite possible that the principals will find other quarters.

The mowers are beginning to make their appearance, and due to the hay crop will no doubt be a good one. Most of our readers know more about the hay crop than we do, but there are quite a number at a distance who read the Mercury to learn of crop conditions here.

The local creamery has been a busy place for the past month or so. While grain acreage has been increased by leaps and bounds, the dairy industry has not suffered any. The butterfat taken in this year is above that taken in during previous years, each month showing an increase.

Gardens in the district are coming on apace. In fact the Mercury expects to chronicle the first home-grown new potatoes next week. Don't all speak at once.

T. Parish, formerly of Tofield, now of Edmonton is taking part in the big pageant being staged at the Edmonton exhibition.

Born.—To Mr. and Mrs. Obram Paters, on July 13th, a son.

The local ball tossers invaded the Camrose diamond on Wednesday and won their game by a handsome margin. Heres hoping they will do as well in the tournament to be held in the southern metropolis soon.

Notice To Pool Members

Cut Off Date July 31st

WHEREAS CLIMATIC and other conditions over which the farmers had not control, have prevented a number of pool members from delivering their wheat prior to the date set for cut off, July 16th, 1928, the Board of Directors by resolution passed this 17th day of July, 1928 have authorized that any street wheat delivered at, or any carload lots billed out of country houses on or before July 31st, 1928, be settled for on a basis of the 1927—28 Pool prices. Members delivering wheat between the dates July 16th and August 1st, will receive the initial payment on the 1928—29 initial payment schedule, but an adjustment will be made by the Pool head office which will bring the payment up to the 1927—28 Pool average price.

Noxious Weeds

Your co-operation with Provincial and Municipal authorities is solicited in the control and eradication of weeds. Keep your fields and roadsides free from these unsightly and costly pests.

Weeds reduce the yield and lower the grade of your grain, rob the soil of its fertility and cost money in dockage and transportation. Approximately 6,000 cars were required to haul the screenings from one season's crop in Western Canada to terminal markets. Will you not help to reduce this enormous loss?

Give your local weed inspector and Provincial Field Supervisor in your district every possible support in dealing with the weed problem.

Automobile Owners Attention!

The REPAIR DEPARTMENT in our garage has been taken over by Mr. Ed Siebel of Edmonton. Mr. Siebel is a capable mechanic and has had sixteen years experience on all makes of automobiles. For the last two years he has been working foreman in one of Edmonton's leading garges and comes to us highly recommended by automobile men of the city. We have added considerable equipment to our shop and with Mr. Siebel's experience the automobile public will derive the benefit of quicker and more reliable service than they have ever experienced before in this district. All work will be guaranteed and will be done at flat rate charges.

McLaughlin Hardware

For The Vacationist

One of the greatest joys of the summer vacation is the taking of photographs of interesting scenes and events. Thus one is able to recall months and even years after enjoyable experiences.

With the modern camera this is a simple matter and better still, comparitively inexpensive. Buy a camera for your vacation trip and for use around the home. The house, the family, the farm, the stock, visitors coming and hundreds of other times and events makes the camera useful and enjoyable.

Different models in stock. Prices are reasonable and the quality the highest.

BOXING BOUT

On Saturday night, surrounded by a goodly sized crowd, a boxing bout between Kid Mikado of Chipman and Battling Eagen of Tofield was staged at the Variety Theatre.

The event was advertised to take place in the curling rink, but owing to the objection of the curling club officers to this it was held after the show at the theatre.

As a fight it was a tame affair, the Tofield man losing out in the second round.

In justice to him, however, it should be said that the change of location, and the necessity of having to do a lot of running ...

MYSTERY ENDS BY FINDING BODY OF LOEWENSTEIN

Boulogne-Sur-Mer, France. — The finding of the body of Captain Alfred Loewenstein, missing Belgian millionaire, has cleared up most of the grim mystery surrounding his disappearance from a cross-channel aeroplane on July 4.

French and Belgian authorities will still have to determine whether Loewenstein accidentally fell from the plane as it flew 4,000 feet over the English Channel or deliberately ... and plunged to his death.

[illegible]

The battered body was found floating face downward ... miles off Cape Gris Nez by the ... fishing smack ... and was ... identified by a wrist watch engraved "Capt. Loewenstein" ...

Otherwise the body was unrecognizable, as it was in an advanced stage of decomposition.

THE LADIES' YEAR

NO TRADITION is more firmly established among us than the right that the ladies enjoy on every leap year of proposing marriage to their reluctant or timid swains, without any compromise of their maidenly modesty. It is, to be sure, a tradition that is humorously rather than seriously regarded. The number of girls who actually take advantage of their supposed privilege is probably not large. Most of them can get a husband, if they really want one, without having to ask for him; and if they are ever driven to that last resort by the caution or the bashfulness of the young men, we imagine they do not think it necessary to wait for a year of 366 days before they speak their minds. But the tradition that leap year is the only time that maids may woo exists and is handed down from year to year. How do you suppose it started?

Apparently we owe it to the Scots, who are a practical as well as a sentimental race, for it was once not merely a tradition, or a custom in Scotland, but a part of the regularly enacted statute law of that realm. Just seven hundred years ago, it was enacted as follows:-

"It is statut and ordaint that during the reign of her maist Blessid Mageatie for ilke yeare known as leape year ilk maiden ladye bothe of highe and lowe estate shall hae liberty to bespeke ye man she likes; albeit if he refuses to take her to be his lawful wife, he shall be mulcted in ye sum of ane poundis or lesse, as his estate may be; except and awis gif he can make it appear that he is bethrohit ane ither woman, he shall then be free."

So at least the Aberdeen Press and Journal informs an interested world. We have not the Acts and Statutes of Scotland for the year 1228 by us in which to look for confirmation. But laws embalm customs quite as often as they originate them, and it is probable that there was some old folk-way of the sort in existence long before 1228. The Irish have the same tradition, for Ireland and Scotland were more closely akin a thousand and more years ago than they have been of late. With roguish humor they attribute the whole business to St. Patrick, whom St. Bridget coaxed prettily into granting this special favor to the girls of Ireland. But with St. Patrick and St. Bridget we enter the shadowy land of legend, where the only certainty is that things are never precisely what they pretend to be. What we can depend on is that it is to the gallantry of the ancient Irish or the sense of justice of the Old Scots that the ladies owe the recurring privileges of leap year. Perhaps in these times of expanding opportunities for women they will make more serious use of them than they have been accustomed to in the past.—The Youth's Companion.

DIPHTHERIA

Diphtheria is an acute communicable disease caused by certain bacilli which live best in the throat of little children. These bacilli form a powerful poison which destroy certain tissues of the body. The tissues most readily affected are the nerves, the heart and the glands, as well as the throat. The effect of this poison or toxin may be temporary or permanent. Eight per cent of all diphtheria is cured in ninety-nine per cent of cases where antitoxin is used in adequate dosage during the first twenty four hours of the sore throat stage of the disease. Antitoxin when given to well children will prevent them from contracting diphtheria for a period of from three to six weeks. Toxin-Antitoxin, however, will prevent the occurence of diphtheria for at least five years in all people and this immunity will last for the lifetime of many. Toxin Antitoxin, is administered by physicians in three doses at intervals of one week. One series of three doses is sufficient to immunize eighty percent of all children. Some children who have a very low resisting power against diphtheria will require a second series of three additional doses.

The Schick Test has been devised to determine definitely whether a child is susceptible to diphtheria and would contract it if exposed or whether he is immune. Nearly all children under school age are susceptible after they are over six months of age. All children between the ages of six months and sixteen years should be given one series of toxin antitoxin. Not less than six months and not more than one year later they should be given the Schick Test. This will tell which of the children need the second series. Toxin-Antitoxin prevents diphtheria. Take your children to your doctor and have them immunized. Make Canada a country safe for children.

EVERY PLANT A PUMP

(Experimental Farms Note.)

Every plant may be likened to a pump. During the growing season it is daily sucking up soil moisture through its root system and transpiring it through the leaves. When the leaf area is large, the weather hot and the air dry the transpiration process is so rapid that a half-inch rain is exhausted in short order. In a tough and there are so many thirsty plants drinking up the moisture that an inch of rain sometimes has chance to penetrate scarcely more than a couple of inches into the soil.

The point to be emphasized is that every growing plant, no matter how small or inconspicuous, plays its part in this abstractive process. A dwarf specimen of lamb's quarter, mustard or shepherd's purse may sap the moisture that a wheat plant needs to keep it vigorous. A late-starting wheat plant may be a weed in a wheat field. It uses moisture and plant food and if it comes to nothing itself it is as much a robber as though it were a noxious weed.

In 1922 when only three and a half inches of moisture fell on the Beaverlodge Station between seeding and harvest more than 19 bushels of Ruby wheat were threshed from a measured acre of land which had raised a fair crop of potatoes the year before. There were no weeds, the crop had been evenly started, and the productive plants had all the moisture to themselves.

In gardening, in hoe-cropping and in summerfallowing, regard every plant as pump. Destroy any not serving some economic purpose, and if possible destroy it while very young.

"It may be possible to succeed without thrift, but why take the chance and thus handicap yourself when it's so easy to learn to save sensibly." These are the words of Robert Dollar, today the shipping monarch of the world, who started to work in a stove factory at six dollars a month.

SIXTH FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alberta, Edmonton, July 21st, 1928

Seventy-five to eighty per cent of the wheat crop throughout the province is in head and all grain crops continue to make rapid growth, according to telegraphic reports received by the Department of Agriculture on Friday for the sixth fortnightly crop report of the season.

Practically all sections of the province have benefitted from intermittent showers during the past two weeks and moisture conditions are generally reported as highly satisfactory. Only in a very few districts have low lying lands suffered from the rainfall which has been well in excess of the average for July. Hot, dry weather would be beneficial now in some sections where early sown wheat is approaching the filling stage. Oats and barley are making vigorous growth and these crops on early land are starting to head.

Conditions continue ideal for breaking, and particularly through the central and northern sections of the province, large areas of new land are being cleared and brought under cultivation in readiness for next year's crop. In some localities summerfallowing has been hampered by the excessive moisture in the soil, and the same difficulty is reported in connection with the cultivation of the beet crop in the south.

Haying is well advanced in southern sections. A good crop of alfalfa and other cultivated hays is being cut and continued dry weather is essential to ensure proper curing. Some hail damage to crop is reported but this is confined to very limited areas. Crops this season have been particularly free from insect and disease injury.

With prospects of a very satisfactory crop, harvesting is expected to start a few days earlier than in 1927 in the Peace River country where the grain acreage is considerably in excess of that of last year, and harvest throughout the province will commence about the third week in August.

"Jimmie", said the teacher, "What is your greatest ambition"?

"I think," he said, "It is to wash mother's ears".

Farmer (to the druggist), "Now, be sure an' write plain on them bottles which is for the Jersey cow an' which is for my wife. I don't want nothin to 'appen to that Jersey cow."

GOOD PROGRESS ON NORTH RAIL EXTENSIONS

It is expected that the construction work on the extensions to the E. D. and B.C. and Central Canada railway lines will be completed in time to handle the increased 1928 crop shipments out of the newly opened up districts in the north, it is announced by Hon. V. W. Smith, Minister of Railways.

Grading on the fifteen-mile extension from Whitelaw to the new end of steel at Fairview, north of the Peace River, will be completed by the end of August and laying of the steel will commence immediately thereafter. Good progress is also being made on the twenty-five-mile grade from Wembly to Hythe and it is hoped that much of this line will be completed before freeze-up.

NEW POULTRY ASSOCIATION FORMED

Special attention will be paid to the development of improved poultry flocks in the province as the result of the recent formation of the Alberta Registered and Approved Association. The new organization will devote its efforts to the promotion of approved flock work, the support of the Dominion egg-laying contest and the advancement of the interests of the poultry industry generally.

L. W. Bond, of Irricana is the secretary.

"Mr. Chairman," complained a speaker, stopping in an address, "I have been on my feet nearly ten minutes, but there is so much ribaldry and interruption I can hardly hear myself speak."

"Cheer up, Guvner," came a voice from the gallery, "you ain't missin' much."

MINNESOTA EDITOR HITS NAIL ON HEAD

Towns and Villages Essential To Progress

The following is from an issue of the Revillon Wholesale Magazine:

A party of editors of Minnesota papers visited Manitoba last fall and were entertained in Winnipeg. One of them had this to say in his paper upon his return home.

"On Saturday morning the party was taken through the big Eaton department store and mail order house."

"This is an immense institution, but it has been built at the expense of the rural communities. While Minnesota has hundreds of thriving villages, with fine schools, good churches and plenty of amusement centres, you find mostly sidings in that part of Canada we have just seen. There's a reason. People who trade at home build up a home market instead of building up great industrial centres here and there."

"When Mayor Webb was deploring the fact that Manitoba did not have the population it should have, the reason was very plain to be seen. Canada had been losing population, no doubt because community life is not developed. It is thriving villages that form community centres and make the people more contented to remain on the farms. Villages are the community centres, but villages cannot and do not exist where establishments like Eaton's are pulling money to the cities. Villages of from 400 to 2,000 population use up considerable food in a year and create a home market for a part, at least, of the home product. Besides, they make possible good schools, churches, and enlarged social life."

"If Canada is to develop, she must develop her villages, have her local newspapers and good home stores, and then they can afford good schools, churches and entertainment centres."

"Railroad sidings will not build up an agricultural community."

As we have frequently stated in these pages, the country towns and villages are the backbone of the country. There cannot be a prosperous and contented agricultural community without prosperous towns and villages. A few great cities cannot help community life in the country.

The above expresses the idea so well that comment is unnecessary.

Cream Shippers
This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.
If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.
YOURS FOR 300,000
THE TOFIELD CREAMERY

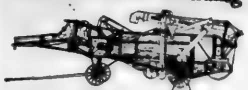
80 Years of Successful Building



of Threshing Machines
The 1928 Red River Special Line represents the result of 80 years of continuous building of Threshing Machines by the Nichols & Shepard Company.
Only by keeping faith with the farmers and threshermen of America has it been possible for this company to grow from a small blacksmith shop in 1848 to its present great factory with branch houses in every grain growing center.
And what a machine this year's machine is!
The finest, fastest, cleanest thresher ever offered to agricultural America. Hyatt Roller Bearings at every main bearing point — Alemite-Zerk Lubrication—a great new feature, Weatherproof Fiber Pulleys on every high speed drive, Armco Ingot Iron in all sheet metal parts, Bridge Truss Construction, French & Hecht Wheels, all in a thresher built around the famous 4 Threshermen.
These famous 4 Threshermen, The Big Cylinder, the Man Behind the Gun, the Beating Shakers, and the Steel Winged Beater are the greatest combination ever devised for getting the grain from the straw.
The Red River Special Line for 1928

A BRAVE ATTACK AND A BRAVE DEFENCE

Upper.—The Chateau Frontenac, famous Quebec hostelry, on whose wall a tablet to memory of the soldiers of the Royal Fusiliers has been erected. Lower—A panorama of the ancient city of Quebec, showing the Chateau Frontenac and the ramparts, taken at the time of the visit of H.M.S. Hood to Canada. The attack against Pres-de-Ville was made along the shore behind the warship. Inset—A mortar and cannon used in Quebec at the time of the siege by American troops in the War of Independence in 1775-76.

A memorial to an event of outstanding importance in both Canadian and American history, has been erected on the wall of the Chateau Frontenac in Quebec.

Although many thousands of American tourists regularly invade the ancient city and throng the corridors of the great hostelry, it is not often realized that their ancestors once attempted to gain admittance to the city with less success. Early in the War of Independence two forces of American soldiers were despatched against Canada, one under General Richard Montgomery up the Richelieu against Montreal, and the other under Colonel Benedict Arnold through the wilds of Maine against Quebec. The two armies united their resources before the city of Quebec in mid-December, 1775, and [illegible] a siege that lasted for 154 days [illegible] long winter. Montgomery had carried all before him and captured the forts of St. Johns and Chambly and occupied Montreal and Three Rivers, so Quebec remained the last stronghold of importance held by the British. Arnold had encountered great difficulty in his march, and his expedition was depleted by about a third of its members.

The defence of Quebec was under General Sir Guy Carleton who had a garrison of about 1,800, about equal to the strength of the attackers, composed of a few regulars, including the Seventh Royal Fusiliers, the Royal Emigrants, a Corps of Seamen, and British and French-Canadian Militia.

Early in the morning of December 31, 1775, the chief assault was delivered by the American troops, bravely led by the commanders in person, Montgomery being killed at Pres-de-Ville, and Arnold wounded at Sault au Matelot at the other side of the town. The attack was unsuccessful, many prisoners were captured by the defenders, and the siege thereafter [illegible] until relief arrived from Great Britain in May, 1776.

The tablet [illegible] of the part taken by the Royal Fusiliers in the defence of the town "throughout the rigors of a Canadian winter, against an active and enterprising enemy" was unveiled in Quebec on Dominion Day, July 1, in the presence of the Governor General. A detachment of the Canadian Fusiliers of London, Ontario, with two officers from the parent unit in England, represented the Second Royal Fusiliers. The arrangements were made by General Charles F. Winter, secretary of the Dominion of Canada Rifle Association, and formerly a member of the Royal Fusiliers.

CHAPTER XXVIII (Continued)

Helmi slept the sleep of utter exhaustion, for when she awakened the gray dawn was showing at the mouth of the cave she looked around for the dog, but she was gone. The pain in her breasts was like a thong and knives twisting and torturing her, and a cry of utter anguish broke from her lips.

Then she remembered the horror of the night before and the terrible deed she had done. She saw again that face of fright and heard the scream.

She went to the mouth of the cave and saw below her the river running so fair and peaceful and serene. The early morning light, platinum gray, was lying quietly on the river's bosom, from which soft little veils of mist were ascending. Helmi shrank back from it in fright, remembering the man who had buried his troubles in its treacherous depths. Hearing in the side of the cave pleading with the river not to tempt her, that curled and rose over the surface to see Jack's face again plotting away from her. Then came little Life's face, so cool and peaceful and smiling, with no more fever or pain, and an irresistible impulse to cool her burning tortured breasts in the quiet green waters of the river drove her forward.

For one brittle moment she swayed toward the stream. Then something sounded against her, shivering her backward to the green, and her friend of the night before was beside her, whimpering, whining, purring, with a tenderness that Helmi knew, for it spoke a universal language. She crawled back in the cave, wide awake now, but writhing in her misery. Then came Cleo, the dog, with something in her mouth which she held to Helmi's arms—a little kitten very cuddly indeed, with a fat little body and cool, soft, eager, questing lips.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Que.—"I am taking Lydia E. Pinkham's Vegetable Compound and it has helped me throughout my whole change of Life. It helps me and I cannot praise it too highly. I was so weak I could not do my work and my brother was heavy on my hands. I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought I would try it, and I am glad I did, for it has given me relief and I have told others what it does for me. I am willing for you to use my letter if you wish."—Mrs. B. S. Parsons, Wilton, Ontario.

Ask Your Neighbor

When Helmi awakened with a brain cleared of her sodden stupor, and a body eased of its pain, she noticed the revolver, which through all her mad flight she had clutched in her hand. Horribly it recalled to her the madness of the terrible night and the loathsome deed that she had done. And yet and yet now that her brain was clearer, she could not recall that she had really fired the weapon. Her hand had been on the trigger when the lightning came.

She sprang toward it eagerly, for it could tell her how she had wrought the deed. Opening the chamber with trembling hand, she found every cartridge was in its place!

Then the soul of Helmi was born anew in thankfulness to God, and in a faith in His goodness that never again wavered, for God had saved her from sin. God had intervened to save her when her heart was farthest from Him. God was her friend! He loved her—He would not let her sin! With His own arm He had saved her!

Helmi went to the opening of the cave and drank in the beauty of the morning. The sun had just come over the edge of the earth, sending a sheen of gold and rose along the top of the mist that filled the valley below. As she watched, enraptured in seeing the new-found goddess, the mist began to form into wings and threads that curled and rose over the surface of the river, that upper mass twinkling and thinning into the air.

A song burst from Helmi's heart, a song of gladness and love and faith—a song that the Blue Hook had taught her

"When the mists have rolled in splendour from the beauty of the hills,

And the sunshine falls in gladness on the rivers and the rills."

There was a whimper beside her. Cleo had come out of the cave, licked full on her knees beside her, and kissed her honest forehead. "Cleo! Cleo!" she cried, "the dog God sent!"

CHAPTER XXIX.

Helmi reached her own home that morning before the people of Eagle Mines were awake. It was a little after morning, without a trace of the storm of the night before, only that the air was washed clean and tasted cool in the mouth like a drink of spring water. She walked with her old sprightliness and without a single trace of fatigue.

Cleo followed her with one pup in her mouth, and Helmi carried the other two. The door of the house was not locked, and Helmi stood had a few burning and a pot of porridge cooking for herself and the dog.

The house showed the traces of the hunting parties that had used it for their abode, and from the fact that they had left the house dirty and littered. Helmi knew that they were not real hunters, but only city men out looking for game. The true hunter will leave everything as he finds it, this is the law of the wilderness. But in Helmi's heart this morning there was no resentment as she swept and scrubbed. She had received so much from God that she could easily forgive any of His children, and as she worked she sang.

When the porridge was cooked and the condensed milk poured over it, she called Cleo, who had stayed outside until she was invited to enter. "Come in, Cleo," she said, "my house is yours. You and I will never part, and your pups are welcome, too. Come on!" Cleo came in, with a pup in her mouth, smiling as broadly as she could without altogether dropping the pup.

The dog's hunger was pathetic. All the more because it tried to hide it and to appear voracious. This was evidently her first good meal for several days. The puppies, tired out by their adventurous night, were soon fast asleep in a box in which Helmi had placed an old coat of Jack's, and in which they curled up into an indistinguishable mass of ashie and white wool, with only one little round head showing.

When Cleo had eaten her breakfast she dried all attention for open food on Helmi's face, as if she were trying to read her mind.

Helmi patted the dog's head. "Take a sleep, Cleo," she said, kindly; "when I get my house cleaned up and my clothes dried I will tell you all my affairs. I do not know where we are going to live, you and I and our families, but I know we are going to live together. I have had many times in the city that no one wanted a girl with a baby, and I suppose a girl with a baby and a dog and three pups is not wanted either. But still I have faith in God, Cleo. He always helps! Now lie down and be happy we have enough here for a time."

Life has changed for Helmi. The demon of revenge which had ambushed her a half year and been laid to rest by the hand of God, her friend. In her simple theology Helmi had actually been down His hand through the blackness of the storm and struck the magistrate dead. Her revenge had been wrought such evil upon her, and to prevent her from committing further crimes of murder. God would be her friend for evermore; the would trust Him now whatever came. She had now no more fears for her baby. Life was to God's keeping. God and the brown-eyed nurse who had spoken so kindly to her.

After a couple of hours of vigorous work Helmi had her house spotless again, and then she lay down to sleep for a delicious weariness had overcome her, and with it a sense of security and peace such as she had never known in all her life before. "Thank God," she murmured to herself drowsily, "Now I can sleep."

It was the middle of the afternoon when Helmi awakened. Cleo was sitting beside her, watching her. The puppies were still sleeping, She sat up, shaking out her golden hair. The fire had died down but the house was pleasantly warm.

Outdoors the sun shone brilliantly, and Helmi wanted out to bask in the delicious odors of spring. How she had missed this in the city! Out here spring was so poignantly sweet as ever. The wind from the river brought to her the fragrant tang of the fields of Colsed, pungent and healing, and Helmi's heart responded to it with a throb of love, for she remembered the salve her mother used to make of that herbal with clean white hand on the stove, strained through a clean cloth and put away in little glass pots for use all the year. As she breathed in the odor reminiscently from the woods behind the station came the liquid notes of the meadow lark.

Three Aids to Good Meals

Another Television Test

Demonstration In New York shows Big Advance Made

The day when radio owners can tune in on sporting events and other happenings of interest and have them instead of merely hearing an announcer's description, has moved one step closer

The Bell Telephone laboratories announced that successful demonstration of television apparatus which showed actual events as they happen, has been moved about an area roughly the size of a boxing ring. Previously television had been confined to an area no more than a head and shoulders.

At the demonstration, a man served tennis balls, drove a golf ball, bound with a companion, and went through various manoeuvres. The action was shown in perfect detail on a screen about two feet square by three feet.

The television images were so clear as the moving muscle and wave under the skin, as appeared as though under a paper thin sheet of water moving slightly across the picture. This defect, engineers believe can be eliminated.

The demonstration was developed by Frank Gray and Dr. Herbert E. Ives of the Bell laboratories.

Discouraging Swarming

Method That Has Proven To Be Very Satisfactory

A method successful in discouraging swarming has been tried with success at the Charlottetown Experimental Station of the Dominion Department of Agriculture. The plan is to destroy all queen cells. Sometimes bees will start building queen cells in this way and lose crowded area of the hive. In due time it was necessary to inspect the hive and to watch for and destroy any new queen cells discovered. The necessary attention at the station in 1927 report states that this method has proved very satisfactory over several seasons

Fresh Supplies In Demand.

Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that this preparation fills a definite need. Its impression its power on the people. No matter if the ailment is of many be found its potency is never impaired. It is put up in a handy size to sleeve in batties and can be carried without fear of breakage.

Makes Mineral Discovery

Woman Finds Copper Pyrite In Northern Manitoba Field

For the first time in the history of Northern Manitoba, a woman has made a mineral discovery of major importance.

Miss Kathleen Rice, graduate of the University of Toronto, and with her party has been prospecting in the northern mining field, in the Sturgeon area, and according to those who have examined the sample of ore recovered from her cabin, she has made a rich strike.

The find, which is copper pyrite, was made near the narrowest shore of Sturgeon Lake, and is about 1,000 feet in length, 25 miles south-east on the Hudson Bay railway. The island, which has served as a landing place for thousands of prospectors during the past few years, but missing men had doubtless its value.

Miss Rice, with another prospector, known as Dick Wesney, has been conducting drilling operations on the property for some time. Yesterday she arrived at The Pas with a sample of ore recovered, which geologists pronounced as "first class" find. The ore was struck about 100 feet below the surface and according to Miss Rice, the vein appears to increase in more than 100 feet in width.

A miniature stampede was launched toward the district as soon as knowledge of the strike became general. Miss Rice reported that she had already received alluring offers for her claim by several leading Canadian mining interests.

Recently Lieutenant Isaac, made trouble on the

Little Helps For This Week

"Let all those that put their trust in Thee rejoice; let them ever shout for joy, because Thou defendest them: let them also that love Thy name be joyful in Thee."—Psalm v. 11.

Under His is, and what He is.
Whose one great purpose is the

Of all, I rest my soul on His
Immortal love and Fatherhood,
And trust Him as His children must.

—John Greenleaf Whittier.

To heart and mind and love like Him alike!
Be true in the light of His consecrance; to be satisfied with a little is to become dissatisfied to others we have so much: to receive all things hopefully, because they are from Him; to take the pace of running in His goodness; to desire all the more that we have that desire for Thy heart, and that wholly"—these are open to all.

—John Hamilton Thom.

A TIRED-OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, P.Q. She further says: "Some years ago I was working as a dressmaker and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from backache. A friend every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel much better. Continuing their use my strength returned, I regained my appetite and the terrible headache from which I had suffered so frequently, I have been entirely free from them, and have two fine healthy children, a girl and a boy, and am in the best of health. All this I owe to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down people."

All weak, run-down people who will give this blood-building tonic a fair trial will find through its use new health and strength. You can get the pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

What Could Be Cheaper

Naughty little Jimmy had been eating green apples, so his mother he call in the doctor

"How my little man," said the kind doctor, "tell me what you think is the matter with you."

"It's like this, doctor," answered Jimmy between the spasms of pain, "you know how fool when you don't know how you feel? Well, that's how I feel."

"I see you've given up teaching your wife to drive."

"Yes, after the accident. I told her to release the clutch and she let go of the steering wheel."

Mineral's Lodgment In Insect Bones.

Physicians are called upon to prescribe for the assimilation more of ten than anything else.

A young lady seldom tires of trying to get herself a bachelor to the admission theory.

Tooth and Health

Issued By The Canadian Dental Hygiene Council and Published by The Canada Starch Co.

THE "GUM BOIL"

Your child has come running to you one day suffering pain—and has pulled aside his lip to let you see an angry lump on his little jaw. A boil, that it was best not as a boil to touch, you called it a "gum boil."

Or, possibly he had not complained of suffering from pain, but one day while scrubbing his teeth, you noticed this lump with a little opening in the centre, reminding you for all the world of a miniature volcano.

And from the "crater," was running a thick, yellowish substance, which you knew to be pus.

Well, what had caused that gum boil? Just one thing—a dead pulp.

Or, you may have failed to seek for this difficulty since usually you will find that the child suffers little more is badly decayed or broken down, with perhaps just the stump remaining.

Then, what should be done? For, of course, this condition should receive prompt treatment.

Should the tooth not be badly decayed, your dentist may think it best to fill it. But if more often, it should be extracted after the inflammation has gone down to stay.

Following this treatment, the gum heals over and you congratulate yourself that you have done all you can.

But consider: already serious damage to the jaw may have resulted. In the disease process may have destroyed the permanent tooth germ beneath, to say nothing of the train of evils from the premature extraction of the offending tooth, and from the drainage of the pus into the system during the progress of the disease.

How much better then, had the tooth received attention during the early stages of tooth decay

Canada a Melting Pot

People From Various Countries Contributing To Our Culture

"It is up to us to see to it that the contributions of the different peoples coming to this country is melted into one homogeneous whole, and we will build up a people that will be equal to the ancestry from which we came."

declared Hon. Sam. J. Latta, speaking before a huge gathering of Norsemen in observance at Saskatoon. The gathering took the form of a patriotic meeting. Mr. Latta expressed the hope that the various countries each contributed cultures of the best elements in their contributions were all blended together here.

Between Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would be convinced that Nacidin, the ex of Dr. J. D. Kellogg's Asthma Remedy, A.S. name, is incipient and chronic, are benefited by this great relief by the use of this experiment with worthless preparations when the genuine article can be purchased everywhere.

Miss Ellis Passes On Seats

Captain Kosoli, Major Fitzmaurice, and Baron von Hunefield, who made the first westward Atlantic flight in the Bremen, were presented with free passes for all the Hamburg-America Line boats for the rest of their lives by Director Boerger, at Hamburg.

We gather from the many articles in the newspapers that the secret of health is still a secret.

Good Type Of Settler

G.B.R. Papers Many Immigrants Through Their Hands Last Year

During the first six months of this year, Canadian National Railways have, through their land settlement association, placed 1,236 farming families on 243,273 acres of land along the lines of the company between the Great Lakes and the Pacific Coast, according to J. S. McGowan, Western Manager of the Colonization Department, and F. J. Freer, Superintendent of Land Settlement for the company. The figures represent a substantial increase over the corresponding period of 1927.

The type of settlers has been chiefly British, American and Northern European stock. Under the land settlement plan of the Canadian National Railways, it has been necessary for them to bring sufficient capital to enable them to make a start on the farms of their won, and the amount of such capital brought in by these people this year is estimated to be approximately a million dollars, besides which the settlers have brought in the live developed districts in the northern parts of Manitoba, Saskatchewan and Alberta, where the land can either be homesteaded or where partially improved farms can be had on very terms.

Settling for the present year there are more than 2,000,000 acres soon to field crops. This includes 1,000,000 acres of virgin land now and placed under cultivation last year, and to the stimulus supplied by new land settlement

Best Advertising Medium

Sir Harold Mackintosh, of "the coffee firm, declared at the meeting of the Incorporated Society of British Advertisers: "A dividend is known by its advertising, and if there is anything in which it is important to be earnest it is in advertising. Humor is a necessary ingredient, so long as you get the public laughing with you and not at you. I always believe that the press is the best form of publicity."

The good luck of their friends was also some people more than anything

Farmers' Marketing Tour

Canadian National Railways' Tour To Ontario and Quebec, 1928

Continued.

In the evening, as guests of the Danish Government, at the Hotel d'Angleterre, in the Royal Opera House we renewed our acquaintance with Mr. Millington Drake, whom we had previously met in Paris. Mr. Drake is a well-known member of the Canadian Foreign Office in Denmark, but as a friend of Canada and the Canadian Farmers Party.

Mr. Millington Drake entertained us with a routine of the opera for those who were not familiar with the great work During the evening we were honored by the appearance in the Royal Box of King Christian, a grandson of Queen Victoria, who acknowledged by representatives of the party rushing at the palace to sign the Royal book, which is the Danish equivalent of our Canadian custom of leaving cards. The next day the Hon. Millington Drake, Mr. Millington Drake, as fellows: "Please thank the Canadians for their visit to the city and me. We hope they will keep a friendly remembrance of us and of Denmark."

Before leaving Copenhagen on our return to Esbjerg, we spent two interesting hours at the Folk Life Folk Hall Danish Cattle breeding farm and the Danish agricultural breeding station.

The Folk Life Folk farm, owned by 800 Zealand farmers, has been responsible for many interesting and successful breeding experiments. The herd of 70 pure bred Danish Holsteins, which we inspected was of the highest quality, and noteworthy for their high butter fat test and their general appearance of health and vigor.

On leaving the farm the party received a surprise invitation from Burgomaster Hansen, to visit his home and farm, an experience which we much enjoyed. Mr. Hansen is farming a large acreage, was able to show us the best that Denmark has to offer in agriculture and stock breeding.

The visit to the London Dog Training Establishment was also something of the secret of the remarkable success of Alsatian dogs in the Danish dog. Here it was found that the best results were obtained by crossing the pure Teutonic police dog with the Alsatian, the hardy native breed which is in itself rather coarse and heavy, and which is undesirable for bacon. Today breeding centres are maintained in different parts of the country, some for Yorkshires, others for the Landrace from which the Danish farmer is able to breed the best bacon hogs in the world. Denmark is a country where the sandy wastes along the West coast of Jutland, where the native inland no human habitation was visible for miles, have been by intelligent drifting sand was covered with grass and heather.

The Danes beat their energies to the better growing of bacon hogs that today there are 350,000 acres in clover. This is made possible by two-thirds of the total original Danish herd, being devoted to bacon planting.

This did not permit us to visit the other plantations, but a trip to see the Folk High School at Esbjerg, a splendid institute Esbjerg, filled us with amazement. A magnificent structure, sour plain there had been transformed into a beautiful educational country, thousands of acres of which were planted with trees, the whole supporting a fair live-stock population.

A trip to Ribe, the oldest town in Denmark, was a delightful and interesting diversion. Here a farewell on behalf of the party was said by Mr. Millington Drake, who thanked the Danish people for the country which we had seen so much of its best, and which we had so enjoyed. The party was telegraphed to the Prime Minister of Denmark, and to the people of Denmark.

Mr. Drake telegraphed our thanks to the British Charge d'Affaires, who had proved himself a most capable representative of the British Empire, and to the Danish Government.

Little need be said of the return journey through North Sea except that, for the first time, there was a Canadian Dinner on the dining table

London again! No place like London! After all, it was good to hear proper cockney accents, instead of the speakers with a different accent! Our first evening was spent at the theatre, but in the afternoon we were to have the honour of meeting Lord King and Queen, and Ian at Buckingham Palace. If we had felt some trepidation, it would have been excusable, but there was no need for such feeling. The shyest person would have felt at ease for the kindliness of the King, the graciousness of the Queen, and the charming hallgeneral manner of Lord and the Royal party had only returned from Sandringham that morning, nevertheless she insisted on meeting us.

The party, which was a large one, was presented in her twenty-seven years ago when she visited Canada as the Duchess of York. His Majesty was thoroughly interested in the Dutch tour and asked many questions about it. This was the crowning honor in a tour already rich in privileges accorded.

Our next engagement brought us to a sphere in which we were the experts. This was our visit at our

The London Hunt and Country Club which is known for the excellence of its cuisine. For several years this progressive club has served no other tea but Red Rose Orange Pekoe that holds all others in favor and fills bodied richness. Put up only in bright, clean aluminum packages.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Harold Mackintosh, of London, Eng., was elected president of the World's Sunday School Association at their convention at Los Angeles.

Hiram Paul Lanthorn, who resumed General Umberto Nobile, has been awarded a medal and promoted to the rank of Captain in the Royal Swedish Flying Corps.

Australia has again entered the London market as a borrower, this time seeking a £35,000,000 loan which will be used for railway purposes from Britain.

A new weather bureau is to be established on the Quebec citadel, it is announced by Mr. Patterson, assistant director of the Toronto meteorological service.

The Austrian golden crown, highest decoration of the republic, has been conferred upon Captain Herman Koehl, pilot of the trans-Atlantic monoplane Bremen.

The first broadcast of a concert in the English waters took place in 1907, according to information recently released from the confidential files of the British Admiralty.

Working men and women of Illinois earn 11 per cent of the total in Illinois corporations, it has been announced by James H. Cunningham, president of the Illinois Manufacturers' Association.

Belgium has proposed appointment of Charles Evans Hughes to the international Hague Court to fill the vacancy created by the resignation of John Bassett Moore, the American representative.

Poking rickshaw-coolies have organized a union to fight the newly-inaugurated motor-bus service in the city's suburbs. The coolies declare that motor-buses are unsuitable for streets in which the Lanes are narrow from which the Danish farmer is able to breed the best bacon hogs in the world. Denmark is a country where the sandy wastes along the West coast of Jutland, where the native inland no human habitation was visible for miles, have been by intelligent drifting sand was covered with grass and heather.

The Danes beat their energies to the better growing of bacon hogs that today there are 350,000 acres in clover. This is made possible by two-thirds of the total original Danish herd, being devoted to bacon planting.

Little need be said of the return journey through North Sea except that, for the first time, there was a Canadian Dinner on the dining table

London again! No place like London! After all, it was good to hear proper cockney accents, instead of the speakers with a different accent! Our first evening was spent at the theatre, but in the afternoon we were to have the honour of meeting Lord King and Queen, and Ian at Buckingham Palace. If we had felt some trepidation, it would have been excusable, but there was no need for such feeling. The shyest person would have felt at ease for the kindliness of the King, the graciousness of the Queen, and the charming hallgeneral manner of Lord and the Royal party had only returned from Sandringham that morning, nevertheless she insisted on meeting us.

The party, which was a large one, was presented in her twenty-seven years ago when she visited Canada as the Duchess of York. His Majesty was thoroughly interested in the Dutch tour and asked many questions about it. This was the crowning honor in a tour already rich in privileges accorded.

Our next engagement brought us to a sphere in which we were the experts. This was our visit at our

UNIVERSITY OF MANITOBA WINNIPEG

Offers, among others, the following Courses:

ARTS AND SCIENCE, leading to the degrees of B.A. and B.Sc.

KEEP HANDY.

Keep a bottle of Minard's handy. It is a universal remedy.

MINARD'S KING OF PAIN LINIMENT

When Pain Comes

What many people call indigestion is often stasis caused acid in the stomach. The stomach nerves have become over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Bisurated Magnesia. It has remained the standard with physicians for the 50 years since its invention.

testoies alkali in water will neutralize any stomach sour as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Small bottle contains full

IS VISITING CANADA

Hon Ian Baird an Oxford student, son of Lord Stonehaven, government-general of Australia, who arrived in Canada a few days on the White Star liner "Alberic," to spend his summer vacation "poaching" in cabins at Anson, P.Q., and Tuscania, Ont.

SUNDAY SCHOOL LESSON

JULY 29

THE FIRST PENTECOSTAL MISSION-ARIES

Golden Text "Go ye therefore and make disciples of all nations baptizing them into the name of the Father and of the Son and of the Holy Spirit: teaching them to observe all things whatsoever I commanded you, and lo, I am with you always, even to the end of the world Matthew 28:19-20.

Lesson: Acts 13:1-52

Devotional Reading Psalm 67

Explanations and Comments

The Missionary Enterprise Chosen and Ordained, verses 1-3 In the founding Christian church at Antioch there were numerous prophets and teachers, men of special inspiration. Among these was the evangelist and historian Luke. Associated with Barnabas Others included Symeon the Negro, sometimes so African Lucius of Cyrene (the province in N.-th Africa lying next to Egypt), a foster brother was one of the Tyrrenian evangelists and established the church at Antioch Manaen (Menahem), a member of the court of Herod Antipas (Acts 13:1). Manaen—another form of Menahem—means "comforter." He was a half-brother of Herod Antipas, who was the "foster-brother" of Herod the Tetrarch (Herod Antipas, son of Herod the Great), and was evidently a person of some social importance, and, finally, Paul of Tarsus. Apparently the historian mentions Paul's place, at the end of the list, in order to emphasize just as was Barnabas at the beginning of the roll. These five leaders of the Antioch church were evidently Grecian Jews

"We know nothing of Symeon and Lucius and Manaen, and yet it is good to have their names, for they formed six of the best of faithful witnesses of the Lord who stood back of the Christian movement, and encouraged its leaders to carry on George Lisle, the one of her fine sales, speaks of "the faithful who are not known, but should we do without them." All great movements depend largely upon the unknown and unsung leaders. While out Paul and Peter and Barnabas the early Christian church have but an undisciplined army without officers. Or as a rule of mind, but Nigor and Lucius and Manaen were needed as well as Barnabas and Paul" (Rev. John Clark Archer).

Why the church at Antioch, under the leadership of these five men was organizing on its services of worship, fasting and fasting, as an advance movement was initiated under the direction of the Holy Spirit, speaking to the representatives of the British Empire, and to the Danish Government.

Little need be said of the return journey through North Sea except that, for the first time, there was a Canadian Dinner on the dining table

London again! No place like London! After all, it was good to hear proper cockney accents, instead of the speakers with a different accent! Our first evening was spent at the theatre, but in the afternoon we were to have the honour of meeting Lord King and Queen, and Ian at Buckingham Palace. If we had felt some trepidation, it would have been excusable, but there was no need for such feeling. The shyest person would have felt at ease for the kindliness of the King, the graciousness of the Queen, and the charming hallgeneral manner of Lord and the Royal party had only returned from Sandringham that morning, nevertheless she insisted on meeting us.

The party, which was a large one, was presented in her twenty-seven years ago when she visited Canada as the Duchess of York. His Majesty was thoroughly interested in the Dutch tour and asked many questions about it. This was the crowning honor in a tour already rich in privileges accorded.

Extending Air Service Westward

Contracts As Far As Winnipeg Planned For Next Year

A gradual extension of the air mail services now successfully operating in the east to the west is contemplated by the Post Office Department.

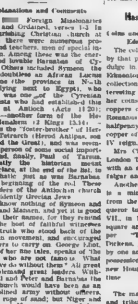
Flyers have started out to determine the best route for a service between Montreal and Winnipeg and whether aeroplanes or hydroplanes are the best adapted to the service.

Contracts as far as Winnipeg are planned for next year and the department has in view later an extension of this service across the prairies although to the end no definite steps will be taken for a while.

To Honor War Heroes

Hungary is to honor its war dead with a monument which will be erected in the fallen heroes, and at the same time will express belief in a Hungary to be reunited some day. The 1,000-year-old country will be typified by a single, huge, unadorned stone. On the stone will be chiselled the figures 1914-1918 and 670,000 —the number of Hungary's war dead. There will be no other inscription. The monument will be erected in Budapest before the Millenium monument.

Scotland will have a modern dialect dictionary



HE DIDN'T THINK DYSENTERY COULD KILL HIS BOY

Mr. John Melling, Fraser, Alta., writes:—"I am a returned soldier, and when I went home there was one of the finest boys you ever saw. He was about 16 years old. He was chewing and he didn't think it could be relieved. However, he decided to try it while, but he did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1926."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

One Hundred Years Hence

British Scientist Has Ideas About Conditions In Next Century

Dr. E. K. Fournier D'Albe, the British scientist, has created a mild sensation with his lecture on the future of women and their dress. Dress materials will be made extensively of cotton a hundred years hence, he said, but it will be colon glorified by good management by chemical treatment, such as has already supplied us with artificial silk

Linen will have disappeared killed by the advent of nitro-cellulose yarn and the disappearance of linen-cotton materials will be made to match the strength of cotton with the transparency of chiffon and the softness of tulle For swimming and other sports costumes will be made of paper or will, perhaps, be sprayed on the skin to make a perfect fit Several methods of doing so are already known to chemistry

A hundred years hence the serious problem will be forgotten in view the servant will be no more Wireless will be compulsory in every household and universal. The companion will be of the same nature as that which forty years ago used to read a newspaper these days Houses will not be built of brick, but of glass or else of some other transparent material so that when occasion arises it will be possible to bathe in the house with all the daylight available. The garden of the next century will be a model and it will be the company of man over the vegetable kingdom will be so advanced that it will be open to everyone to grow gorgeous flowers and new kinds of fruit

Has Many Valued Curios

Colms and Books Make Collection Of Edmonton Woman Valued

The collection of curios is a hobby by that perhaps not many women indulge in but Mrs. E. Q. Chase of Edmonton has an assortment of curios and valuable collection as well as some very interesting books of old days. Among her coins are included two Roman coppers of the reign of Augustus, Emperor of Rome at the time of the birth of Christ; a Canadian penny of 1843, United States money dated 1842 and copper of George IV reign.

Mrs Chase also has a copy of the London Times, November 7, 1805, with an account of the battle of Trafalgar and the death of Lord Nelson.

Another possession of Mrs. Chase is a miniature history of England bound in leather and presented to Queen Victoria on the occasion of Edward VII., in 1841. It is only one inch square and printed on very fine paper. The "Chosen," by Charles Dickens, printed in one inch cards by one and one-half is also a valued possession. A freshwater cove where the new House of Parliament at that time

The man who never has any trials in his existence is unable to appreciate happiness

Don't Make a Toy Out of Baby

—Babies Have Nerves—

By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the overstimulation during early years, often by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be fondled with fun for more than a quarter of an hour to an hour daily Beyond that the excitement is checked, invariably causes irritability, crying or sleeplessness

Fretfulness crying and sleeplessness in baby are often caused by overstimulation by well-meaning baby minus consideration, and when you next can't see what is making baby restless or upset, better give him a few minutes' rest. Nervousness is so amazing to see how quickly it calms baby. Another thing—regularity of sleep; put it contains no drugs or opiates. It is purely vegetable in recipe is on the wrapper Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of childhood. Over 20 million bottles sold and have grown its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations

ARRANGEMENTS OF EMPIRE

(Continued from front page)

discovery connected?

What are the chinook winds and what is their effect?

What part of Canada is known as the great clay belt?

Why are newspapers interested in reforestation in Canada?

What income tax would a single man earning five hundred pounds pay if he lived (a) in Great Britain (b) in Canada?

Such was the interest taken in this competition that every source of likely information was leveraged with requests for information on Canada. Keen-eyed competitors searched through booklists and pamphlets. Determined looking parents accompanied their boys and girls to Study of Facts. The librarians did a land office business, and librarians became pale and haggard. Everybody got into the game.

It is a tribute to the zeal of the competitors that over fifty per cent of those completed their papers in full. The examiners reduced their serried ranks from thousands to hundreds and finally to the fifty victors of the major awards, the last test being an oral one.

The great enterprise has served enthusiastic commendation from such pioneers of empire understanding and international good will as H.R.H the Prince of Wales, the Right Honorable L. S Amery, M.P., secretary of state for the dominions; the Lord Mayors of London, Liverpool and Manchester, the Bishop of London, the Prime Minister of Australia; Sir Henry Thornton; Sir Arthur Currie and a host of others distinguished in all walks of life.

Of all the tributes submitted to us we are inclined to dwell upon the following passage from a compliment paid by Lord Burnham, formerly proprietor of the London Daily Telegraph

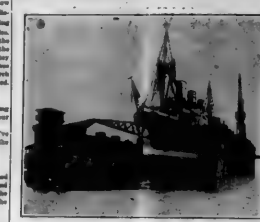
"The scheme is admirable because it introduces that personal touch, and it strengthens the bonds of the empire and people the wide spaces of the Dominion with sturdy young Britons. Canada is a land of golden opportunity. Only by seeing for themselves can our young people of today fully realize how vast that opportunity is. Personal contact with their compatriots overseas and the sympathetic understanding of their aims and methods can do more to bring home to our nation's youth the tremendous significance of empire than any amount of stereotyped propaganda."

The old has given way to the new in the realm of potatoes in this district, good stand and healthy looking tubers now adorning Tofield tables. An irrefutable evidence of the Mercury received a sample from the garden of Mrs. Ed Kalbol and they both boiled—and tasted O.K. Thus another milestone in the year's march of nature's progress has been passed.

Golf Pro "Well it's a funny thing Your stance is all wrong, but your form is wonderful.

Pretty Golfer "Of course. I've got to diet carefully to keep it like that."

We envy when we were married that we would suffer together, and so now my wife has the bottle-she is playing the piano so that she shall not suffer alone.



TWO GIANTS OF SHIPPING CIRCLES

The Canadian Pacific liner "Empress of Australia" is seen in the huge floating drydock at Southampton, England, where she was placed for inspection after her 8-with America-Africa cruise. This dock boasts the reputation of being the largest of its kind in the world with a length over all of 900 feet, a-with at the outer of entrance being 134 feet and the depth of water over the boat blocks is 32 feet.

For The Vacationist

One of the greatest joys of the summer vacation is the taking of photographs of interesting scenes and events. Thus one is able to recall weeks and even years after enjoyable experiences.

With the modern camera this is a simple matter and better still, comparitively inexpensive. Buy a camera for your vacation trip and for use around the home. The home, the family, the farm, the stock, visitors coming and hundreds of other times and events makes the camera useful and enjoyable.

Different models in stock. Prices are reasonable and the quality the highest.

A. A. BEIRNES, *Tofield*

The Reliance Store

One hears a great deal today of "Service." Yet after all, "Service" is nothing spectacular. An individual or firm in business should expect to give service and the customers of that business house is justified in counting on it. It is a source of satisfaction to us that long before the word "service" became so frequently used in business announcements, the Reliance Store recognized the need of giving our customers every attention, and long before we commenced to talk about service, we were giving an every day kind of service that won for us many friends. We are doing business along the same lines as formerly and in hundreds of different ways, the Reliance Store will cater to its customers in the very best manner possible.

The Reliance Store Co.

Automobile Owners Attention!

The REPAIR DEPARTMENT in our garage has been taken over by Mr. Ed Siebel of Edmonton. Mr. Siebel is a capable mechanic and has had sixteen years experience on all makes of automobiles. For the last two years he has been working foreman in one of Edmonton's leading garges and comes to us highly recommended by automobile men of the city. We have added considerable equipment to our shop and with Mr. Siebel's experience the automobile public will derive the benefit of quicker and more reliable service than they have ever experienced before in this district. All work will be guaranteed and will be done at flat rate charges.

LOCAL and PERSONAL

Mrs. Wm. Hall returned home on Monday after visiting some time at Westlake.

Mrs. Nels Shaw returned home on Tuesday after visiting some time at Westlake home.

Mr. and Mrs. Jack Johnston entertained the Thompson family from Kingman on Sunday.

Mr. and Mrs. Thos. Jones motored to Edmonton on Sunday. They were accompanied by Mr. Jones brother who remained in the city.

Mr. and Mrs. R. Phillips motored to Camrose on Sunday. They were accompanied by H. Heppell of Tofield.

Jos. Ashley of Lower Bear Creek is branding for Roe Phillips.

Mrs. Irvin Pinate and daughter of Woodlawn returned home on Saturday after visiting friends in this district for some time.

Lloyd Wood put in his basement last week and expects to start building his house in the come future. Jacks supplies Lloyd.

Vernon Stumpf of Camrose is visiting his friend Donald Phillips of this district.

Mr. Michael Sevura visited home folks Saturday evening and Sunday.

A number of ladies of Lake Shore attended the U.F.W.A. meeting at the home of Mrs. Roe Francis on Thursday last week.

U.F.W.A. NOTES

The regular meeting was held on July 26th at the home of Mrs. Jos. Francis. There were 15 members and two visitors present. As the president, Mrs. Ferguson, is away on a trip to Eastern Canada, and the vice president had tendered her resignation of office, Mrs. Booth was appointed chairwoman for the meeting which she conducted in a very able manner. After the regular business was disposed of, Mrs. T. Soule gave report of the convention held at Lamont on July 23rd. This report showed that Mrs. Soule had taken a keen interest in the proceedings and it was submitted to the board in such a manner as to enable us to get a very clear picture of the idea of the convention.

After this, Mrs. Myrtle Soule gave an exceptionally interesting paper on Canadian authors. Mrs. Soule thoroughly understands the subject and presented it in a very pleasing and interesting manner.

The next meeting will be on August 9th at the home of Mrs. Gray. The roll call will be answered by "a name where born and what is noted for. There will also be a paper "How to can fruits and preserve the atmosphere which gives character to home by Mrs. T. E. Soule.

Each member is asked to bring a suggestion for next year's program. The meeting will be at 2.30 p.m. please be on time. The hostesses will be Members of McAllister, Gray, Baptist and Phillips.

Mr. and Mrs. P. Haugen arrived home from Banff on Wednesday after a pleasant vacation trip to Banff.

As the president, Mrs. Ferguson, is away on a trip to Eastern Canada, and the vice president had tendered her resignation of office, Mrs. Booth was appointed chairwoman for the meeting which she conducted in a very able manner. After the regular business was disposed of, Mrs. T. Soule gave report of the convention held at Lamont on July 23rd. This report showed that Mrs. Soule had taken a keen interest in the proceedings and it was submitted to the board in such a manner as to enable us to get a very clear picture of the idea of the convention.

After this, Mrs. Myrtle Soule gave an exceptionally interesting paper on Canadian authors. Mrs. Soule thoroughly understands the subject and presented it in a very pleasing and interesting manner.

The next meeting will be on August 9th at the home of Mrs. Gray. The roll call will be answered by "a name where born and what is noted for. There will also be a paper "How to can fruits and preserve the atmosphere which gives character to home by Mrs. T. E. Soule.

Each member is asked to bring a suggestion for next year's program. The meeting will be at 2.30 p.m. please be on time. The hostesses will be Members of McAllister, Gray, Baptist and Phillips.

Mrs. Hicks of Calgary and Mrs. McCartney and family of Provost, mother and sister of Mr. Ed and Mr. Harold Hicks are visiting at the Hicks homes of Tofield, this week.

The Tofield baseball team played at the big ball tournament held at Camrose last week. They were eliminated by losing to New Norway in the early stages in the tournament.

Mrs. Sherlock returned on Monday after spending a few days at Calgary visiting her brother. Mrs. Fraser is staying with a son there for a short time.

Mrs. Snell received word on Wednesday that her mother, Mrs. Martin, was very ill and not expected to live. Mr. F. O. Ball kindly consented to take Mrs. Snell and family to Duhamel in his car. Mrs. Martin passed away on Thursday, the funeral being held on Saturday.

Mrs. R. Davidson and Mrs. Glover are spending a two week vacation at Cooking Lake.

There will be no Sunday school or service at the United church on Sunday Aug. 5th.

BIG LAND DEAL

A land deal of major proportions was put through this week, whereby Mr. W. C. Bellman sold his ranch to McLaughlin & Sons. The ranch which comprises 320 acres lies in the Rose Creek district, was sold for $20,000.

BIRCHBROOK

The holidaying which swept this district last Sunday, lithe of short duration, was exceptionally severe, several crops being completely destroyed and lots of others badly damaged. Quite a few turkeys and chickens lost their lives, lots of windows smashed, and even the siding and shingles on buildings were split by the hailstones which were the largest ever seen here, lots as big as goose eggs and odd ones larger. Several cars had their tops pierced time and again by hail which bruised the passengers inside, one cloud over crop had the stones come through the top and "all its plain glass windows shattered. One little boy got a knock on the head with a hail stone nearly giving him the K.O. and a big lump was seen in evidence. Oh! it was a storm to talk of for years, and we hope it doesn't happen again.

Mr. Leslie Rogers is on a trip to Washington to visit the folks there.

Mr. J. Leahy is on a vacation at Lake Beach.

KETCHAMOOT

Ketchamoot got her share of the hail storm on Sunday evening and it was the worst storm ever known to old timers. Hail stones being as large as turkey eggs, and not only whole fields of grain were wiped out but window lights were smashed in as large as one's hand were made in roofs of buildings, turkeys, chickens and pigs were killed and other damage done.

The Richner farm was sold last week. Mr. and Mrs. Herman Lawson bought the east quarter at $45 an acre. Mr. Iven Sonne the west quarter at the same figure.

The monthly meeting of the M.A.T. will hold their regular meeting at the home of Mrs. Henderson next Wednesday, August 8th. As there was no meeting in July it will be a pleasure to get together again.

Mr. and Mrs. Campbell and family and mother, Mrs. Ross, were guests of Mr. and Mrs. Carlisle on Friday evening.

Several families attended the Camrose fair last week. Those we heard of were the Wm. Law family, Mr. and Mrs. John Law, the Cownlee family, Mr. Sears and Stanley and Harold Schultz.

The nurses, and Herman Lawson families: Mr. Wm. Law) also a number of young people motored to Mundare Lake on Sunday.

Mr. and Mrs. Hugh Mitchell entertained their family and a few friends at their home on Sunday. Those present were, Mr. and Mrs. Tennie and family, Mr. and Mrs. D. H. Mitchell of Edmonton, Mr. and Mrs. W. A. Mitchell and daughter Mr. and Mrs. Carlisle and Bellva

Friends of the McBeth family were pleasantly surprised to hear of the marriage of their eldest daughter, Beulah, to Mr. James Hamilton, all of Calgary.

Mr. Wilford Law returned home last week from the coast.

Mr. and Mrs. John Johnson and family motored to Edmonton on Friday to visit Mr. Johnson's relatives.

Miss Ethel McClymont and Percy Owen were guests at the Sears home on Sunday evening.

Thanksgiving week when Mr. Sears and two boys were going into town, Mr. LaRoche collided with them, completely demolishing the front part of the car. Charley's hand was badly cut and is still being dressed by the Dr., he being thrown against the wind shield his hand going through it.

KINGMAN

Miss Mildred Wolfred from Grande Prairie visited at the Andrew Johnson home for a few days last week.

Mrs. Olaf Benson of Edmonton has been visiting for a few days with friends and relatives in Kingman.

Mrs. Erickson spent last week with friends in Edmonton. Mr. Erickson, Lolly and Lillian Lindbergh motored up on Saturday to spend the week-end.

The Andrew Johnson and Thor Thorson families spent Tuesday with Mr. and Mrs. W. Ingram of Ketchamoot, and Mr. and Mrs. Pete Vold of Bardo.

Mrs. Robert Brunn and her brother Mr. Hans Benson, of Minburn, visited for a few days last week with their parents, Mr. and Mrs. J. Benson.

T. Thorson left on Friday for his home in Okotoks, after a two week's stay in Kingman. Mrs. Thorson and children are staying another two weeks.

Several Kingmanites attended the fair in Camrose last week.

Mr. and Mrs. Martin Marcks from Cadogan spent the week-end with Mr. and Mrs. Jonas Anderson.

The Kingman district was very fortunate to escape the hail storm which started only about six miles from here on Sunday. We had a substantial rain on Monday morning

BAD HAIL STORM HITS TOFIELD DISTRICT

After an exceptionally hot day, a day in which the heat was acutely felt in the early morning, the Tofield district suffered one of the worst hail storms of its history.

The district of Lindbrook seems to have suffered worst, the damage spreading east and west and south from there. In the town of Tofield itself, it was not so very severe, bad enough, but not so bad as at Lindbrook, where the hail stones were as large as turkey eggs, and killed pigs. Smashing windows was easy for these same ones going through the roof of a closed car.

It is too bad the crops suffered so severely quite a number being hailed out and carrying no insurance. Several have farmed in the district hit for twenty years and this is the first time hail has done any damage.

One peculiar feature of the storm at Tofield, was the comparative absence of any wind, the hail stones here falling down straight. There were some large ones too, the largest we have seen, but not so large as those that fell at Lindbrook. The duration of the storm was very brief, as a short time after the hail fell, the sun was shining again.

Mrs. Ross of Edmonton is visiting her daughter, Mrs. Campbell, on the Hannan farm

Mr. Fred Sharpe cousin of Mr. Frank Sharpe and Mrs. Hosier spent a few days visiting at their homes while travelling through our country. He expects in the future to make his home in Edmonton.

Russell and Alvan Schultz took in the stampede at Bruce on Wednesday.

WORLD HAPPENINGS BRIEFLY TOLD

Japan has announced unconditional acceptance of the American anti-war treaty.

H.R.H. Prince George has been appointed to H.M.S. Durban as an interpreter in French.

P. C. Caverhill, chief forester for British Columbia, will go to Australia to represent British Columbia at the British Empire forestry conference there.

Alaska now has more than forty landing fields for airplanes and plans are under way for the construction of sixteen more according to F. C. Crawford of Fairbanks.

It is probable that Premier King will go to Geneva in September as a Canadian delegate to the League of Nations assembly and also as a member of the council of the League on which Canada now has a seat.

Leaders of the Arab Congress presented Lord Plumer the high commissioner a demand for the institution of democratic rule in Palestine. Lord Plumer promised to take up the question at his visit to London.

French attorneys have entered protest against the morally reprehensible conduct of United States in regard to the "foreign divorce mill." The protest was sent to the American Bar Association.

... air mail stamp will be issued in Canada soon. The stamp has been approved by Hon. P. J. Veniot, postmaster-general, but the denominations have not yet been decided upon. The stamp will be used on air mail routes now in operation.

The steamship North Shore has sailed from Quebec prepared to stop at Greenley Island and at Long Point to the mainland to pick up the dismantled trans-Atlantic plane Bremen and bring it to Quebec City, where the plane will be re-assembled and placed on exhibition for a short time.

The Newest Airship

Germany Is Proud Of Her New Super-Zeppelin

Behind the ceremonies attending the christening of the huge airship LZ-127, at Friedrichshafen lay a significance probably greater than a brief cable dispatch could indicate. They symbolized not only German pride in the completion of a new super Zeppelin, but German aspiration for a renewed leadership in what many experts regard as an important future element in aviation lighter-than-air transport.

The LZ-127, christened "Count Zeppelin," is now the world's largest completed airship. It can carry a greater "pay load" than any air vehicle in existence. Because of a wide travelling radius, it and others similarly large are expected to become in time the trans-ocean carriers of mail, express and passengers.

Germany is not alone in the construction of new super-dirigibles. In England even larger airships are being built, one for commercial purposes with the idea of shortening travel time between London and Colonial possessions.

In the United States design data and bids have been asked for two new giants of the air to be used by the navy. It is, however, on the commercial possibilities of lighter-than-air craft that modern thought now centres.

Bernard River

Interesting Story Of How This Western Stream Got Its Name

In 1828 Sir George Simpson, governor of the Hudson's Bay Company crossed Canada from east to west by way of Peace River. At half-past six on Sunday evening, September 7, the travellers laid aside their paddles to camp for the night at the mouth of a small tributary to Peace River not far below where the latter river divides into two main branches, the Finlay and the Parsnip. In disembarking from large canoes passengers had generally to be carried from the canoe to the shore. Sir George Simpson's guide, Bernard, was carrying the Governor ashore when he fell with him into the water. Since that day the river has borne the name Bernard and all that is known of the guide is that he was the principal figure in this incident. The name Bernard River has just been approved by the Geographic Board of Canada.

Where Begging Is Prohibited

Begging is prohibited in Lima and Callao. An order recently issued by President Leguia states that, in view of the completion of a beggars asylum by the Lima Society of Public Beneficence, capable of caring for 300 persons, anybody found soliciting alms will be arrested.

Automobiles As Settlers Effects

May Be Imported Without Sales Or Excise Tax Under Certain Conditions

Certain officers of National Revenue have apparently had difficulty in deciding whether or not excise and sales tax applies on the importation of automobiles as settlers' effects, having in mind that Tariff Item 709a provides for the collection of duty on the amount in excess of $1,000 on motor vehicles imported as settlers' effects.

In order to clarify the situation the Department submitted the question to the Department of Justice for an opinion as to whether or not the exemptions in Schedule 1 and 3 Chap. 179, Revised Statutes of Canada, had the effect of exempting cars entered as settlers' effects in total or only to the value of $1,000 each.

The Department of Justice has held that automobiles entered as bona fide settlers' effects may be imported without the imposition of either sales or excise tax. These cars, however, are subject to the regulations and restrictions by the Customs Division with respect to length of ownership prior to importation, and length of retention after importation.

How a Town Prospers

Four Things Which Must Be Done To Ensure Success

George Brown, the great pioneer publisher of Toronto, addressed a Presbyterian audience in a little town, saying: "If you want your town to prosper there are four things that must be done:

(1) You must buy from your local merchants.

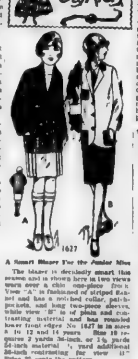
(2) You must uphold the character of your local manufacturers.

(3) You must support your schools and churches liberally.

(4) Above all you must give an ungrudging support to your local newspaper.

If you do these four things, and do them well, your town will one day be a city." His audience followed his advice and their town has become a city.

Winnipeg Newspaper Union Fashions



A Smart Blazer For the Junior Miss

The blazer is decidedly smart this season and is shown here in two views worn over a chic one-piece frock. View "A" is fashioned of striped flannel and has a notched collar, patch-pockets, and long two-piece sleeves, while view "B" is of plain and contrasting material and has rounded lower front edges. No. 1627 is in sizes 8, 10, 12 and 14 years. Size 10 requires 2 yards 36-inch, or 1¾ yards 54-inch material; ½ yard additional 36-inch contrasting for view "B." Price 25 cents the pattern.

The frock has plaits and a yoke at front and back, a high neck with shaped collar or square neck, long sleeves gathered to wristbands or short sleeves with cuffs, and a belt. No. 1542 is in sizes 8, 10, 12 and 14 years. Size 10 requires 2¾ yards 36-inch, or 2 yards 54-inch material. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

It was a pleasure to see the fine type of young men we saw on this farm, vigorous, keen, happy fellows who only too evidently were anxious to "make good" in Canada. The progress they had made was good, so much so that one of our party declared that the ploughing he had seen that day by former city workers would put to shame some so-called experienced ploughmen. Another declared that he would willingly engage at current wages men who proved capable as the young fellows he had seen that day. And still another took off his coat and gave the young men an object lesson in the swinging of an axe. Afterwards we were addressed by Mr. H. Betterton, Under-Secretary to the Ministry of Labor, who asked us for our frank criticisms. Truth to tell, from our day's observations, there was little but minor points to criticize, for we were glad to recognize and commend an experiment which was so worthy in its aim.

An amusing but useful device was a number of rubber udders filled with water. These are used in the first stages of teaching milking. An historic feature of the Weeting Hall estate was the remains of a moated castle built by the son-in-law of William the Conqueror.

Back in London, after having luncheon on the train as guests of the Ministry of Labor we were accorded yet another high privilege an informal reception at 10 Downing Street, by the Prime Minister, Mr. Stanley Baldwin and Mrs. Baldwin. Dignified, plain, simple, nothing could be more expressive of the British character than the unpretentious house which Great Britain allots to her Prime Ministers. As with the house, so with Mr. Baldwin. The greeting given to us by the Prime Minister and Mrs. Baldwin was direct and sincere. We might have been visiting the home of an old friend. And it was as a friend that Mr. Baldwin spoke to us. Frankly and straight out he told us of Britain's unemployment difficulty and appealed to us as fellow-citizens of the Empire to help so far as we could in the solution of the great problem to the mutual advantage of Great Britain and Canada. That we had investigated the Brandon experiment and had found it good was gratifying to him. He acknowledged it, asking us not to be prejudiced because these men had been unemployed for a fairly long period. Unemployment had been their misfortune, not their fault. They were willing and sound at heart. All they needed after their training was a little encouragement. He hoped we would see, so far as we could, that the encouragement was given to them when they got to Canada.

Who of us would have dreamed, when starting on our tour that, before we went back we should enter the cabinet room of 10 Downing Street, the Inner Council Chamber of the British Government, where so many momentous decisions have been made, affecting not only the Empire, but the world itself; that in that room we should be taken into the confidence of the Prime Minister of Great Britain, that he would ask our goodwill in favor of a great experiment, and that we should be able to help, if we wished, in a great Empire purpose!

We had still another appointment before this fascinating day was ended. The Imperial Institute had invited us to dinner, where we were to meet the representatives of the woollen industry under the chairmanship of Mr. Frederic A. Ackroyd, a large woollen manufacturer of Bradford. A magnificent banquet, tendered us by Mr. Ackroyd, was followed by addresses exhorting the Canadian farmer to grow long wool sheep which would meet the particular requirements of the British woollen trade. The challenging remarks of our hosts were met with stout defence by Mr. Arkell, of Canada's present policy in breeding more of the short-wooled breeds for meat primarily on account of the premium to be secured on the markets of the United States. This added spice and stimulus to a delightful evening. Afterwards we were shown over a section of the Institute devoted to Dominion displays.

One more day and then "goodbye" to London, but before actually leaving her we were to receive an unexpected honor, an unexpected invitation, and our greatest thrill of the tour, a flight from Croydon aerodrome the largest and best equipped in the world.

The unexpected honor came from the King, for we were accorded a special place from which to view His Majesty's procession to Westminster for the opening of Parliament. It is a fine sight to see the wonderful state coach go by accompanied by all the pomp which marks this important ceremonial. Our only regret was that Her Majesty for the first time in the reign of His Majesty was unable, through indisposition, to accompany the King to the opening of Parliament. Her Majesty however, was able to appear on the balcony of the Palace with the Duchess of York, and the Little Princess Elizabeth.

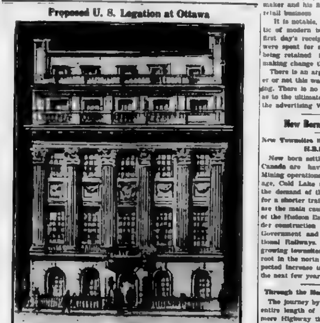
Our unexpected invitation came from Mr. George Robey, the famous comedian who had reserved seats for the whole party at the Princess Theatre, where we saw his revue, "Bits and Pieces," prior to its being toured in Canada this summer. A wonderful evening, concluded with our being invited "back stage" to meet Mr. Robey and his leading lady.

The aeroplane selected for our flight at Croydon was of the "Silver Wing" type, a luxurious air liner capable of carrying 14 passengers, the pride of the Imperial Airways Fleet. Strong, graceful, beautiful, she had a wing-span of 71 feet and a total length of 63 feet 6 inches. Her triple engines developed 1260 horse-power. She was capable of 105 miles an hour in still air, was furnished with basket arm chairs, and carries a buffet and waiter on her long trips. Let it be said at once, that more than one of us hid a secret nervousness which we wouldn't show, no not for worlds! We need have felt no qualms. In the hands of Captain Olley, our cheery little pilot, she rose like a bird. Up, up she climbed until she reached 3,000 feet. Below us surely was not great London, but the land of Lilliput, tiny houses, tiny plots, and ribbons for roads. Those two little spindles like the legs of a brass bedstead were the towers of the Crystal Palace. Favored by the wind we were travelling 110 miles an hour, it seemed like two, so slowly moved the landscape. Soon, all too soon, our quarter-of-an-hour in the air was ended. In a long graceful glide we said to earth, landing lightly as thistledown, then skimming along the ground to the place of debarkation. It was wonderful, exhilarating experience, in more senses than one a "high spot" in the tour.

(To Be Continued.)

The stamp clerk often weighs other people's words.

Proposed U. S. Legation at Ottawa



How the new United States Legation at Ottawa will look. American architects have drawn plans for the building. The site will be adjacent to the Rideau Club, fronting Parliament Hill, where two buildings will be demolished to make room for the new structure. The site cost the United States $104,000 and the building will cost about $350,000. This does not include quarters for the minister and his family and staff as is the case with the Canadian legation at Washington. Canada's Washington legation cost $540,000, including furniture and everything complete. The United States diplomatic service still has to provide the minister with a residence, so the housing cost of the United States ministry in Ottawa will far exceed that of Canada in Washington. The first floor of the new building will house the consular staff, the second the minister and the diplomatic staff, and the third floor the commercial attache and his staff.

SUNDAY SCHOOL LESSON

AUGUST 5

PAUL IN A PAGAN COUNTRY

Golden Text: "I know how to be abased, and I know also how to abound." Philippians 4.12.

Lesson: Acts 14.1-28.

Devotional Reading: Matthew 8.16-18.

Explanations and Comments

A Cripple Cured At Lystra, verses 8-10.—At Listra Paul and Barnabas were face to face with stark paganism. Apparently there were no Jews in the city, and few Romans. There being no synagogue, Paul began to preach outdoors. One day he noticed, on the ground near him, a lifelong cripple who was listening with an eager attention that revealed to the apostle a faith which was sufficient for the man's healing. Suddenly Paul interrupted his address by commanding the man in a loud voice, "Stand upright upon thy feet!" Up sprang the cripple, able to walk. Compare Jesus' words to the man with a palsied arm: "Stretch forth thy hand!" (Matthew 12.13). In each case there was immediate cure.

"The men of Lystra looked upon it as a great material miracle, but the deeper fact was the spiritual miracle that lay behind it, the cripple's apprehension of the truth, and the application of it to his own case; the preacher's knowledge of it, and his keenness of sight in the man's operation of faith in the living Lord. That was the wonderful thing."—G. Campbell Morgan.

Announces Arts Competition

Viscount Willingdon To Donate Prizes Totalling Thousand Dollars

Announcement that His Excellency Viscount Willingdon purposes awarding prizes amounting in all to $1,000 for competition this year in music, drama, painting, and sculpture, will occasion much appreciation in art loving circles throughout the Dominion. In music there will be one prize of $200, and two prizes of $100 each; drama, one prize of $200; painting, one prize of $200; and sculpture, also one prize of $200.

These gifts indicate not only His Excellency's interest in the arts in Canada, but also his interest in Canada generally. It is a practical interest of a type that will appeal. The competition which he is inaugurating should do not a little to develop talent and engender skill in the arts and it is to be hoped the west will be heard from in the contest.—Regina Post.

Admits Of No Argument

Money Spent In Advertising Is Gilt-Edged Investment

The local merchant who fears to spend his money in advertising, should never read the life story of John Wanamaker. If he does, he will have to revise his own life completely.

In a recent address made by Arthur Williams, Vice-President, the New York Edison Company, the speaker remarked apropos of John Wanamaker and his first venture into the retail business:

"It is notable, and perhaps prophetic of modern business, that of the first day's receipts of $24.67, $24.60 were spent for advertising, 67 cents being retained for convenience in making change the next morning."

There is an argument as to whether or not this was a wise proportioning. There is no argument, however, as to the ultimate business success of the advertising Wanamaker.

New Born Settlements

New Townsites Springing Up In the H.B.R. Area

New born settlements in Northern Canada are having rapid growth. Mining operations at Cranberry Portage, Cold Lake and Flin Flon, and the demand of the Western Prairies for a shorter train haul to the ocean, are the main causes for the building of the Hudson Bay Railroad now under construction by the Canadian Government and the Canadian National Railways. Stores, hotels and growing townsites are quickly taking root in the north to care for the expected increase in population during the next few years.

Through the Heart Of the Rockies

The journey by motor car over the entire length of the Banff-Windermere Highway through the heart of the Canadian Rockies can be made comfortably in one day. The route lies through virgin wilderness, but rest camps, automobile camping grounds, bungalow camps, and service stations are located along the way in such numbers as to guarantee accommodation for those who wish to make a more leisurely survey of the road.

Production of lead, tin and zinc products in Canada has increased from $3,151,000 in 1923, to $5,140,000 in 1927.

Memory Of Explorer Honored

Hudson's Bay Company Remembers Captain From Whom It Takes It's Name

The Hudson's Bay Company of the year 1928, has done honor in a very beautiful way to the brave sea captain from whom it takes its name.

One day in the spring of 1607 master Henry Hudson and his crew met at the little church of Saint Ethelburga, in Bishopsgate Street, London, England, to take communion before sailing away to seek the Northwest Passage.

The little church was old then, but it still stands. The company has given it three windows, and, in the presence of some of its leading members, the first was unveiled a short time ago on the anniversary of that communion.

In his little sailing vessel, with a crew of eleven men and a boy, the adventurous captain made two voyages to the Arctic ocean. On the third, in 1609, he sailed for the Dutch East India company. Taking a more southern course he discovered the Hudson river, and the Dutch traders who followed founded New Amsterdam by building a fort at the mouth of the river. In the three centuries that have passed the great city of New York has grown up around that site.

In 1610 Hudson was again in the service of an English company. This time he took a crew of twenty-three men, and set out again to find the Northwest Passage. He discovered Hudson Bay, and spent the winter on its shores. In the spring of 1611 the crew mutinied as he was on his way to England. The captain, with seven sick men and his son, were set adrift. Nothing was ever heard of the frail craft, or its crew, but, ever since, the name of Captain Hudson has rung through Canada and the motherland, as well as the United States. The great company that still bears that name is one of the oldest and most honorable institutions of our country.

Homestead Entries Show Marked Increase

Great Activity Seen Around Land Offices In Alberta

Homestead entries at the various land offices in Alberta are showing a very marked increase as a result of new regulations announced from Ottawa. Under the new arrangement persons who had proved up on their homesteads prior to January 1, 1925, are entitled to file on a second homestead. It is necessary, however, to make application to the Commissioner of Dominion Lands, Ottawa, specifying the land previously homesteaded and to secure authority from this source to enter for a second claim.

The Land Offices at Grand Prairie and Peace River are showing the greatest activity. At the former point 299 entries are reported during the month of June, making a total of 732 for the three months' period ending June 30, and at Peace River 400 entries in June have made up a total of 1,040 in the three months. Northbound trains from Edmonton are still carrying their full quota of prospective settlers, the majority of whom are either filing on homesteads or purchasing farm lands in the north.

Willing To Oblige

Recently arrested and brought to court was an Irishman, to whom the thing was a new experience. He was however, unabashed, and wore an air of a man determined not to get the worst of it. "Prisoner at the bar," sang out the clerk, "do you wish to challenge any of the jury?"

Pat looked the men in the jury box over very carefully.

"Well, I'll tell ye," he finally said. "Oi'm not exactly in trainin', but oi think oi could stop a round or two wid that fat boy in th' corner."

A wise man knows that his wife knows that he doesn't know so much.

"Why is smoking forbidden here?"
"On account of the powder factory."
"But that has been blown up."
"Yes, everything except that notice."—Meggendorfer Blaetter, Munich.

TWO SEAPLANES CARRY MATERIAL TO H. B. TERMINAL

Ottawa, Ont. — Remarkable feats have been performed and more are being attempted this year for the Hudson Bay terminal project.

Two seaplanes, under the guidance of Flight Officer James, of the Royal Canadian Air Force, are making two flights daily between Nelson and Churchill, transporting men and material from Nelson to the New Hudson Bay railway terminal.

Each plane is doing 600 miles a day. In addition to the large amount of material transferred by the seaplanes within the past month or six weeks, 116 men who have been working at Nelson have been transported to Churchill without any mishap.

The fliers have also taken photographs for use by the topographical survey branch of the Department of the Interior, and observed ice conditions off the two harbors. At present 125 men are at work at Churchill and 200 remain at Nelson dismantling the equipment there and preparing it for transfer to Churchill. Eventually practically all of these men will have been moved to Churchill.

A large amount of transfer work is being done by boats, the material from Nelson being taken to the two temporary docks constructed at Churchill. About 12,000 tons of such material and supplies will be moved during the present summer.

Another big project is the towing to Churchill this summer of the two dredges from Montreal.

Barring accidents it is expected the two dredges will reach Churchill by September 20, too late to do much work this year. Their real performance will commence next summer. The dredges and their convoys will represent a value of over $1,500,000. The two dredges cost $400,000 each, in addition to which will be a large quantity of material on at least one of the convoys.

Three hundred thousand feet of crib lumber is now being loaded at New Westminster, B.C., ready to leave next Sunday to journey southward down the Pacific coast, through the Panama Canal and thence to Hudson Bay. She is expected to reach Churchill about September 10. Two other vessels with supplies are due to leave Halifax at an early date.

Tunney Retains Championship

Heeney Succumbs To Technical Knockout In Eleventh Round

Yankee Stadium, New York.—Blinded and staggering, his face a bloody smear, Tom Heeney, the hard rock from Down Under, collapsed and fell a victim to a technical knockout in the eleventh round of his world's heavyweight championship battle with Gene Tunney.

Tunney, born and bred in New York, and defending his title at home for the first time, cut the sturdy, courageous New Zealander to pieces, subjecting him to one of the worst beatings a challenger ever received.

The spectators saw Heeney wade into unbroken slaughter through round after round, as Tunney, the master boxer, lashed his face with left hooks and pounded his heart with vicious solid rights.

Heeney came charging in like a bull, but the elusive Tunney, cool and collected, evaded his wild rights to the jaw and stabbed him with lefts to the face until the blood of the gore against Heeney's cut and bruised face almost became monotonous.

Nobile Reaches Norway

Harbor Workers Refuse To Handle Ropes Thrown From Ship To Dock

London.—With its flag at half mast, the supply ship Citta di Milano with General Umberto Nobile and the survivors of the Italia disaster on board, arrived at Narvik, Norway, said a Central News dispatch from that city.

The arrival, added the dispatch was watched with sullen interest by the harbor workers who refused to handle the ropes thrown from the ship to the docks.

The attitude of the Norwegians toward the Nobile party was caused by the reports of the desertion of Prof. Malmgren, Norwegian scientist with the expedition, who was injured and left behind.

Canada's hens produce over 200 million dozen eggs in a year, worth $60,000,000.

Phone Call From London

Moose Jaw Station Converses With British Metropolis In Test Talk

Moose Jaw.—"Hello, this is London, England, speaking, how do you hear me?"

This question was asked by a voice speaking 6,000 miles away while the listener was a Moose Jaw man, J. A. Inch, wire chief of the local telephone office. For two or three minutes Mr. Inch conversed with the man speaking from the metropolis of England, some 6,000 miles away, and he could hear him clearly throughout the conversation.

The test call was put in from the British Isles to Saskatchewan to determine the efficiency of the long-distance system recently inaugurated whereby a person in the West can converse with anyone in the Old Country.

Veteran Mountie Dead

Captain Denny Enlisted When Force Was Being Organized

Edmonton.—One of the two last survivors of the original troops of the Royal Northwest Mounted Police to cross the plains in 1874, Capt. Sir Cecil Edward Denny, 79 years old, sixth Baronet of Tralee Castle, County Kerry, Ireland, died in a local hospital on July 24.

He left Ireland at the age of 21 and enlisted at Ottawa in the R.N.W.M.P. which was just being organized. He rose to the rank of Inspector in the force and was one of the officers to sign the famous treaty of 1877 with the Indians.

In late years Sir Cecil Denny has been acting as archivist for the Alberta Government, and has written several books on early life in the west.

Nova Scotia Reports Few Men Available

Cannot Supply Number Asked For To Assist In Western Harvest

Halifax.—The department of natural resources has notified the minister of labor, at Ottawa, that Nova Scotia would be unlikely to supply more than 75 per cent. of the number asked for to assist in the harvest of the Western wheat crop.

It was stated that owing to the increased activity in the province in building and mining industries, the number of men who will go on the harvest excursion from Nova Scotia would not be more than 1,500.

Find Wreckage Of Plane

Idea Is Advanced That It May Explain Fate Of Nungesser-Coli

Copenhagen.—A fragment of aeroplane wreckage with some silver and bronze colored fabric attached to it has been picked up off the Jutland Coast.

In the belief that the wreckage may possibly be part of the Nungesser-Coli 'plane lost last year, the fragment has been sent to Paris for identification. The wreckage was found by Dr. Frode, a Danish physician. There was a wireless receiver among the fragments.

Heads Teachers' Federation

Winnipeg Man Is Elected President For Coming Year

Winnipeg.—C. W. Laidlaw, B.A., principal of the Machray junior high school, Winnipeg, was elected president of the Canadian Teachers' Federation at the ninth annual conference here.

The other officers of the association for the coming year are C. Braden Jelly, of Summerside, P.E.I., who was given the majority vote over C. H. Sweet, of Alberta, for vice-president; and Alderman M. J. Coldwell, of Regina, who was re-elected secretary-treasurer of the organization.

Will Investigate Nobile Charge

Rome.—Italy's inquiry into the conduct of the Nobile expedition, which has been ordered by Premier Mussolini to still hostile criticism throughout Northern Europe, is expected to be opened late in September or early in October. It is believed that it will be directed by Mussolini himself.

Hail Ruins Crops

Saskatoon.—Heavy grain crops, almost ready for the harvest, were completely wiped out in some parts of central Saskatchewan last week by hail which accompanied the worst electrical storm to have swept this district in a decade.

Plan Visit To States

New York.—Field-Marshal Lord Allenby and Lady Allenby have planned a visit to this country, and are due to land here October 2.

Balfour At Eighty

Distinguished British Statesman Has Been Adviser To Three Sovereigns

London.—Great Britain celebrated recently the 80th birthday of one of her most distinguished statesmen, the Earl of Balfour. Lord Balfour's public service goes back back 54 years, for he entered the House of Commons in 1874, and he is one of the few great survivors of the Victorian era. He was adviser to three successive sovereigns.

The only other statesman of outstanding eminence in the period alive today is the Earl of Rosebery. He has been out of politics for 20 years and is an invalid. Earl Balfour is a member of the cabinet today, being Lord President of the Council.

Notwithstanding the throat infection which laid him aside during the winter and spring, he is again normally active. His recent illness necessitated a rest from his usual physical activities including tennis, of which he was a devoted player, but the Daily Mail quoted him recently as saying that he intends to take up tennis again shortly.

Lindbergh's Earnings Large

Federal Tax Payments This Year Amount To $30,000

Washington, D.C.—During the latter part of 1927, according to reliable calculations, the earnings of Col. Charles A. Lindbergh, New York-Paris flier, amounted to $204,000 and his Federal tax payments this year amount to $30,000. He started his earnings by winning the $25,000 Orteig prize for being the first to fly the Atlantic to Paris. For touring 70 American cities he received $360 a day from the Guggenheim Foundation.

WILL CONSIDER MORE PLANS TO AID IMMIGRATION

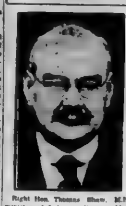
Ottawa, Ont.—The announcement by Right Hon. Winston Churchill that the British government is prepared to spend more money in stimulating British immigration to Canada has created deep interest at Ottawa. While officials of the immigration department are unaware of the various policies suggested, it is expected that Lord Lovat, who will arrive in Canada shortly, will have complete details.

All of the proposed policies with the exception of the boy immigration scheme are either new or are schemes which have been suggested by the Canadian government and refused by the British Government.

This is true, particularly of the proposal to give to settlers a substantial loan to aid them in commencing farming. The Canadian government obtained the consent of the British Government, in the 3,000 family scheme, to an agreement whereby the British Treasury advanced $1,500 per head but when the agreement expired the British government sought to reduce the amount for future settlement to $800. When this was refused they increased the amount to $1,200 and it is not expected that they will be prepared to deal with settlers in still more generous terms.

In the matter of reducing the ocean rate the Canadian government has hitherto been opposed to spending more public funds for this purpose, but it is believed that the steamship companies and the British government may unite to this end. The other schemes suggested by Mr. Churchill are all regarded sympathetically at Ottawa, and as soon as Lord Lovat arrives the department will reach a decision.

TO VISIT CANADA



Right Hon. Thomas Shaw, M.P., minister of Labor in Ramsay MacDonald's cabinet, who will tour Canada with the British Parliamentary Association.

Alberta To Consider Town-Planning Scheme

Premier In Position To Make Recommendation To Council

Edmonton.—Premier Brownlee has returned from his visit to the University of California, where he gave the opening address at the fourth annual convention of the American Institute of Co-operation by invitation of the U.S. federal minister of Agriculture.

En route, he stayed at Victoria and Vancouver to interview two possible town planning directors for Alberta's recently-formed Town Planning Commission—H. L. Seymour, town planning commissioner for Vancouver, and Doughty Davies, who has just completed a town planning survey in Victoria. These two, with other applicants will be considered by council in the near future, and the premier indicated that he was in a position to make a recommendation to council.

May Meet In Canada

League Of Nations To Consider World Disarmament Conference

Ottawa.—A world disarmament conference, vastly more far reaching in its scope and consequence than the United States Multilateral Treaty for the outlawry of war, will be considered by the council and assembly of the League of Nations in September.

It is said that in the event of the conference being decided upon the Prime Minister of Canada may issue an invitation for the conference to be held in Canada.

Big Opium Seizure

Shipment Valued At $120,000 Is Seized At Nanaimo

Nanaimo, B.C.—Opium valued at $120,000 was seized in the bonded warehouse here. It was concealed in a package of freight marked "peanut oil" and "salt turnips."

The packages were addressed to Lam How, a local Chinese merchant and are thought to have come over on a liner recently arrived from Asiatic ports.

The seizure was made by provincial police, assisted by officers of the customs preventive staff.

Lessening Fire Hazard

Winnipeg.—Rain is gradually lessening the fire hazard of the forests of Northern Manitoba districts, and according to forestry officials here the 20 to 30 fires which the Royal Air Force and the fire rangers have been fighting strenuously during the past month, are gradually petering out under the drenching.

NEW CANADIAN STEAMSHIP

The "Lady Nelson," first of five steamers being constructed for the Canadian National Steamships to be operated between Canadian Atlantic ports, the West Indies, British Guiana, Bermuda, the Bahamas and Jamaica. They will engage in passenger, cargo and mail traffic, with special refrigerator equipment. The passenger accommodation will be of the most complete character. In construction these ships are being built to comply with all requirements and will possess the most complete facilities for comfort and safety. The "Lady Nelson" was launched on July 17th, and was christened by Madam Lapointe, wife of the Minister of Justice.

Cannot Supply 'Plane To Hunt Prospectors

Department Of National Defence Receives Many Appeals

Ottawa.—"The first requisite of a prospector is the ability to find himself." That is the view taken by the Department of National Defence as outlined by an official of that department. The department is being inundated with appeals for 'planes in search for prospectors thought to be lost.

"When a prospector in the Northern woods fails to turn up when his employers or associates think he should they rush to the Department of National Defence asking that a 'plane be sent to search for him," said this official. "In most cases the department declines. In the first place the prospector is probably not lost at all, but something has impeded his progress. Then if he were lost there is very little chance of an airman seeing him from a 'plane."

English Cadets Will Compete

Ottawa.—A party of English cadets which will make a tour of Canada, will participate in the annual prize meeting of the Dominion of Canada Rifle Association here, Aug. 13 to 17. There will be fourteen in the party, under the command of Captain R. J. E. Hanson. Ten members of the Australian Bisley team who will return home by way of Canada, also are likely to take part in the matches, while most of the members of Canada's Bisley team are scheduled to enter.

A team of cadets from Victoria High School, Victoria, B.C., will take part in the Dominion matches and will motor from the capital of the Western province.

At the matches last year there was one woman competitor and this year there is a prospect of four or five women entrants from Saint John, N.B.

Start Long Water Trip

Vancouver Men Sailing From New York To San Francisco Via Panama Canal

New York.—James McArthur and Sydney A. McQuillan, both of Vancouver, B.C., sailed down the Hudson River in a 24 foot motor launch, the Miss Vancouver, bound for San Francisco. They will go by way of the Panama Canal.

McQuillan, who is a well known speed boat enthusiast of Vancouver and who has already travelled more than 10,000 miles in that type of boat, is planning the trip as a method of proving the possibility of using a slow speed motor in a high speed hull.

ARCHBISHOP OF CANTERBURY HAS RESIGNED OFFICE

London.—After serving for 25 years as Archbishop of Canterbury, Right Rev. Randall Thomas Davidson has resigned. His long-expected retirement was undoubtedly hastened by Parliament's second rejection last month, of the revised prayer book, in support of which he had labored for years.

It was announced officially that the King had received with great regret an intimation from the Archbishop that he was desirous of resigning his high office. His Majesty, on the recommendation of the Prime Minister by Royal Warrant, appointed a commission consisting of the Archbishop of York and Bishops of London, Durham and Winchester, for the purpose of receiving the resignation of the primate.

The commission reported that it accepted the archbishop's resignation to take effect on November 12, of this year and this has been approved of by His Majesty.

The Archbishop of Canterbury 96th of his line, is 80 years of age. At about the time his resignation will take effect he and his wife will celebrate their golden wedding anniversary, and it is planned to present to them on this occasion a fund which is now being collected, to ensure greater comfort in their declining years. A memorial will also be placed at Lambeth Palace residence of the Archbishops of Canterbury, to mark the general gratitude for Dr. Davidson's long and painstaking services to the church and the nation.

Most Rev. Cosmo Gordon Lang, Archbishop of York, is the most probable successor to Dr. Davidson, indeed it is reported he has already been offered the post and has indicated his acceptance.

WOULD FORM A CENTRAL BUREAU OF EDUCATION

Winnipeg.—Agitation for the establishment of a Dominion Bureau of Education, which had its inception at a former assembly, was revived in resolution form at the Canadian Teachers Federation convention.

The objects of the bureau would be to bring about uniformity in the standards of the teaching profession and the creation of a federal teachers' registry, centralization of educational policies and stimulation of research work under government supervision.

Another resolution upon which action was deferred, asks the national research council to set aside a certain sum of the annual grant for the study of educational psychology.

A resolution advocating that steps be taken by the departments of education in the various provinces of the Dominion to limit the number of students attending normal schools to the needs of the provinces was passed back to the resolutions committee for redraft.

A comprehensive survey of the advancement made in the field of educational research was given by Dr. W. F. Russell, dean of Teachers' College, Columbia University, N.Y. In his opinion there was a tremendous need for intensified and concerted effort in this work. Granted that normal progress noted in the past was continued in the future he predicted that the teaching profession in the next hundred years would see as significant an advance as seen in the field of medicine and other sciences.

Dr. Russell stated that too much stress could not be laid upon the importance of scientific study of educational problems. He expressed the hope that Canada and the U.S. would join with other nations of the world in interchanging results obtained from their independent investigations. By such a forward step, overlapping would be avoided to a degree, educational standards materially advanced while the pupil would derive inestimable results.

Harvesters From B.C.

Coast Province Will Be Able To Supply Usual Quota

Vancouver.—British Columbia will be able to supply its usual quota of harvesters to the prairie provinces this year, in the opinion of government officials here. While it is stated conditions in British Columbia are better than in past years, it is estimated that six thousand men will be available for the harvest fields of western Canada this year, in the opinion of J. H. McVety, superintendent here of the Dominion employment service.

Record Number Of Entries

Many Nations Will Be Represented At Olympic Events

Amsterdam.—Entries for Olympic swimming, rowing, yachting, wrestling, modern pentathlon and cycling have closed with a record number of countries signifying their intention of competing.

Thirty-four nations will be represented in the Olympic swimming, 23 in yachting, 20 in rowing, 30 in wrestling and 14 in the modern pentathlon.

Portrait Presented To Dominion

Ottawa.—A magnificent life-size portrait of the late Earl of Minto, at one time Governor-General of Canada has been presented to the Dominion archives. The portrait, the work of Miss Vicaji, an English artist, arrived recently, and has been hung in the room devoted to Governors-General. The Dowager Countess of Minto, widow of the late administrator, donated the gift to the nation.

Situation Much the Same

Ottawa, Ont.—Renewed reports that the Government may take over a number of provincial or privately owned railways in different parts of the country and merge them with the Canadian National, brought the statement from the Minister of Railways that the situation is very much the same as in the last session when he stated that Sir Henry Thornton is looking into all these propositions.

Camp Borden Flier Killed

Toronto.—While dropping a note from an airplane to his fiancee, Miss Dorothy Fallis, of Wasaga Beach, Ralph Brown, 23 years old, of Winnipeg, Camp Borden pilot, is believed to have struck an air pocket and crashed to his death when the machine collided with a tall pine tree.

Where Do You Stay When You Come to Edmonton?

There are two Hotels right in the centre of the city that will appeal to you and your family. The rates are reasonable and you would have to go a long way for greater comfort.

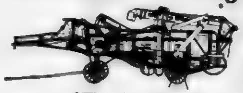
80 Years of Successful Building



of Threshing Machines

The 1928 Red River Special Line represents the result of 80 years of continuous building of Threshing Machines by the Nichols & Shepard Company.

Only by keeping faith with the farmers and threshermen of America has it been possible for this company to grow from a small blacksmith shop in 1848 to its present great factory with branch houses in every grain growing center.

And what a machine this year's machine is! The finest, fastest, cleanest thresher ever offered to agricultural America. Hyatt Roller Bearings at every main bearing point — Alemite-Zerk Lubrication — a great new feature, Weatherproof Fiber Pulleys on every high speed drive, Armco Ingot Iron in all sheet metal parts, Bridge Truss Construction, French & Hecht Wheels, all in a thresher built around the famous 4 Threshermen.

These famous 4 Threshermen, The Big Cylinder, the Man Behind the Gun, the Beating Shakers, and the Steel Winged Beater are the greatest combination ever devised for getting the grain from the straw.

The Red River Special Line for 1928 — Threshers 22x36, 28x46, 30x52, 32x56, 36x60 — Tractors N & S Lauson Built 20-35, 30-60 — Nichols & Shepard Corn Picker Husker — Combines 15' Cut 20' Cut Prairie Type — Nichols & Shepard Steam Engines

BUILT BY NICHOLS & SHEPARD — In continuous business since 1848

Cream Shippers

This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

YOURS FOR 300,000

For The Vacationist

One of the greatest joys of the summer vacation is the taking of photographs of interesting scenes and events. Thus one is able to recall months and even years after enjoyable experiences.

With the modern camera this is a simple matter and better still, comparitively inexpensive. Buy a camera for your vacation trip and for use around the home. The house, the family, the farm, the stock, visitors coming and hundreds of other times and events makes the camera useful and enjoyable.

Different models in stock. Prices are reasonable and the quality the highest.

A. A. BEIRNES, Tofield

The Reliance Store

One hears a great deal today of "Service." Yet after all, "Service" is nothing spectacular. An individual or firm in business should expect to give service and the customers of that business house is justified in counting on it. It is a source of satisfaction to us that long befor the word "service" became so frequently used in business announcements, the Reliance Store recognized the need of giving our customers every attention, and long before we commenced to talk about service, we were giving an every day kind of service that won for us many friends. We are doing business along the same lines as formerly and in hundreds of different ways, the Reliance Store will cater to its customers in the very best manner possible.

Born.—To Mr. and Mrs. Floyd Haymen, on August 4th, a daughter.

Born.—To Mr. and Mrs. Sparchuski on August 6th, a son.

Mr and Mrs. Hammond spent a few days in Calgary last week.

Mrs. H. T. Wood was called east leaving on Sunday morning's train.

Mrs. Snell and family returned home on Thursday.

Mr. A. B. Evenson is visiting at the Jobb home for a few days.

Mrs. Gorhan has been visiting with Mrs. Roy Phillips of Lake Shore this week.

Mrs. Letourneau returned from Saskatoon on Sunday where she has been visiting her daughter.

Mrs. Roberts and daughter, Margaret, and Mr. and Mrs. Cunningham of Calgary, are visiting at the Wal[illegible] home this week.

Mr. and Mrs. Taylor left Monday for Banff, Field and other B.C. points. Mr. McLean is attending to the store while they are away.

Bill Chapman returned on Sunday from Vancouver. Mrs. Chapman and Mrs. Emery will stay until the end of the month.

WEDDING OF LOCAL INTEREST

BRICE—YOUNG

Strathcona Baptist church, beautifully decorated for the occasion, was the scene of a lovely wedding on Thursday evening, when Rev. J. E. Harris solemnized the marriage of Yvonne Jeanette Guthlers Young, daughter of Rev. and Mrs. James Young, and Mr. Edward Brice, son of the late Mr. and Mrs. A. D. Brice, of Brandon.

The bride, who was given away by her father, wore a lovely wedding gown of white georgette. Her long tulle veil was held in place about her head with a circlet of orange blossoms, and she carried an exquisite bouquet of white roses and valley lilies. She was attended by two bridesmaids, a little flower girl and a ring bearer.

The bridesmaids, Miss Olive Young sister of the bride, and Miss Muriel Smith, were dressed alike in water lily taffeta. Their hair was bound with circlets of flowers and they carried shower bouquets of rose and mauve sweet peas. The little ring bearer, Eric Young, nephew of the bride, was in a blue sailor suit, and the little flower girl, Ruth Young, her niece, was daintily frocked in pale blue taffeta with pale blue ribbon binding her hair. She carried a pretty basket of old fashioned flowers.

Mr. Bernard S. Young was the best man, and the ushers were Mr Robert Smith of Westlock and Mr. Montague Young.

Mrs. Robert Smith, of Westlock, sister of the bride, played the wedding march, and Miss Margaret Bowen was soloist.

Mrs. Young, mother of the bride, was smart in her duncoress habit.

Following the ceremony, a reception was held at the residence of the bride's parents.

Mr. and Mrs. Brice are spending their honeymoon in Banff and will be at home at their residence in 80th avenue about the first of September. Mrs. Brice travelled in a smart ensemble of beige and midnight blue, and small midnight blue felt hat.

COMMUNICATION

Lake Huron, July 26th.

Dear Editor,

If you have the time and space in the Mercury to set up a short letter from one of the old rustlers of Tofield I thought it might be of some interest to some friends to hear from me, so I am taking the liberty of writing how we are enjoying ourselves so far. We had a very nice journey by train to Port Arthur, crops look good all along the route, but I think our Tofield district has the best of everywhere, both in clean land and in heavy crop; also in advance of everything heading out except a small part of Manitoba. Then we did not see much until we got near to Fort William where we first saw clover, both red and white that looked good enough to be eaten by human beings. We landed in Fort William and found one of my brothers that I had not seen for 18 years. I found him hale and hearty. I may say when I saw [illegible] last they had one little girl, now I find him with two half grown boys I did not know anything about, because we never wrote, so you can imagine my surprise to find boys able to entertain us, and they did, for they are both fine musicians. They have a seven passenger car and I want to say it was a real surprise to me to find that these two places are real beauty spots. The roads are all very smooth and the Lakes and bays are very pretty summer resorts on all sides. Some of the residences in these places I do not think can be beat anywhere for beauty. At Port Arthur we took the boat, which is named Noronic, and to give you some idea of what the boat is like, or I should I ought to say for those like myself who are not accustomed to see such boats, I will describe it: Length 385 ft., beam 56 ft.; speed 18 miles; number of crew 167; number of seats in dining room 272, total number of berths 582. But the best of all we are fed and waited on the very best. Breakfast 7 to 9 a.m. anything you want to order; lunch 12 to 2 p.m.; tea at 4 p.m.; dinner 5.30 to 7 p.m.; 9.45 p.m., lunch, lemonade and candy. The trouble we have is we cannot eat it all. Then there is entertainment nearly all the time. Last night there was a concert and a dance afterward, tonight there is to be a masquerade dance and a lot more. You might not have room for all, but I might also say that the lakes and scenery are beautiful; I think worth the money for anyone going just to take in the boat trip.

Now I suppose some might think I have forgotten all about business, well to tell the truth, I wanted to but I find I cannot because some one always comes up asking some question about the pools or U.F.A. Some even say they do not think much of our pool. I spit it out before I thought because the questioners often do not know what they are talking about. Well, they say, let's see and they start asking questions. When we get through they say, I guess you were right, I did not know. Now that reminds me I went and saw our big Pool terminal at Port Arthur. It is the largest in the world. This makes Pool terminal No. 7 at Port Arthur, so you can see how things look to men who know nothing about what a pool means, to them it looks like a monopoly and this new terminal looks like the finishing touch, for it is the most monstrous structure imaginable. I was amused to have them start to tell me all about the big terminal. Then I amused them when I said Oh yes, that is our terminal and we are also building another at Vancouver. Then they would start [illegible] how we done it, so I told [illegible] we started with the U.F.A. and [illegible] even go so far as to elect men to the houses of parliament to [illegible] out us because we found it re[illegible] men of our own profession to [illegible] stand our needs. I am afraid I am getting this letter to long, so will close for thistime.

JOHNSTONE FERGUSON

KINGMAN

Mrs. [illegible] Ohman and Mrs. Lars Larson of Camrose, visited with Mrs. E. Erickson on Thursday.

Mrs. C. Kortzman of Edmonton visited with relatives in Kingman for a few days last week.

Mrs. Roy Melvik and Gordon, left on Saturday with Mr. and Mrs. P. Sorenstead of Camrose for a few week's holiday at Banff.

Miss Gertie Bergseth of Lougheed visited for a couple of days last week with her friend Miss Alice Simonson.

Visitors at the J. Bones home on Sunday were Mr. and Mrs. Andrew Johnson and Inga, and Miss Thea Thorsen and children.

Mrs. E. Grondahl of Edmonton visited with relatives in Kingman for a few days last week.

Guests at the E. Erickson home on Sunday were Mr. and Mrs. Gust Bard and family, Mrs. Lindblom and Mr. and Mrs. F. Horte and family.

Born.—To Mr. and Mrs. N. Dettwiler on August 1st, a daughter.

Born.—To Mr. and Mrs. Myers on August 4th, a daughter.

Miss Graham, the Mapleton school teacher returned to-day from Edmonton, where she has been attending summer school.

LAKESHORE

Congratulations to Mr. and Mrs. Peter McAllister on the birth of a son on July 2[illegible]th.

John Warner jr. returned home this week from Clover Bar where he spent nearly two weeks visiting his grand parents, Mr. and Mrs. D. W. Warner.

The United Church of Lake Shore and Ross Creek are preparing for a concert to be held at Lakeshore on August 10th and Ross Creek on the 23rd. We understand talent is taking part from both places.

Mrs. T. [illegible] Beale entertained the W.A. on Thursday of last week.

Mrs. Van L. Buskirk of Edmonton is visiting friends here for some time. She is accompanied by her daughter, Grace.

Construction is going forward rapidly on the house which Mrs. Dorothy Walker is having built near that of her father, Mr. Will Abernethy. C. Plante of Woodlawn is the carpenter.

Miss Myrtle Bethel has resigned her position as teacher of the Lake Shore school. She will be succeeded by Miss Emily Ferguson.

Miss Anna Booth, nurse in training at the University Hospital, Edmonton, spent a few hours at home one day last week.

AMISK CREEK

Mr. E. A. Moen shipped over [illegible] head of cattle and 25 hogs to the pool last week. Everything was well paid for, some of his steers went over five to each.

Mr. [illegible] Erickson, Carl and Mrs. [illegible] returned from the States about a week ago. They report a very fine trip.

Mr. and Mrs. L. Watt arrived from Vancouver last Saturday. They are now visiting with Mrs. Watt's mother Mrs. J. [illegible] Olson.

Mr. and Mrs. E. A. Moen spent several days in the city last week. Mr. Moen had some dental work done. Ruby Berg assisted at home while they were away.

[illegible] and S. O. Berg motored to Camrose last Saturday, returning in the evening.

On [illegible] 29th the hail storm struck this vicinity. Some of the hail was as large as pigeons eggs and a little larger. There was some damage done but not as bad as father west from here.

Mr. and Mrs. Annels and family visited at the E. A. Moen's home last Saturday.

LINDBROOK

The question of the day here when two ladies meet is, "How many quarts have you down now?" You will note that we say "down" not "downed." Please do not infer from this that the quarts refer to amounts consumed but only to the number of quarts of berries picked, preserved and stored down in the cellar for future use. If you call on anyone and are told that they've gone "burying," it means "berrying" and not a funeral.

Another case of a knockout from the hail comes to light. Mr. Frary was in a shed with a hay roof belonging to Mr. Leslie Rogers when a hail stone came through the roof knocking him unconscious. You tell'em! Alberta! We never do things by halves!

Miss Mary Muir of Edmonton, who ll be remembered by many as the dainty little dancer at the concerts here last winter is a guest at Mr. and Mrs. J. Leahy's.

Mr Reggie Glenn is back again from the East and at present is at Mr. Chas. Morden's.

Several crops have been cut with the mower here for hay, the hail rendering them unprofitable for anything else.

The S.S.B. valuators were around this district last week revaluing S.S.B. quarters under the Act passed some time ago, some of these places sure need it badly and should be greatly reduced.

Mr. Ramshaw of the Edmonton postal staff accompanied by his wife and family and sister Miss Edith Ramshaw of North Edmonton motored down to spend a few days at the Hooper-Hollar place with old friends.

Nelson's Unlucky Love Adventure.

Writing in the London "Evening News," Max Pemberton, well-known English writer, says —

I read in an American journal a discussion as to which is the most beautiful city in the world; and I am not surprised that a writer names Quebec, and names it with emphasis.

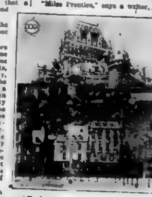
We cannot wonder at the literary enthusiasm Quebec has provoked.

"The majestic appearance of Cape Diamond," says one writer ... the fortifications, the cupolas, and minarets, like those of an Eastern city, blazing and sparkling in the sun, the noble basin like a sheet of purest silver, in which might ride with safety the navies of the world, the graceful meanderings of the River St. Lawrence, the fertile valley dotted with picturesque habitant houses, the distant falls of Montmorency ... the grim purple mountains, the barriers to the North, form a picture which it is no exaggeration to say is unsurpassed in any part of the world."

It is easy to applaud such chauvinism when one has set foot in Quebec and been received with that courtly hospitality for which its people are famous.

Nature's [illegible] is never far away from [illegible] picture. There is a story told of the Lord Nelson and of one Miss Prentice who served under Wolfe and subsequently served beer. This fellow opened an inn to which the soldiers and sailors resorted ... and among them in the year 1782 came the Captain Nelson, then commanding H.M.S. Albemarle, of 26 guns.

"Miss Prentice," says a writer,



"had a niece, Miss Simpson, daughter of Sandy Simpson, whose charms so captivated the embryo Admiral that when his vessel had sailed from port he clandestinely returned for the purpose of wedding the maid of the inn, which purpose was defeated by Mr Alexander Davidson, then a Quebec merchant, who with the assistance of his boat's crew, forcibly carried the amorous captain on board his vessel."

This seems somewhat drastic treatment, hardly likely to be popular in our time, when captains ashore to marry maids are usually welcome and other [illegible] has a to buy confetti. But Quebec ever was and ever will be a city of the strictest proprieties.

I would add that my first visit to this incomparable height was made during the first considerable snowfall of the year. I saw some five feet of snow were down in relatively a few hours, and anything more bewitching than the white domes and pinnacles and the fairy-like scenes beyond the walls it is difficult to imagine.

But Quebec is the home of superb spectacles, and in the Chateau Frontenac possesses one of the most commanding hotels in the world. Here is a great hostelry like to no other one can name—majestic in the fashion of a mediaeval fortress, yet as up-to-date as any hotel in America and more comfortable than most. From its terrace a glorious panorama of river and villages and blue hills beyond is unfolded ... and it is no surprise to hear that many thousands of Americans seek this pinnacle height every year and succumb to its enchantment.

"See Naples and then die!"

Rather, see Quebec and find a new inspiration to live.

WORLD HAPPENINGS BRIEFLY TOLD

Announcement is made by the minister of National Revenue Hon. W. D. Euler of the coming into effect of the trade treaty between Canada and the Baltic Republic of Latvia.

The British government will establish agricultural schools to train [illegible] farmers preparatory to their migration to the Dominion [illegible] a five [illegible].

[illegible] Chancellor of Great Britain [illegible] the nineteen delegates from [illegible] on the [illegible] British Empire Parliamentary Association.

[illegible] of the New York Central Railroad and for the [illegible] the Canadian [illegible] establishing [illegible] Minneapolis [illegible].

Miss [illegible] the first woman to fly the Atlantic ocean has sent a cheque for [illegible] to Commander Richard [illegible] Byrd Antarctic expedition.

[illegible] that [illegible] Lowenstein might have been [illegible] the family of the dead man has requested permission to [illegible] charging an unnamed person with poisoning Lowenstein, in the event traces of poison are found in the body.

Sir Austen Chamberlain, foreign secretary announced in the House of Commons that Great Britain had reached a compromise with France over the naval armament question which would be submitted to the other naval powers and eventually to a disarmament conference.

The cabinet council has confirmed the appointment of the commission to enquire into the return of the natural resources of Manitoba to the province. The personnel will be Mr. Justice Turgeon, supreme judge of the Saskatchewan court of appeal, Hon. T. A. Crerar and C. M. Bowman of Waterloo, Ont.

Hal B. Donly, former editor and proprietor of The Simcoe Reformer and former president of the Canadian Weekly Newspaper Association, is dead. He had been in poor health for some time and retired from active newspaper work several years ago after he had built up one of the best known weekly newspapers in the Dominion.

Modernizing E.P. Ranch

Electric Plants Furnish Light and Pump Water For Ranch Buildings

The ranch of H.R.H. the Prince of Wales, has been electrified. Two large individual electric plants, of the type used by thousands of Canadian farmers, were installed recently on the E.P. ranch, completely electrifying the many buildings which form a small city on the farmstead. Two electric residence water systems were also installed to supply drinking water, so that kerosene lamps and water from a pump are as rare at the ranch house as they are in the Prince's home in London.

Stabilizing Easter

Hoped That International Agreement Will Be Reached For Fixed Dates

The measure stabilizing Easter in Great Britain and Northern Ireland given third reading in the House of Lords recently will not be effective until an international agreement has been reached, it is stated.

The bill provides for observance of Easter on the Sunday after the second Saturday in April instead of determining the date by the phases of the moon.

One of the world's [illegible] hospitals was founded by Prince [illegible] in Ireland about 500 B.C.

"What little children go to heaven?"
"Dead ones!"—Sondagsnisse-Strix, Stockholm.

OUTSTANDING EMPIRE FIGURES

Outstanding empire figures who have achieved world-wide distinction are included in the list of British Parliamentary Association delegates who will begin a tour across Canada on August 24, from Quebec city. Among the party will be those pictured above: (1) [illegible] [illegible] [illegible] member of the House of Commons, whose fiery remarks once caused his suspension; (2) Sir Patrick McGrath, well-known journalist and president of the legislative council of Newfoundland; (3) Viscount Peel, former secretary of state for India and now commissioner of works whose department includes supervision of the Tower of London and royal residences; (4) Lord Thomson, ex-secretary of state for air, who believes future travel will be by aeroplanes serving as imperial links; and (5) Thomas Shaw, who started work as a weaver when ten years old and who became minister of Labor in Ramsay MacDonald's cabinet in 1924.

Raise English Pheasants

Experiment Is Being Made To Introduce Game Bird In Saskatchewan

An attempt is being made in the Alsask and Leveron districts in Saskatchewan, to raise English pheasants of the ring-necked variety. It is not many years since Hungarian partridge was introduced into Western Canada. The experiment will take take some years, it is said, and if successful will furnish an added attraction for bird hunters.

SUNDAY SCHOOL LESSON

AUGUST 12

THE COUNCIL AT JERUSALEM

Golden Text: "If therefore the Son shall make you free, ye shall be free indeed." John 8.36.

Lesson: Acts 15.1-35; Galatians 5. 1-15.

Devotional Reading: Psalm 133.

Explanations and Comments

Trouble-Makers From Jerusalem, verse 1. Jewish synagogues were composed of Jews and proselytes, the latter being Gentiles who had received the Jewish rite of circumcision. Other Gentiles who attended the synagogue services were called "God-fearing" or "devout," but were not in "full fellowship" with the rest because they had not been circumcised. We have seen how Paul and Barnabas preached to the Gentiles and founded churches among them at Pisidian Antioch, Lystra, Iconium and Derbe on his first missionary journey and how he reported to the church at Antioch of Syria, the church which had sent them on their mission, that "God had opened a door of faith unto the Gentiles." The church at Antioch itself composed largely of Gentiles, rejoiced over the good news, and did not realize the far-reaching effect of this new departure. When the report reached the church at Jerusalem, however it was not so welcome. In fact it aroused violent opposition. "Certain members" of that church, upon their own responsibility, went from Jerusalem to Antioch and declared there that Gentiles must first become Jewish proselytes before they could become Christians, must be "circumcised after the custom of Moses" in order to be "saved."

For their stand there is much to be said. The rite had been observed since the days of Abraham, and no law abrogating it had been voiced. Who had authority to declare it unnecessary? What right had Paul to adopt his revolutionary procedure and say that "Circumcision is nothing and uncircumcision is nothing?" Paul had the right of a revelation from God, a revelation shown, not by vision nor by word of prophet, but by results which proved God's will and purpose. God had borne the Gentiles witness, giving them the Holy Spirit even as He did unto the Jews; and he had made no distinction between Jews and Gentiles, cleansing their hearts by faith. God's will is shown in His ways with men as well as through His words to men.

"The Jews of the first century eschew the Gentiles, but we of the twentieth century eschew the Jews. They were wrong, and so are we."—George W. McDaniel.

UNIVERSITY TO OPEN SEPTEMBER 20th

Lectures for the 1928—29 term of the University of Alberta will commence on Wednesday, September 26 according to the calendar which has been issued during the past week. Registration of first-year students and new students for the second year will take place on September 24th and 25th and registration of all other students on September 25th and 26th.

The last day for receiving applications for supplemental examinations is fixed as August 21st, the date which these examinations begin. The autumn matriculation examinations will commence on August 27th.

Indian Day Celebrations at Banff

Upper—The day of the parade when Indians of all tribes ... for the inspection. Lower left—Squaws ... their ... Lower right—An Indian of today depicting one of a hundred years ago.

No section of Canada can claim a monopoly of Indian Summer, but, to Banff, Alta., belongs Indian Days. Indian Summer occurs in the fall and may last two or three weeks, Indian Days occur in July and are only three in number; but, for those for whom they are named, there is more real pleasure crowded into that short time than they experience during the other three hundred and sixty-two days of the year.

For three days the Indian is "King of Banff". He pitches his tepees under the steep cliffs of Cascade Mountain, known to the Indians from ancestral days as "Stoney Chief". Close to "Stoney Chief" and still known by its original name stands "Stoney Squaw". The latter is a pretty mountain, much smaller than its neighbour, but with an appealing feminine dignity all its own. The reason, then, for the Indians' original choice of names is obvious to all.

For these three festival days the Indian is lord of all he surveys, and all through the village of Banff and in and around the famous Banff Springs Hotel the scene resembles a veritable monster Indian camp. The event that probably led up to the adoption of Indian Days occurred in July 1889 when rail traffic, both east and west of Banff was tied up for a period of ten days, as heavy rains had washed out the tracks in both directions. The Banff Springs Hotel, then but a small structure, was crowded with tourists who found time hung heavily on their hands.

The hotel manager at that time and Tom Wilson, the famous Rocky Mountain guide, then put their heads together and decided to invite up the whole Stoney Indian Tribe from the Morley Reserve to make friends with the visitors.

What is today the main road to the hotel was on that occasion staked off as a race track, the winning post being placed at the hotel entrance. Every form of race and sport known to the Indians was held, in addition to many suggested by the white spectators. Altogether the visit of the Indians was a marvellous success, and it ultimately led to the establishment in 1907 of an annual Indian Day, which in time grew into the continent-wide advertised Indian Days. The Indians look forward to these days with the greatest enthusiasm and early on in the year start counting "only so many days now till we go to Banff". The Indian village of a hundred tepees is, as said before, located at the foot of Cascade Mountain for this festival, and is semi-circular in form, each band of the tribe having a section to themselves. Rations are served directly the Indian village is in shape. The Government donates three buffalo annually to the Indians, and the first one of these is then shot by a game guardian and quickly cut up by the redskin butchers. So skilled and speedy are the few Indian butchers employed, that within thirty minutes after the shot is fired, there is not a vestige left of what was once a lordly animal weighing approximately one ton.

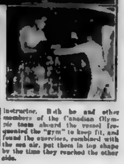
TRAIN AT SEA



The Westminster Lacrosse team which represents Canada at the Olympic games at Amsterdam, are shown in the above photograph on the boat deck of the Canadian Pacific ship "Empress of Scotland," on which they crossed the Atlantic. In the front row, from left to right, are C. Davis, I. Stoddard, D. Brunett, H. Wilkie, G. Feeney, H. Stoddard, J. Woods, back row, G. Spring, W. Patchell, J. Vernon, Red Fraser, Bobby Bourne, Ab. Brown, Bob Mackie, Nels Atkinson, Les Gregory (captain) and Dan McKenzie (business manager).

In the photograph below is seen Don Carrick, amateur boxing champion, in the gymnasium on board the "Empress of Scotland" sparring with the liner's physical instructor. Both he and other members of the Canadian Olympic team aboard the vessel frequented the "gym" to keep fit, and found the exercises, combined with the sea air, put them in top shape by the time they reached the other side.

Cream Shippers

This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

SCHOOL MATTERS

JUST TO what extent the delegation that waited upon the School Board on Tuesday evening represented private wishes and to what extent it represented a widespread desire to have an existing policy changed we do not know. But even were it representing private wishes to the extent of one hundred per cent, those self same wishes are praiseworthy and laudable.

The question of filling vacancies on the Tofield teaching staff with local teachers is one that has been discussed for several years now and so far, there is no more indication of a change in policy than formerly. Some years ago, the Mercury had something to say on the question, at that time favoring the engaging of local teachers. We have not changed our opinion any, even though the years may have given us a greater knowledge or understanding of the difficulties a local school board would be liable to encounter if such a policy were adopted. Anything that we could write at the present time cannot alter a situation created by the resolution of the Board on Tuesday night, a resolution which provides for a virtual plebiscite on the question. In taking this course, the Board may have acted wisely, but they certainly did not act courageously. A delegation was there asking for an answer yes or no—and the Board replied, wait six months and provide your own. Looking at it one way, the delegation paid the Board a compliment and the Board was unable to rise to the occasion and suitably acknowledge it.

However, that's a small matter, engaging or refusing to engage local teachers is a much larger one. To go into the matter thoroughly would require more space than we have available at the present moment, but this question will be dealt with in an early issue by us. More important still, is the expression of opinions by the ratepayers, and our columns are open to receiving letters upon this subject.

SEVERE MEASURES ARE NEEDED

(Calgary Herald)

Disquieting information comes to the Herald from a gentleman whose business keeps him travelling over the province pretty steadily. A couple of years ago he noted the fact that sow thistle, most dangerous and damaging pest of Manitoba farms, had made its appearance in Alberta. Today, he tells the Herald that he notices much larger areas of the weed, particularly in crops adjacent to railway tracks.

The disquieting feature of this information is that it means the Alberta farmer is evidently is still unaware, or, if aware, is careless as to the sort of enemy he is harboring on his property. Sow thistle practically put the Red River grain farming section of Manitoba out of business. It is a whole lot worse than a heavy first mortgage on the farmers property and once established, more difficult to get rid of.

The weeds branch of the Alberta Department of Agriculture is devoting itself to a praiseworthy campaign of education on the subject of weeds this year. ... [illegible]

ANOTHER $31,000,000 FOR WESTERN FARMERS FROM LAST YEARS CROP

Winnipeg, July 30th.—An interim payment of more than $34,000,000 is being made to-day to members of the Canadian Wheat Pool in the Western provinces. In practically every district of Saskatchewan, Manitoba and Alberta, pool members will share in the distribution, which is the largest interim payment ever made by the wheat pool.

To-day's payment is the second interim one for the 1927—8 crop, the first having been made on March 15th.

"There seem to be general satisfaction among our members as to the manner in which the various selling problems were handled and the average price obtained for their wheat," stated E. P. Ramsey, manager of the Central Selling Agency, Winnipeg, in announcing the payment.

On contract grades the payment to provincial pools ranges from 10c. to 2c. per bushel; tough grades from ... [illegible]

LARGE INCREASE IS REPORTED IN WORLD SUPPLY OF WHEAT

THE BABY IN SUMMER

God's greatest gift to the world is a baby. ... [illegible]

... condition is preventable. If diarrhoea develops however mild, stop all food at once. Give castor oil and cool plain boiled water, consult a doctor. A baby is bathed every day and in very warm days sponging with water in which has been placed baking soda (one teaspoonful to the pint) will add to the baby's comfort.

Literature on care of the baby can be had from the Red Cross Society, 101 Civic Building, Edmonton, Alta.

FIELD DAY AT OLDS SCHOOL OF AGRICULTURE

August 16th has been set as the day for the annual U.F.A. picnic and field day at the Olds School of Agriculture. The programme for the day will consist of reviewing the crops, stock, flowers, fruits and shrubs, as well as some recreational pass time. The day is open to visitors from all walks of life and from all parts of the province. The Olds School of Agriculture management would appreciate having as many ... [illegible]

The party who had been quite obviously celebrating some occasion or other, stumbled into the telephone booth and inserted his nickel in the slot.

"Number please," inquired a voice.

The stewed one sat up and opened an eye. "Number, heck, how much do I weigh?"—The Groundhog.

"What!" exclaimed the lady, "you charge me a dollar for that loose-leaf scrap book."

"Yes, ma'am," replied the polite stationer, "that is the very lowest price we can sell it for."

"How is it that I can get one just like it at Brown's for 90 cents?"

"I cannot say, madam. Perhaps Mr Brown has taken a fancy to you. He is a widower and you are very beautiful and—yes, ma'am, one dollar. Thank you."—The Groundhog.

The Ideal gift in Scotland is Homing Pigeons.—The Groundhog.

New Beauty - New Luxury New Performance - nowhere equalled - - -

NEW Masterpiece Bodies by Fisher endow these new McLaughlin-Buick creations with a measure of style, individuality and dashing beauty unapproached by any other automobile.

Gorgeous new colors and wonderful new upholsteries lend an added touch of luxury. New adjustable front seats and wider rear seats provide unequalled driving—and riding comfort.

Increased bore and stroke—greater piston displacement—improved carburetion and other advancements in McLaughlin-Buick's famous valve-in-head six-cylinder engine—give tremendous new power to what was already the most powerful automobile engine of its size in the world.

The same great developments impart thrilling new pick-up, lightning acceleration and new top speed that few drivers will care to attain.

Other features include new high-pressure gas pump—handsome new radiator design—new chrome-plated head-lamps and cowl lamps—new type instrument board—as well as many additional appointments of luxury and convenience.

The 1929 McLaughlin-Buick is an epic car marking the supreme achievement of automobile engineering.

Confirm these facts at your McLaughlin-Buick showroom.

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

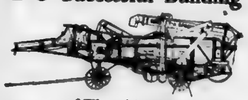
80 Years of Successful Building



# of Threshing Machines

The 1928 Red River Special Line represents the result of 80 years of continuous building of Threshing Machines by the Nichols & Shepard Company.

Only by keeping faith with the farmers and threshermen of America has it been possible for this company to grow from a small blacksmith shop in 1848 to its present great factory with branch houses in every grain growing center.

And what a machine this year's machine is!

The finest, fastest, cleanest thresher ever offered to agricultural America. Hyatt Roller Bearings at every main bearing point — Alemite-Zerk Lubrication — a great new feature, Weatherproof Fiber Pulleys on every high speed drive, Armco Ingot Iron in all sheet metal parts, Bridge Truss Construction, French & Hecht Wheels, all in a thresher built around the famous 4 Threshermen.

These famous 4 Threshermen, The Big Cylinder, the Man Behind the Gun, the Beating Shakers, and the Steel Winged Beater are the greatest combination ever devised for getting the grain from the straw.

A Great Achievement

Keen interest has been aroused in all parts of Canada by the announcement made at Victoria recently by Sir Henry Thornton, President of the Canadian National Railways, that as a result of some years of study and work a plan will be submitted to the Government and Parliament in the very near future providing for the financial reconstruction of the national system of railways, a plan which, in the words of the C.N.R. president, "will in perpetuity remove the C.N.R. from being any further drag upon the treasury of Canada."

As a matter of fact, the financial reconstruction of the Canadian National Railways has been proceeding apace for some years past through the making of amicable arrangements with stockholders and bondholders of several of the railways now incorporated in the national system. These arrangements were a necessary preliminary step to a final consolidation and development of a plan whereby the system could be relieved of the huge burden imposed upon it by reason of its heavy over-capitalization.

In considering the Canadian National Railways, it is always to be remembered that it was not constructed, like the Canadian Pacific, as one operating unit. On the contrary, it is the result of the amalgamation of several different systems, with lines often duplicating each other in the same territory, with duplicate sets of shops, round houses, stations, and other equipment. Thousands of miles of the system were built not for purely commercial reasons, but as a feature of national policy for the opening up, colonization and national development of the Dominion. Some portions were located for strategic national reasons rather than from the standpoint of the business to be secured or developed.

Under the circumstances, it was not surprising, but rather to be expected, that such mileage would be operated at a deficit. Year by year these deficits have been charged up against the lines which ultimately became part and parcel of the present Canadian National Railways. These individual systems were, in reality, bankrupt when the Government was compelled to take them over to prevent a catastrophe and financial disaster which would have shaken the Dominion and all but ruined its credit in the money markets of the world. Had these railways remained in private ownership and passed into receiverships there would have been a drastic writing down of capitalization and holders of the stocks and bonds would have had to take their losses, while the Dominion itself would have lost all the many millions loaned to them.

It has long been foreseen that if the Canadian National Railways were ever to earn sufficient revenues to meet interest charges on its capitalization, the financial structure of the system would have to be reconstructed so as to more nearly bear some relation to the actual physical value of the system as a going concern. But, as already stated, certain arrangements with the stock and bond holders of the old railways had to be negotiated if Canada was to escape the stigma of having broken faith with these investors and the accusation of being guilty of a policy amounting almost to repudiation.

Neither Sir Henry Thornton, nor Hon. C. A. Dunning, Minister of Railways, has given any hint of the nature of the proposals to be laid before Parliament, but the people of Canada, as reflected by the editorial expressions of papers on all sides of politics, are decidedly friendly to the development of any reasonable plan which will give the management of the national railways a fair chance to make the system self-supporting and ultimately a profit making enterprise.

When Sir Henry Thornton, at the request of the Mackenzie King Government, accepted the presidency and managership of the Canadian National Railways it was still in a state of disorganization. From an operating standpoint it had to be completely reorganized. At that time it was not only not earning one cent of interest on its outstanding stocks and bonds, but it was being operated at an actual loss year after year, which loss had to be put up in cold cash out of the Dominion treasury. Next to the war debt of Canada, it was the greatest burden imposed on the Canadian people. The outlook was blue indeed, and many people feared it would bankrupt the Dominion.

Therefore before any permanent reconstruction of its financial system could be undertaken, it was not only necessary to effect the arrangements already referred to, but even more necessary that these annual losses in operation be stopped. It stands to the credit of Sir Henry Thornton that in this he was markedly successful. Operating deficits ceased some years ago. Within the past two or three years these surpluses have been sufficiently large to meet all interest charges on securities held by the public leaving a small balance to be applied on the enormous sum owing to the Government itself.

Addressing a meeting in a Saskatchewan town last month, Sir Henry Thornton stated that the surplus this year would be the largest in the history of the system, and that the outlook for the future of the road as a real and very valuable asset of the Dominion was never brighter, and this despite increased wages to employees and lower freight rates imposed by the Railway Commission.

The final and definite financial reconstruction of the whole system, and the resultant establishment of the Canadian National Railways as a self-supporting publicly-owned transportation utility, will not only give the greatest satisfaction to the taxpayers of Canada, but it will prove a guarantee to the whole world of the financial stability and strength of the Dominion, and be hailed as another great Canadian achievement.

Red River Voyageur Dead

One Of Last Survivors Of Courageous Northern Adventurers

One of the last of the Red River voyageurs, Eli Carriere, 89 years of age, died recently at Winnipeg following a few weeks illness. Carriere was one of the band of intrepid and courageous men organized by the Hudson's Bay Company to direct the carrying of freight to Far Northern Canada and to return with the fur catch.

He assisted Colonel William Kennedy to organize the Red River Voyageurs which went to Egypt in the eighties.

Indians Surrender Lands

12,000 Acre Stretch In Saskatchewan To Be Sold

W. M. Graham, Indian Commissioner for the Prairie Provinces, announces securing the surrender of 12,000 acres of land on the Little Black Bear Reserve in the Qu'Appelle Fish district. It is all good farming land but much too extensive for the 30 persons then in possession. The land will be sold at public auction and the proceeds applied to improve the living conditions of the Indians.

A great deal of time is wasted by urging the other fellow to have common sense. If he hasn't common sense he won't get it, so let him alone.

Stings and Bites.

The pain of insect bites disappears quickly with an application of Minard's. Try a bottle.

League Is Fighting Illicit Drug Traffic

New International Convention Goes Into Effect In September

A general world-wide tightening-up of the illicit "dope" traffic is scheduled to take place when the League's new international opium and harmful drugs convention goes into effect on Sept. 25th.

Although the convention was signed in 1925, provision was made that it could only become effective when ratified by at least 10 states of which seven had to be members of the League council including two permanent members.

To date the convention has been ratified or adhered to by nearly 30 states but it was only Canada's recent ratification that gave the necessary number of council members.

THE UNTOUCHED MEAL

People Who Go Hungry With Food On the Table

"I simply cannot eat." Actual tragedy is suggested by these simple words, so often heard, because loss of appetite is the beginning of trouble that sooner or later reveals itself as indigestion, nervous dyspepsia, with violent headaches and other serious symptoms. Loss of appetite, whether a man or woman, is a symptom you dare not ignore if you do much suffering is sure to follow.

The secret of a good appetite—the secret of keeping well—is to keep up the quality of the blood. By enriching and purifying the blood Dr. Williams' Pink Pills supply strength to the enfeebled organs of digestion, and enable them to digest thoroughly the food eaten without causing pain or distress. Proof of this is given by Mr. William H. Kelly, Kingston, Ont., who says:—"I cannot recommend Dr. Williams' Pink Pills too highly. I had been bothered with indigestion in a chronic form for almost ten years. Everything I would eat would turn sour. I felt as though there was a big ball in my stomach all the time. I felt tired and weak, and would often turn dizzy. I doctored and tried many medicines, spending many, many dollars, but to no avail. One day I heard a lady praising Dr. Williams' Pink Pills and I decided to try them. I am more than glad I did, for soon I found relief, and after taking the pills for a couple of months the trouble had disappeared, and now I can eat all kinds of food, and have again my old time health and strength."

Send For These Health Books

Two useful books, "Building Up the Blood," and "What To Eat and How To Eat," will be sent free by The Dr. Williams' Medicine Co., Brockville, Ont., if you mention this paper.

Dr. Williams' Pink Pills are sold by all dealers in medicine or will be sent by mail, post paid, on receipt of price, 50 cents per box.

First Woman Air Pilot

Lady Heath Employed By Royal Dutch Air Lines

Lady Heath, noted British air woman, has been engaged by the Royal Dutch Air Lines as a pilot for the passenger air service. She is the first woman to be so employed.

Lady Heath, the former Mrs. Elliott Lynn, is the wife of Sir James Heath, ironmaster and collieries proprietor. She arrived at Croydon on May 17, from Cape Town, South Africa. Completing a 10,000 mile solo flight started in February, she was the first woman to fly the length of the African continent.

For Scalds Or Burns.—Dr. Thomas' Eclectric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

The wood of the balsam fir is very light in color, and, being odorless, is very suitable for boxes intended for packing food materials.

SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mrs. Theodore Scott, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak, had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Recipes For This Week

(By Betty Barclay)

SCALLOPED EGGS AND CHEESE

4 eggs.
½ cup grated cheese.
½ cup soft bread crumbs.
¼ teaspoon salt.
1 cup white sauce.
Few grains cayenne.

Break the eggs into a buttered baking dish and cook in hot oven until they begin to turn white around the edge. Then cover eggs with white sauce and over this the mixture of crumbs, cheese and seasonings. Brown in very hot oven, so eggs will not be overcooked by time cheese is brown.

ROLY-POLY

2 cups flour.
4 teaspoons baking-powder.
1 teaspoon salt.
4 tablespoons butter.
¾ cup milk, scant.
½ cup sugar.
4 oranges.
Grated rind 1 orange.
½ cup water.

Mix and sift flour, baking-powder, and salt. With tips of fingers rub in two tablespoons butter, and mix to a dough with milk. Roll out one-half inch thick, and cover with small pieces of orange pulp. Mix sugar, orange rind, and remaining butter, and sprinkle two-thirds of it over the orange. Roll up; pinch ends together; place in baking-dish, sprinkle with remaining sugar; surround with water, and bake about thirty minutes. Serve with an orange or lemon sauce.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Small Thing To Look For

But Twenty-Fifth Billionth Of Inch Means Much To Astronomers

Measurements equivalent to the one-25,000,000,000th of an inch have been made by Charles E. St. John, of Mount Wilson Observatory, in researches to prove the contention of Professor Einstein, that a ray of light is "bent" when it passes a gravitational field, such as the sun. Professor Frost of the Yerkes Observatory, explains that the amount of displacement sought and found by Mr. St. John is very minute, being a trifle less than one twenty-fifth billionth of an inch. It was a small thing to look for but a big thing to find, because it presents another proof of the Einstein theory in regard to light rays.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

To Represent Canada

Canadians To Attend International Fuel Conference In London

Edgar Stansfield, research engineer, scientific and industrial research council of Alberta and B. J. Haanel, chief engineer, division of fuels and fuel testing, department of mines, Ottawa, will represent Canada at the international fuel conference to be held in London, England, Sept. 24 to Oct. 6. The conference is to be held under the auspices of the world power conference at the Imperial Institute. Some 22 countries will be represented.

It is expected that extensions of railway lines in the Peace River country, Northern Alberta, will be completed in time to handle the 1929 crop shipments, which promises to exceed all previous records.

Minard's Liniment — the Universal remedy.

Much Like Human Beings

Fish Have Same Ailments and Require Lots Of Exercise

"Fish are very much like human beings. People who have them for pets should realize this and give them some consideration," says Miss Ida M. Mellen, America's [redacted] woman fish doctor.

"Fish suffer from much the same ailments that the human species do and they cannot exist if their conditions of life are uncomfortable.

"We learn a lot about people [redacted] fish. Take the matter of exercise. If fish get lazy and won't exercise, they get sick. To remedy this at the New York Aquarium, we give them a change of scenery. You would be surprised how a more attractive swimming ground and an extra amount of sunlight arouses their enthusiasm.

"If fish eat too much of the wrong food they get indigestion just like humans. And, like humans, they hate to take castor oil. I have had fish hold it in their mouths and spit it out later, rather than swallow it. We have to watch them just like children to see that they get their medicine.

"An excellent motto to make sure your pet fish has good care is, 'Try to imagine yourself in his place.' That makes you think."

Would Be Sensible Law

Motor Brakes Should Have To Pass Certified Tests Regularly

It is strongly suggested that the time is coming in the near future when brakes must be tested and certified regularly, and the careful motorist will make no objection.

When it is remembered that 800,000 people were killed or injured in automobile accidents in the United States alone last year and the fact that faulty brakes cause a majority of all accidents, the need for such a law may be realized. It is the height of folly to drive with faulty brakes.

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

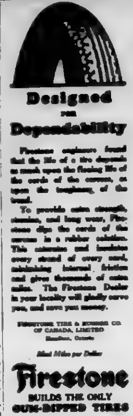
Quite Possible

"The evening wore on," continued the man who was telling the story.

"Excuse me," interrupted the would-be wit, "but can you tell me what the evening wore on that occasion?"

"I don't know that it is important," replied the story-teller, quite unperturbed. "If you must know, however, I believe it was the close of a spring day."

For every dollar Canadian tourists spent in the United States in 1927, American tourists spent four dollars in Canada, it is said.



RUG YARN

$1.15 per pound up. Twenty-one samples free.—Stocking & Yarn Mills, Dept. 17, Orillia, Ont.

National Fish Week

Would Popularize Fish As a Main Article Of Food

Canada is to have a national fish week from October 29th to November 4th inclusive. This was decided at the closing session of the annual meeting of the Canadian Fisheries Association in Montreal. For a number of years a national fish day has been observed, usually in October; but dealers have come to regard this as insufficient. The purpose of fish week is to popularize fish as a main article of diet.

Minard's Liniment for Blistered Feet.

A fishing rod that registers the weight of each fish as it is caught has been invented and the inventor probably will starve and probably deserves to.

No electrical device has yet been invented that can take the place of "wire pullers" in an election campaign.

EXPEDITION TO ARCTIC AREAS MAKES PROGRESS

Ottawa.—All goes well with the Hudson's Straits expedition, both on the ice infested sea, and in the air. Daily a wireless message comes down from Wakeham Bay [redacted] from the ice-breaker Montcalm, giving the weather conditions and the position of the Montcalm. [redacted] unusual happens the daily reports contain nothing else, and for some time past these meagre details have been the tenor of the reports. The Montcalm today is in the straits making ice and current observations and gathering data for the establishment of directional wireless stations as aids to navigation.

The other arctic expedition now in the far north has left Pounds Inlet in the Beothic and is making its way to Dundas Harbor enroute to the most northerly station in the world, the R.C.M.P. post at Bache Peninsula, which is only 11 degrees from the pole, and where the night is six months long in winter.

The Beothic safely got through the pack ice north of Baffins Bay, the real danger zone of Arctic exploration. In attempting to cross in this way Captain McClintock, hunting for Sir John Franklin many years ago got caught in the ice and was held for a year drifting slowly down into Davis Strait and not getting out until the following spring.

Ships crossing from Greenland can only get to the northern islands by going up along the Greenland coast away past the ultimate destination. Then working into the pack ice and angling over to the western shores.

If a ship gets into the pack ice too soon it is liable to share McClintock's experience and be unable to get out. The Beothic, however, has successfully passed its Arctic rubicon and has made Pounds Inlet on the western coast.

All-Canadian Phone Service

Gap Between Sudbury and Fort William Has Been Bridged

Toronto.—An all Canadian telephone line linking Ontario and Quebec with the Twin Cities at the head of the lake and Manitoba was officially opened and the necessity of switching calls through the U.S. will thereafter be eliminated.

The Canadian Pacific Railway, Bell Telephone Co., Manitoba Government Telephone system and the municipal systems of Fort William and Port Arthur co-operated in the all Red route.

The gap to be bridged was the sparsely populated section between Sudbury and Fort William, and the connection between existing long distance telephone systems was made via the C.P.R. right-of-way.

Brings Message From England

Boy Scout From Westminster Going To New Westminster B.C.

Quebec.—En route to New Westminster, B.C., where he will deliver messages from the mayor of the city of Westminster, England, to the mayor of New Westminster, B.C., and from the first Westminster troop of Boy Scouts to the Westminster troop on the Pacific, Jack Turble, a member of the British Boy Scouts, reached Canada recently on the Montnairn.

He came over as a member of the crew, being a cabin boy while crossing the Atlantic.

Hickman Case Proceeds

San Francisco, Cal.—William Edward Hickman, youthful slayer of Marion Parker, Los Angeles banker's daughter, was one step nearer the gallows today, as the state supreme court denied the petition for a re-hearing of the case. Hickman is expected to be re-sentenced to the gallows within sixty or ninety days.

On Way To Far East

Montreal.—His Royal Highness, Prince George, the King's youngest son, will arrive in Quebec City on August 16, aboard the Empress of Australia. Prince George is on his way to the far east where he is going to join the China flagship. From Quebec he will journey by train to Vancouver.

Fund Is Growing

Stockholm.—The cancer fund, which was begun as a birthday tribute to King Gustave on his seventieth birthday, already amounts to $1,500,000, it was announced. The fund will be applied by His Majesty's wish to cancer treatment research.

Crowds Welcome Nobile Party

Meet Train At Every Stop In Italian Territory

Rome.—"Viva Nobile!" was the slogan of Italy as countrymen of the Polar explorer welcomed him and five other survivors of the dirigible Italia to their homeland.

Enormous crowds met the train at each stop in [redacted] territory, showering the returning explorers with flowers and gifts of wine, and shaking rafters of railway stations with their roars of encouragement.

The demonstrations constituted a veritable march of triumph from the northern frontier.

Premier Mussolini sent the prefect of Bolzano to [redacted] and his men at the Brenner pass in the name of Fascist Italy. There also were striking demonstrations at Rento, Verona, Bologna and Florence.

Lieut. Alfredo Viglieri, navigator of the dirigible Italia, who was in command of the red tent encampment on the ice after Nobile himself was rescued, was the centre of demonstration all his own. He left the train soon after passing the frontier and went to his home in the little town of Borghetto Santo Spirito. En route, however, he had to stop at Milan, where the prefect and an enormous crowd welcomed him.

The crowd shouted "Viva Viglieri!" and "Viva Nobile!" and added "Down with the jackals of the anti-Italian press!"

Initial Pool Payment

Statement Made That Payment On Current Year's Crop Will Be Same As Last

Saskatoon.—The initial payment by the Wheat Pool on the current year's crop will be the same as last year, according to R. Catton, of the Central Selling Agency, representatives of district nine of the Saskatchewan Pool. This means that the first payment on No. 1 Northern wheat delivered at Fort William will be one dollar per bushel; 97 cents for No. 2, and 93 for No. 3.

Despite the fall that wheat has taken in price during the past few weeks, the pool is not worrying, Mr. Catton stated, and it has every hope of marketing the crop to advantage. Discussing the cut-off date that is in demand by so many farmers, he said that he was not in favor of it except in the exceptional circumstances of wheat falling to such a low level that the non-pool farmer, sensing the opportunity to better himself by joining the pool, attempted to come in at the last moment.

Fewer Leaving Canada For United States

Figures For Year Just Closed Show 11,448 Less

Montreal.—Emigration from Canada into United States along the eastern section of the boundary decreased in substantial manner during the fiscal year ending June 30, 1928. Figures for the year are announced by H. R. Landis, United States Commissioner of Immigration at Montreal, head of District No. 1, which extends from Halifax to Kingston. In this district, which roughly covers the eastern boundary, emigrants admitted to the United States from Canada for permanent residence totalled 34,383 during 12 months ending June 30, 1928. For the previous year the total was 45,831 emigrants, or 11,448 more than in the year just closed.

Death Of Mrs. W. S. Fielding

Ottawa.—Mrs. Hester Fielding, wife of Right Hon. W. S. Fielding, former Canadian minister of finance, one of the capital's most distinguished women in social and philanthropic circles, died at the family residence here. She had been failing in health for nearly four years and had been almost entirely confined to her home throughout that period. Mrs. Fielding was soon to have celebrated her 80th birthday.

Law Suits Total Millions

Budapest, Hungary.—Lawsuits totalling $200,000,000 have been instituted in the international tribunal at The Hague against the Jugo-Slavian Government by the former Archduke Frederick of Austria and 25 others. The suits are based upon confiscation of property. Frederick claims a loss of $17,000,000.

No Car Shortage For Crops

Winnipeg.—There is no shortage of cars for handling of this year's grain crop, the railway association of Canada has announced, but there was every possibility that the harvest will be the heaviest in years and all of the 80,000 cars now in Western Canada, probably will be needed.

Civil Service Council

Hon. Peter Heenan Wants Representatives To Meet the Government

Ottawa, Ont.—Hon. Peter Heenan, minister of labor, stated that he is issuing invitations to civil service organizations to select representatives to meet with the government in order to draft a constitution for a national civil service council. This action is in line with the report of the select standing committee on industrial and international relations, which devoted some considerable time during the recent parliamentary session to this matter. The minister has left the capital for Winnipeg.

Plans Visit To Canada

Bisley Winner May Take Part In Dominion Rifle Meet

Montreal.—Arthur C. Hale, winner of the King's Prize at Bisley this year, is coming to Canada according to the eight members of Canada's 1928 Bisley rifle team, who arrived here from England. Hale, a 22-year-old gunsmith, of Birmingham, intends it is said, to take part in the Dominion Rifle meet at Ottawa. He has been shooting eight years. His father and brother are crack shots. It is understood that six members of the Australian team also will come to Canada for the same meet.

BRITISH MINERS COMING TO ASSIST WITH HARVEST

London.—Arrangements have been finally concluded for 10,000 men to go from Britain to Canada to assist in this year's harvest, stated Rt. Hon. L. C. M. S. Amery, Secretary for the Dominions, in the House of Commons.

The Dominion Government especially wished that the men be recruited from the mining areas and the British Government would carry out these wishes, the minister said. He concluded amid cheers:

"The British Government is greatly indebted to the Canadian government for the readiness with which they co-operated in this arrangement."

Ottawa.—The Canadian Government is not assuming any financial responsibility for the movement of the British harvesters either coming or going, it was stated at the immigration department recently. The department, however, has expressed its willingness to co-operate in every possible way in placing men who wish to stay in Canada after the harvest is over.

Under the arrangement reached, men who wish to return will have the benefit of the reduced rate they paid westward. But it is assumed that most of them will wish to remain in Canada, and the problem will then arise of their absorption without increasing winter unemployment in the cities.

HEADS RETAIL MERCHANTS ASSOCIATION

J. T. Crowder, Toronto, was re-elected president of the Retail Merchants Association of Canada at Regina. He was elected over J. E. Sansregret, Montreal, who was vice-president last year.

Grant For Class "B" Fairs

Will Receive Same Assistance From Government As Given Last Year

Ottawa.—It has been decided by the government that class "B" fairs will receive the same grant in 1928 as they did in 1927. This was stated by Dr. J. H. Grisdale, deputy minister of agriculture, when asked respecting a report that the government was contemplating giving these fairs some measure of assistance.

During the last session of Parliament no appropriation was made for the class "B" fairs as had hitherto been done, the entire government grant in this connection going to the class "A" expositions. Considerable opposition to this has developed among the farmer element of the House of Commons and the agricultural estimates were subjected to severe criticism on this account both by friends and opponents of the government.

The deputy minister's announcement restores the former status of the class "B" fairs for the current year.

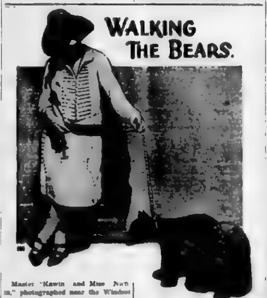
Must Keep Arctic Rescue Films

Moscow.—The Russian relief committee approved recently the refusal of aviator Chukhnovsky, of the Russian ice-breaker Krassin, to hand over to General Umberto Nobile films he took when he sighted two men of the dirigible Italia on the ice off Northeast Land. In refusing to give Nobile the originals of the film, the relief committee said Chukhnovsky was right, for he had been ordered strictly as had been other Russian rescuers, to retain all material and data gathered.

Fire-Eater Burned

London, Ont.—Essaying to entertain a few companions by igniting with a match a mouthful of gasoline, Alex Johnstone, young Irish farm hand, was badly burned about the head, chest and arms when the liquid lighted too suddenly. He was blowing the gasoline toward the match flame when the liquid ignited.

WALKING THE BEARS.



Master "Kawin" and Miss "Nichin," photographed near the Windsor Station in Montreal with their mistress, Mrs. E. Roncarelli, who is having them sent to Italy for presentation to Marquis de Pinedo, the famous Italian round-the-world flier. They form a "No Good" combination, "Kawin" meaning "No," and "Nichin" meaning "Good," in Indian dialect. Needless to say, the latter is the lady bear cub with a sunny disposition, and the former a young gentleman with a rather bad temper at times. They were obtained by the General Tourist Department of the Canadian Pacific Railway from Fred Arnott, who captured them in the Lake Temiskaming district. The two bear cubs are being sent over to Italy, where they will be met by de Pinedo in his plane, and flown to their new home.

Mine Workmen Killed In Ontario Accident

Crushed By Falling Steel Gate On Welland Canal

St. Catharines, Ont.—The crash of the steel gate of lock number one of the new Welland Canal at Thorold, Ont., caused the deaths of at least nine workmen and injuries, some of which have proved serious, to about 30 others. About 40 workmen were in the vicinity of the lock when the disaster occurred, and none is believed to have escaped death or injury.

The accident was caused by the boom of one of the cranes slipping when an effort was being made to raise a huge 500-ton steel gate into place on the West side of the lock. Two cranes were at work at the time, one handling each end of the heavy gate. The crane nearest to the head of the lock held but the boom of the crane at the lower end slipped.

The huge gate crashed into the steel gate fabric at the east of the lock and smashing the steel work fell to the bottom of the lock crushing the workmen as it fell.

Ottawa Crowds Greet Lieut. Desmond Burke

Rousing Welcome Given To Member Of Bisley Team

Ottawa.—With the plaudits of his fellow citizens ringing in his ears Lieut. Desmond Burke, of the Governor General's Foot Guards, who at the Bisley meet in 1924, won the King's Medal, and this year came within one point of duplicating the feat, came home.

He was accorded a spontaneous welcome by large crowds which thronged the central station, blockaded his entrance and stretched several blocks along nearby streets. Among those on the platform to welcome him in addition to his parents and relatives, were Premier Mackenzie King, Mayor Arthur Ellis, and members of the board of control and the city council.

Message From Lost Aviators

Note Found In Bottle Signed By Names Of Elsie Mackay and Capt. Hinchcliffe

London, Eng.—A bottle washed up on the shore near Flint, North Wales, Tuesday, contained a note on which was written, "Goodbye all." Beneath the brief message was signed the names Elsie Mackay and Captain Hinchcliffe, and beneath the names the words "Down in fog and storm."

C. P. R. REVISED BRANCH LINE HAS BEEN SANCTIONED

Ottawa.—The Board of Railway Commissioners has handed down a judgment approving the route map showing the revised general location of the Canadian Pacific Railway's Swift Current Northwesterly branch which projects northwesterly in a direction which it is intended, will ultimately have as its terminus Willingdon, Alta.

In delivering the judgment, Hon. H. A. McKeown, chief commissioner, details the history of the construction of the company's branch lines and notes the objection of the counsel of the Canadian National Railways that this would be really an extension of the Cutknife-Whitford Lake branch from which the National lines contend, the Canadian Pacific has not obtained parliamentary authority. Counsel for the Canadian National advanced that the terminus of the Cutknife-Whitford Lake line was at Willingdon and that the road to Strathcona could not be built as an extension of this branch.

It was further argued that the Swift Current Northwesterly branch was originally projected from Swift Current to Edmonton via Empress-Cereal, Coronation, Ohaton and Camrose. Of this only the portions between Swift Current and Empress and Coronation and Lorraine had been built.

A revision of the Canadian Pacific Railway Company's plan was acceded to in 1919 and the Canadian National contends that the rival company is taking advantage of this nine-year-old revision to extend the Cutknife-Whitford Lake line from Willingdon to Edmonton. Exception is taken on the ground that this is an extension of a branch line already constructed.

The chief commissioner reviewed the matter of branch line construction and recommended the diversions asked for.

VACANCIES IN GOVERNMENT TO BE FILLED SOON

Ottawa.—A score of pending appointments face the government before the end of the present year and considerable activity is betrayed among political leaders as to who shall be appointed and whether the appointments will be made before the prime minister leaves for Geneva or after he comes back.

Two ministers plenipotentiary to Paris and Tokio are to be selected with secretaries and three secretaries. At present Hon. Herbert Marler is the first Canadian minister to Japan ... has been named as to the Dominion's representative in Japan.

There will soon be two vacancies on the railway board due to the retirement of Hon. Dr. McLean and Hon. Frank Oliver and there is already one vacancy on the duty ... of the Canadian National Railway. In addition it is understood that the resignation of C. A. Magrath from the international joint waterways commission may be accepted this year which makes another important vacancy.

There are two vacant senatorships due to the death of Senator Cloran and Senator Boyer. There will also be a vacancy on the supreme court bench due to the age limit retirement of Mr. Justice Mignault while it is further stated that J. Denis, present M.P. for Joliette, is to go to the bench in Quebec. There may be two new lieutenant governors to be appointed in Quebec and in New Brunswick and there is also talk of the retirement of the lieutenant governor of Saskatchewan. Two permanent commissions are believed imminent, one being the possible new radio commission and the other some permanent commission to direct Canada's part in the St. Lawrence development.

This means at least half a dozen important commissionerships.

Scores Double Victory

Vancouver Boy Wins Twice In Olympic Sprinting Event

Amsterdam.—Percy Williams, of Vancouver, sent the Canadian flag to the top of the Olympic pole for the second time in three days, in token of a world victory in the Olympic games. The youthful sprinting marvel won the 200 metres final against some of the finest and most experienced sprinters in the world including Jackson Scholz, of the U.S., the title holder. Williams is the Olympic champion at 100 and 200 metres, the first double sprint winner in the Olympiad of 1928.

Held For Obregon's Death

Mexico City.—Sister Conception Acevedo de la Lata, 32, is under arrest charged with having induced Jose Toral to assassinate General Alvaro Obregon. She is quoted by newspapers as saying: "I hope to be executed. I want to be punished." She did not admit influencing Toral to kill Obregon, but added: "God must have wanted, otherwise He would not have permitted the crime."

To Attend Dry Congress

Washington.—For the first time the American Government will be officially represented this year at the International Congress Against Alcoholism which convenes next month in Antwerp, Belgium. Commissioner Doran, of the Prohibition Bureau and Harry A. Anslinger of the State Department have arranged to attend.

Courtney Is Rescued

New York.—Drifting helplessly in mid-ocean, their radio sputtering occasional messages to guide searching ships, Captain Frank T. Courtney, British aviator, and his three flying companions were rescued from the flying boat in which they had attempted to fly from the Azores to Newfoundland.

Visit Will Be Short

Winnipeg.—It is unlikely that the prime minister on his forthcoming Western tour will address any meetings in Saskatchewan other than in his own constituency of Prince Albert. The haste is occasioned by the necessity of the Premier's presence in Paris at the month end to sign the Kellogg outlawry of war pact.

Kellogg Going To Paris

Paris.—Secretary of State Frank B. Kellogg has sent word to M. Briand, Foreign Minister, that he will come to Paris to sign the multilateral treaty renouncing war, sailing from New York on the French liner Ile de France, on August 18.

SCHOOL BOARD MEETING

A regular meeting of the Board of Trustees of the Tofield School District was held on Tuesday evening, August 7th. Trustees present were the chairman, Mr J Lee, Mrs. Davison, Mr J W Robinson, and Mr J W Chapman.

A delegation of ratepayers interviewed the Board and asked that the Board give consideration to applications of local teachers when there are vacancies on the staff, it having been the rule for quite a number of years that local teachers should not be engaged.

The matter was considered at great length by the Board after the delegation had retired and the following resolution was put to the meeting and carried by a unanimous vote of the trustees present:

Resolved that as the matter, and wisdom of the policy of engaging local teachers has been urged upon the school board several times during the past few years, it is the opinion of the trustees present that the adoption or rejection of this policy should be definitely settled by an expression of the opinion of the ratepayers of the school district. That the board go on record of favoring such an expression of opinion on this point ... at the next school elections. That this action is ... the members of the board ... that opinion among ... ratepayers ... divided on this question and it is now considered advisable to ascertain what the majority opinion is.

Miss Mabel Cooper was engaged to fill the vacancy caused by the resignation of Miss Argue.

Mr McCullough's resignation was received and accepted, and Mr. J Thornton Bullock B A was engaged to fill the vacant principalship.

Miss Esther Jacob and Clarence ... left on Wednesday afternoon ... where they attend agricultural school for one week. This ... scholarship won by procuring the highest number of points at the Tofield School fair last year.

Here and There

(31)

The Duchess of Bedford, latest addition to the Canadian Pacific's fleet of passenger liners on the Atlantic, is the first of four cabin class vessels being constructed for the Canadian Pacific to be used to the company's service on the St. Lawrence route, and they will also be used for winter cruise purposes.

Winnipeg — According to statistics recently collected from 248,162 farms, there are 6.8 horses to each farm in Manitoba and a tractor to every 1.6 farms in the province. Each Saskatchewan farm has 10.2 horses and there is one tractor to every 4.7 farms. In Alberta there are 10.8 horses to each farm and one tractor to every 7.5 farms.

Ottawa, Ontario — Employment stood at a higher level in Canada in April, 1928, than in any April as far back as records go. Returns from 6,191 employers of labor with working forces aggregating 842 ... persons, showed the employment index standing at 101.1, as compared with 94.2 in April, 1927 and 84.1 in April, 1926.

Winnipeg.—Homestead entries in the four Western Provinces for the first quarter of the year totalled 1,316, as compared with 1,016 in the first quarter of 1927. Filings in Manitoba were 107 as compared with 123, in Saskatchewan 555 as against 513, in Alberta 962 as compared with 367, and in British Columbia 72, against 12.

Earnings and expenses statement of the Canadian Pacific Railway for the month of April, issued from headquarters of the company show net profits up $150,944.85 as compared with April of last year. Net profits for the four months to end of April are shown increased by $1,902,617.71 as compared with the same period of 1927.

The English Rugby League Football team at the present time touring Australia and New Zealand, is scheduled to arrive at Vancouver on R M S Niagara September 14 and will play a game there next day, leaving on the Trans-Canada afterwards for Montreal where another game will be played September 20, before sailing for England on the Duchess of Atholl next day.

"Just one more glass, boys, and then we'll all go home," said the dishwasher as he laid down the soap.—The Groundhog.

Mr. Peter McNab motored from Edmonton on Tuesday of last week to visit his friend, Mr. John Thomson. Mr McNab has just recently motored to Edmonton from Los Angeles.

E. R. KALLAL CUTTING WHEAT

About the first and probably the first in the district to cut wheat this year is E. R. Kallal whose farm lies just south of town.

Mr Kallal makes a specialty of growing Garnet wheat and this variety was falling before his binder on August 7th.

WOODLAWN PUPILS' SUCCESS

The grade IX pupils of the Woodlawn School have been successful in passing in the following subjects:

George Lougheed, English Composition, Algebra, Geometry, General Science, French.

Lee Hanson English Literature, English Composition, Ancient History, Algebra, Geometry, General Science, French.

Eric Hanson's results are worthy of special mention, the average for the seven subjects being over 80 per cent and the following subjects over 90 per cent algebra 96; geometry 91, French 93.

—Mrs. McCowan, Teacher

The Reliance Store

One hears a great deal today of "Service." Yet after all, "Service" is nothing spectacular. An individual or firm in business should expect to give service and the customers of that business hope is justified in counting on it. It is a source of satisfaction to us that long before the word "service" became so frequently used in business announcements, the Reliance Store recognized the need of giving its customers every attention, and long before we commenced to talk about service, we were giving an every day kind of service that won for us many friends. We are doing business along the same lines as formerly and in hundreds of different ways, the Reliance Store will cater to its customers in the very best manner possible.

The Reliance Store Co.

KETCHAMOOT

A pleasant afternoon was spent at the Henderson home on Wednesday when the M.A.S. met for their monthly meeting. A goodly number of members and visitors were present. Visitors included, Mrs. Lake, Mrs. John Johnson, Miss Fawcett, Helen Schultz and Erma Shope, Rev. Gordon and family. The meeting took more the form of a social afternoon, the hostess, Mrs. Henderson, serving refreshments. The September meeting will be held with Mrs. A. McMullen.

Mr and Mrs. Chas. Ingram and Charley Sears were guests of Mr. and Mrs. P. O. Moline of Amisk Creek on Sunday.

Born.—To Mr. and Mrs. Sam Stirritt, on August 8th, a son, at the Camrose hospital.

On Tuesday Bardo was quite a busy place, the first shipping day for mid-summer. Mr. J. H. Ingram took charge of the shipping.

Mr. and Mrs. Harold Elliott and son motored over from Kindersley, Sask., and visited a few days last week with Mrs. Elliott's sister, Mrs. Harrison.

Mr. and Mrs. J. Younie and family of Edmonton who are spending their holidays with Mrs. Younie's parents, Mr. and Mrs. Hugh Mitchell, motored to the city on Sunday for a few days.

Mr. and Mrs. Wm. Lee and daughter Viola and sons Wilfred and Lorne, visited at the Aronson home in the Mundare district on Sunday.

More than the Lindbrook ladies were putting down berries last week, hence, no Ketchamoot news.

Born.—To Mr. and Mrs. Ingvald Harbeck, on August 11th, a daughter.

Mr. and Mrs. Hannan are motoring to Banff on a holiday trip.

Mr. Glover has laid aside his pliers in order to enjoy a brief holiday.

Miss Carver of Edmonton is visiting at the J. Carver home.

Mr. A. B. Evenson left for his home on Tuesday.

Horace McHaffey and Wesley Taylor visited the City for a few days this week.

Watch for the Fall Milinery Opening at Lucille's Beauty Parlor to take place on September 1st.

Mr. and Mrs. McLaughlin returned from a two weeks visit at Banff, this week.

Miss Myrtle Bethel returned on Wednesday after three week's visit at High River and Calgary.

Mrs. Firth and children left on Tuesday for Drumheller, where they will visit Mr. and Mrs. Constantine.

Mr. and Mrs. Galloway were away on a holiday trip north-west of Edmonton last week.

Mr. and Mrs. Scott returned this week from spending the summer at Claresholm, where Laurie has been playing professional baseball.

Mr. and Mrs. H. E. Rogers and son Max, returned from a holiday trip to the Pacific Coast on Friday last.

Miss Lorett Ross returned from a motor trip on Wednesday. While away, she visited Banff, Cranbrook, McLeod, and Calgary.

Lucille's Beauty Parlor will be closed next week from August 20th to August 29th. Miss Gray is taking a trip to Banff and Lake Louise.

Mrs. Carter and Miss M. Carter called upon Tofield friends on Tuesday. They were on their way home to Holden from Banff where they had spent a pleasant vacation.

Mrs. H. Rogers Sr., of Winnipeg, spent the week end with Mr. Rogers. They both left on Tuesday for Granum where they will visit Mr. Walter Rogers.

L. L. JOHNSON IS VICTIM OF MINE ACCIDENT AT DODDS

Dodds, Alta., Aug. 13th.—Fatally wounded when a charge of dynamite exploded in his pocket at his strip mine here, L. L. Johnson, for many years chairman of the D.S.C.R. Board at Calgary, died shortly after 10 a.m. to-day, only living an hour and a half after the accident.

Mr. Johnson has been operting the mine which is one of the open "stripping" type at Dodds, eight miles south west of Ryley, on the C.N.R for a brief time only.

This morning he called in at the store of M. Williamson, a few minutes before the accident and then went on to the mine office. It was raining at the time.

He was apparently carrying some of the explosives in his pocket from the mine office, some two hundred yards distant, to the mine, when by some means, it exploded, tearing a deep hole in the unfortunate man's side.

Johnson was picked up by one of his employees, named Brennan, and a telephone call brought Dr. McPherson to the scene of the accident. It was impossible to do much for the injured man, however, the wound being a fatal one, and Johnson died ten minutes after the doctor's arrival.

The deceased leaves a widow and a ten year old son at Calary, to mourn his loss. He had only come up to Dodds from Calary two months previously.

He served during the war in an infantry battalion and was a prominent member of the Elks Club and Military Institute.

Mr. and Mrs. G. W. Sears, daughter Hazel and son Stanley, were guests of Mr. and Mrs. Wesley Ingram on Sunday.

Miss Lillian Carlisle visited over Sunday with her friend, Miss Edith Ryley at her home north of Tofield.

Mr. and Mrs. T D. Ferguson and little son spent Wednesday of last week at the home of Mrs. Ferguson's parents, Mr. and Mrs. J. H. Ingram.

Master Stewart Harrison returned home after spending some of his holidays with friends and relatives at Lamont.

LINDBROOK

Haying is in progress here between showers, but no cutting of grain so far as we know.

Mr L. Pointer has bought the S. E. 24 ... W 4, from Mr. C. Gallinger of Tofield and is fencing same with woven wire intending to pasture his sheep there.

Mr D. Macaw we hear has purchased the N. E. 19 19 W. 4 from the C. P. R. This is the quarter adjoining his own on the east, so that he now owns the north half of 19.

Mr and Mrs. W. Fontaine of Rosebud, Alberta paid a short visit to Mrs. Fontaine's parents Mr. and Mrs. Lepine of this district, but have returned home now.

Mr Jas Hooper caught a live bittern, which he offered to the Edmonton Zoo. The offer was accepted and he despatched the bird by express. It arrived O. K. and is now installed at the Zoo; so at least one denizen of the Lindbrook district in the Zoo; say "howd-do" to him or her when up there looking around.

Mr P. Nickerson of Edmonton is at present visiting his friend L. Hooper here.

Mr. and Mrs. Werton, Charlie and Leonard spent the week end at Mr. and Mrs. Hedley Burton's farm of Lindbrook North.

Mr Robb Scott has recovered from his attack of blood-poisoning, the infected hand being O. K again now.

A carnival with open air dance pavilion, mid-way attractions, and decorated with Chinese lanterns was held at Deville last week in aid of the fund organised to build the Town Hall there. Everyone voted it splendid and we hope the finance committee found there building fund considerably augmented by same.

TOWN COUNCIL ENGAGES GOVERNMENT ROAD CREW FOR THREE DAYS TO WORK ON ROAD EAST OF TOWN

At a special meeting of the Tofield Town Council held in the Mayor's office on Monday night last, it was decided to engage the government road crew working under Mr. Noland, to work on the road immediately east of town. The crew will do what they can to the road in three days. This will, it is hoped connect the town with the government highway running east and west, and will enable automobiles to pass through town without passing through the golf course.

J. C. PHILLIPS WELL KNOWN TOFIELDER DIES

John Carter Phillips, for many years a well known figure on our streets passed away on Saturday, August 11th. The old gentleman had been in failing health for some time, though at his passing he was of the ripe age of 81.

The following is from the Edmonton Journal:

John Carter Phillips, a pioneer of the Tofield district passed away on Saturday August 11th, at the age of 81 years. The late Mr. Phillips was born in Guelph, Ontario, in 1847. As a young man he moved to Iowa, where he homesteaded for a number of years. And in 1901 he came to Canada and settled near Tofield. He leaves to mourn his loss his wife, five sons and three daughters, Mr. H Eaton, Tofield, D. L. Phillips, Washington; Mrs. A. L. Hill, Vancouver; H. H. Phillips, Edmonton; R. C. Phillips, Tofield; Mrs VanBuskirk, Edmonton; R. H. Phillips, Tofield; and E. H. Phillips, Deville, Alberta; 30 grandchildren; and eight great grand children. Deceased was a general favorite around Tofield, where his death is deeply mourned by the entire community. The remains were laid to rest in the Tofield cemetery beside those of his first wife on August 13th.

HOLY TRINITY CHURCH
August 19th, 1928

7 30 p.m. Evensong.

The Sunday school will not assemble until Sunday, September 2nd

Weather permitting, the annual picnic will be held at the residence of Mr. D. C. McCarthy on Wednesday, August 22nd. Members of the church at Lindbrook, Logan and Bathgate are cordially invited to attend this event.

U. F. W. A. NOTES

The regular meeting was held on August 9th at the home of Mrs. Gray. It was moved and seconded that our two members who have been ill for some time, Mrs. Hawley and Mrs. Hall be sent some flowers or a growing plant if possible. Mrs. Booth gave a most interesting paper on how to create and preserve the atmosphere which gives character to a home. This is a pretty extensive subject but Mrs. Booth handled it well and a round table talk followed. This is one subject in which all the members are widely interested and we hope next years programme committee will give us an opportunity to have more papers and discussions on it. The discussion after the paper led to the topic of literature and reading for juveniles and it was suggested that all the members make lists of such books as they have in order that they may be exchanged. These lists are to be given to Mrs. T. E. Seale. Mrs. Warner had proofs of the pictures taken at the picnic held at the home of Mrs. Dodds and will order copies for any member who wish them. The next meeting will be held at the home of Mrs. Munro on Aug 23rd at the usual time.

Mrs. P. Lee will give a paper on jelly making. Mrs. Bowick, Mrs. Booth, Mrs. Bourisko and Mrs. Carlisle will serve tea.

AMISK CREEK

Mr. and Mrs. I. C. Olson and children returned from the States last week. They report having had a very nice trip.

The Ladies' Aid meeting at Mrs. R. O. Berg's last week was very well attended. Most of the members were present and many visitors from Ryley also Mrs. J Eggen and Mrs. F Rude from Bardo, Mrs. H. Brunneman also attended. The next Ladies' Aid meeting will be at Mrs. W. Anderson's on the 22nd of August.

Miss Mabel Moen who is up from Washington visiting at P. O. Flaaten's home for a few days last week.

Miss ... Berg is visiting at the N. Sand... home in Ryley at present.

Mr. and Mrs. Finseth and children, Miss N... Rude, Mr. and Mrs. J. Jacobson and children from Bardo, Mr. and Mrs. Mothers from Minneapolis, who are visiting with their daughter, Mrs. J. Jacobson, were all visitors at the E. A. Moen home last Sunday.

R. O. Berg, Ruby and Alice were visitors at the Aasmoe home last Sunday evening.

Mrs. W Anderson, the superintendent of the Sunday school entertained the Sunday school children and several of the young people at her home last Thursday evening. Many amusing games were played. Ice-cream and cake was served for lunch. They all had a very nice time.

Agnes Annebo succeeded in passing grade ... this year. Arnold Berg passed grade eight examinations.

FOUND.—A twenty-two calibre rifle. Owner may have same by identifying property and paying cost of this ad. H. A. McMullen. 30c

KINGMAN

Callers visitors on Tuesday were Mr and Mrs W Hartschen and two children, Mrs. Jack Erickson and Connie and Mr and Mrs W Jardie.

The ... children and Connie Erickson were operated on for their tonsils and adenoids.

Mrs. J Erickson and Lily visited with Mrs. Joe Ohman of Camrose on Tuesday.

Mr and Mrs. Ted Severson of Cold Lake are visiting in Kingman for a couple of weeks.

T ... made a business trip to Edmonton on Thursday.

Mrs. ... and Harry Spar... spent Wednesday in Kingman. Simon Simonson returned with them to visit for a few days with Harry.

Mrs. Andrew Johnson and Inga, and Mrs. T ... and Inez visited with Mrs. E. Erickson on Wednesday.

Mr. and Mrs. O Bergum and family visited on Sunday with Mr. and Mrs. ... of Ketchamoot.

Mrs. Thorsen and children, and Inga Johnson left for Okotoks on Saturday. Miss Johnson will stay for a couple of weeks.

Palmer Hanson spent a few days last week with relatives in Minburn.

Mr. and Mrs. T Horte and family were dinner guests at the home of Mr. and Mrs. E. Erickson on Monday evening.

Ole Bergum began harvesting his Garnet wheat on Saturday. It is reported to be the earliest harvest of wheat in the Kingman district that he can remember.

A party was held in the hall on Monday evening in honor of Misses Irene and Gladys Horte who are leaving for Daysland. A merry time was had, and a gift presented to each of the girls from the basketball team. The girls are very popular with the young people of the community and we are sorry to see them leave. Here's wishing them the best of luck!

Mr and Mrs T Horte and family were invited to supper at the P. Simonson home on Sunday—but they got no supper. Immediately after, a number of friends crowded the house, bringing them to the realization that they were being "surprised". After lunch had been served, Rev. Bjelde, on behalf of the people, presented Mr. and Mrs Horte with a purse of money. They are leaving for Daysland on Tuesday where Mr. Horte has accepted the position of manager of the Pool elevator. Mr and Mrs. Horte are old-timers, and the community extends their best wishes to them in their new venture.

The Misses ... and Mildred Simonson, from Chicago, have been visiting with relatives in Kingman for the last three weeks. They left on Saturday for Edmonton.

A dance will be held in Kingman on Friday, Aug 17th. Music by the Bluebird Orchestra of Camrose.

VISITING CANADA

The three daughters of the Rt. Hon. J. Ramsay MacDonald, former Premier of Great Britain, who are visiting Canada with their father. The photograph, taken aboard the Canadian Pacific liner "Empress of France" shows: Joan, who is a second year medical student, Ishbel, eldest daughter—the youngest member of the London County Council; and Sheila, the youngest, who is still at school. (122)

Why is Red Rose Tea so fresh and flavory? The answer is that it is a blend of the choicest, juiciest leaves, picked when only ten days old—and sold by your grocer in clean, bright aluminum. No tea can be expected to retain its richness and strength unless packed in this modern metal container—the only package worthy of Red Rose quality.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

Having seen Impington Hall, once the home of Samuel Pepys, a three hours' run took us to ... En route were Huntingdon, the birthplace of Oliver Cromwell ... burgh with its cathedral ... 1116 ... was buried and ... body of Mary Queen of Scots ... 1461 Oakham, where every traveller was required at one time to leave a horseshoe at the Castle, the earliest of the present collection being contributed by Queen Elizabeth, and Melton Mowbray, famous for its pork pies, Stilton cheese and fox hunting.

Our stay in Nottingham was for the night only ... on our way to Newcastle, passing through Ollerton on the borders of Sherwood Forest, of Robin Hood fame, Doncaster of the race, and ... Selby, with its Abbey built by William the Conqueror; York ... the birthplace of the modern railway ... whose cathedral, one of the most ... in England ... the grandest ... cathedral in the country.

Lunch at York gave us opportunity to visit York Minster and to view the city walls. History is not merely evidenced but felt in York. Here died the Roman emperor Severus in the year 211. Here the son of Constantine the Great was proclaimed Emperor of Rome in 306. From their base in York the Romans ... more than one campaign ... times York was a torchlight of Christianity. Last year York celebrated the 1300th anniversary of the founding of York Minster.

Amazement filled our minds as we entered this glorious building, lofty and more magnificently spacious than any cathedral we had seen from floor to roof 90 feet sheer, 102 feet in the choir. The east window, the second largest in the world, is 75 feet by 32 feet. The stained glass is the most perfect and extensive in Britain. The Chapter House is the most beautiful in England. It is believed that the pagan temple of Diana stood on the site of York Minster. Here the Saxon King Edwin embraced Christianity and in the crypt we saw the well from which he was baptized. How wonderful then that we should ...

War On Crows

Saskatchewan's Crow Population Is Materially Reduced

Saskatchewan's crow population has been reduced by more than 50,000 and 154,150 eggs have been destroyed in the competition promoted by the provincial department of railways, labor and industries, according to the official returns up to the beginning of August. To date, 1,886 competitors have enrolled in the competition.

Competitors certificates account for 112,737 crows' legs, or 56,378 crows, and 154,150 crows' eggs.

Anton Golgan, Dana, is leading with 146 eggs and 2,054 legs, for a total of 16,362 marks. Horace Cornling, Semans, is second with 1,330 eggs, and 1,280 legs, for a total of 9,415 marks, while Rudolph Lenicsak, Neudorf, is third with 491 eggs, and 1,064 legs for a total of 8,203 marks.

Would Remit Customs Duty

Grade Ewe and Pure Bred Rambouillet Rams From U.S. To Enter Free For Certain Period

An order-in-council has been passed providing for the remission of customs duty on grade ewe and purebred unregistered Rambouillet rams imported from the United States during the period commencing September 1st and ending November 30th. These sheep are imported for breeding purposes, and must conform to all regulations as to health and be subject to all quarantine orders. The supply of these classes of sheep in Canada is not sufficient to meet the demand, and a large quantity is available in the United States for export. Similar action has been taken during the past few years on recommendation of the Minister of Agriculture.

THIRD WRIGLEY MARATHON

Only One Swimmer In West Has Entered the Big Swim

Surprising as it may seem, to date only one entry has been received by the Exhibition authorities for the Third Wrigley Marathon from Western Canada, that of John Patrick Smythe of Saskatoon, and sent in from Moose Jaw. However, John Patrick is an easterner, when it comes to swimming, as he long ago was a member of the Toronto Swimming Club and learned most of his swimming there. He doesn't say where he does his training, but he will establish himself on the banks of Lake Ontario, a short week before the race.

Fred Crowe, of Fort William, is the next nearest approach to a western entry who up to now will be a competitor. Fred should have no trouble in negotiating the southern waters of Lake Ontario, when it is considered that he has been navigating the Kaministiqua for three months in preparation for the big grind,—although Lake Ontario has not been warmer than fifty degrees Fahrenheit for the past month.

Armenia is represented, Holland has three; Poland, one; Australia two; Germany, four; Switzerland, two; France, four; England, two; Finland, three; Norway, two; South Africa, one; Dutch East Indies, one; ..., one; Belgium, one; the United States and Eastern Canada scads ... yet the west has only one to ... chance his arm."

Georges Michel is now in Canada, and in hard training near Quebec. Vierkoetter does his daily dozen in Humber Bay. George Young, after a vigorous ... with his management in which he capitulated, is still at Port Credit, where he attracts many to his camp. "Flying Fish" Summers of California, is looked on as almost a sure thing this year. He has improved his stroke to a remarkable ... now swimming a flutter kick that seems to add miles and miles to his speed. But Mendell Burditt, former Winnipeg boy, a clerk in the Canadian National Railway head office, is ...

SUNDAY SCHOOL LESSON

AUGUST 19

PAUL CARRIES THE GOSPEL INTO EUROPE

Golden Text: "Come over into Macedonia, and help us."—Acts 16.9.

Lesson: Acts 15.36; 16.15.

Devotional Reading: Isaiah 60.1-6.

Explanations and Comments

The Macedonian Call, verses 9, 10.—Paul was at Troas, the gateway to Europe. As he walked the streets he saw a motley crowd, among them many Europeans. As he stood in the harbor and gazed out at the distant islands fringing the coast of Macedonia, he must have longed to go over and possess that part of the world for Christ. It was a natural vision which appeared to Paul that night, of a man of Macedonia standing before him and begging him to "Come over into Macedonia and help us." "There was that mighty power which has been called 'the urge of God' acting upon a soul ready to obey the divine behest to the uttermost."

"How came the vision to take this shape—a man standing beseeching him? Perhaps because an active imagination tends always to personify human need. Phillips Brooks once confided to a friend that sometimes, as he preached in Trinity Church, the multitude of faces in the congregation, expressing their multitudinous hunger and yearning would suddenly melt into a composite face, all the people becoming for the moment a single person whose vast need moved the preacher profoundly, and to whom he poured out his secret soul in impassioned utterance. It may have been thus with Paul and the Macedonians. His eager yearning to help would not permit him to think of them impersonally as a collection of individuals, but only as a composite personality whose need was so acute ...

Faith In The Wheat Pool

No Reason To Worry Over Possibility Of Falling Prices

Opponents of the Canadian Wheat Pool are already worrying over the predicament of the Pool when it faces a possible wheat crop of 500,000,000 bushels with a falling market. It is predicted that the organization will lose strength and may ultimately be unable to continue operations. That is a case of borrowing trouble which is not based on reason or experience.

The Pool may have been fortunate as well as skilful during the era of high prices of the past two or three years, but the drop of ten to twenty cents a bushel in recent weeks causes some concern to growers and dealers alike. The carry-over of 60,000,000 bushels for export is larger than usual, and when added to the huge crop now ripening will make a problem in selling for the next few months. It is hinted that the "orderly marketing" methods of the Pool have failed to get rid of the 1927 crop as rapidly as was desirable. It should be remembered, however, that last year's crop was late in ripening, and that continued rains further delayed threshing and selling. Inevitably a large portion of the harvest, which was well above the average, was left in the farmers' hands till spring.

Should wheat continue around $1.25 instead of $1.40, as of recent years, can the Pool hold its members? It is instructive on this point ...

CHAPTER XXX.—Continued

Only desperate men would ever have dreamed of such a plan as theirs. The camp was fenced with eight strands of barbed wire, and every sixth fence-post carried an arc light. But with the aid of a file which one of the men possessed, they would cut the two lower strands at dusk, just before the lamps were lighted, and crawl through. At the last moment the other two men grew panicky.

"It is sure death," said one; "they'll catch us. I can see how they are watching us. I'd go, and take a chance only I have a wife and kid—I've got to think of them."

The other man declared the plan a foolish one on account of the weather. "January in Germany is too much like the corner of Portage and Main," he said.

A new batch of prisoners had come ...

... it as die here ... there is always a chance."

While the prisoners were taking their exercise just at nightfall walking up and down the enclosure listlessly, aimlessly, Jack lay beside the fence filing away the two lower strands of wire. This done he crawled through, English following. The prisoners, who were all in the secret, kept a sufficient number directly in front of them to hide them from the camp.

Out into the bog went the two desperate men, fighting for what we hold so lightly because we have never lost it. Their enemies were cold and hunger and the pitiless rains which seemed to fall every day. They journeyed only by night. Jack found his new friend's knowledge of the country to be remarkable. He seemed to know every village, and he spoke German as well as a native. In this way they were able to travel after dark on the roads, and once they got a lift from a kind-hearted waggoner, with whom English carried on a long conversation, eliciting the information that everyone was tired of the war, but it was considered the wisest course to give the English a proper beating and teach them not to start another. He asked them to ...

... boldly into a garden as they came through a village. He had a way of quieting the dogs by a peculiar whistle and this gave him a distinct advantage. The dogs who came out barking fiercely, changed their attitude when he spoke to them, and even showed a disposition to follow him.

"If the dogs could bring us food we would have plenty," he said that day, as they sat in the spruce thicket. "The chances are against us, Jack, but one of us may get over."

"One of us!" exclaimed Jack. "It must be both or none!"

"No," said the other, "it does not matter much about me. No one cares so very much, and it happens that the one person who cares a little bit about me, cares very much about you."

Jack looked at his companion—dishevelled, dirty, long-haired and long whiskered, his eyes bloodshot — and wondered if his mind were going. "And who is that?" he asked gently, as if he would humor his poor friend's mood.

"Your wife, Helmi."

"Helmi!" Jack repeated. "My Helmi!"

"Yes, yours—she is the only woman except my mother who ever cared whether I lived or died."

Then he told Jack of his quarrel with Larsen in Eagle Mines, and of Helmi's kindness, and of the week he had stayed in her house.

"She asked me to pray for you, Jack," he concluded, "and I kissed her golden hair. She told me she was sure you would go to the war, and asked me if I met you would I be your friend. That is why I came. It seemed as if I must come—when I found you at Valenmoor."

Jack's voice trembled as he spoke. "Then you are Arthur Warner, and I have been doing you wrong in my thoughts. No one told me you were hurt—they only gave me half the story. When I got back I found Helmi gone—gone without a word. She had been gone a week—I was a month late—but she might have waited."

The trees were throwing long, cold shadows over the sweeping current of the river.

"Did you not know there was a ...

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE SIX YEAR MOLAR

You have heard your dentist call this first double tooth "the six year molar."

Why is this? You have perhaps guessed it—that it is because it erupts usually at about the sixth year.

Now, you have been observant enough to note that it is a first tooth in the sense that no tooth was lost to make room for it.

And coming in at this early age you may have thought it a "baby tooth" which would, in due time, be shed.

So, in your child, you have perhaps neglected to give it the care that it deserved—with disastrous results.

Without doubt, this neglect is the most common of dental sins committed by parents, and perhaps with gravest consequences to their children.

Because should this tooth become so badly decayed within from four to six years following its eruption as to infect the "pulp," your dentist as a rule, has no recourse but the use of the forceps—and, losing the tooth, the whole series is deranged, since, in ...

Little Helps For This Week

"And now men see not the bright light which is in the clouds: but the wind passeth, and cleanseth them."—Job xxxvii. 21.

His purposes will ripen fast
Unfolding every hour;
The bud may have a bitter taste
But sweet will be the flower.
Blind unbelief is sure to err,
And scan His work in vain;
God is His own interpreter
And He will make it plain.
—William Cowper.

There is nothing in what has befallen or befalls you which justifies impatience or peevishness. God is inscrutable, but not wrong. Remember if the cloud is over you that there is a bright light always on the other side; also, that the time is coming, either in this world or the next, when that cloud will be swept away, and the fulness of God's light and wisdom poured around you. If your life is dark, then walk by faith, and God is pledged to keep you as safe as if you could understand everything.

—Horace Bushnell

Announcing the NEW UTILITY TRUCK

-another Sensational Chevrolet Value

4 Speeds Forward · 4 Wheel Brakes

NOW Chevrolet presents the New Utility Truck—a low-priced haulage unit embodying every feature of advanced engineering developed through years of experience in commercial car-building and proved by exhaustive testing on the General Motors proving ground!

Typical of the progressive design embodied in this sensational new truck are a four-speed forward transmission, powerful non-locking four-wheel brakes, full ball-bearing steering mechanism, [illegible] springs, air-bound seat cushions and channel frame bumper. In addition, it offers all those basic features which have been so largely instrumental in Chevrolet's tremendous success as the world's largest builder of trucks—rugged rear axle with one-piece banjo-type housing . . . semi-elliptic springs set parallel to the load . . . completely enclosed valve-in-head motor with air cleaner, oil filter and positive action vane type oil pump . . . thermostatic control of water circulation . . . low loading height . . . generous road clearance and countless other features of comparable importance.

Visit your Chevrolet dealer and get a trial-load demonstration of this remarkable new truck! It has been developed to meet the modern conditions of business transportation and body types are available for every type of business.

Cream Shippers

This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU.

SCHOOL MATTERS

THE DUTY of any school board is to procure the best teachers available, having in mind the general efficiency and well being of the school. Whether the teachers happen to be local teachers or teachers from elsewhere should make no difference, unless a preference is given towards the local product. Salary and ability and willingness to give adequate service is what should be required. Yet for years the Tofield School Board has steadfastly refused to engage local teachers on the grounds that it was against the Board's policy to do so. Who inaugurated the "policy" and why?

The only answer to the question we can give is—to avoid possible trouble. An outside teacher can be engaged, and should occasion demand, dismissed, with perfect equamity, but the dismissing of a local teacher would be felt very keenly by both Board and teacher, and many a tongue would wag were this ever done. There are other possible instances where the Board would be compelled to use fine judgement and determined action. Bearing in mind that they are holding office for the purpose of conducting the affairs of the school as efficiently as possible, a situation like this might arise. There would be three vacancies to fill on the teaching staff. There would be four applications, three from local teachers and one from an Edmonton teacher. The qualifications of two of the Tofield teachers are ideal, those of the other Tofield teacher decidedly poor, and those of the Edmonton teacher excellent. Now, if doing its duty, the Board would engage the two Tofield teachers and the one Edmotnon teacher, aiming at maximum efficiency. But one can easily imagine the cry that would go up if this were done. The third Tofield teacher, even though her qualifications were not so good, would no doubt have friends, and these friends would either fail or refuse to see this fact, with consequent embarrassment to the Board.

Again the matter of school discipline always is responsible for a certain amount of "touchiness" on the part of the parents and with an outside teacher in charge any unpleasantness stops there, but with a local teacher in charge, heaven only knows where it would end.

While all the above is true and could be added to if necessary, yet we are of the opinion that it is only a matter of time when the Tofield School Board's policy of refusing to engage local teachers will have to be discarded. We say this because it lies along the lines of common sense, while the refusal of the Board to even seriously consider local applicants, is a combination of smug complacency, stubborness and a fear of possible consequences which are at the worst, half imaginary.

We may never have more local teachers than we have now—young lady teachers have a habit of getting married—but even now there are enough local teachers to staff our school and do it well—better than it has sometimes been done in the past. To engage teachers from a distance is no guarantee of their superiority over the local product, in fact, ofttimes upon the arrival of the distant teacher, disappointment is felt, but it is too late to make any change. With regard to the local product acceptance or refusal of their application is an easy matter as the members of the Board has generally known them since childhood.

We are unaware how towns similarly situated to us in Alberta solve this problem, but we are quite sure small towns in the older settled portion of this country do not regularly import their teaching talent. If their local teachers and school boards can handle the situation ours should be able to handle the situation also.

In February the ratepayers will have an opportunity of expressing themselves on this matter. At that time we will again return to the subject—until then we will let the matter rest.

Willie's reading lesson was about ships. He came to a word he could not pronounce.

"Barque," prompted his teacher. Willie looked at his school mates and laughed.

"Barque," exclaimed the teacher harshly.

Willy looked up at his teacher and said, "Bow-wow."—Youth's Companion.

Mrs. Mandy Johnson: "I wants to see Mistah Roeser."

Office Boy: "Mr Roeser is engaged."

Mrs. Mandy Johnson: "Go 'long boy. Ah don't want to marry him. Tell him his wash lady wants huh money."

DISABILITY RAISERS

Arithmetic Teacher: "Billy, if your father's car made twenty miles to the gallon of gas and he bought ten gallons, how far could he drive?"

Billy: "Not an inch; ma drives our car."—The Groundhog.

A MENACE TO HEALTH

Our old enemy the House Fly is with us again. He never fails to come around when the warm weather arrives. To annoy people and to cause trouble seems to be his special aim in life. From the baby's face to the father's bald head, to the milk pitcher and to the food are some of his journeys, well known to all of us. Yet in spite of this, and possibly because he is seen too often, it is doubtful if many of us ever fully realize the danger and filthy ways of this common pest.

The house fly lays her eggs (120 at one time) in fresh horse manure. She prefers it, but she will use any heap of garbage or filth. With a very short incubation (2 weeks) period it can be seen how rapidly flies will multiply unless they are controlled. Naturally the best way to control the fly is to destroy the eggs or maggots before their wings are developed and they can move about rapidly.

Why is it necessary to destroy flies and keep them from hatching? All flies can carry disease germs; they are all filthy in the extreme. The legs of flies are provided with a great many short hairs (100) or bristles and, as the fly walks over filth containing disease germs, some of those are collected and held by the hairs. When the fly goes again to take a drink from the milk pitcher or touches food, some of the germs will be left behind in the milk or in the food. When these are swallowed later with the food by the baby, or anyone else, they may cause such diseases as typhoid, diarrhoea, dysentery or other illness.

Experiments with the house fly prove that it can be controlled by sprinkling the infested parts of the manure with a three percent solution of Lysman's Disinfectant. One gallon of disinfectant makes 33 gallons of solution and costs about 60 cents. It should be applied about every second day or sufficiently often to ensure that all maggots are destroyed.

For the few that will escape this treatment a cone trap should be employed. Placed in a sunny place, with tasty bait such as molasses and water it will account for most of those left.

NEW acceleration -like a shot from a gun . . .

. . due to greatly increased power and vital engineering advancements adding new brilliancy to McLaughlin Buick's VALVE-IN-HEAD Engine!

A THRILL with energy—like a spirited thoroughbred that will let no other pass—the 1929 McLaughlin-Buick ushers in new and unrivalled power of acceleration.

Never was there an automobile so responsive, so nimble, so sensitively flexible. Never an automobile with such dash and spirit. Never an automobile so thrillingly alive to every desire and demand of the driver!

Increased bore and stroke in the world-famous valve-in-head engine—a tremendous increase in power—new and advanced carburetion—high pressure gas pump—all combine to produce accelerating abilities which will be the envy of other motorists.

Pick-up, getaway and top speed—a greater top speed than ever before—all are attained in the fewest possible seconds in the new, 1929 McLaughlin-Buick.

If you want the feeling of dash, power, swiftness—just look out over the mighty hood; and if you want to experience traffic mastery—just press the accelerator.

Drive it and you'll say, there never was a car like this great, new McLaughlin-Buick. It provides acceleration like a shot from a gun!

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

MERCURY ADS PAY!

CABIN LINERS SET NEW STANDARD

Upper right—A general view of the vessel looking aft. Upper left—An interior view showing the cabin smoking room with its luxurious decorations. Lower: "The Duchess of Bedford" as she appeared when coming up the St. Lawrence River. Inset—Capt. [illegible], commander of the "Duchess of Bedford."

PROOF that the St. Lawrence route is rapidly increasing in popularity and that an era of continued prosperity is predicted for her ports, is shown by the addition of four new cabin class liners of the new "Duchess" type to the Atlantic fleet of the Canadian Pacific.

The Duchess of Bedford, leader of this quartette of the largest liners to Montreal, arrived in that port at 8.45 p.m. June 8th, having completed her maiden voyage in exactly seven days after leaving Liverpool. The liner is over 20,000 tons gross register, is oil burning, two-funnelled, and measures 600 feet in length and 75 feet in width. She will carry Cabin Class, Tourist Third Cabin, and Third Class passengers. In each class broad deck space is available, and accommodation is far superior to more expensive quarters on Atlantic liners of not long ago. The three sister ships of the Duchess of Bedford, now under construction in the shipbuilding yards of the Clyde, are the Duchess of Atholl, Duchess of Cornwall, and Duchess of Richmond.

The discoveries of radio engineers have aided in making the Duchess of Bedford an outstanding marine personality. For instance, while the ship's orchestra is playing in the Cabin Dining Room the music is relayed by means of microphones and amplifiers to the Tourist Third Cabin and Third Class Lounges and decks. Loud-speakers also simplify the transmission of orders to the forecastle, crew's nest, and docking-bridge.

Other interesting facts about the construction of the Duchess of Bedford are that the twin propellers weigh 16½ tons each, and the 184 foot steel shafts connecting them with the powerful turbine engines weigh about 100 tons. Nearly two million rivets were used in the ship, totalling 1,000 tons in themselves, some of the plates having as many as 650 rivets each.

The advent of the "Duchesses" greatly increases the passenger and freight services maintained by the Canadian Pacific on the St. Lawrence route. The schedule of passenger sailings had already been increased this summer by speeding the "turn about" of the Empresses from a four weekly basis to meet the expected expansion of traffic. The "Beaver" class of ships, newcomers to the St. Lawrence also, have been placed by the Canadian Pacific on an exclusively freight service. They run regularly between Montreal and London and continental ports, making almost as good time as the passenger liners.

Canada To The Fore

The breaking of records by Canada is becoming a commonplace. It is indeed an old story, in some branch of human activity and whenever the young Dominion does not attract world attention in large measure new and startling achievement.

Prior to the war Canada was hardly known, even as a name to the vast majority of the people of Europe and those who recognized the name had but slight knowledge of the country. To most of the world Canada was one of the colonies which Britain had scattered here and there over the face of the globe for which was of little value and of still less importance in world affairs.

In the war Canada made a name for itself and other nations were foolishly made to see that there had arisen in the western hemisphere a nation which already was helping to settle problems in large measure these characters and was destined to have a profound effect upon international relations for all time to come. War after war had been fought, battle after battle of a more spectacular nature could have done to turn the attention of the people of the United States northward and cause them to the fact that the whole of North America was to be found within the confines of the republic, that on the contrary a second American power was rapidly developing all their very doors.

Since the war the reality of this fact has year by year been emphasized. Long the world's greatest exporter of wheat the United States has seen Canada pass it and assume that title by a wide margin. Within the past year or two the United States has been forced to also relinquish to Canada the distinction of being the world's largest manufacturer of paper. Steadily year by year Canada has been passing other countries in the production of gold and is now within measurable distance of overtaking the United States and assuming second place to South Africa.

Contributing a share of only minor importance to the total trade and commerce of the world a bare generation ago Canada is now one of the world's greatest traders, a factor to be reckoned with in all the markets of the world. Within the year, dependent upon the United States for her capital Britain and the United States to finance its many undertakings Canadians today are able not only to finance their own country but to an ever increasing extent are financing huge undertakings in other countries while at the same time rapidly paying back into full Canadian control many large concessions of this country which in years of our financial necessity were financed and controlled by British and United States capitalists.

The war and Canada's significant parties position therein, also had the effect of raising the international status of the Dominion, giving it and every a status of equality with Great Britain within the Empire, but the rank of a nation in the council of nations. The refusal of the United States to join the League of Nations undoubtedly had the effect of the more directly focusing attention upon the North American nation which did join, and placing Canada in the forefront in the League membership.

And since destiny thus called upon Canada to play its part in the International arena, this Dominion assumed the responsibility with dignity and real effectiveness. Its place around the council board at Geneva has been no minor one inasmuch as one Rather Canada has wielded an influence possibly out of proportion to its present population, but in keeping with the growing importance which other nations now attach to this Dominion.

Having thus moved out into the great international arena, Canada this year decided to be worthily represented at the Olympiad the great meeting place of the athletes of the world. Despite its small and widely scattered population, this young Dominion dared to try competition with the much more numerous representatives of other countries in the field of sport and athletic skill and endurance. And again Canada surprised the world. The sons and daughters of the Dominion carried the flag of Canada to victory time and time again, winning many of the premier events. A Canadian school boy Percy Williams of Vancouver achieved the double victory of winning the 100 metres and the 200 metres race regarded as classic of the great meet. Ethel Catherwood a Saskatchewan girl won the high jump and in so doing so established a new world's record. A quartette of Toronto girls also broke the world's record in winning the 400 metres relay race Considering the number of events in which the Canadian participated no other country in the world approached their record

Canada's future is assured when it can produce virile and courageous young men and women of the stamp of its representatives in the Olympic games and in the hands of such youth its position as a great agricultural, mining and manufacturing country, as a leader in world finance and as an arbiter in international relations is assured. Canada is coming into that proud position which Nature through her bountiful endowments intended it should occupy and if the Canadian people continue to regard each new achievement as an incentive to still greater effort and enterprise, another generation will see their Dominion occupying a world position second to none.

National Radio Chain

Broadcasting Company to Improve Quality Of Radio Programs

A national radio broadcasting chain has been organized, it was announced here today. The new company will embrace operators among the principal cities of the country. Stations in Toronto, Montreal, Ottawa, Kingston, Hamilton, London and Quebec will be linked up with the chain, it was announced, and stations in Saskatoon, Regina, Edmonton, Lethbridge and Vancouver with the west coast section.

Russia and Peace Pact

Foreign Minister Of Soviet Republic Believes Its Failure Of Line To Include Russia To Sign

George Tchitcherin, foreign commissar of the Soviet Republic, issued a lengthy statement to the newspapers today in which he criticized the United States' failure to invite the Soviet to sign the pact indicating "a desire to make the pact an instrument of intrigue and struggle against the Soviet."

The statement asserted that the pact was incapable of preventing wars because it does not provide for obligatory disarmament."

Charity covers a multitude of sins that should be allowed to remain uncovered.

Will Need Trained Voices

Talking Movies Will Have To Be Prepared To Talk Now

The "talking movie" is just now being much talked about. Professor Shuh it will greatly increase attendance on the perhaps. That may be so. But it won't unless more actors and performers learn to speak as well as to register emotion."

A voice has as much personality as a face, perhaps more. An being as it is not allowed to interfere with the face as it does, well but when the face on the screen is fascinating and the voice unpleasant and feeble the contrast makes the audience either uncomfortable or amused. Neither state of mind is good for the box office.

NOBLEFORD LOSES IN BOTH CONTESTS OF THE PLAY-OFFS

Editor's Note.—The following taken from a Calgary daily paper will be pleasant reading to the many friends of Laurie Scott here.

Claresholm, July 28th.—The Calgary Brewery challenge trophy remains in Claresholm.

Earl Reid's peppery nine was successful in defending the silverware against Nobleford, copping both games of the series.

Following Thursday's 7—6 victory, Claresholm walloped Nobleford 11—8 on Friday. A third game will not be necessary. Laurie Scott, the famous hockey star who has been doing the receiving for Claresholm all summer, featured with a home run in the fourth inning and with one and a tripple in the sixth with the bases filled.

Pengergast, one-time Toronto Maple Leafs hurler, was knocked out of the box in the fifth inning. Claresholm ball players were on one of their batting rampages, and they turked away the decision early in the contest.

Nobleford came here heralded as a wonderful team, with 48 straight victories, but Claresholm turned them back easier than they did Blackie and Stavely.

Ashenback did the hurling for the locals and going good and supported efficiently, he had a rather easy time of it.

KETCHAMOUT

Miss Jean Dickson of Edmonton is spending some of her holidays as the guest of her friend, Miss F. Fawcett.

Miss Marjorie Lee has gone back to her school near Wainwright, after a month's vacation.

Mrs. John McGinitie, Mr. and Mrs. Maurice McGinitie and baby accompanied by Mrs. McGinitie's parents, Mr. and Mrs. Likes, returned home from a few weeks holiday spent at Jordan, Montana, motoring through.

Mr. and Mrs. Dave Harrison and son motored over from Vermilion and visited with Mr. and Mrs. A. J. Harrison from Saturday evening until Monday.

Miss Gertrude Ingram is spending a week's holiday with her sister, Mrs. T. D. Ferguson.

Mr. and Mrs. A. McMullen, Mr. and Mrs. John Johnson, Mr. and Mrs. C. [illegible] and their families motored over to Banff on Sunday and spent the day visiting at the Archie Brown home.

Mrs. H. Olson returned to her home at Portland, Oregon on Sunday evening after a month visit with her sister, Mrs. Frank Hall.

How Many Quarts Have You Down

With the season for the preserving of fruit for winter use already upon us, many Tofield housewives are now busily putting down fruit delicacies from far away orchids.

If Peaches, Plums, Apricots, Grapes, Pears, Cherries, Etc., Etc., grew on Alberta bushes—like raspberries—this advertisement would not have to be written or printed. But as they do not, we beg to be permitted to remind you that we can supply all your requirements as regards preserving fruit. Our long connection with fruit houses ensures prompt arrival of fruits in their various seasons, and we suggest that for you to get the best possible service you should let us have a list of your requirements and we will supply your needs as the delivery of the various fruits are made to us. The season for many of the varieties is of short duration and there is generally one or two weeks when it is best to buy for preserving purposes.

Will be at

TOFIELD NEXT WEEK

Any parties desiring any TINSMITHING Work done such as furnace overhauling, stove pipe replacement or any tin or metal work whatsoever, is requested to leave their name at the MERCURY OFFICE and Mr. Anderson will call on them.

LOCAL and PERSONAL

Mr. and Mrs. L. C. Hay were visitors to the city on Tuesday.

"Cap" Lee is now driving a new Ford.

Mrs. Ross and two children are visiting friends in Kitscoty, Alta.

The Tofield School fair will be held on Tuesday, September 18th.

Mr. and Mrs. W. C. Swift and family spent an enjoyable vacation at Jasper.

Mr. Donald Cressy of Viking was a guest at the Hay home for a short time this week.

Mrs. Martin is on a visit to Mr. Martin who is teaching school in the Peace River country.

Joe Snell left for Dohmael this week where he will stay with his grandfather.

Miss Helen Carnes of Edmonton visited at the McCauley home for a week.

Miss Nettie Neal, nurse in training at the Misericordia hospital at Edmonton, is home on her holidays.

Mr. Kendall, who has been at the Pacific coast all summer, returned home this week.

Mr. and Mrs. E. Rogers and daughter, Miss L. Gray and Dr. Morrison are holidaying at Banff and Lake Louise.

Miss Eva Clutterham, nurse in training at the Misericordia hospital at Edmonton, is home on her vacation.

Swift and Emery are changing the location of their office from the rear of their building to the front. Mr. Kendall is doing the work.

Miss Edna Zook and Thora Haugen who wrote grade eight exams at Ingram school were both successful in passing.

A regular meeting of the Tofield Council was held on Monday night. The business was of a strictly routine nature and the passing of a few accounts.

A number of the harvesters from Great Britain passed through Tofield this week enroute to points south. There were about two railroad coaches full.

Mr. McCauley returned home from a visit to Sexsmith, Alta., in the Peace River country, on Thursday. He was visiting his father who has land holdings there.

Mr. Anderson of the Anderson Metal Works, Camrose, will be at Tofield next week, prepared to do all kinds of tin work, furnace overhauling, stove pipe replacements, etc. Parties desiring this work done, please leave name at Mercury Office.

On Tuesday evening last Miss Ruth McLaughlin was host to a party of young people. There were about fifteen present, the main event being a "candy pull" which delighted them all. There was also music and informal dancing. After a splendid lunch the party broke up about midnight.

On Wednesday night, a group of young people were entertained to a party at the home of Mr. and Mrs. McCauley. The Misses Helen and Margaret McCauley were hosts to the gathering and a splendid time was had with music games, etc. A lunch which was heartily appreciated by the young people was served at midnight, shortly after which they departed for their homes, having had a wonderfully good time.

An enjoyable event was held on Wednesday afternoon when the teachers and scholars of the Anglican Sunday school held their annual picnic at the McCarthy home. Games races and picnic sports were indulged in a general good time spent by all. A beautiful supper was served picnic style which was much appreciated by all.

NOTICE

Anyone having any boots or shoes in A. W. Wallis's repair shop are requested to call for them at once as Mr. Wallis will soon be quitting.

CARD OF THANKS

We wish to thank all the kind friends for their sympathy and assistance during our recent bereavement, also for many beautiful floral tributes.

Mrs. B. Phillips and Mr. and Mrs. R. C. Phillips.

GOLDEN WEDDING

Mr. and Mrs. F. E. Hills of Bardo celebrated their fiftieth wedding anniversary on Wednesday, August 15th in spite of the showery weather and muddy roads, about ninety neighbors and friends gathered at their home to spend the afternoon with them. During the course of the afternoon Miss Gudrun Ness, who is studying music at St. Olaf's College, Minnesota, sang beautifully "When You and I Were Young, Maggie" and "Silver Threads Among the Gold". Besides many beautiful bouquets, a wedding cake, and presents from their children, Mr. and Mrs. Hills were presented with fifty dollars in gold as a token of esteem from their neighbors.

Vera Gates and Franklin E. Hills were married at Alden, Iowa on August 15th, 1878. To them were born seven children of whom only two, Mr. H. Brenneman and Mrs. P. Lorbeer were able to be present at the anniversary gathering. In June, 1914, Mr. and Mrs. Hills moved to Alberta and have since resided on a farm at Bardo. They are planning to spend the winter in the western and central States, visiting relatives and old friends.

LAKE SHORE

Mrs. Geo McKenzie and Mrs. Willard McKaffey of Lindbrook were Sunday visitors at the home of Mr. and Mrs. J. H. Johnson. Mr. and Mrs. N. Noland and son Everett also called their in the evening.

Miss Emily Ferguson and brother Russel spent a few days in Lamont last week where they went to have their tonsils removed. They are both home again and are doing as well as can be expected.

Mr. George Brydges of Deville is plastering the new house built for Mrs. Dorothy Walker.

Mr. and Mrs. D. W. Warner and son Donelly were visitors at the J. R. Warner home a day or two last week.

The furnace and plumbing is being installed in the new house recently built for R. C. Phillips this week. N. Sheratianko of the Sheet Metal Works at Mundare is doing the work.

Mr. and Mrs. C. W. Piper had their infant son to Lamont one day last week for medical advice.

The concert held at Community Hall last Thursday night was well attended and over $30 was cleared. This is to go to pay Mr. Lester's salary. Mr. Lester is the student minister in charge at Lake Shore and Ross Creek.

Miss Mildred Booth left on Friday evening to her school near the Saskatchewan line where she will teach the coming term.

Mrs. Frank Ball and children of Tofield spent last Wednesday at the Guy Walker home celebrating birthdays. It being Mrs. Walker's birthday and Virginia Ball's also.

KINGMAN

Mrs. Hans Simonson of Edmonton spent a few days last week with her mother, Mrs. Ovalson.

C. F. Sealund was a business visitor in Edmonton a couple of days last week.

Mr. and Mrs. Asp and family motored to New Norway on Thursday evening.

Mr. and Mrs. E. Erickson visited with Mr. and Mrs. Gust Bard on Sunday.

Dan Serumsted of Edmonton spent the week end with relatives in Kingman.

Mrs. Setterlund of Daysland, visited with her daughter Mrs. Asp, for a couple of days last week

Mrs. D. Serumsteand and children of Edmonton, have been visiting in Kingman for a couple of weeks.

Miss Lillian Lindberg entertained a number of young people on Saturday evening.

Mrs. Sam Slutsky from Saskatchewan, is visiting relatives in the Kingman and Round Hill districts for three weeks.

Mr. and Mrs. T. Gibson held a party for a number of friends on Saturday evening, and everyone reported an enjoyable time.

Mr. and Mrs. Batson and family motored to Minburn on Sunday.

There will be a dance in Kingman on Friday, August 31. Music by the Blue Bird Orchestra.

AMISK CREEK

E. A. Moen shipped three carloads of cattle and hogs to Edmonton Pool last week. He obtained a good price so why not boost for the Pool when it deserves it?

Mr. and Mrs. E. A. Moen entertained the young people of Amisk Creek and several from Ryley on Tuesday evening of last week in honor of Mr. E. Larsen, who has been elevator man at Shonts for the past four years. Games, Music, and singing were the pastimes of the evening. As a token of remembrance a photograph album was presented to him by Miss L. Anderson on behalf of the young people. A dainty lunch was also served. Mr. Larsen entrained for Sexsmith on Wednesday where he has accepted a position as elevator man. Everyone regrets his departure as he played a very prominent part in the young people's circle in this vicinity but, we all wish him prosperity, and success in his present undertaking.

The men of the vicinity were busy on Wednesday working on the basement to be put in the Amisk Creek church in the near future.

The men of this district met at Patterson's on Friday evening to make arrangements for threshing this fall.

Misses Astrid and Dorothea Sorensen, and Alfred of Poe, attended the party held at Moen's on Tuesday evening.

The Moen, Patterson, and Fleaten families attended the reception held on Sunday at the home of Mrs. A. Findlay in honour of the newly weds, Mr. and Mrs. T. Graftons.

Mr. and Mrs. I. Annabo and family motored to Bawlf on Sunday to visit with their daughter Clara who is assisting at the Old People's Home there.

Quite a number from this vicinity attended the concert held by Miss Gudrun Ness in Ryley on Sunday evening.

Gordon Watt visited with Arnold Berg on Sunday afternoon.

Mrs. Fleaten and Ruby Berg called at the Patterson home on Friday evening.

H. O. Berg lost a valuable horse recently.

Lillian Pearl, Raymond and Norman Patterson spent Sunday at the Moline home.

Miss Ruby Berg has been assisting her aunt Mrs. Fleaten for a few days.

Miss Lucy Berg left on Tuesday morning for Camrose to have her tonsils taken out at the hospital there.

Arnold Berg will assist Mr. O. Hershbarger during harvest.

Harvest is here again soon. The farmers are busy getting ready for it procuring twine and help. We expect it will be the general thing this week.

CANADIAN HOGS STEADILY IMPROVING

The quality of Canadian hogs is steadily improving. The percentage of hogs marketed last year was the highest on record, surpassing even the high marketings of 1924. An outstanding feature of the 1927 hog marketings, according to Mr. P. E. Light, the editor of report on "The Origin and Quality of Commercial Live Stock Marketed in Canada," issued by the Department of Agriculture at Ottawa, was the heavy increase in the percentage of hogs shipped direct to packing plants. An important feature in helping the price of hogs during the year was the heavy movement of stock for export, the total showing more than 56,000 head as against 44,000 during the previous year. The origin and grading of the supply as sold from eight provinces in Canada, is given by counties or electoral districts in the report, which also deals with cattle sheep, and calves in a similar manner.

HARD TO ANSWER

Young lady (visitor to Western ranch)

"For what purpose do you use that coil of rope on your saddle?"

Cow puncher: "That line, lady, we use for catching cattle and horses."

Young lady: "Indeed! Now may I ask what you use for bait?"

Youth's Companion.

A tramp was brought before the judge for stealing a rug from a lady.

The judge: "Did you steal this rug?"

The tramp: "No, your honor; the lady here told me to take the rug and beat it, and I did."

KETCHAMOUT

Ketchamout friends of Mr. and Mrs. Hill of Bardo, were very sorry not to be able to attend their golden wedding anniversary last Wednesday owing to the rain, we would like to take this opportunity to congratulate and wish them many more years of health and happiness.

Harvesting started the first of the week, in another week it will be general over the district.

Mr. and Mrs. A. Hansbodel and little daughter returned home last week after a vacation spent visiting friends in Peace River district.

Mr and Mrs. John McGinitie entertained Mr. and Mrs. Chas Whillians and two children, Mr. and Mrs. Chas Ingram to Sunday dinner.

Mr. Ivor Mitchell has bought the quarter section of land north of Marshell Mitchell at $10 an acre.

Mrs. Sam Sterritt and infant son returned home Tuesday from Camrose hospital.

Mr. and Mrs. W. Spilstead visited Mr. and Mrs. O. Barnes at their home Sunday

Miss Jean Dickson returned to her home in Edmonton the first of the week, she was accompanied by Miss Helen Schultz who spent a few days in the city

Mr. Wm Mitchell and daughter arrived on Monday from Nebraska. Mr. Mitchell is a brother of Clarence Mitchell and lived in our district some twenty-five years ago.

Mr. and Mrs. Robert Sterritt and family were guests of Mr. and Mrs. Herman Lawson on Sunday.

Mr. and Mrs. J. H. Ingram and family spent Sunday at the T. D. Ferguson home at lakeshore Sunday.

Miss Selma Simmerson is assisting Mrs S. Sterritt with her house work.

Miss Lillian Carlisle and brothers Earl and Glen were Sunday guests of Hazel and Albert Sears.

Master George Younie entertained a few friends Sunday evening at the home of his grandfather in honor of his birthday anniversary.

Mrs. Annie Johnson Mrs. Jim Johnson and Mr. and Mrs. Howard Stine and little daughter visited at A. McMullen home Sunday

Mr. Donald Cressy came down from Edmonton Monday and spent the day visiting friends and relatives in our district.

HAY LAKES FORMS ANTI-NOXIOUS-WEED ASSOCIATION

A short time ago a meting of farmers was held for the purpose of discussing the weed problem which is facing the grain growers of this district to-day. As a result an organization to handle the weed situation was formed, with the following officers:—

President—Alvin Pearson.
Vice-President—Erling Nordin.
Sec'y-Treas.—J. A. Sware.

At a second meeting, which was held at the Sulitjelma School, the organization got away to a good start with ten paid up members. The membership fee was set at 25c. to cover any small expense which the organization may incur

The name decided upon for the organization was the Hay Lakes Anti-Noxious-Weed Association.

The chief item for discussion was the danger arising from the thistles which are found in the district on the vacant C.P.R. and Government reserve lands. It was decided that steps should be taken immediately in the matter.

No time was lost, for all the members were on the warpath bright and early next morning. The party was divided into groups and the land along the south side of Oliver Lake and the hills adjoining the lake were carefully covered in search of the enemy. All patches of the offending plants were cut down by the sharp weapons of the attacking association.

It is realized however, that this method will not kill out the thistles, but it will weaken them, and prevent their spreading from seed. There is more danger from the sow thistle spreading from seed than from Canada thistle, and great care should be taken to prevent it seeding.

The number of patches of these plants found on the above mentioned lands was considerable in spite of the fact that a few years ago only an occasional plant could be found.

WORLD HAPPENINGS BRIEFLY TOLD

Increasing alarm is being expressed over the unemployment situation in Great Britain with 1,300,000 men ...

Two new brands of whisky, approved by the Ontario Liquor Control Board have been put on the market by the commission. The varieties are styled Commission No. 1 and Commission No. 2 and bear the seal of the board's approval on the bottles.

Dr. Paul, chief chemical analyst for the Surete Generale, the French Scotland Yard, is reported to have detected toxic matter in the viscera of Captain Alfred Loewenstein, Belgian financier, whose death recently was surrounded with mystery.

Four men held up the First National Bank of Buxton, N.D., and escaped with between $3,500 and $4,000. They made their getaway in a dark blue Buick sedan heading east out of Buxton which is about 65 miles north of Fargo.

Baron Von Huenefeld, owner of the trans-Atlantic monoplane, the Bremen, which Captain Hermann Koehl and Col. James Fitzmaurice piloted across the Atlantic, will make a present of the disabled plane to the projected municipal museum of New York.

Investigation of the immediate power requirements of the city of Saskatoon is to be made by a committee of the Saskatoon ...

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

We were now in the home of the Clydesdales, and a call to Mr. Weir from Newcastle in the morning had brought a pressing invitation from Messrs. A. & N. Templeton of Sandy Knowe near Kelso to visit them. This took a section of our party to see the great horse "Benefactor" and some of his progeny as well as the Border Leicester flock of Messrs. Templeton and here we had our first taste of Scottish hospitality. The brothers with their sister and mother entertained us royally to a delightful tea ... was a great privilege because the afternoon was lovely and from the high ground at Sandy Knowe the eye could roam for twenty to thirty miles in every direction over the beautiful Scottish countryside. Our visit over, we continued our journey to Edinburgh enlivening the night with our familiar songs.

The main body had gone on passing through Dalkeith at dusk awakening many memories for one of the members of our party, Mr. James Walker, representing the Canadian Bank of Commerce, Toronto, who was born in this pleasant Scottish town. Evening found us in Edinburgh, comfortably established in the North British Hotel overlooking the famous Princes Street.

From Melrose we had sent a challenge to meet the best curling rink in Scotland ... but unfortunately a game could not be secured owing to its being Saturday.

...

RULING INDIAN PRINCES

Conferences are now in progress between representatives of the ruling Indian princes and of the secretary of state for India. At present only about half of India is under direct British rule, while the rest is made up of a hundred so-called independent states. It is said that the rulers of the native free states seek to create a federation which would recognize some central authority as a first step to a larger union, which, it is hoped, would embrace British India as one of its units. The four spokesmen for the reigning princes are: (1) the Maharajah of Kashmir, who won considerable notoriety as Mr. A. in the Robinson blackmail case; (2) the Maharajah of Patiala; (3) H. H. Sir Jagat Singh, and (4) the Maharajah of Rajpipla. They are conferring with a committee of Englishmen headed by Sir Harcourt Butler.

... our places next day in the auction room.

Accommodation in Perth was taxed by the sale that nearly half our party had to spend the night in Dundee, an opportunity of seeing the Jute City which was appreciated.

Back in Perth we had the pleasure of hearing Mr. Lovat Fraser, the greatest livestock auctioneer in Great Britain ...

On the Job
- over all roads - in all weathers - at all times

WITH the superb ease of a thoroughbred that takes all in its stride, the "Bigger and Better" Chevrolet never falters in the most trying circumstances—proves its mettle on the steepest grades and in the face of the greatest obstacles.

The ruggedness of Chevrolet construction alone makes these things possible. There is no part of the engine—of the chassis—of the body that was not designed primarily for rugged endurance—put to the test again and again on the General Motors Proving Ground.

As a result the "Bigger and Better" Chevrolet sturdily climbs without a halt, the steep slopes of the Rockies, and ploughs its way through the deep mud and gumbo of half-made prairie trails. In whatever conditions it may be placed, the splendid ruggedness of Chevrolet remains loyal in the service of its owner.

Its long life has become proverbial—the very name Chevrolet is a synonym for strength that endures.

The "Bigger and Better" Chevrolet—beautiful in form—luxurious in appointments—supremely rugged in construction—powered by the famous Valve-in-head engine—offers solid, enduring, trustworthy performance even under adverse conditions.

No matter what the roads—no matter what the weather—at all times the "Bigger and Better" Chevrolet stays on the JOB.

Guns And Appliances

The use of automatic (auto loading), swivel or machine guns, or battery, or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, power boat, sail boat or night light, and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one hour before sunrise or later than one hour after sunset is prohibited.

Penalty

Every person who violates any provision of this Act or any regulation shall, for each offence, be liable upon summary conviction to a fine of not more than three hundred dollars and not less than ten dollars, or to prison for a term not exceeding six months or to both fine and imprisonment.

Atlantis

Somewhere beneath the ocean waves lies a lost continent. Plato tells us of Atlantis, probably the scene of this world's earliest civilization, which, by a tremendous submergence, sank below the sea and disappeared forever. Where, no man can tell. But the search for Atlantis has continued through the ages. The latest expedition sailed from New York last spring. A group of University students, with deep sea dredging devices, will search for evidence in the depths off the Azores. They sailed in a schooner built in Nova Scotia.

Cream Shippers

This little talk is for the purpose of reminding you that the surest way of getting the full profits from your cows is by selling your cream to THE TOFIELD CREAMERY. Our large family of patrons is evidence that we are providing a satisfactory service. Efficient manufacturing facilities enable us to pay the highest prices for cream. More important than the price paid is the careful handling of your shipments. Along this line highly trained employees weigh, sample and grade your cream, so that your satisfaction is safeguarded at every point.

If you are already a shipper to the Tofield Creamery you know more about our way of doing business than we have written. In that case we ask you to accept our thanks for your continued business, and to pass along to your neighbors the good word that TOFIELD CREAMERY SHIPPERS ARE SATISFIED. THANK YOU!

THE BEAUTY OF FLOWERS

IT IS not so many years since, in this country, which was then the new west, a flower garden was a rare site. Partly because people were too busy attending to the stern realities of life in a new country and partly because a good flower garden is not the result of one year's effort but of many, flower gardens were few and far between. however, in the cities there are really splendid gardens and in the country gardens equally as good. The inherent love of humanity for flowers has been responsible for the laying out of many a flower bed and with constant care and attention, these flower beds have become beautiful and fragrant.

The Town of Tofield is no exception. During the last ten years there has been a steady increase in the number of flower beds laid out and planted, and to-day there are many beauty spots around town. This is not intended to be a list, as there are numerous private gardens worthy of note, but we can mention the Telephone Office garden, the C.N.R. flower beds, the flowers around the Royal Alexandra hotel, etc. Those people who plant and care for flower gardens deserve much credit, for they are making the town more beautiful and by making the town more beautiful they are making it better—for beauty and wrong doing are not affinities.

A VEXACIOUS SITUATION

MOST FARMERS in this district have by this time heard or read of Sow Thistle; if they are at all observant they have seen it. There is however, a side to the Sow Thistle menace in this municipality that needs some attention. Just south of Cooking Lake there is a bird sanctuary and this sanctuary at this time is pretty well infested with Sow Thistle. The seeds from this spot are blown over the land nearby subjecting it to great risk of pollution. A farmer owning land in this territory of course comes under the jurisdiction of the Noxious Weeds Act. Sow Thistle appears on his land and a weed inspector calls on him and requests him to remove it. Knowing where it most likely came from and that more will follow, it is easy to imagine the reception a weed inspector would receive in that locality. Here is the rub—the bird sanctuary being federal land does not come under the jurisdiction of the Noxious Weeds Act, this being a provincial statute. As it is probable in the near future Alberta will receive from the Dominion Government, the natural resources, little if anything is being done on the sanctuary to combat Sow Thistle. No wonder a farmer in that locality has to blow off steam when a weed inspector calls upon him. Knowing the serious nature of this weed and the fact that prosecution follows in the wake of private parties if they allow it on their property, the Dominion authorities should see to it that sow thistle on their land is under control—that it is not allowed to come to seed, thus preventing spreading by the seed method.

BOLD ADVENTURERS

ALMOST EVERY day one reads of one or more intrepid aviators or explorers either being in imminent peril of their lives or having passed to that sphere from which no traveller ever returns. Right at the present moment the world at large is in suspense regarding the fate of the fliers, Bert Haskell and Earl Kramer who endeavored to fly from Ontario to Greenland, intending from there to fly to Stockholm, Sweden. Long overdue at Greenland, their fate is unknown. This is the latest venture of very many that has been undertaken within the last two years, many of which has ended in disaster and a few triumphantly succeeding. The general trend of opinion is that these sacrifices of splendid lives are necessary to the welfare of aviation in general—that pioneers must blaze the trail, run the risk and pay the price. To a certain extent we agree with this, but for some time we have been of the opinion that the spirit of adventure as applied to long and dangerous aeroplane flights have been over done. The Atlantic and the Pacific have both been conquered and flights made over the north pole, but no one will dare to assert, that either of these flights can be attempted with present means of transport except by undertaking exceptionally heavy risks—risks far too great for general use. It would seem to us that advances in aviation can be made equally as effective by long distance flights over settled areas.

PAID $100.00; LOST THE BRIDE

A chap who recently came out from Germany, says the Walkerton Herald-Times, and saw two farmers of German extraction doing their stuff in single harness, west of town, when the Fatherland was over-run with eligible maidens, decided to do a little advance work at match making and so pictured the charms of two damsels back in the old home town that the local agriculturists became interested to the extent of investing $100.00 each to ensure the ladies a bon voyage over the sea to this land of promise.

The pair arrived in due course and believing that first impressions are lasting, one of the swains took particular pains to make a hit, by having the barber give him a clean shave and up-to-date hair cut and freshen up the wrinkles with a face massage. Putting on a standup collar he met [illegible] with all the [illegible] air of a prince. [illegible] some girls [illegible] know royal blood from tomato soup.

Discovering that the charms of the lady hadn't been overrated and that she was as plump and handsome as one could wish, his heart began to flutter like a flivver on a frosty morning and he was blushing right through his freckles in spite of himself. Talk about your love scenes, but Romeo's behavior to Juliet looked like that of an unfriendly neighbor compared with this gent. If he received a rebuff he certainly didn't earn it according to the rules of the game.

Just when he thought he had the lilies of the field looking like weeds the lady began to act as if something made her tired and the indifference she assumed wasn't exactly calculated to swell out his chest until the vest buttons were in danger of yielding to any prevailing pressure from pride.

As time wore on and his love was [illegible] reciprocated to any noticeable extent he began to feel as tough as an auctioneer's tongue. But the climax was reached last week when the two ladies left for Kitchener without holding out any encouragement to the two locals that they would ever return and become more in their lives than distant friends and possibly very distant at that.

Getting his dandruff—we mean his dander up, the jilted swain mentioned above, came into Walkerton and thought the government should take some steps. And he is right. The immigration department, which is paying out real money to get immigrants into this country, had a very desirable pair brought out through the matrimonial scheme didn't materialize, yet what is the locals' loss may be somebody else's gain in this fair domain, so $120 apiece might be handed back as balm to the wounded feelings of two men who acted in good faith and lost.

In the meantime the world will go on with its political conventions and saxaphone playing, while two girls who must think they are the whole orchestra, have left behind two men who have paid handsomely for music, and to whom a corkscrew must seem straighter than a fountain pen in comparison with this matrimonial scheme.

HIGH FINANCE

The following appearing in the "Here and There" column of "The Barrhead News," will be interesting reading to the many friends of Mr. Brice, the editor, in Tofield.

We all perhaps have our mental limitations. We may come to some problem which presents a stone wall to our reasoning capabilities. The editor sometimes finds himself in need of a superior intelligence when doing business with a grocer or dry-goods merchant.

As he is almost the only person in Edmonton who wears his style of collars, he sometimes has difficulty in replenishing his outfit. Therefore, on finding a store carrying the line a few years ago, he purchased the entire stock of several dozen. The price was 25c. a piece, or 5 for $1.00.

Everything went well, the editor paying $1.00 for every 5 counted, until one solitary collar was left, and here the fight started. The editor reasoned as follows: "If you take 1, 2, 3 or 4 collars, you pay 25c. for each one. If you take 5 or more, you pay 20c. for each one. As I have already purchased several dozen, this last lone collar will cost 20c." But the clerk said, "No, the price is 25c per collar, or 5 for $1.00. If this last collar were 5 collars, you could have it for $1.00; but as it is only one collar, you must pay 25c. for its possession."

The other evening in Banff the grocery store that has the honor of being purveyors to their Majesties, the Editor and his Wife, advertised strawberries at 25c. per box or two boxes for 45c. Three boxes were necessary for their Royal requirements. The editor reasoned as follows: "25c. for one box, 20c. for each additional box; therefore 65c. for three boxes." But the clerk said, "No, how do you get that way? We have no price on a third box. 2 equals 1, and one box sells for 25c. Therefore you owe 70c. If you want 3 to equal 2, you must add 1 to the 2, then the result will equal 2 squared, and the total price will be 90c."

Such high-falutin' reasoning was too much for the editor, and the additional 5c. was unearthed.

Yes, grocers and dry goods vendors are funny people. If you don't believe the editor, just ask Sidney King.

THUMBS DOWN

Lawyer: "Madam, you lost your thumb in a trolley accident, but how can you prove it worth the $3,000 you have sued the company for?"

Lady Plaintiff: "It was the thumb I kept my husband under."—The Groundhog.

RETURNED

Bill: "Where did you get the black eye?"

Will: "You know that lady down the street whose husband is in China?"

Bill: "Yes."

Will: "Well, he ain't."

ASK DAD

Tommy's father—"Did Tommy take his medicine like a man?"

Tommy's mother—"No, he didn't know enough words."

PERFECTLY SAFE

A spinster encountered some boys in the old swimming hole, minus everything but nature's garb, and was horrified. "Isn't it against the law to bathe without suits on, little boys?"

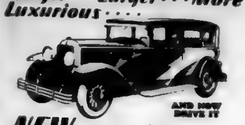
"Yes'm," announced Johnny, "but Jimmie's father is a policeman, so you can come on in."

SIMPLE RECIPE

"Do you know how to make a peach cordial?"

"Sure, send her a box of candy."

Longer . . . Larger . . . More Luxurious . . . .



NEW masterpiece Bodies by Fisher . . .

IN one tremendous stride, McLaughlin-Buick has overleaped old modes of car design and attained an order of beauty without parallel in the automotive world. To know the new style—to appreciate its superiority—simply see the 1929 McLaughlin-Buick with new Masterpiece Bodies by Fisher.

The world's foremost builder of automobile bodies has co-operated with the world's foremost builder of fine cars to produce the most beautiful creations ever shown. And with what results!

Dashing new lines, different from any heretofore known—longer, larger, more luxurious bodies, matchless in their grace and symmetry—gorgeous new color harmonies—the richest of upholstery and appointments—wider rear seats providing plenty of room for three adult passengers—an ensemble of beauty and luxury that has never been equalled.

New and deeper radiator lines—new chrome-plated head-lamps and cowl-lamps—new wheel and fender design—all combine to lend incomparable poise, fleetness and distinction.

The new McLaughlin-Buick Bodies by Fisher mark the supreme achievement of the body builders' art. To see the 1929 McLaughlin-Buick is to see the most beautiful and fashionable car of the year, as well as the most capable and comfortable.

Visit the nearest McLaughlin-Buick showroom. See the 1929 McLaughlin-Buick today!

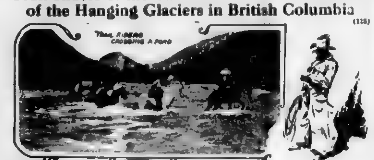
Trail Riders of the Canadian Rockies Visit Lake of the Hanging Glaciers in British Columbia

(118)



Hundreds of lovers of the great outdoors have joined the Trail Riders of the Canadian Rockies, an organization of poets, novelists, scientists, educators, artists, Indian chiefs, cowboys, nature lovers in general, and those who wish to perpetuate ancient trails in the Canadian Rockies and get the grand kick of a wonderful horseback ride through the Canadian Rockies to scenic wonders which have been viewed by a mere handful. John Murray Gibbon, of Montreal, first organized this great ride, which this year started August 2, for the Lake of the Hanging Glaciers, from Banff and Lake Windermere, B.C. Each year it has been bigger and better and the membership now exceeds a thousand, many of whom have won the gold and enamel button signifying that they have ridden at least fifteen hundred miles. Of the hundred so qualifying, 23 are ladies. Three of the girl-members who joined up with the main party this year on the start for the Lake had already covered upwards of 200 miles of mountain trails.

The Lake of the Hanging Glaciers about 7,500 feet above sea level in the Selkirk Range, was discovered about 20 years ago, but is still as wild as ever. Its name gives some idea of its spectacular appearance, which is that of an immense cirque, with eight glaciers forming a morraine which drops off sheer in an ice wall nearly 300 feet higher than the lake itself. From this wall icebergs are falling continually, and forming a miniature Arctic sea in the heart of the mountains. Surrounded as it is by jagged Alpine peaks, many of which exceed 11,000 feet in height, this district has challenged the ambition of many Alpine climbers.

Big Land Deal

Ten Thousand Acres Of Farming Land Purchased In Wainwright District

What is stated to be the largest land deal ever consummated in Northern [illegible] was completed here when the Mid-West Development and Finance Corporation purchased 10,000 acres of choice farming land in the Wainwright District at a price of $200,000. There are 8,000 acres under cultivation and the land is laid out in twenty units which are being rented by progressive farmers.

ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus Dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face and limbs. As the disease progresses the twitching takes the form of spasms in which the jerking motion may be confined to the face or all the limbs may be affected. Frequently the patient [illegible] anything in the hands or walk steadily. In severe cases the speech is often affected. The disease is due to debility of the nerves and relief comes through an enriched blood supply. Dr. Williams Pink Pills have been most successful in reaching this trouble through their specific action on the blood, which it enriches and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Bowen, Bath, Ont., says: "Dr. Williams Pink Pills have been in use in my family for years and always with good results. I believe they saved the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch, then his speech was affected and his condition was pitiable. Just then there came to me a little book telling of Dr. Williams' Pink Pills and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and by the time six boxes more were taken all traces of the trouble had disappeared, and he was well and strong. I have also given the pills to my growing girls and I know of no better strengthening tonic. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Travelling Clinic

Government Clinic Pays Visit To Peace River District

A Government travelling clinic has been operating in the Peace River District this season. At five population centres a total of 314 children were examined in 10 days. A total of 124 minor operations were performed, 279 children given dental examinations, 144 extractions performed and other dental treatment given to 128 children.

Gasoline Tax Revenue

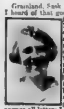
In the first two months, May and June, in which the three-cent gasoline tax was in force in Saskatchewan, $325,000 was collected, it was officially announced. When the gasoline tax act was passed at the last session of the Legislature, it was estimated that the revenue to the province would be for the full year $700,000.

Stop the Cough. Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Canada has the most complete governmental system of wireless telegraphy of any country.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound



Grainland, Sask. "I am glad that I heard of that good Lydia E. Pinkham medicine and I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women."—Mrs. Mary Schulteis, Grainland, Sask.

MUST TAKE REST

Viscount Haldane, 72, former lord chancellor and secretary of state for war, is ill and has been ordered to take a complete rest.

For Evacuation Of Rhineland

Declaration Of Policy Adopted At Socialist Gathering

Immediate evacuation of the Rhineland by France, Belgium and England was demanded in a declaration of world policy adopted by the socialist labor international congress meeting at Brussels. Re-establishment of German sovereignty in the Saar region was also demanded. The clause covering the demands was applauded by the French delegation which joined the Germans in a demonstration for its adoption.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its undoubted usefulness in relieving and curing sickness. As a specific for cuts, burns, scalds and various inflammatory pains its record is beyond reproach.

Take Up Homestead Lands

Demand Has Been Very Brisk In Northern Alberta

Demand for homestead land in the northern part of Alberta continues very brisk, judging from the records at Grand Prairie and Peace River. At this former point 200 entries were reported during the month of June, making a total of 732 for the three months period ending June 30th, and at Peace River 400 entries in June, making up a total of 1,040 for the three months.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1923."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Lean Men Better Insurance Risks

In conversation an English insurance man said that, unlike Caesar, insurance companies prefer lean men, as they consider them better "lives" than fat men. In this connection he added that men of moderate girth usually put on considerable weight if they give up smoking. His observation of this particular method of weight-building has extended over many years.

Grain Stocks Larger

The Dominion Bureau of Statistics reports the following as the stocks of grain in Canada at the close of the crop year ended July 31, 1928, as compared with the same date last year within brackets. The quantities are expressed in imperial bushels. Wheat, 76,484,952 (50,765,435); Oats 28,712,183 (23,045,449); Barley (1,293,777); Flax seed 1,296,347 (2,056,106).

Laying Heavy Steel Rails

C.P.R. Replacing Rails With Heavier Steel On Maple Creek and Brooks Subdivisions

Good progress is being made with the relaying of steel on the Canadian Pacific lines in the Calgary division during the past few months. One hundred and thirty-five miles of new rail has been laid on the Maple Creek subdivision, that is between Medicine Hat and Swift Current, while the relaying is now going on in the Brooks subdivision, between Calgary and Medicine Hat.

The relaying consisted of the replacement of 80 and 85 pound steel by rails weighing 100 pounds per [illegible]. The heavier rail is necessary in view of the increased speed of the trains and their greater weight.

As mentioned above, 135 miles of heavy rail have been laid on the Maple Creek subdivision. On the Brooks subdivision the mileage of heavy steel will be about 120. It is [illegible] that the cost of relaying the track is approximately $1,000,000 per hundred miles, thus the work on the Calgary division this year will cost the Canadian Pacific Railway a total of about $2,065,000.

Water Power Installation

Two Million Horsepower To Be Added Within Next Few Years

Two million horsepower will, it is estimated by the department of the interior, be added to the water power installation in the Dominion within the next few years. This new work will require a direct investment of at least $[illegible],000,000.

The annual statement of the Hon. Charles Stewart, minister of the interior, with regard to the progress of water power development issued at the beginning of the year predicted an addition of 378,000 horsepower to the total installation in the Dominion during the first six or seven months of 1928. A mid-season review of conditions now indicates that during the whole year as much as 550,000 H.P. will be added, either in new development or in addition to existing stations.

Russia Needs Capitalists

It was understood that Russia is attempting to float a $15,000,000 loan abroad, to be used in support of the Russian railway system. Negotiations are said to be under way in Berlin, London and New York.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Farm Credits

Steps To Be Taken To Put Into Operation Recent Legislation

With the return to Ottawa of Hon. J. A. Robb, minister of finance, definite steps will probably be taken to put into operations the legislation of 1927 authorizing farm credits.

The first step, it is stated, will likely be the appointment of a central board to be known as the Canadian Farm Loan Board. Under the statute, this board will be composed of four members, one of which will be the Minister of Finance.

Six provinces have passed the necessary legislation, electing to come under the scheme. These are: Quebec, Alberta, Manitoba, British Columbia, New Brunswick and Nova Scotia. Ontario, Saskatchewan, and Prince Edward Island had not as yet taken final steps in this direction.

VISCOUNT PEEL IS CHOSEN TO HEAD DELEGATES

London, Eng.—It is announced that in view of the appointment of Lord Hailsham, lord chancellor, as acting prime minister in the absence of Premier Baldwin, Viscount Peel has been appointed chairman of the United Kingdom's delegation to the meetings of the Empire parliamentary Association in Canada in the next few weeks.

Viscount Peel is first commissioner of works in the government and has held numerous appointments from 1900. He was under secretary of state for war from 1919 to 1921. He is 61 years of age. The prime minister having expressed a strong desire that the United Kingdom delegation should include two members of the government, the association has invited Hon. P. G. Williams, parliamentary secretary to the board of trade to join the delegation.

The delegation is expected to arrive at Quebec on August 21 and in company with other Empire delegations will make a transcontinental tour of the Dominion before leaving Sydney, N.S., on October 5.

Fatal Crossing Accident

Three Killed and One Badly Injured At Grade Crossing In Alberta

Calgary.—Three were killed, one fatally hurt, subsequently succumbing in hospital and one other dangerously injured in a crossing accident at the town of Olds.

The dead are A. J. Clarke, deputy sheriff of the town of Sunburst, Montana, his wife Jennie, and his two boys, Garry aged ten, and Lloyd aged four.

A daughter, Ada, aged about 15, lies in hospital in High River in a precarious condition.

The party were touring on holidays and had been staying at Coutts, Alta. They left there with the intention of driving to Calgary.

When within 27 miles of their objective they met tragedy, due, it is thought, to the driver being blinded by the oblique rays of the setting sun as he made his way in a north-westerly direction over the crossing.

Farmers Seek Relief

Nearly Million Dollars Damage From Floods In Southern Manitoba

Winnipeg.—One hundred and fifty farmers of the Sperling District in Southern Manitoba, claiming to have suffered loss to their crops amounting to nearly a million dollars this season as the result of floods, have directed an appeal to the government for drainage relief.

According to a spokesman for the distressed farmers, approximately 180 sections of land were inundated during June and July destroying grain after it was in the head, and ruined grazing lands.

The government is being urged to reconstruct its drainage system in the affected area. Premier John Bracken and Hon. W. R. Clubb, minister of public works, following a trip of inspection of the flooded lands, promised early consideration of the request.

Record Crop In Australia

Prospects For One Of Greatest Crops In History

Victoria, B.C.—Australia, as well as Canada is enjoying the prospects of the greatest crops in her history, according to Sir Joynton Smith, millionaire publisher and promoter of Sydney, N.S.W., who arrived here recently on board the liner Aorangi.

"Australia's wool and wheat crop for 1928 will be the most immense the country has ever produced," said Sir Joynton. "I hesitate to suggest a figure to represent the vast yield. Suffice it to say that we fully anticipate it to be a record in every way."

Mine Blast Is Fatal

Calgary.—L. L. Johnson, for years chairman of the Department of Soldiers' Civil Re-establishment at Calgary, was instantly killed when a charge of dynamite exploded prematurely in Mr. Johnson's mine at Dodds, Alta., according to information received here.

Miners For Harvest Fields

The Pas, Man.—Men are flocking in from railway construction camps along the Flin Flon railway seeking higher wages in the harvest fields in the interior. Five hundred men have departed from The Pas on the last two trains going south.

Prairie Pool System

Toronto Professor Says Pool Has Revolutionized Morale Of Farming Community

Williamstown, Mass.—Agricultural co-operation is not merely a marketing device but a means of lifting the farmer to a plane of greater prosperity and keeping him there, Prof. C. R. Fay, of the University of Toronto told the Institute of Politics here.

"In Canada," he said, "the wheat pool has revolutionized the morale of the farming community, relieving the farmer of the difficulty of deciding when to sell, eliminating the pressure to sell at certain seasons, and basing all farm marketing on statistical knowledge."

The co-operative system he declared, is of special benefit to the small farmers, whose plane of living has been raised to the highest level it ever reached.

In the United States the government's attitude toward the farmer's problems is one of encouragement through active assistance in research and educational facilities, C. L. Christensen, chief of the department of co-operative marketing of the department of agriculture, said.

Receives Re-Appointment

Dr. McLean To Be Assistant Chief Commissioner Of Rail Board

Ottawa.—Dr. Simon J. McLean, Ottawa, has been re-appointed assistant chief commissioner of the board of railway commissioners. Dr. McLean's term of office expired August 8, and his re-appointment is for a further period of ten years. Dr. McLean was originally appointed to the board in 1908.

The term of Commissioner Frank Oliver will terminate toward the end of September, when Mr. Oliver will have reached the age limit of 75 years.

Dr. McLean drafted the Dominion Railway Act, and his re-appointment for a third term creates a precedent. Since the formation of the Board of Railway Commissioners in 1904, Dr. McLean has been the only commissioner to be re-appointed after expiration of the ten-year term.

While no official statement has been made in the matter, it is rumored that legislation may possibly be introduced at the next session of Parliament providing for the superannuation of members of the board.

Death Of Canadian Novelist

Mrs. Isabel Ecclestone MacKay, Dies At Her Home In Vancouver

Vancouver.—Mrs. Isabel Ecclestone Mackay, Canadian novelist, poetess and playwright, wife of Peter J. Mackay, official reporter of the Supreme Court of British Columbia, died at her home here after a year's illness. She was born in Woodstock, Ont., 52 years ago.

The late Mrs. Mackay was the daughter of Mr. and Mrs. Donald MacLeod MacPherson, of Woodstock, and came to Vancouver 19 years ago.

She was the authoress of several novels, including "House of Windows," "Up the Hill and Over," "Mist of Morning," "The Window Gazer," and "Glengarrow." Mrs. Mackay was also the writer of a book of lyrics, "Fires Of Driftwood" and a volume of poems for children entitled "The Shining Ship."

She also wrote a number of plays which have been produced in Canada and the United States.

In addition to her husband she leaves three daughters.

Inspect Australian Ship

12,000 People Visit New Cruiser During Stay At Montreal

Montreal.—H.M.A.S. Australia, flagship of the Royal Australian Navy, sailed for Quebec following a visit of several days to Montreal. It is estimated that 12,000 persons visited the new cruiser while she was here.

The Australia will remain at Quebec four days, following which she will proceed to Halifax, which will be visited on August 22. Other places to be visited include Boston, August 26; New York, August 30; Chesapeake Bay, September 4; Colon, September 17; Tahita, September 20; Wellington, N.Z., October 9; Brisbane, Australia, October 17; Sydney, N.S.W., October 23.

Will Visit Ireland

Washington.—Secretary of State Kellogg has practically decided to visit Ireland after signing the fifteen-power anti-war treaty in Paris, August 27, in order to return the call of President Cosgrave of the executive council of the Irish Free State, made during his visit to this country. It is not unlikely that Mr. Kellogg [illegible].

Gold Strike In Ontario

Rich Find Is Reported In Vicinity Of Mine Centre

Toronto.—A special despatch to the Mail and Empire from Lochalsh, Ont., says:

"Reports from Mine Centre, west of Fort William, on the Canadian National Railways, bring word of what is described as a sensational gold strike made on the Johnson claims at that point. The claims are located south of the Foley mine of British-Canadian Mines, Ltd., and east of Little Vermilion Lake.

"A mining engineer returning from the scene of the strike says that the ore taken from the surface is glittering with visible gold which would run thousands of dollars to the ton, and is said to equal or even eclipse the remarkable find made on the Isabella property of Northern Red Lake Mines, Ltd., reported several weeks ago."

Message From Amundsen

Believe Note Found In Bottle To Be In Handwriting Of Lost Explorer

London.—Despatches to the Daily Mail from The Hague state that the Norwegian Minister at Amsterdam announced an apparently genuine message from Roald Amundsen, noted explorer who was lost while participating in the expeditions seeking the crew of the wrecked Polar dirigible Italia, had been found in a bottle near Rottumeroog.

The message, which was compared with Amundsen's handwriting and was said to be authentic, gave the position of the explorer and his party on July 1.

Rottumeroog is in the Netherland Islands in the North Sea.

Amundsen and four companions have been missing since they started in a French seaplane to search for the Italia party.

HON. PHILIP ROY RECOMMENDED AS ENVOY TO PARIS

Ottawa.—Hon. Philippe Roy has been recommended by the Dominion Government to His Majesty the King for appointment as Canadian minister plenipotentiary to Paris, Premier King has announced.

Mr. Roy has been Canadian commissioner in Paris for the past 18 years.

No action to appoint a Canadian minister to Tokio has yet been taken, the prime minister said.

It is expected that the formal commission for the appointment of Mr. Roy will be issued by His Majesty in time for the opening of the legation in Paris during the first week of October.

Mr. Roy was born on December 13, 1868, at St. Francois, Que., and was called to the Senate on March 8, 1906. He was appointed to Paris on May 1, 1911, being one of the administration of the late Sir Wilfred Laurier. Mr. Roy was also appointed agent-general for the province of Quebec at Paris on January 13, 1912.

Heads Native Sons Of Canada

Dr. J. H. Cotton, of Toronto, was elected president of the National Council of the Native Sons of Canada at their annual meeting in Regina. Dr. Cotton is the first eastern member of the organization to be appointed to the presidency. Formerly he was appointed to the vice-presidency of the council.

Influenza In the North

Serious Epidemic Has Broken Out In Mackenzie River District

Winnipeg.—A serious epidemic of influenza has broken out along the banks of the Mackenzie River with considerable loss of life, according to a letter received from Rev. W. B. Singleton, principal of the Hay River Indian school of the Indian and Eskimo mission of the Missionary Society of the Church of England.

At Fort Resolution, where Slave River flows into Slave Lake, 20 deaths were reported. At Hay River towards the west end of the lake there were ten deaths. The toll of deaths at other points was thought to be even greater, the letter stated.

The Manitoba Division Dominion Department of Indian Affairs, had received no information of any epidemic in this province.

Fuller Party Reported Safe

Have Been Reprovisioned and Are Now Headed For Shores Of Hudson Bay

Regina, Sask.—Three weeks ago the John D. Fuller expedition of student geologists from Iowa into the north was safely launched on a new and shorter route to Hudson bay. The four men, who have been almost given up as dead for the past six weeks, have been reprovisioned and given new equipment for the trail. They are now headed along the route through Nueltin Lakes and smaller bodies of water and down the Thlewiaza River to Hudson Bay. They are expected to emerge near Driftwood Point, half-way between Chesterfield Inlet, their first objective, and Fort Churchill.

Church Is Desecrated

St. Jerome, Que.—Vandals entered the Roman Catholic Church here and laid waste many sacred articles. Sacred vessels were thrown around the chalice and the main body of the church, while the priests' vestments were torn and slashed and scattered around the edifice. A chalice containing the Host was broken to pieces.

BRITISH STUDENT HARVESTERS

British university students seeking information, experience and adventure are coming to Canada to help with the harvest in the West this year and places for them are being found by the colonization department of the Canadian National Railways. If they are all of the type of the first four to arrive in the West both Canada and Great Britain should gain by their enterprise. The photograph shows the advance guard of four of these young men. From left to right, with the places where they are being stationed, they are: W. D. Harrison (Marcelin, Sask.); E. A. Corcoran (Weldon, Sask.), F. W. Beale (Carlea, Sask.); and J. D. Preston-Jones (Atwater, Sask.).

Hope For Peaceful Relations

Kellogg Peace Pact a Revolutionary Policy Among Nations

Wausau, Wis.—Within a fortnight of the date on which the international treaty for outlawing war is to be signed, President Coolidge declared before the Wisconsin State American Legion here, that the Kellogg pact holds a greater hope for peaceful relations than was ever before given to the world.

The President maintained that by taking a leading position in securing this agreement the United States proved its pacific inclinations toward [illegible].

"We have demonstrated," Mr. Coolidge declared, "that when we have said we maintained our armaments, not for aggression but purely for defence, we were making a candid statement which we were willing to verify by our actions."

The President said that while it would be too much to suppose that war had been entirely banished, yet a new and important barrier reasonable and honorable has been created to bar it.

"This agreement proposes a revolutionary policy among nations," he said. "It holds a greater hope for peaceful relations than was ever before given to the world. If those who are involved in it, having started it, will finish it, its provisions will prove one of the greatest blessings ever bestowed upon humanity. It is a fitting consummation to the first decade of peace."

To Take Care Of British Harvesters

Effort Will Be Made To Provide Permanent Work Throughout Winter

Saskatoon, Sask.—If the British miners who are coming to the west to work in the harvest fields do not obtain permanent work throughout the winter it will not be the fault of the railway companies or want of effort on their part.

No stone will be left unturned to try to keep these men here and in the opinion of T. Devlin, local manager of the Canadian National colonization department, future immigration from the British Isles depends largely on the success or failure of this venture.

Mr. Devlin said that he could see no reason why the project should not prove an outstanding success. "The men who are coming are by no means strangers to hard work and they know just as much about farm work as the average harvester from Eastern Canada," he says.

Expedition Well Equipped

Commander Byrd's Antarctic Venture May Cost One Million Dollars

New York.—The Antarctic expedition of Commander Richard E. Byrd which starts from this port this week will be the most extensive expedition in the history of exploration and may cost one million dollars.

At the expedition's headquarters here it was said the cost would be not less than $455,000, and before the expedition returns to this country may reach $1,000,000.

Contributions received to date include $435,000 worth of equipment and $237,545 in cash.

The total expense of Commander Byrd's North Pole expedition in 1926 was $140,000.

SPIRITED FIGHT ON LAKE ERIE WITH RUM FLEET

Buffalo.—The struggle for supremacy between the rum running fleet on the Niagara River and Lake Erie blazed into spirited action in which government boats set afire and sank one craft and captured two others carrying contraband liquor and ale.

At Niagara below the Falls a speedy boat carrying many cases of both whiskey and ale fell into the hands of the federal patrol.

Earlier in the day the C.G. 121 sighted a suspicious looking craft off Brocton, on Lake Erie. A chase followed during which the government boat fired 50 rounds.

After the gun fire had set the rum runner ablaze the coastguard boat took off the crew of two men and stood by while the damaged craft burned to the water's edge.

The other boat was caught on Lake Erie off Barcelona. Three hundred rounds were fired at it before the crew decided to heave to and surrender. Two men and a small quantity of liquor were found.

MANY NATIVES IN NORTH SUCCUMB TO 'FLU EPIDEMIC

Edmonton.—Scouring the population along the banks of the Mackenzie River, the influenza epidemic which has been raging in the North for some time has taken a toll of 275 of the native population within a period of a couple of weeks, according to a report received in Edmonton.

As far as is known only one white man has succumbed to the disease.

A total of 53 are now known to have succumbed at Fort Simpson alone according to a radio message received by Jack Stewart, a trapper at that post. The message was sent by a man named Sherwin.

The full total of the deaths caused by the disease may not be known for months until police patrols and trappers returning to their lines among the hills and barren land find teepees with their occupants possibly dead.

The points along the Mackenzie that have been badly hit are Fort Resolution, with 50 deaths; Fort Simpson 53, Fort Rae 33, Fort Norman [illegible], Fort Goodhope 20, and Fort McPherson 21. Deaths at other points have also been heavy.

Some men say that the natives are apathetic when attacked by the disease, sitting moaning and wailing in their camps and cabins instead of making an effort to fight the sickness. They throw away the drugs given them by medical men and missionaries because it does not effect an immediate cure and wait patiently either to die or to recover.

Only one white man has died in the North from the disease so far as has been reported.

All Bitterness Forgotten

Remarkable Tolerance Is Shown In Irish Free State

Victoria, B.C.—Right Hon. Hugh Kennedy, chief justice of Ireland and honorary member of American and Canadian Bar Associations, was the guest speaker at the Canadian Club luncheon here.

"We had a fight with England but that fight terminated in a treaty of peace, and a reconciliation was reached which I believe has wiped out the rancour which existed in the past," the chief justice said.

One of the first steps in the reorganization of the country was placing agriculture on a firm basis, as agriculture for years to come would continue as the foundation of prosperity in Ireland, he said.

He said that the Free State had shown a remarkable degree of toleration with the test of religion never entering into politics. As an example, he referred to the fact that the minister of finance was a presbyterian from an Orange county.

Aerial Sham Warfare

Two Accidents Was the Result Of the Manoeuvres Over London

London, Eng.—The aerial sham warfare over London in which hundreds of planes have been engaged for four days was marred by the first two accidents of the manoeuvres. No one was hurt.

Flying Officer L. C. Bennett was forced to jump in a parachute when his 'plane burst into flames over Richmond. He landed safely on a house top. A "raiding" bomber, engaged in an attack on London, made a forced landing in a field and was damaged, but the pilot and observer escaped without a scratch.

Recognition Of Ecuador

United States Now Convinced Of Country's Good Intentions

Washington, D.C.—The United States has accorded complete recognition to the Government now functioning in Ecuador, the State Department announced.

Secretary of State Kellogg has informed the Ecuadorian Government by note that beginning immediately the United States, convinced of Ecuador's good intentions to return to a constitutional form of government which it abandoned in 1925 accords recognition to the present regime.

Montreal Garment Workers Quit

Montreal.—Twelve hundred employees and 70 work shops in Montreal are affected by the "present stoppage" of work of local members of the Amalgamated Clothing Workers of America. It is not spoken of as a strike by union officials because not all the shops of the city are affected. Speedy termination of the dispute is expected.

ENRICHED in Color ** Enhanced in Style and Offering Even Greater Performance

BEAUTIFUL as the Pontiac Six has been in the past—great as its performance has proved in the hands of owners—

—today's Pontiac Six is even more beautiful, even more thrilling to drive! For, in keeping with General Motors' policy of progressive engineering practice, this lowest-priced General Motors' Six has been enriched in color, enhanced in style and equipped for even finer performance.

To the beauty of style of long, low bodies by Fisher, have been added the swagger touch of smaller, smarter wheels and larger tires, while new and harmonious combinations of Duco colors have been created. Mechanical advancements result in *smoother performance and greater power than Pontiac ever offered before.* And along with its more stirring response to the throttle, it continues to provide the stamina and long life for which it is famous.

Until you have seen and driven it you cannot realize what style, what color and what performance today's Pontiac Six affords—for here are beauty and snap you never dreamed you could buy at so low a price.

ALBERTA WHEAT POOL

The Alberta wheat pool has issued the following statement with reference to rumours concerning this organization which have been circulating in many newspapers for the past few weeks.

"Statements emanating from various sources to the effect that the Wheat Pool has an enormous carry over from 1927 crop, and is in a "blue funk" because of the large volumes of new crop to be delivered within the next few months are ridiculously inaccurate. Neither is the Wheat Pool thinking of running to cover under the protecting wing of any Government.

The estimates of the Wheat Pool carry-over this year will not in certain newspapers as that of anything up to 70,000,000 bushels. As a matter of fact the Wheat Pool carry-over this year will not be any larger than that of last year and possibly less.

It is true that the Canadian wheat crop will be large this year but such estimates as that of 70,000,000 bushels which was recently published by Winnipeg Chicago are entirely unrelied for and do a great deal of damage. As a matter of fact the crop may not exceed that of last year and certainly estimates should tend to lower prices.

The Pool handled last year's crop in spite of the damaged condition of a large percentage of it, in a capable and efficient manner. There are no grounds for the belief that it will not handle the forth coming crop in an even more efficient way. Pool members can rest assured that their organization is functioning smoothly and that they will get the very best average price obtainable for their wheat. There is no reason for members becoming panicky.

The Wheat Pool is entering their second contract period in very good shape with a membership will be increased very rapidly during the next few months. Five years of operation has given the Pool Directors and Officials invaluable experience and it is only reasonable to expect that each year more efficiency will be attained."

How Many Quarts Have You Down

With the season for the preserving of fruit for winter use already upon us, many Tofield housewives are now busily putting down fruit delicacies from far away orchids.

If Peaches, Plums, Apricots, Grapes, Pears, Cherries, Etc., grow on Alberta bushes—like raspberries—this advertisement would not have to be written or printed. But as they do not, we beg to be permitted to remind you that we can supply all your requirements as regards preserving fruit. Our long connection with fruit houses ensures prompt arrival of fruits of their various seasons, and we suggest that for you to get the best possible service you should let us have a list of your requirements and we will supply your needs as the delivery of the various fruits are made to us. The season for many of the varieties is of short duration and there is generally one or two weeks when it is best to buy for preserving purposes.

New Open Stock CHINAWARE

ANNOUNCING THE ARRIVAL DIRECT FROM MYOTT'S ENGLISH POTTERIES OF A NEW PATTERN IN BEST SEMI-PORCELAIN.

The Black And Gold

"IVORY BLOSSOM" pattern is on the new ivory ground and the dainty octagonal shapes help to make each individual piece a delight to the eye. Direct importation enables us to price this line at lower figures than are quoted by large city stores. A full 97 piece Dinner Set is priced at $33.95 and a 84 piece Tea Set $8.85.

As an advantage of purchasing from open stock, we offer numerous pieces which are usually desired, but are not included in regular dinner sets We would suggest that a selection be made to include a large jug, oval vegetable dishes in different sizes and oatmeal dishes, which will be added at the usual reduction from open stock prices.

We now carry in open stock five different patterns. In addition to the above latest arrival we offer:—

- **The "ACADEMY" Ivory with blue and fawn pattern.**
- **The "ALMERIA" Ivory with Orange and Red pattern.**
- **Gold Line and Three Gold Stripes.**
- **Plain White English Dinnerware.**

LAKE SHORE

We are sorry to report that Mr. Henry Wood has been quite seriously ill for the past week with heart trouble. His daughter, Mrs. H. Bolline of Viking motored up and his two sons, Will and Arthur came from Washington to be with him.

Mrs. Gray paid a visit to the sick at the T. R. Murray home one day last week we regret to say neither Mr. or Mrs. Hawley are well at the present time.

A number of people from Lake Shore attended the concert at the Rose Creek School house Thursday evening of last week.

Mrs. Warner and Mrs. Dodds spent last Friday at Clover Bar at the D. W. Warner home.

Mr. Wm Seale spent the week-end in Edmonton.

U. F. W. A.

The regular meeting was held at the home of Mrs. Rouse. There were only seven members present but there was a goodly number of visitors and one of these joined the local. Mrs. Gray was appointed chairman for the day.

The roll call was answered with "my Hobby" Mrs. Lee gave an excellent paper on jelly making which was much appreciated.

The next meeting will be on Sept. 5th, at the home of Mrs T. E. Seale, when roll call will be answered with short cuts in mending. There will be a paper on "House Plants for Winter Blooming" and another by other Mrs. McGinnis or Mrs. Gray on "Storing Vegetables for Winter."

Members Mears, Carlisle, J. H. Ingram and Murray will serve tea.

UNIMPROVED LAND SELLING.

Several quarters of unimproved land have been sold lately at prices $7.00 to $10.00 per acre. There is still some land within ten miles of Tofield to be had at these prices. You should buy that quarter or half section that you need for farming or pasturage purposes this fall.

My Listings also include several good improved quarters and half sections.

FOR DEPENDABILITY BUY AND USE

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff —the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

K. C. Hammond
John Deere Machinery—Durant and Chrysler Cars
Oils, Greases, Etc.

AN OPPORTUNITY

We have been turning a good many quarters of land in the past few months and if you wish to sell it will pay you to give me a listing of same. Also we would like to state the TWIN CITY Tractors and Threshers are selling fast; if you care to get a Tractor or Thresher which will give you years of service and satisfaction, come in and talk the proposition over with us. We also are selling ALLIS CHALMERS Tractors which are known as a great tractor. Phone call or 'phone.

LOCAL and PERSONAL

As we go to press word is received that Mr. Henry Wood, old timer of this district has passed away.

Born.—To Mr. and Mrs. Albert Rotten, on August 23rd, a daughter.

Born.—To Mr. and Mrs. A. A. Klemm, on August 23rd, a daughter.

Born.—To Mr. and Mrs. Tory, at the Royal Alexandra Hospital, at Edmonton, on August 10th, a daughter.

School will re-open on Tuesday, September 4th.

Father Quirk was a business visitor to Tofield on Monday.

Miss Olive Smith, who has been visiting at the McLaughlin home returned to Edmonton on Tuesday.

The Misses Audrey, Helen, and Thelma were visitors to the city last week.

Mrs. V. Herndon is at present at Lacombe, Sask., to which point she was called owing to the sickness of a friend.

The United Church services will be held at Tofield and Lindbrook on Sunday at the usual hour. Sunday school will also be held at both points.

Anyone having boots or shoes at A. W. Wallis' shoe repair shop, is requested to call for them at once as the shop will shortly be closed.

Mr. and Mrs. E. W. Rogers and daughter, Miss L. Gray and Mr. Morrison returned from their vacation on Wednesday.

Mrs. Wallis left for Calgary on Wednesday morning where she will make her home. Mr Wallis will follow in a few weeks time.

Mr. McCauley returned from Smith, Alta., last Thursday. Smith is in the Peace River country and Mr. McCauley's father and brothers are farming there.

A very enjoyable young peoples' party was held at the Hobson home on Monday night. Whist and other games were played and refreshments were served. The gathering broke up at midnight, all having had a splendid time.

A pleasant event was held at the home of Mr. and Mrs. P. O. Ball on Wednesday afternoon when a surprise party was given Miss Ellen Walker, who is going to attend normal school in a short while. The event took the form of a handkerchief shower, Miss Walker being the recipient of many beautiful handkerchiefs. Games were played and afternoon tea served.

OBITUARY

We regret to report the passing away on Sunday last, of Mrs. Ivey. While he had been failing for some time, he was confined to his bed only a few days before his demise. Mr. Ray was well known and highly respected in the town and district. He was born in Carrsberry Station, New Brunswick, 52 years ago. He spent the greater part of his life there, marrying and bringing up his family at that point. About eleven years ago with Mrs. Ray and family, he came west and located at Tofield. Mrs. Ray pre-deceased him by about two years.

He leaves to mourn his loss four sons, Leverett Charles of Tofield; Robert of Cranberry, N.B.; Albert and Wilmer of Tofield; four daughters, Mrs. Leighton of Washington; Mrs. Messer of St. Stephens, N.B.; Mrs. Scott of Tofield; and Lauva of Tofield.

The funeral was held on Monday, the floral tributes being numerous and beautiful.

CARD OF THANKS

Mr. and Mrs. I. C. Hay extend sincere thanks to their many friends for kind expressions of sympathy and practical help during our recent sad bereavement. To those who sent flowers we are especially grateful.

THE FAMILY

KETCHAMOOT

School will reopen next Tuesday Sept. 4th with Miss Mable Lawson as teacher.

Mr. and Mrs. Likes returned to their home at Jordan, Montana, after a few weeks visit with their daughter Mrs. John McGinitie.

Mrs. P. H. Ingram of Victoria B. C. arrived on Sunday for a short visit with friends and relatives after which she will take her father and mother, Mr., and Mrs. Hugh Mitchell back with her.

Misses Mabel and Mildred Lawson and brother Milford returned home on Thursday, from Flint, Mich., the Misses Lawson spent a six weeks holiday while this is Milford's first trip home for three years.

Born to Mr. and Mrs. Albert Sutton, on Thursday, August 22, a daughter. Congratulations.

Miss Lillian Carlisle entertained a few girl friends on Thursday afternoon in honor of Miss Janet Mitchell of Fairbury, Nebraska. Those present were Misses Ethel Hoskette of Holden, her cousin Edna Campbell, Mildred Ingram and Hazel Sones.

Mr. and Mrs. McCowan, Mr. and Mrs. Harold McMullen were Sunday guests of Mr and Mrs. C. A. Ingram.

Master Clarence McKeown of Calmar is spending some of his holidays with his cousin Master Ivan Appleby.

Mrs. DeSilva, daughter, Mrs. Bowman and son are guests of Mrs. Appleby.

Several families from our district attended the funeral of the late Mrs. Ovelson in Kingman on Friday. Mrs. Ovelson was the mother of Mrs. Vreeland of our community to whom we extend our sympathy, also to the other daughter and sons

A very pleasant afternoon was spent at the Haskell home on Tuesday when Mrs. Haskell and Mrs. C. A. Ingram gave a miscellaneous shower in honor of Miss Edna Lawson bride elect of the week, the room was very tastefully trimmed with pink and white streamers and a white wedding bell over the gift table. Many pretty and useful presents were given to the bride elect. Misses Edna Yeder and Millie Fosbang assisted with the unwrapping. Delicious refreshments were served. Those present from Tofield, Bardo and Ketchamoot.

Mr. W. Mitchell and daughter returned to their home at Fairbury, Nebraska on Monday.

Mr and Mrs John Johnson and children visited Mr. Johnson's grandfather and other relatives at Holden on Sunday.

Mr and Mrs. O. Barnes motored to Edmonton on Thursday.

Tofield has been held up now for nearly a week on the road east of Bardo owing to a government bridge being put in.

Mrs. Viola Lee was a passenger to the city Monday.

Mr and Mrs. R. Wildman motored to Camrose on Thursday.

Mr and Mrs. J. McGinitie, Mr. and Mrs. Maurice McGinitie motored to Tofield on Sunday last and visited at the Warner home.

Miss Ruth Pugh recently of Portland, Oregon, is at present visiting her aunt and uncle, Mr. and Mrs. Geo. Yager and Miss Yager. She returned home with her father, first of week and Mr. and Mrs. Pugh were residents of Tofield a few years ago, but are now located at Pigeon Lake, Alta.

Mr. Whitaker, Miss Yager, Mr. and Mrs. Geo. Yager and Miss Ruth Pugh were guests of Mr. and Mrs. A. J. Williams on Thursday.

HOLY TRINITY CHURCH

September 2nd, 1928
2.30 p.m. Evensong and Flower service.

Visitors are cordially invited to this service, especially members of the church at Logan, Lindbrook and Bathgate. There will not be a service at 7.30 p.m.

CARD OF THANKS

We desire to thank the many friends for their expressions of sympathy and floral tributes during our late bereavement.

MRS. P. BOYD
MRS. A. BOYD
MRS. J. BOYD

Mr. and Mrs. F. A. Moen and family, Mr. and Mrs. P. O. Flaaten and Gunvald were guests at Mr. and Mrs. A. Hardwick's home at the Bardo siding last Sunday.

One of Ralph Olson's hired men had the misfortune of breaking his collar bone last week when he was thrown off a horse.

(continued on back page)

KINGMAN

Mr. C. Kortzman and three daughters of Edmonton, visited for a few days last week at the C. Lindberg home.

Mr. and Mrs. E. Erickson visited with friends in Edmonton on Sunday.

Miss Florence Benson visited for a week with Mr. and Mrs. Bob Bruce of Minburn.

Mr. Calder, of Calgary, began his duties at the Home Grain elevator on Tuesday. The position was recently vacated by Mr. Horte, who left for Daysland.

Mrs. Carl Banks and children from Saskatchewan visited with Mrs. Bruce Mabrity for a couple of days last week.

Mr. and Mrs. Peter Dedanosky and family of Edmonton have moved to Kingman, which was their home a few years before. Mr. Rodanosky will renew his duties as manager of the Kingman Farmer's Supply Co., formerly managed by Jack Hardie. Mr. and Mrs. Hardie have moved north of Edmonton.

Mr. and Mrs. Paul Thomas of Ranfurly, spent the week-end with Mr. and Mrs. Walt. Hartscher.

Mr. and Mrs. Jos Olsman and John Erickson, of Camrose, and Fred Miller of Edmonton, were the guests of Mr and Mrs. Erick Erickson on Friday evening.

Hans Benson of Minburn, spent Sunday with his parents, Mr. and Mrs. J. Benson.

We regret the passing of Mrs. Olsen, one of our oldest inhabitants, who died early on Thursday morning, at the age of 82 years. The funeral which was held on Friday, was conducted by Rev. Bjelde of Ryley. The many and beautiful floral tributes showed the esteem in which she was held by the community. Mrs. Ovalson leaves to mourn her loss four daughter-in-laws, three sons, several grandchildren, and great grandchildren. Three daughters, Mrs. Rahnger of St. Paul, Mrs. H. Simonson of Edmonton, and Mrs. Dement of Daysland, were present at the funeral. The other daughter, Mrs. S. Nomeland, and three sons, Andrew, Oval, and Lasse, reside in the Kingman district.

Admis CREEK

The Ladies' Aid held their monthly meeting at the home of Mrs. W. Anderson on Wednesday of last week. The attendance was fairly good in spite of the busy time, most members and several visitors were present. The next meeting will be held at Mrs. E. A. Moen's on September 12th.

Our local team for the Prov. E. A. Moen ships leaves carloads again this week north from Holden, Kingman and Tofield

An enjoyable evening was spent on Monday last at the home of Mr. and Mrs. L. Rolstad in honor of Miss Mable Moen. Mrs Rolstad's sister, who has been visiting friends and relatives at our local here for the past few weeks. About one hundred people were present. They were from Bardo, Ryley, Admik Creek and surrounding districts. Games and vocal selections were rendered during the course of the evening. Miss Gudrun Moen presented Miss Mable Moen with a set of money. A dainty lunch was served. As they departed everybody wished Miss Moen good luck and a safe journey. She returned for Washington last Tuesday evening.

Many farmers were attended the conformation seed fair held in the Lutheran Church in Bardo last Sunday.

The basement of the church was put in last week. Nils Sand supervising the work.

Mr. and Mrs. Johnson and son Herman from Viking were callers at the P. Plaetzer and Patterson homes last Sunday.

Mrs. R. H. Berg Ruby and Alice were callers at the Mrs. J. Olson's home last Sunday evening.

Mr. and Mrs. T. T. Moshier, who have been visiting their daughter left for their home in Minneapolis last week.

The Will Stutzman and John Stutzman families, drove through from Nebraska for a visit with relatives and friends here. The latter was accompanied by Mrs. Berky, sister of Mrs. Ruben Roth. The Ruben Roths are nicely settled in their new home.

The Dave Roth family have also moved into their new house, Sunday they entertained a large company of friends.

The new house being built by Will Stauffer is progressing nicely.

Mr. Joe King and family and the Stalter family arrived last week from Chenoa, Illinois, having driven through in their cars. They will visit relatives here for some time.

All day services were held in the Lutheran Church on Sunday. Dinner being served to the congregation in the basement of the church. At the morning services the following class was confirmed.

Thelma Moen, Arthur Ness, Mable and Mrs. Walt. Hartscher.

Fosbang, Irene Fosbang, William Simonson, Wilfred Simonson, Truman Jacobson, Arthur Haugen, Irene Bade and Esther Ness, all of Bardo. Clara Brown, Gladys Rude, Agnes Lee, Nora Mathison, Tolmar Peterson, of Round Hill; and Amanda Olson, of Admik Creek.

Myrtle Rude who has been spending her vacation visiting friends in B. C. and Washington also the Parker and Lewis families in Grahams, Ore. is expected home this week.

Mr. and Mrs. John Yoder who recently returned from California are living in the Swartzendruber house.

Miss Margret Ness who has been spending her vacation at home will return to her work at the hospital in Edmonton on Wednesday. Miss Gudrun who is also spending her vacation here, will remain several days longer.

Mr. and Mrs. Hossath have returned from Grande Prairie where they spent some time. Pete Eggan also made a flying visit to the North country.

Mr. Jacob Baumann who is building a barn on his farm, has been hindered by a scarcity of lumber. The demand seems to be greater than the supply at present.

Mr. and Mrs. Monrad Flaseth entertained for supper Sunday night about forty guests in honor of Mr. Flaseth's sister, Mrs Johnson, from Washington. They were the Flaseth, Aasmo and Stavrud families of Ryley, and the Fosbang and Rude families of Bardo.

Miss Mable Moen, of Seattle, Wash. who has been spending her six weeks vacation with home folks here will return to Wash on Tuesday.

Bernard Anderson arrived from the west the last of the week.

LINDBROOK

Cutting is general here now, that is any that escaped the hail. Several frosts have fired the gardens for us, but also late crops. We hear some of these have had to put up large amounts of hay as rowen and all and time cutting is, some being matted and tangled being beaten down yet with the storms; the hay is not so thick this year as usual, but seeing that lots of the crops were cut for feed after the hail we do not anticipate any feed shortage.

Skunks seem to be getting numerous here, several having been seen and "smelt", yes! don't forget the smell once smelt never forgotten, so if any of you see what looks like a black cat with two white stripes on its back, don't try to pet it or argue the right of the way with it, but silently glide away and be sure to take your dog with you lest they perfume the air around your place for days to come.

Miss Joan Corbin is home for the holidays.

Mrs C. Kortzman and daughters Minnie, Ina and Pearl spent a few days here with relatives this week.

Get ready for next week kiddies! the school bell rings on Tuesday the 4th.

(continued on back page)

WORLD HAPPENINGS BRIEFLY TOLD

Stephen Stelmach, premier and foreign minister of the war in 1915 and 1916 during which he was a prisoner of German destitution is dead.

A convener will be held some of the 1929 convention to be Canadian Pharmaceutical Association. It was decided at a session of the council held in Toronto.

Want Royal Commission

Should Study From Every Angle Problems Of Immigration and Assimilation

Speaking of the resolution passed recently at the Saskatoon conference of provincial groups interested in immigration that a royal commission should be appointed by the government of Canada to "study from every angle problems of immigration and assimilation," J. A. Bilsborrow president of the United Farmers of Canada, Saskatchewan section said that a royal commission, if properly constituted would command the confidence of the public. It can perform a great deal of work which members of the House of Commons have not the time nor facilities to do," he declared. The suggestion of a commission had been already approved by the U.F.C. Saskatchewan section and organized labor as well as by the Canadian Legion at its last national convention he pointed out.

Young Farmer Wins Prizes

[illegible] Sheep

Success Attends Efforts Of Graduate Of School Of Agriculture

A 19-year-old farmer, I. F. Shiells of Athelstane, Que., under the 4-H Clubs, won a first prize for wheat grown on half used a fertilizer 1928 test at the Tabaretah Exhibition held recently.

The young lad, who after years of study at the Quebec Government school of Agriculture, at [illegible] took up the growing of [illegible] seed grain on a farm of his own at Athelstane, and in open competition with other exhibitors in the province of Quebec captured the [illegible] prize.

No Thought Of Retiring

"The newspapers retire [illegible] personally, but I will give [illegible] can be had by writing office." Howard Ferguson premier of Ontario, when asked in an interview as to rumors that he might retire from the Conservative leadership. Mr. Ferguson has returned from a visit of Europe.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1929

(Continued)

The return to Edinburgh was made under pleasanter conditions, sunshine replacing mist and snow. The journey south was followed by one of the most interesting of all certainly most discussed addresses of the tour. This was the talk by Dr P. A. Boysen, Director of the Animal Breeding Research Department, Edinburgh University, whose subject was "Animal Breeding Some Scientific Aspects." Dr. Cyril Anderson was responsible for the skill with which he fitted the discovery of scientific laws and set forth the limitations of what had, but for the point of view taken. The modern breeds, he contended had their begin ngs in the vision of an artist, the breeder, and the men of keen accidental appearance of one or more superior individual animals, and again and again Dr. Boysen stressed the aspect of the [illegible] which [illegible] the truly great advance.

After what was perhaps remarkable only for the inspiring address of Dr. Boysen, the dinner to the tour was [illegible] in haggis, which we [illegible] by the Piper of the Pipe Band of the Scots Guards, the words were entered into by the Earl of Elgin, who himself sang for us in a rich baritone. Mr Haslett in the Hon. Gordon Hewart, Lord Chief Justice, [illegible] that it was sung in his honor, as was the case with Mr. Vernon when he visited there. He also told [illegible] that on arranging a tour of Scotland at Winnipeg he was overwhelmed with requests for a chance to [illegible] listening to one radio, when [illegible] his surprise he heard the announcer at 2 N R W (the Canadian National Railways) broadcasting Haslett, wishing him a speedy recovery. The Earl, grandson of the 8th Earl, who long ago was stroked in Montreal grandson of the 8th Earl, who long ago was stroked in Montreal grandson of the 8th Earl, who long ago was stroked in Montreal

PERENNIAL SOW THISTLE

Saskatchewan's Great Monster To Agriculture, by S. A. Sea, Cando Manager, Wayburn Security Bank, at last Convention Saskatchewan Association of Rural Municipalities.

(continued from last week)

CONTROL MEASURES

In Manitoba they do not speak of eradication but all control measures at eradication has been given up years ago as a hopeless and impossible task. I have recently returned from a trip through Eastern Manitoba, specifically for the purpose of getting first hand information direct from the farmers who have had the actual experience. I also visited the experimental farm at Morden and talked with Mr. Kitchen, Manitoba Agricultural College and they are all agreed that there are at present some 10 or 12 municipalities in Manitoba which have stood the test, although many have been tried. The methods used in what is known as the Black Summerfallow method. The land must be kept free from the weed thistle his means and labour well and thoroughly worked continually.

I find there is some hesitation in the minds of many farmers about the practicability of summerfallowing on this account. I have talked with many farmers in this district and am met with in the methods as I have mentioned before. Many have tried a week or ten days ahead during harvest permitting the thistle which the plants to emerge from the ground. They practically all have missed a week or ten days and have been fooled. Then too, the method is expensive and many more than one farmers can't see. They tell me that they can't afford to summerfallow more than eighteen acres each year, and the average farm in Saskatchewan is around 320 acres, so as they have been able to figure, a summerfallow costs $16.00 per acre but when the profits are figured during the land against the spring but by the time it is put in, if a good crop year, they may expect a good crop and reasonably free from sow thistle. But the year following sow thistle again appears and while it may not smother the crop as the second year it has its effect and by the time the land will be as bad as ever. The other method of plowing during the winter seems to have worked quite well in some districts. The binder Part of North Dakota. In this district I am told the larger portion of Saskatchewan is fortunate. The farmers of Eastern Manitoba know personal sow thistle and know its results and are doing everything within their power to prevent its spread, therefore acting as a fine guard to Southern Saskatchewan and although as mentioned, it has come from Manitoba to North-eastern Saskatchewan, we scarcely ever have North-east winds and for that reason it is not so liable to spread over the province through wind blown seeds.

We have however, a very serious situation to deal with. Perennial sow thistle has been brought in in some manner and there is scarcely a portion of our province where it cannot be found in small patches. There are differences of opinion as to how it has been brought in. There are many ways in which this may happen. It may come in garden seeds, it is quite liable to come in packing around machinery and nursery stock, shipped in from infested districts. It has also established itself quite rapidly along railway right-of-ways and in as careful as they can, the railway is powerless to eliminate the entirely. These trains are running through the sow thistle infested portions of Manitoba during the fall of the year when sow thistle is blowing on the country. The seeds from the cars will naturally blow full of sow thistle seeds and are now being tried by farmers adjacent to the bodies of water for poisoning and also through the investigations that I have made and from what farmers have told me, I have found that the chemical superiors, overshadowed by the Department of Agricultural Chemistry at the University, I have been led to believe that eradication of sow thistle by chemicals is a thing of the future. Neither can it be eradicated by cover-crops. We have in the fall have tried the new thistle seed up through the Dauphin district in Northern Manitoba and into portions of North-western Saskatchewan. The North-east winds are likewise distributed it through Minnesota and the Dakotas. Part of North-Dakota. In this regard I think the larger portion of Saskatchewan is fortunate. The farmers of Eastern Manitoba know personal sow thistle and know its results and are doing everything within their power to prevent its spread, therefore acting as a fine guard to Southern Saskatchewan and although as mentioned, it has come from Manitoba to North-eastern Saskatchewan, we scarcely ever have North-east winds and for that reason it is not so liable to spread over the province through wind blown seeds.

Take a Ride and you will know

ONE of the most spectacular achievements in automotive history is the manner in which today's "Bigger and Better" Chevrolet is increasing its margin of leadership as the world's largest builder of automobiles.

Come, take a ride! Learn the reasons why people prefer Chevrolet.

Know Chevrolet performance! Wherever hills are steepest, the fame of the Chevrolet motor is greatest—because it is built on the valve-in-head principle, which provides all the power advantages of overhead direct firing.

Chevrolet's delightful smoothness is achieved by the use of invar-strut alloy pistons, and by the accurate balancing of reciprocating parts.

Chevrolet flashes out and away when you open the throttle because it offers the advantages of light invar-strut pistons, large valves, and carburetor equipped with an acceleration well. Come, take a ride—today!

IS YOUR CHILD HANDICAPPED

Does your child's nose run or is it sore? Does the child sniffle? Are eyes red? Does the child sneeze dull? Does it stand and look at you with open mouth? Does it put its hands to its head as though it had an earache? Does the child sleep with his mouth open? Does it snore? If the answer to any of these is yes, and the doctor if the child has adenoids or large tonsils.

Tonsils often become diseased and catch out into the throat. Sometimes diseased tonsils do not get larger, but small, little pits filled with pus. Diseased tonsils hold poisonous germs which may cause throat troubles or may be carried to parts of the system and cause other sickness. Adenoids look like a little head of cauliflower colored tissue. They grow in the back part of the throat where the nose and throat join and can be seen only by the doctor with a special mirror. They stop up the nose and make the child breathe through its mouth and when it breathes through the mouth much dust and many germs get in the lungs. Adenoids should always be removed. Earache often means a child has adenoids. Earache always means a child is in danger of getting deaf, if there is the danger of running a doctor should treat a running ear always when the adenoids are to trouble become diseased the child of the back try to carry off the poison. This overwork makes the system run down and then becomes easily Germ diseases. Asthma, bronchitis, pneumonia, and other troubles often follow. Adenoids and diseased tonsils can get rid of them. Don't wait until something serious happens. Neither can it be considered by coverings. Operations under the skilful knife of Dr. Chase, Physician and Surgeon, Office at Bank of Hong Kong Building, Edmonton, Alta.

Remember Your Labor Costs

The simplest man in the world will not buy a mule. His head tells him to walk and run to the rooms.

"I'll ring the big bell and bring the hired men from the fields," she cried.

"What time is it?" asked the farmer with a shiver, as he beat the cold water.

"About eleven o'clock."

"Wait till lunch time. I'll try to keep on top till then."

"Stop sniffling, little boy. Can't you do something with your nose?" the pastry old lady asked as the crowded train.

"Pa'ha," returned the lad politely, "I can keep it out of other folks business."

be spent in this work. $5,000.00 or more $10,000.00 per annum spent in such municipality, if by the spending of that amount the spread of perennial sow thistle can be curbed, would be the best investment that could possibly be made by the rural councils over Saskatchewan and for the very reasons that I have mentioned I am further convinced that district agricultural agents or better still municipal agricultural agents, are what are needed and needed badly. If sow thistle is to be kept in an restricted that it will be through money spent paying men who are capable of organizing and convincing people of the truth that the situation may be saved.

Here and There

(By)

With concrete now up as far as the first bedroom windows and sized up to the fourth, the Royal York C. P. R. manager hotel in Toronto is well up to schedule and is expected to be completed at time for the opening next May, notwithstanding the short strike of the steel and building trades.

W. H. Van Valkenburg, president of the Regina Board of Trade, says that his city and province are not to express indignation. That is one reason for his visit to Ottawa and the Eastern Provinces. He claims that the natural resources of the province should provide the basis of a number of industries, as 42 per cent of the produced area lies within the pre-Cambrian shield.

Inauguration of the new Nova Scotia-Yarmouth, Nova Scotia, passenger ship service recently represented the first entrance of a vessel from New York into Yarmouth harbor for the past 30 years. This was the S.S. Evangeline, of the Eastern Steamship Lines, carrying 150 passengers. She is of 1,000 tons and her sailing connects with the Dominion Atlantic Railway and the Canadian National Railways at Yarmouth.

This summer will witness a great deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the bumper harvests which are expected. Another company which has announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the first plans to erect six new elevators each with a capacity of 40,000 bushels.

Graduates under the leadership of Flight Lieutenant John A. Wilson, forming the band of the Royal Air Force, Uxbridge, England, are now touring Canada under the auspices of Quebec Province Canadian Legion. Major Macnamara, for a tour of Canada from coast to coast, on the 20th band of the Uxbridge Band last year. This aggregation was formed in 1920, and since then has fulfilled engagements all over the British Isles. The band will play in all the principal centres, delivering a series of concerts in towns of business having their headquarters.

"First call for dinner!" "Last call for dinner!" The old conductor's cry rang in the hungry traveller in a thing of the past on the Trans-Canada Limited. C. P. R. trans-continental crack train from Montreal to Vancouver. To-day a saddly attired waiter in white coat and apron with a smart bellboy trade walks through the cars ringing "chimes" on a cutdown, an appeal at once saintly pleasant to the ear and more likely to attract attention than the former method. In time, there is no doubt, the idea will be adopted on all dining car trains on the railway.

Advertised to make the trip from Montreal to London in nine days, the Canadian Pacific Steamship Montrose actually completed the run in eight days and twenty hours, making record time for a freight vessel between the two ports. This ship is one of the five "Beaver" ships making up the new fast freight steamship service of the Canadian Pacific. They have extraordinary cargo space and are of 10,000 tons dead weight. The service is between Montreal and London, and there is a sailing from the Canadian port every Friday, the vessels as a rule making better time than most passenger vessels on the London route.

THE PORT OF VANCOUVER

Much of the wheat now being harvested in Alberta and this district will pass through the Port of Vancouver on its ocean voyage to the consumer in Europe. As a wheat terminal the Port of Vancouver is comparatively new, consequently a brief article concerning it will no doubt be of interest to our readers.

Port of Vancouver is administered by the Vancouver Harbor Commission, a body incorporated by act of the Dominion Parliament in May 1913. This body is responsible for the good government, improvement and regulation of the harbor and it is their duty to, so far as possible, facilitate trade and increase the convenience and utility of the harbor. As defined by the act of incorporation, the harbor includes all tidal waters lying east of a line drawn from Point Atkinson Lighthouse to the most westerly point of Point Grey. The total area of the harbor is 48.78 square miles, of which over 28 square miles are landlocked. The harbor area is 96 miles.

Starting in 1921 with a movement of 1,500,000 bushels, the grain trade through the port increased in the short period till the 1927 crop the exports have already passed 75,000,000 bushels with another 5,000,000 bushels in sight to move. The elevator capacity has increased in this time from 1,250,000 bushels to 7,400,000 bushels with 2,900,000 more in the course of construction. The grain loading berths have increased from 4 to 14, with four more now building. Grain is shipped to nearly 30 countries, moving by regular liners and chartered vessels in parcels and full cargoes.

Some of the commodities moving through the port are, canned, salt and frozen fish, lumber, metal, fruit, vegetables, logs, manufactured goods, grain and flour. The general tonnage has risen in a period of several years, from 3,206,466 tons to 7,806,033 tons and shipping has increased in the same time from 496 deep-sea vessels to 1123, the net tons from 1,867,255 tons to 3,779,015 tons. A total of 45 lines call and sail from the port regularly to practically every known port in the world.

The Board itself is composed of three men, the president and two commissioners who are appointed by the Dominion Government. The president is F. R. McD. Russell, K. C., an eminent lawyer and a prominent resident of the city for many years. Associated with him are A. M. Pound and B. G. Hansuld. These three man decide the policies of the port while the work is carried out by a staff of executives, who follow out the policies decided upon.

SILLY SUPERSTITIONS

We may laugh at the superstitious native or Morocco or Manchuria and pat ourselves upon the back as a compliment to our modernism yet many of us still believe the most ridiculous things imaginable.

The unlucky thirteen; three lights from a match; a broken looking in the black cat—if any of these things worry you go to Manchuria.

Even in our food habits we lean back to old woman's tales of yesterday. Children are told to Shun candy because it will ruin their teeth. Candy dieves almost immediately and comes in contact with the teeth for only a few minutes—and then does not harm them. Tofield old fossil lodge in the crevices overnight and do the damage that superstition has foisted upon candy.

Good pure candy, by the way, is a sugar fuel that we need to help to burn the fat we eat and keep our body engines running smoothly. As the consumption of sugar has made a spectacular gain in this country during the past generation and as child mortality is nothing compared with what it was twenty years ago, it seems to me that common sense should soon banish the old superstition and insist upon the inclusion of pure candy in the diet.

An old farmer was driving a mare that interfered very badly. A passing friend, observing the mare's antics, cried out:

"Say, Si, that mare of yours interferes pretty bad, don't she?"

Si paused, spat voluminously, and shrilled, "Yeh, she interferes, all right; but she don't interfere with nobody but herself!"

Here is a story about the most optimistic man: Totally bald, he went to a drug store and asked for a bottle of hair restorer. "Yes, sir," the clerk said, "here is a preparation that is sure to make your hair grow." "All right," replied the optomist, "I'll take a bottle. And please wrap up a comb and brush with it."

Would You Like Electricity In Your Home?

THE KOHLER Automatic Electric Light and Power Plant will give it to you with the minimum of expense and trouble and the maximum of economy and dependability.

The KOHLER Automatic Electric Light and Power Plant is exceptionally well made in every particular. Has four cylinder vibrationless engine containing all the refinements of a high grade motor. It is radiator cooled; force feed lubrication; vacumn tank; automatic governor (proportions fuel consumption to load plant is carrying), etc. Dynamo is 1500 watt capacity and is also splendidly made. The plant is purely automatic—that is, when you turn on a light or appliance the plant starts and when the last light or appliance is turned off it stops.

There are thousands in use in the United States and all parts of the world.

Both President Coolidge's summer homes are lighted by Kohler plants and many other notable installations have been made.

But while the quality is as high as can be procured the price is no higher than the ordinary run of private electric plants.

A 1500 watt plant, which we recommend for most farm installations come at $700.00 f.o.b. Tofield and at that figure is the best electric light plant investment a farmer can make.

There is an 800 watt model at a lower price and 2000, 3000, and 10,000 watt models for larger consumers.

Further information will be gladly given by—

New POWER New BEAUTY in General Motors' Lowest Priced Six

PROVIDING even finer performance, revealing even smarter style and built by General Motors under manufacturing processes unsurpassed for precision and accuracy . . today's Pontiac Six represents a value the like of which has not been known since the beginning of Pontiac history.

To the sound basic design which has made Pontiac Six internationally famous for stamina and long life—to those important advancements, such as the G-M-R cylinder head . . Pontiac has added improvements leading to even greater power and to smoother performance.

To the inherent style and beauty of Fisher bodies —to the effective symmetry of sweeping fenders and high, straight hoods—Pontiac has added the freshness of new Duco colors and the modish air of smaller, smarter wheels and oversize tires.

This lowest priced six of General Motors has won its sensational success by always reflecting General Motors' ability to build a better car for the money. Now it offers new power and beauty. See it and drive it today.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes time buying easy.

EVEREADY Dry Batteries

ASK FEDERAL AID FOR HIGHWAYS IN THE WEST

Edmonton.—Launching of a strong campaign for federal aid for highways was expressed at a meeting of the northern directors of the Alberta Motor Association, held here, when A. B. Mackay, provincial president, and Fred R. Brason, head of the Calgary branch, were also present. This will be following up the request made at the annual convention held last spring when a resolution asking the federal authorities to grant $50,000,000 which would be spread over a term of five years, was passed. The sum specified would be used for the Dominion and greatly adding to Canada's tourist attractions in that way.

The federal grant of $20,000,000 made in 1919, and now exhausted, was distributed on a basis of population to the various provinces. It is felt that this basis works out unfairly on the far-flung prairies especially and that it should be apportioned on a mileage basis instead.

President A. B. Mackay is strongly in favor of a vigorous campaign to secure federal aid and feels that there should be no delay in showing the Dominion authorities that there is a feeling throughout the country in favor of such assistance for highway programmes.

Receives Appointment

Gen. Gough Given Position More In Keeping With His Station In Life

Quebec.—Although he was making expenses and was learning French through contact with other employees at the hotel where he was engaged in washing dishes, Brig.-Gen. Charles Henry Gough has decided to accept an appointment more in keeping with his former condition. Thanks to the publicity which he received when an officer of H.M.A.S. Australia ...

British Warship Not Welcome

Soviet Government Will Not Permit Warship To Transfer Bodies Of Submarine Crew

Moscow, U.S.S.R.—The Soviet news agency Tass says that in response to a British request through the Norwegian mission to Moscow, that Great Britain be allowed to send a warship to transfer the bodies of the crew of the recently raised submarine L-55 from Leningrad to England, the Soviet Government has replied that it cannot consent to a British warship entering Soviet territorial waters.

The Soviet Government would not object to a warship of a friendly nation such as Norway or a British merchantman coming.

The L-55 was sunk in 1919 while assisting the white Russians against the Bolshevik Government but recently was raised by the Soviet authorities, who found a number of skeletons of British seamen.

University Women Meet

Membership Of Federation Now Stands At Nearly Two Thousand

Vancouver.—Woman's place today, her participation in world affairs, and her limitations because she is a woman, were some of the topics discussed at the fourth triennial conference of the Canadian Federation of University Women by Mrs. Bertha Landes, former mayor of Seattle.

Mrs. Landes said that "the woman who deliberately turns her back upon marriage, upon a home and children is making the greatest mistake of her life, but forcing these things upon women only breeds unhappiness for all."

The membership report of the federation was read by Miss Marjorie Gregg, of Ottawa. The various efforts to increase the membership, which now stands at 1,802, within twenty-seven affiliations, were outlined.

May Remodel Liquor Act

Banff Motor Highway

Alberta Experimental Tests

May Establish Permanent Experimental Farm In Peace River District

Edmonton.—Experimental tests of an extensive nature are being carried on in Alberta, in common with other parts of the west, stated Dr. J. H. Grisdale, of Ottawa, deputy minister of agriculture. In this province, the work concerning grains and grasses is being undertaken on a large scale while growing of suitable range feeds and tobacco is also receiving special attention.

Dr. Grisdale left for a visit to the Peace River country. While in that area, he will likely select a location for a permanent experimental station as the one now operated at Beaver Lodge is held under a lease. After looking over property in the Grande Prairie, Wembley, and Beaver Lodge districts, he will submit a recommendation as to what section should be acquired by the federal government for the development of its permanent work in the north.

GOVERNOR SMITH STATES POLICY IN VIGOROUS SPEECH

Albany, N.Y.—With all the force at his command Alfred Smith, governor of the state of New York, told an expectant nation what he would do if elected president. In aggressive fashion, he accepted the Democratic nomination with a speech which not only set forth his stand on prohibition, agriculture, foreign relations and other public questions, but accused the Republican administration of a failure to keep faith with the people.

As millions listened-in by radio, the new leader of the Democrats advocated modification of both the Volstead law and eighteenth amendment, reiterated that he would give the problem of controlling crop surpluses ...

... restrictive immigration, the nominee asserted that he was "heartily in favor of removing from the immigration law the harsh provision which separates families," and was "opposed to the principle of restriction based upon the figures of immigrant population contained in a census 38 years old."

FIGHT ILLEGAL LIQUOR EXPORT

Gordon N. Shaver, K.C., has been appointed by the attorney-general of Ontario to act as special crown prosecutor in the proceedings against liquor export companies at Windsor as a result of seizure of about $5,000,000 of liquor along the Canada-United States border by the Ontario liquor control board in its fight against illegal export.

Prosperous Saskatoon

City's Financial Position Never Better Than At Present Time

Saskatoon, Sask.—Saskatoon's financial position was never better than at the present time. Due to better tax collections the city has entirely wiped out its current loans from the bank and has on deposit today approximately $80,000.

This is the first time in the history of the city that this condition has existed and it is said to be due entirely to the improved business conditions experienced here.

Earlier in the year there was one occasion when the city was able to wipe out its current bank loans, but there was no surplus.

Eye Tests For Motorists

... German cabinet for the first time since his recent illness, made an extensive report on the foreign situation with emphasis on the forthcoming renunciation of war treaty ceremonies at Paris and the League of Nations meeting at Geneva. He found the cabinet members in accord with him.

Labour Premier's Canadian Tour

Ex-Premier Rt. Hon. Ramsay MacDonald at the throttle of a Canadian Pacific engine at Schreiber with his daughter Sheila standing in the door of the cab. Miss Sheila had ridden in the engine from Schreiber to Nipigon, Ontario, while on their trip to the West. "It was most exciting," she said. Mr. Ramsay MacDonald and his three daughters were delighted with the scenery of Northern Ontario along the Canadian Pacific main line.

Advice To Dairymen

Hon. C. M. Hamilton Says Industry Here Is Not Behind Other Countries

Ottawa, Ont.—Bringing back some friendly advice for Canadian dairymen, Hon. C. M. Hamilton, minister of agriculture in Saskatchewan, reached Ottawa. He is returning from the world's dairy conference in London, where 1,000 delegates represented nearly every country in the world.

"Canadian dairying," Mr. Hamilton observed, "does not appear to be behind other countries in the line of production and manufacturing. The main difficulty seems to be in the ... high standard of the herds ... that we are somewhat lacking but it is not surprising since in a number of the provinces dairying is largely a side line.

"To establish ourselves in the British market, as producers of butter or cheese, bacon or any other agricultural product, we must not only place in the market the highest quality ... a steady ... Merchants whose customers have developed a taste for a certain thing want to be able to supply it continuously, and that is where we sometimes fall down."

Mr. Hamilton tells of the Hon. W. R. Motherwell's travels. He has motored all over the British Isles and is going to France, Belgium, Germany, Italy and "finally up to the Scandinavian countries to see if they have anything on us in the line of agriculture."

Joins Scottish Club

Lord Lovat Becomes Honorary Member Of Club In Toronto

Toronto.—A distinguished Scot was added to the honorary membership of the Scottish Club of Canada when the club honored Lord Lovat, parliamentary under secretary for Dominion Affairs, who is in Toronto for the purpose of conferring with the Ontario government on immigration matters. In accepting the honor his lordship reminded the membership ...

Less Drunkenness In England

MIGRATION PLAN IS ESSENTIALLY BRITISH PROBLEM

Toronto, Ont.—While the province of Ontario is willing to co-operate in every possible way in bringing the immigration scheme suggested by Lord Lovat to fruition, Premier Ferguson expressed the opinion that the matter was essentially a British rather than an Ontario problem.

Discussing the conference held with Lord Lovat in his office here the premier stated that he looked forward with great optimism to the final result although he admitted that the paramount question of finance had not been definitely settled.

The premier pointed out that the Ontario government was already lending money to Ontario farmers and financing settlers in Northern Ontario.

Under the scheme the British government is working directly with the Dominion Government and financial details are being worked out between those two governments.

"Would the British Government be willing to finance the scheme if Ottawa decided not to enter into agreement?" the premier was asked.

"That is what we were discussing yesterday," replied the premier.

"It will also be a subject of further conference when I meet Lord Lovat again. The British Government is willing to assist in financing the men and I gather from Lord Lovat that the discussions at Ottawa have been satisfactory."

The premier expressed the opinion that if the farmers of Ontario paid a yearly wage rather than seasonal, no difficulty would be encountered in keeping the men on the farms.

PRINCE GEORGE GREETS YOUNG AMBASSADORS

Vancouver.—His Royal Highness Prince George was greeted here just before he boarded his ship, H.M.S. Durban, by four members of the ... party now touring Canada ...

The Prince expressed great interest in the ... of the young ambassadors and said that both he and his brother the Prince of Wales were ... with the ... His Royal Highness was particularly interested ... it was planned to ... other parts of the Empire ...

... chatted with each member of the party. He was told that ...

... in bidding the group farewell, expressed the belief that these visits would do a great deal of good for Canada and the Empire generally.

Receives Message From Missing Aviators

Amateur Radio Operator In Communication With Greater Rockford Crew

Toledo, Ohio.—A long message purported to be from the crew of the Greater Rockford was received by Joseph E. Williams, an amateur radio operator, who declared he was in direct communication with the crew for ten minutes.

The crew said, according to Williams:

"We are stranded on a small island 100 miles north of Newfoundland. We are Rockford to Sweden flyers. We need assistance badly ..."

MANUFACTURE OF ARMS UNDER LEAGUE CONTROL

Geneva.—Russia has returned to collaboration with present efforts of the League of Nations to obtain control of the manufacture of arms.

Maxim Litvinoff, Soviet vice-commissar for foreign affairs, in telegraphing this decision to Sir Eric Drummond, secretary of the league, pointed out his government's strong opposition to the principle of nothing toward solution of the problem of real disarmament.

He insisted that urgent steps should be taken to obtain definite results and avoid the risk of future wars. An attempt to supervise the production of armaments is calculated merely to weaken public opinion, of holding forth hopes of real disarmament, he asserted.

Meanwhile, Canada and the United States are co-operating in an effort to bring about the widest degree of publicity concerning manufacturing of armaments. The former premier, Ambassador Hugh Wilson for the United States, and Dr. W. A. Riddell, for Canada, framed disarmament proposals which were presented to the commission which is trying to frame a convention for the control and manufacture of arms on the ground that it did not go far enough.

Messrs. Riddell and Wilson favored giving the same publicity to arms manufactured by governments as to arms made in private factories. Mr. Riddell contended that countries withholding largely on private manufacture should not be expected to take statistics if countries depending on governmental manufacture were permitted to withhold such figures.

The draft provision with reservations stating that it was not to be considered binding upon the United States or the League of Nations council, which with the league assembly will be empowered whether, taking into account the difference of opinion in regard to the league, it is desirable to call the three powers together to consider what action should be taken.

In French circles it is categorically denied that the provisional naval limitation agreement between Italy and Great Britain contains any secret clauses. British and French spokesmen deny reports that the agreement provides for association of French and British fleets in ports of the United States. Italy and France are not bound by the Washington treaty.

Copies of the agreement which is described here as an effort to have something passed and practicable by all countries, are regarded the underlying idea of the Washington naval conference, the limitation of tonnage and of certain naval fighting machines.

The British expect that the agreement was placed before the other naval powers in the hope it would be accepted as a basis for discussion by the league preparatory to disarmament conference. The date of the commission's next meeting depends on the result of these negotiations.

Riots In Berlin

Berlin.—Thousands of communist demonstrators, protesting against the proposed construction of a new German battleship, attacked police guards here and were fired upon. Three persons were reported killed by and a score were hurt in the rioting. Police arrested 30 after the disturbance.

Criticism Is Resented

Ottawa.—Lord Lovat's Winnipeg comment on Canada's immigration policy has caused a mild sensation among the officials of the Department of Immigration and Colonization. These officials are very sensitive on this question as there has been much criticism in the past of the outward British immigration.

Will Continue Search

Bergen, Norway.—Roald Amundsen is breaker Khaiaia, searching for explorers and rescuers lost in the fatal Italia expedition, has proceeded to King's Bay where the Russian aviator Chukhnovsky joined the vessel. The ice breaker will continue to Franz Josef Land, where a base will be established.

Building New Town

The Pas, Man.—Surveying of the Cold Lake townsite has been completed. The new town has not been officially named but it will probably be known as Cold Lake. It is surrounded by rich mineral deposits.

Farmers Take To Flying

A farmer living a few miles north of Mount Joy has purchased a Gosh Aeroplane, and it is understood that several others are about to follow his example.

Chinese Facing Starvation

Crops In Many Districts Have Been Ruined

Shanghai, China.—The population of 1,500,000 in a district 30 miles wide and 100 miles long in the border of South Chihli, and Northern Shantung, is facing death from starvation, said Earl Baker, secretary of the New York-China famine fund committee on his return from a visit to the stricken area.

There has been sharp differences of opinion, both in China and the United States, regarding the necessity of relief measures.

Mr. Baker said he is convinced that relief must be sent at once. He stated that 150,000 persons were in an exhausted state of malnutrition and apparently doomed to death and that 30,000 were slowly starving.

Drought and grasshoppers have ruined the crops in the famine district, said Mr. Barker. He added that the grasshoppers now form part of the diet of thousands of the stricken people. One village, he said, was visited by grasshoppers on a wednesday scale, the insects being the only food of many houses which he visited.

Declares Navy Pact Letter a Forgery

Foreign Office Says Document Is Palpably False

London.—"We have now seen a copy of the letter which purports to have been written by Sir Austen Chamberlain, secretary of state for foreign affairs, to Aristide Briand and the French premier, concerning the alleged terms of an Anglo-French naval agreement, and we have no hesitation in declaring that this letter must obviously be a forgery. No communication, even remotely in such a sense as suggested has ever passed from Sir Austen to M. Briand."

This statement was issued by the foreign office to the Canadian Press.

The documents mentioned in the letter was published widely in the United States and Canada and occasioned a great sensation, has never been received in London and is stated to be a most patent and palpable forgery.

It is understood that the British government has cabled instructing the British embassy at Washington to publicly categorically the authenticity of the document.

Little Damage From Rust

Rust Menace In Saskatchewan Has Been Overestimated

Moose Jaw.—Although conditions in Saskatchewan were propitious for a rapid rust infection during the month of July, the rust menace in Saskatchewan has not materialized.

This was the statement made here by M. F. Tullis, Field Crops Commissioner for Saskatchewan, following his return to this city from a 1 000 mile tour of inspection throughout the province.

"While the heavy crop stands and the succulence of the leaves and stems of the grain, together with the unusual amount of moisture in the atmosphere in the month of July, indicated the possibility of heavy rust infection, the rust menace has been practically negligible," said Mr. Tullis.

Canada May Be Honored

Likely To Have Representative In Court Of International Justice

Regina.—Canada may have representation on the bench of the permanent Court of International Justice at the Hague, if either the Right Hon. Mr. Justice Duff, or of Eugene Lafleur, K.C., of Montreal, according to an announcement made to the Saskatchewan Bar Association by the Hon. H. W. Newell, K.C., of Moose Jaw. A vacancy has occurred on the bench owing to the resignation of John Bassett Moore, a renowned United States jurist, and the names of the two Canadians were submitted for election. This will occur in about a month's time.

Will Continue Vaccination

Geneva.—The small pox vaccination commission of the League of Nations has voted that despite the development of occasional cases of sleeping sickness from vaccination there was no reason for discontinuing the practice which it regards as the most powerful weapon against smallpox known to medical science.

Commissioner Radio Dead

Winnipeg.—Commissioner William Radie, of the Salvation Army, is dead at Halmstad, Scotland, according to word received here. For the past two years he had been in charge of the work in Western Canada.

Predicts Rapid Mail Service

Airplanes Will Aid Communication Between England and Canada

Montreal.—A rapid mail service by airship between Great Britain and Canada was forecasted by W. G. Wilband, parliamentary secretary to the British Board of Trade. There were two great advantages now under construction in Great Britain, one by the government, the other by Vickmans der Bumey, said the latter was likely to have its train toward the end of the year.

"I should be surprised," Mr. Williams said, "if we do not see the development of rapid mail communications between England and Canada through airships."

Mr. Williams was speaking at the first conference of the delegates of the Empire Parliamentary Association now visiting Canada. The conference was with members of the Montreal Board of Trade, the subject being empire transportation.

MORAL VALUE OF THE PEACE PACT IS NOW STRESSED

Paris.—Lord Cushendun, who signed the peace pact in behalf of Great Britain, Northern Ireland, has declared that it was a great and historic event, but he cautioned against the interpretation of the activities of Secretary Kellogg, of the United States, as suggesting that the British and United States would depart from the policy of aloofness toward European complications.

"So far as this pact is concerned," declared Mr. Cushendun, "I am convinced that the American people must concern themselves with European matters."

The British minister emphasized the moral value of the pact, recalling that Napoleon once said that the great factor in war was the moral factor.

"So it is in peace," Lord Cushendun added. "Moral force.

"No one imagines that signing this treaty will immediately and finally do away with the face of the earth. That would be a mistake. Possibly there will still be small wars somewhere on the earth, but do not let the reason be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord Cushendun said that personally he divided the credit for the negotiations of the treaty between Foreign Minister Briand and Secretary of State Kellogg but he credited Sir Austen Chamberlain's action over the last few years in favor of peace, even though it was not directly credit as for any one else in the matter against war.

Death Of Charlie's Mother

Hollywood, Cal. — Mrs. Hannah Chaplin, mother of Charlie Chaplin, famed motion picture fame, died in a hospital in Glendale. Disorders that resulted from exposure during a visit to London during the world war were said to have caused her death.

Epidemic At Athens

Athens.—Eighty per cent. of the population of Athens and Piraeus have been affected by the recent visit of dengue, it is now estimated. The fever was spreading in the provinces.

Aftermath Of B.C. Tragedy

Debris Found Near Seattle Thought To Be Part Of Wreck Of Missing Plane

Seattle Pieces of aeroplane upholstering and several tourist pamphlets, supposedly from the British Columbia Airways plane which disappeared Saturday morning with seven persons aboard, were picked up on the beach several miles southwest of here.

Lt.-Commander L. L. Bennett, directing the coast guard search for the missing plane, declared he was satisfied that the fragments of upholstery were from the plane's aeroplane.

Lt.-Commander Bennett also found a number of tourist pamphlets and several fragments of felt used to insulate the body of the plane from the engine.

New Seed Cleaning Station

Announcement Made That Plant Will Be Established At Saskatoon

Saskatoon — Announcement that the government will establish a seed cleaning station here, similar to the one operating at Moose Jaw, was made by Dr J. H. Grisdale deputy minister of agriculture, who is on an inspection trip through the West Speaking at a banquet tendered to him by the use of phosphates in the treatment of grain at the Scott experimental farm

Amusement Initial Payment

Winnipeg, Man. — The Central Board of the Canadian Trade Pool, in an official statement issued by E. R. Rumsey secretary and manager, announces that the initial payment for the 1928-29 crop will be 85 cents per bushel, basis No 1 Northern at Port William.

Prince George Crosses Canada

H.R.H. Prince George, K.G., fourth son of the King, photographed aboard the Canadian Pacific liner "Empress of Australia" on his arrival at Quebec. It is anticipated that this unconventional portrait will earn for his subject a repetition of his brother's unofficial title—"The Smiling Prince."

Air Mail Service

First Air Mail In Western Canada To Operate From The Pas

Saskatoon.—The first air mail service west of Winnipeg will be established from The Pas to Cold Lake Friday.

W. Rippingale, of the Saskatoon post office, will represent District Superintendent J. H. Hunter at the inauguration of the weekly mail service, which W. A. Rae, barrister at Cold Lake, terms one of the greatest boons ever presented to the pioneer gold prospectors at Cold Lake.

Formerly mail was taken to and from Cold Lake at infrequent intervals, greatly handicapping the work of the mine recording office established there last April.

The new post office will be named Kinistenog, the Cree word for "cold." Under the new system mail will reach Cold Lake every Friday, returning the same day.

Peter C. Dezeure, a pioneer merchant at Cold Lake, has been appointed postmaster.

Completes Arctic Patrol

Canadian Government Ship In Its Homeward Journey

Ottawa.—The Bowdoin the expedition ship of the Canadian government, has completed its annual patrol of Canada's Arctic archipelago and is now on its southern journey to Sydney, N.S., which it is expected will be reached early in September.

This information was conveyed in wireless messages from the ship to the Northwest Territories and Yukon branch of the department of mines and resources.

George P. MacKenzie, officer in charge of the expedition, reported that three Eskimos had died and that had been 25 deaths, mostly children from the exception, the health of the natives in Baffin Island has been exceptional.

INDUSTRIAL GAINS ARE MADE BY GREAT BRITAIN

Montreal.—Herbert G. Williams, M.P. parliamentary secretary to the Board of Trade, addressing the Canadian Club here viewed some misconceptions about the old land.

"Some people think," he said, "that Great Britain has passed the peak and begun to decline. I am sure the fact that she does not represent the truth."

An instance he pointed out that in spite of electrical machinery Great Britain was to-day in the third position with the United States and Germany first. Now Lloyd, Kensington Gordon R. Haig, Moose Jaw; Alexander N. Grant, Edwardsbury, Peter N McLaren, of Deadland; James Joseph McNeice, Foam Lake; Thomas Wilson, Moose Jaw; G. F. Rowland, Earl Grey and W. H. Moore Southern.

To Aid Prisoners

Toronto Chief Of Police Interested In Movement To Assist Ex-Convicts

Toronto.—It is proposed by the committee of churches and welfare organizations, of which Col. Draper, chief of police, said he would prevail upon the federal government to assist in the formation of a society which will establish themselves in society.

Doctor Lyle Creelman, secretary of that branch of the work, said that there were many hundreds of men who, being hindered instead of helped in their efforts to live down their past and start life again, deserved help and that the united Canada and the United States was doing far more than any company to right from Canada in the amount of time and money it had to lay for every dollar's worth she sold to Canada.

We would like to get a little of that American trade," he added.

Mr. Williams compared the results of the census of production taken in Great Britain and Canada in 1924 and said that 13 per cent. of the total population of Great Britain was employed in a living while 30 per cent. worked for a living in Canada. In other words there are 600,000 more men working for a living.

Mr. Williams pointed out how Great Britain had been able to retain her predominance at sea despite efforts made by other countries to capture it. One attempt to capture it had been made by the people of the United States. "So far as I can see" he said, "they regret it."

HOLD DIVERGENT OPINIONS ON BANK MERGERS

Winnipeg.—Divergent views on bank mergers were expressed by the press heads of two of the largest banks in Canada when they were interviewed here.

Sir Herbert Holt president of the Royal Bank of Canada, declared it was in the public interest to have larger rather than smaller banks with one of Charles Gordon who is going to be first trip west as president of the Bank of Montreal visited this he was not in favor of mergers although he would decide under the new system mail will reach Cold Lake every Friday, returning the same day

Peter C. Dezeure, a pioneer merchant at Cold Lake, has been appointed postmaster.

Completes Arctic Patrol

Canadian Government Ship In Its Homeward Journey

Ottawa.—The Bowdoin the expedition ship of the Canadian government, has completed its annual patrol of Canada's Arctic archipelago and is now on its southern journey to Sydney, N.S., which it is expected will be reached early in September.

This information was conveyed in wireless messages from the ship to the Northwest Territories and Yukon branch of the department of mines and resources.

George P. MacKenzie, officer in charge of the expedition, reported that three Eskimos had died and that had been 25 deaths, mostly children with the exception, the health of the natives in Baffin Island has been exceptional.

Canadian Bar Association

New Officers Are Elected At Meeting Held In Regina

Regina, Sask. With more than 50 members in attendance the annual conference of the governing bodies of the legal profession in Canada was held in Regina.

New officers were elected when Sir James Aikins, K.C., Winnipeg was unanimously reappointed as president. the other officers being F. F. Montgomery K.C., Montreal, and A. L. Smith, K.C. Calgary, vice-presidents. With H. J. Wilson, K.C. Kitchener Out., being reappointed secretary. The next conference will be named by the law societies of the various provinces.

The members of the association assembled, stood at attention when the following resolution commending the Canadian going on record as expressing unswerving loyalty to the King Then, as Gordon W. Forbs read a letter of the committee, expressing regret at the death of the members of the association during the past year, the meeting stood in memory of the deceased.

Before the new officers took their seats, Sir James Aikins, K.C., Winnipeg, Lloyd, Kensington Gordon R. Haig, Moose Jaw; Alexander N. Grant, Edwardsbury, Peter N McLaren, of Deadland; James Joseph McNeice, Foam Lake; Thomas Wilson, Moose Jaw; G. F. Rowland, Earl Grey and W. H. Moore Southern.

To Aid Prisoners

Toronto Chief Of Police Interested In Movement To Assist Ex-Convicts

Toronto.—It is proposed by the committee of churches and welfare organizations, of which Col. Draper, chief of police, said he would prevail upon the federal government to assist in the formation of a society which will establish themselves in society

Doctor Lyle Creelman, secretary of that branch of the work, said that there were many hundreds of men who, being hindered instead of helped in their efforts to live down their past and start life again, deserved help and that the united Canada and the United States was doing far more than any company to right from Canada in the amount of time and money it had to lay for every dollar's worth she sold to Canada.

Well Known Man Injured

Saskatoon.—Dar Aitchen, brickbuilder, Flin, who boasts the longest moustache in the province and who is known all over the Dominion, particularly in newspaper offices, was injured here when hit by a car here. He is in hospital suffering from a fractured skull and broken collarbone.

Cheque For Doctor Doolittle

Toronto Doctor P. E. Doolittle, veteran motorist, was given a $5,000 check by the Canadian Automotive Industries in appreciation of what he has done to make motoring in Canada more available.

THE TOFIELD MERCURY

Published Every Wednesday at Tofield, Alberta
W. Worton, Publisher

Wednesday. September 5th, 1928

THE BRITISH HARVESTERS

OUT OF the 8500 British harvesters who were given assisted passage from Britain to the harvest fields of Western Canada, there will be a number who, for various reasons and a combination of pure chance, will stay with the country and become good settlers, and in time prosperous farmers. How many, it is impossible to say. There will also be a large number who, through inability to procure work, inability of adaptation and pure chance, will be compelled to undergo, for them, considerable hardship, perhaps privation, coupled with severe homesickness and a fear of the future, before again reaching their home land. This is one way of increasing the population of a country, but at what cost! Firstly there is the trial all immigrants of this class must undergo and secondly the message of bad cheer the returning men take back with them.

For the past two weeks the papers have been printing reports from different towns of groups of stranded harvesters who could not get work and who had no money. What were they to do? Men, who are newcomers and strangers to the country and who are without any money, should not be left in groups around the country. It is true they do not actually starve, kindly residents see to that, but they often go hungry. Brought out with the promise of work, work or sustenance should be found them upon arrival. Immigration officials know or should know that delays in getting work, even harvest work at harvest time, are inevitable. And when the grain is ripe and ready to cut, five farmers out of ten will haggle over the rate of pay and sieze every opportunity of getting cheap help.

We have not come in contact with any of the "miner" harvesters since two carloads of them were at Tofield for ninety minutes some two weeks ago. Then they were full of hope and expectancy, and were eager to get work. None so far as we are aware, stopped at Tofield, and few, if any, have drifted in here since. But the following from the Vegreville Observer will indicate what is going on in other districts.

"The Observer was astonished to learn that several boys had hired out as harvest help at $35.00 per month. Read it and weep; $35.00 per month. If offering this wage to newcomers is not taking advantage of ignorance, we would like to know what is. Thirty years ago the prevailing wage for harvest help was $40.00 per month. $40.00 in 1898 would buy more than $75.00 will in 1928.

Ukranian laborers will not touch a job for less than $3.00 per day. But because these boys had to work or starve they had no option but to accept what was offered. True enough, they are inexperienced in farm work; but any husky boy can learn to set up a stook or pitch sheaves in one day. Perhaps he will not have the artistic touch gained only by experience, but he can do the work quite properly with a little practice.

Consider the situation of the boy who works for three months during the harvest—if it lasts that long—at $35.00 per month. At the end of that time, if he saves every nickle he will have $105. How long will $105 last him when he runs out of work and has a board bill of $30.00 or so per month? What is going to be his lot during the winter, which lasts six months?"

We are convinced the immigration problem is one that cannot be speeded up by outsiders. That schemes of various sorts are at the best only partial successes, and they usually carry with them a great deal of grief for all concerned. The best immigrant for Canada to procure is the man who saves his pennies in Great Britain until he has enough for his passage money and then comes out to a job lasting at least a year, with a bona fide farmer. Canadian immigration officials can step in here and find farmers willing to sign properly drawn contracts whereby they will hire these men at a fair wage for the whole year. Even this would not be 100 per cent efficient as there would without doubt be many misfits. Immigrants coming out to personal friends is better still.

It is to be hoped that the parties responsible for the coming of these British lads will keep a check upon them throughout the coming year. It is also to be hoped that whatever may be the individual lot of the harvesters, that Canadians will remember that they were promised a job and a warm welcome.

A little girl was put in the upper berth of a Pullman sleeping car for the first time. She kept crying till her mother told her not to be afraid, because God would watch over her.

"Mother, you there?" she cried. "Yes" "Father, you there?" "Yes." A fellow passenger lost all patience at this point and shouted: "We're all here! Your father and mother and brothers and sisters and aunts and uncles and cousins. All here; now go to sleep." There was a pause; then, very softly: "Mama!" "Well?" "Was that God."—Tit-Bits.

Would You Like Electricity In Your Home?

THE KOHLER Automatic Electric Light and Power Plant will give it to you with the minimum of expense and trouble and the maximum of economy and dependability.

The KOHLER Automatic Electric Light and Power Plant is exceptionally well made in every particular. Has four cylinder vibrationless engine containing all the refinements of a high grade motor. It is radiator cooled; force feed lubrication; vacuum tank; automatic governor (proportions fuel consumption to load plant is carrying), etc. Dynamo is 1500 watt capacity and is also splendidly made. The plant is purely automatic—that is, when you turn on a light or appliance the plant starts and when the last light or appliance is turned off it stops.

There are thousands in use in the United States and all parts of the world.

Both President Coolidges summer homes are lighted by Kohler plants and many other notable installations have been made.

But while the quality is as high as can be procured the price is no higher than the ordinary run of private electric plants.

A 1500 watt plant, which we recommend for most farm installations come at $770.00 f.o.b. Tofield and at that figure is the best electric light plant investment a farmer can make.

There is an 800 watt model at a lower price and 2000, 5000, and 10,000 watt models for larger consumers.

Further information will be gladly given by—

A Little Sub Here
A Little Sub There
Subscriptions, Subscriptions
---Everywhere

Like grain stooks standing in a farmer's field—are subscriptions scattered throughout a rural district. Each are holding a promise as good as gold—yes better than gold—yet they must be collected up before they are of real and practical value. With a team, wagon and pitchfork, the farmer can collect his grain stooks, take them to the threshing machine, from which golden grain emerges which in turn is taken to the elevator, where in exchange, the farmer receives coin of the realm.

The newspaper man cannot do this, he is dependent upon the good will of subscribers—when they come to town to drop in and pay. Fall time is subscription time and we would be delighted to renew your subscription now.

Special Note.—After October 1st the price of the Mercury will be $2.00 per year. We are among the very last of weekly newspapers to raise our price, the great majority having been selling for $2.00 per year for the past seven years.

THE TOFIELD MERCURY

SMOOTHER
with New Refinements..
and enhanced in Style and Beauty

DURING its thirty years before the public, the Pontiac Six has gained a world wide reputation for combining the ultimate smoothness and high-speed endurance like no other car in its field. Now, increases in refinements made by Mr. Sloan in this year's Pontiac Six offers even greater smoothness and more satisfying performance than ever before.

To Pontiac's thoroughly proved design—to Lovejoy Shock Absorbers, in 100 cu. in. engine and generously ventilated vital spots—is now added a pulsating sensation of flotation such as the G.M.R. cylinder head—Pontiac has added new Marvel carburetor, improved manifold and new distributor.

Now this famous patent General Motors invention provides a combination of quality features never before offered in a car of comparable price. The distinctive performance and beauty of Pontiac's "Body by Fisher" has been enhanced by new, smaller wheels and longer lines.

Newly refined and improved—today's Pontiac Six is more closely than ever the ideal choice of its field. Drive it—and discover this truth for yourself!

HUGE INSURANCE POLICY WRITTEN FOR EMPLOYEES OF GENERAL MOTORS

Employees in Oshawa, Walkerville and Regina plants of General Motors of Canada will participate in the benefits of the largest life insurance contract ever written, it is announced by H. A. Brown, General Manager.

The record contract was an application signed by Alfred P. Sloan Jr., President of General Motors, in the interests of the employees. It was made out to the Metropolitan Life Insurance Company for group insurance which is expected to total between $250,000,000 and $400,000,000—more than double the amount of the largest previous policy—and group sickness and accident insurance for a total weekly benefit two and one half times larger than the former record policy. The cost of the insurance will be shared by the company and its employees, thus giving the case the added distinction of being one of the largest co-operative enterprises ever entered into by employer and employee.

Canadian workers in three plants will be among the 300,000 employees of General Motors Division, subsidiaries and affiliated companies affected by the plan. It will come into effect in Dominion of Canada on Sept. 1st, according to Mr. Brown.

Under the terms of the insurance contract all General Motors employees of three months' service are eligible to participate in the insurance programs, while new employees and those of less than three months' standing automatically become eligible as soon as the waiting period has elapsed. Individual employees will have $2,000 of life insurance and benefits of $15.00 a week during absence from work owing to illness or accidents happening off the job. Occupational accidents will continue to be covered by workmen's compensation.

The insurance will be used without medical examination—a condition that permits the leaving of many employees who are unable to obtain individual protection because of physical impairment. The contribution toward the cost will be the same for all employees, regardless of age. The amount the individual worker will pay will be less than five cents a day, from one-ninth to one-third of the cost of similar protection if applied for individually. This low cost is made possible by the fact the General Motors will pay a substantial part of the premium.

A feature of the insurance contract is the total and permanent disability clause that provides for the payment of the life insurance to the policy holder if he becomes totally and permanently disabled. Such payment is made in forty equal monthly installments. In the event of such disability the employee would first draw his temporary disability benefits. Then the combined benefits would cover a period of three years and seven months.

When announcing on the insurance program, Mr. Brown pointed out that it is but one of a number of plans for mutual benefit that General Motors and its employees have under taken co-operatively. He quoted from remarks made by Mr. Sloan in connection with the signing of the application: "The success that General Motors has enjoyed", said Mr. Sloan, "naturally cannot be attributed to any single influence, but on the contrary has resulted from the combined efforts of many. However, the fact that General Motors has prospered proportionately even more than many other industries in wages prices can be attributed almost entirely, I believe, to the increased effectiveness of its employer-employee relationship."

EIGHTH CROP REPORT

Broken weather during the first week in August has retarded the ripening of crops and delayed harvesting a few days. The warm weather of the last few days has however, been beneficial in drying the grain for cutting, and in ripening the late grains, and cutting is now general over the entire province. The Peace River country reports 75 per cent of cutting done and threshing reported to be general by next week. Individual reports from all parts of the province report 25 to 30 per cent of the cutting done. Very little threshing has been done in the province to date and no estimate can be made at the present time of the yield of the different grains. We do not anticipate, however, any instance in total yield of wheat, over that of 1927. The quality of the grain being harvested throughout the province is good.

Frosts have occurred in almost all parts of the province but these have been confined to small areas and the average percentage of damage from frost for the province will be small, not more than 10 per cent at the most. Hail damage has been heavy also in a few districts but the average for the whole province will be less than last year. The percentage is estimated to be approximately 14 per cent of the insured acreage as against 17 per cent last year. The crop in general has been singularly free from disease and insect pests.

Labor appears to be plentiful throughout the province, wages ranging from $3.50 to $5.00 per day. Boarding machines and combines are being used more generally in the province than was the case last year and harvesting should go forward rapidly.

The acreage sown to wheat will be less than estimated at the beginning of the season owing to the dry conditions at wheat seeding time. The land, however, was sown to coarse grains in larger acreage than usual and there is approximately the same as estimated.

The best crop of Southern Alberta is progressing well and promises a good yield per acre.

WINTER PIG SHELTERS

(Experimental Farms Note.)

Sheds, cabins, pig pens and straw stacks have been used at the Dominion Experimental Farms as winter quarters for winter pig shelters and the straw stack has been the most satisfactory. If it is not possible, however, to have the straw stack, as in other sheds are must be renewed to. A shed of fords partial protection from the weather, but enough straw must be provided to cover the pigs at least a foot and it must frequently be renewed. A cabin affords complete protection from the cold and if banked well with straw and provided with a heavy sack over the door is fairly warm but even this is better if kept nearly filled with straw. A pig pen at best is an inadequate structure and must be carefully constructed or great accumulation on the ceiling and walls and sickness results. A pig pen can be some warm building such as a stable is to have stable is necessary for a farrowing pen for early pigs, but it is not necessary for growing or mature pigs. A small satisfactory shelter may be made by supporting a platform of poles about twelve feet high and thrashing a straw stack over it preferably of wheat straw. Such a shelter is compact, fairly inexpensive, requires no attention all winter, is dry, and is perfectly ventilated.

HE MADE THE SALE

The following story illustrates the fact that there is a right and a wrong way to talk to your customers:

"During the late war the officers of a sugar company tried to get all the men to take out insurance. They talked to the groups, to individuals and to the regiment as a whole, with very little results. Finally they called in a top engineer and told him he would have to sell insurance to every private or else things would happen.

"The man was assembled and the top sergeant ordered him

Aluminum possesses qualities of lightness, cleanliness and protection against rust and dust which make it incomparable as a container for fine tea. You will never find that flat, stale taste in Red Rose Tea, because it is put up exclusively in damp-proof aluminum packages.

WORLD HAPPENINGS BRIEFLY TOLD

Marshal Emile Fayolle, Marshal of France and one of the great French soldiers that the war produced, died in Paris recently.

According to members of the Canadian Olympic team, [illegible] content was evidenced over the [illegible]ment accorded Canadians at Amsterdam.

What is believed to constitute a record for light aero[plane] clubs has been established by the Winnipeg Flying Club whose members have made more than 1,000 flights since the club opened on May 26 of this year.

Rear Admiral Alfred Meyer-Waldeck, who defended Kiao Chau during the World War, is dead at the age of 64. He was appointed governor of Germany's colony on the Shantung peninsula of China in 1911.

Hon. C. A. Dunning, Minister of Railways, sailed from Quebec for Geneva to attend the League of Nations Assembly. Mr. Dunning is accompanied by Mrs. Dunning and his secretary, Miss Craig.

A $25,000 prize for the best and most practicable plan to make the United States bone dry was offered by W. C. Durant, millionaire automobile manufacturer and stock manipulator, in a cabled statement from Europe.

Plans are being made for the erection of a million dollar paper plant in Winnipeg, according to advices received by the Manitoba Industrial Development Board. The Hinde and Dauch Paper Company are said to be considering a suitable site for the factory.

Through the signing at Paris of a multilateral treaty renouncing military force as an instrument of national policy, 15 nations representing two-thirds of the world's fighting power have agreed never again to go to war. The rest of the world was invited to take the same pledge.

John Nolan and Robert Copeman, in their canoe "Canadian Friendship," have left Winnipeg via the Red River to continue their journey from Edmonton to the Rio Grande. The canoe trip is 6,000 miles long and the youths expect to complete their trip in time to return to Canada and spend Christmas in Edmonton.

Shaving Does Not Hurry Growth

Dr. Mildred Trotter has proved to her entire satisfaction that shaving does not increase the rate of growth of the beard. Precise measurements of beard shavings supplied by four students over a period of nine months were used in the test. She also found that hair does not grow continuously but in short spurts, each of which is followed by a short rest.

Rural Mail Service

Rural mail services in Canada are steadily increasing. A maximum of 3,900 rural routes has now been reached, this representing an increase of about 400 compared with a year ago. The most notable development is in the Western Provinces, more demands coming from there than from other sections of the country.

He took the bend like one possessed.

Farmers' Marketing Tour

Canadian National Railways Tour To Great Britain and Denmark, 1928

(Continued.)

Time still permitted a visit to Holyrood prior to a reception by the Lord Provost, Mr. Alexander Stevenson, at the City Chambers. H[olyrood], built in the French style, is still used by the Royal Family. It has been the scene of many stirring events, [illegible] well stationed some of [illegible] there before the Battle of [illegible] in 1650, but its chief interest to most people was its association with Mary Queen of Scots. In Mary's Audience Chamber we saw the oratory where she used to pray, the best chairs and furniture believed to have been used by [illegible]. The walls of Queen Mary's rooms are hung with tapestry hangings of the bed are of damask with green silk [illegible] tassels, but that this was [illegible] used by Mary is doubted. [illegible] interesting of Queen Mary's apartments is of course the [Supper] Room, where Rizzio, her secretary, was set upon by the traitors who dragged him into the bedroom and the Audience Chamber to the head of the principal staircase. There they left his body bearing fifty-six wounds.

The Picture Gallery in the Palace of Holyrood contains the portraits of kings who, save [illegible], if they ever flourished at all, lived before the invention of painting in oils.

During a visit to the Castle a[t] night our party was photographed [illegible] a where the first and only time this had proved possible.

The reception at the City Chambers was necessarily short [illegible] we were due to reach [illegible] six o'clock the same evening. We shall never forget the courtesy of the welcome we received or the happy fashion in which the [illegible] of a cultured city was blended with warmhearted brotherliness. The Lord Provost and the councillors in their red robes, the ordered lofty rooms and the wonderful pictures depicting the history of the city added to the impressiveness of [the] happy occasion. Owing to the absence of the Lord Provost in London where he was receiving his knighthood, the following morning we were received by Baillie and Mrs. Hay.

Our earliest scheduled appointment was kept on our first morning in Glasgow when we breakfasted with the officers of the United Co-operative Baking Society at their plant, where the President, Mr. Alexander Buchanan, welcomed us. Our trip through the bakeries was full of interest. In one department we saw the baking of one day's supply of the 300,000 loaves that are baked weekly. In another wonderful machines tended by neatly uniformed girls obviously happy in their work, were turning out biscuits at an extraordinary rate. Over 40,000 tins of biscuits are baked in one week, 22,000 packets of oatcakes, and 6,000 trays and boards of pastries and shortbreads. Over 100 vans are in daily use. The Society is truly co-operative, the very bakeries having been built by the Society's own maintenance staff. The United Co-operative Baking Society serves 220 co-operative societies and its annual output is worth over $4,000,000. The baking plant is the largest in Europe if not in the world.

We next visited the Shieldhall works of the Scottish Co-operative Wholesale Society, which represents the co-operative idea carried into the realm of industry and its application to the purchase, distribution and even manufacture of goods for the benefit of a number of individuals working together in their mutual interest. The Scottish Co-operative Wholesale Society came into existence in 1868 through the federation of retail co-operative societies. Its initial capital was $5,000. Its capital today is $4[illegible] and its annual sales total $80,000,000. The Shieldhall Works through which we passed were devoted to the manufacture of clothing, furniture, boots and shoes. We also visited the printing establishment where we saw the latest type of two-colour printing machine which prints in two colours in one operation.

Forty-eight factories are operated by this great Society, and it was especially interesting to us to learn that it possesses 2,140 acres of farm lands. As is well known the Society maintains an office in Winnipeg and elevators in Western Canada and it was our pleasure to meet the Canadian Manager of the Company, Mr. John Fisher, in the Shieldhall Dining Room where we were entertained to a delightful luncheon under the cordial presidency of Mr. R. Stewart, chairman of the Society.

A full day was completed by a meeting with the representatives of the wholesale fruit, provision, grain and flour trades in Glasgow. Once more we were treated to the outspoken businesslike talk which we had come to expect when dealing with leading business figures during our tour. This particular session was perhaps the most productive of any that we had attended.

Our next day's programme had been anticipated with more than ordinary interest, for we were to visit the world's leading Clydesdale stud, probably the two most famous Ayrshire herds in existence and the wonderful Doochro'ti herd of Aberdeen Angus cattle, and in addition, Burns' cottage and the Brig o' Doon.

First we went to Craigie Mains, Kilmarnock, where Mr. James Kilpatrick, famed not only as great breeder of Clydesdales but as host, housed the finest horses in his stud. Surely never were nobler specimens of the Clydesdale breed ever brought together. As one beautiful animal was succeeded by another, we became lost in admiration for the truly aristocratic breeding and the high individual merit shown by the stud. Such horses as "Craigie Excellence," Cawdor Cup, and Brydon shield winner and six times first at the Scottish Stallion Show; "Craigie Aviation," first and reserve at the Royal Highland and Scottish Stallion Show; "Craigie Exquisite," first and Cawdor Cup, Scottish Stallion Show; "Craigie Winalot," probably the best colt in the stud, and many others were seen, including several from Mr. Kilpatrick's great breeding sire, "Craigie McQuaid," whose progeny stands so high in Scottish show rings today.

But a few hundred yards from the Kilpatrick home where we were most hospitably entertained, are the ruins of an ancient castle, the stronghold of an uncle of the great William Wallace. Close by a monument marks a spot called Burnweel, from which tradition says Wallace looked back to watch the burning of the barns in which he had barred English soldiers after a number of his followers had been treacherously slaughtered. Standing at this spot Wallace said "The barns of Ayr burn weel." Hence the persistence of the name, Burnweel.

(To Be Continued.)

PAYS TRIBUTE TO FALLEN COMRADES

As Britain observed the 14th anniversary of her entry into the great war some 11,000 British ex-service men paid their tribute to their fallen comrades in a great memorial pilgrimage to the battlefields of France and Flanders. Among the pilgrims as a soldier rejoining his old comrades was the Prince of Wales. Above, his royal highness is seen at Bethune walking with the mayor.

Curing a Scold

Drastic Treatment Used By Our Ancestors For Bad Cases

Our ancestors were severe on the woman scold, and the penalties meted out to her were drastic. One, known as the brank, was a sugar loaf shaped fixture for the head constructed of iron hooping, with a cross at the top. A flat piece of iron projected inwards, which was placed on the woman's tongue. She was then led about the street wearing this unique headdress. If this did not cure her, there was the ducking stool. Fastened in this she was swung over a pond and immersed in the water, the operation being repeated "as often as the virulence of the distemper required."

Show a Welcome

Incoming Britishers Should Be Given A Welcome By Their Own People

[It is] an obvious although a seldom recognized fact, that the non-British [immigr]ants in Canada are much more prone to assist their fellow-nationals [from] Europe than the British people are to lend a helping hand to their brothers from the British Isles. When complaints are made that mid-European [imm]igrants seem to find a heartier welcome here than Britishers, the fact is overlooked that the welcome extended to Europeans is generally looked after by their own people already resident here. The resident Britishers, on the other hand, pay no attention to the incoming Britishers. A real effort to overcome this defect, if it is a defect, might make all the difference in the world to the immigration problem.—Western Produce.

In the Interests Of Peace

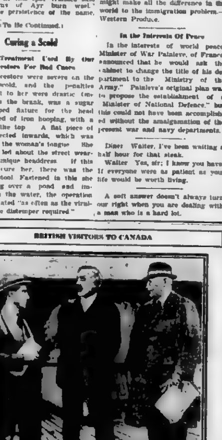
In the interests of world peace, Minister of War Painleve, of France, announced that he would ask the cabinet to change the title of his department to the "Ministry of the Army." Painleve's original plan was to propose the establishment of a "Minister of National Defence," but this could not have been accomplished without the amalgamation of the present war and navy departments.

Diner: Waiter, I've been waiting a half hour for that steak.

Waiter: Yes, sir; I know you have. If everyone were as patient as you life would be worth living.

A soft answer doesn't always turn out right when you are dealing with a man who is a hard lot.

BRITISH VISITORS TO CANADA



Lord Lovat, under-secretary of state for the Dominions, photographed on board the "Empress of Scotland" en route to Canada with Sir Howard D'Egville, honorary secretary of the Empire Parliamentary Association, and Col. H. W. Cole, principal of the Empire Marketing Board. From left to right: Sir Howard D'Egville, Lord Lovat, and Col. Cole.

SUNDAY SCHOOL LESSON

SEPTEMBER 9

PAUL IN ATHENS AND CORINTH

Golden Text: "For I determined not to know anything among you, save Jesus Christ, and Him crucified."—I Corinthians 2:2.

Lesson: Acts 17:6-18:17; 1 Corinthians 2:1-16; 1 Timothy 2:2-7.

Devotional Reading: Psalm 119:9-16.

Explanations and Comments

Paul At Athens, verse 1.—After leaving Beroea, Paul went on to Athens, as we learned last week. There he reasoned in the synagogue with the Jews and preached in the marketplace to all who would listen. Athens had a famous university and was the headquarters of the various philosophical schools, among them Luke mentions the Stoics and Epicureans, certain of whom encountered him and said, "What would this babbler say?" and others of whom said, "He seemeth to be a setter forth of strange gods," because he preached Jesus and the resurrection. Parenthetically Luke observes, "Now all the Athenians and the strangers sojourning there spent their time in nothing else, but either to tell or to hear some new thing." Thus Luke explains the fact that Paul was taken to the Areopagus and asked to tell there what his new teaching was.

Paul addressed the waiting crowd. He referred to an inscription which he had seen on one of their altars, "To an Unknown God," and said that the one whom they worshipped in ignorance he declared unto them. God who made the world does not need to dwell in temples, nor does He need anything, for He Himself is the source of all life and of all things. He made all nations brothers, he would have them all seek and find Him, but He is not far from everyone, for in Him each one lives. Being God's children, we ought not to think that our Father is like any image made by man. Their ignorance God had overlooked in the past, but now He calls them to change their views, for there will come a day when God will judge the world by One whom he has appointed, whom he has raised from the dead.

At the reference to the resurrection some of Paul's hearers mocked, others said that they would hear him again some time; and thus he was dismissed. Among those who believed his message were Dionysius the Areopagite and a woman named Damaris, but the shallow intellectualism and religious superstition of the people of Athens did not offer a promising soil for the Word, and Paul left Athens for Corinth.

Preaching To the Jews At Corinth, verses 4-6. As usual, Paul addressed himself first to the Jews, and in the synagogue every Sabbath he persuaded, or, as the marginal rendering is, sought to persuade, Jews and Greeks to accept his message concerning the Saviour.

Silas and Timothy, you remember, had remained at Beroea, and when Paul reached Athens he sent for them to "come to him with all speed" (Acts 17:14-16). They joined him at Corinth, and on their arrival Paul was able to give more time to preaching, since they brought money with them (2 Cor. 11:9; Phil. 4:15) and there was less need for his toiling at tent-making. Accordingly, he "was constrained by the word." The word had him in its grip, he yielded to the urge within him, and proclaimed more zealously than ever that Jesus is the Christ.

Will Sign Treaty Twice

Ireland Has Two Signatures On War Renunciation Document

Ireland, smallest of the nations originally adhering to the war renunciation treaty, will have two signatures on that document.

President Cosgrave will sign for the Irish Free State, and Lord Cushendun, acting head of the British Foreign Office, for Great Britain and Northern Ireland.

Cushendun's signature will stand for all divisions of the Empire not signing as individual states. His signature for Northern Ireland will be in behalf of a population of one and a quarter million and his separate signature for the King as Emperor of India, will be in representation of three hundred millions.

A Bid For Advertising

"Ten cents straight will be charged for all obituary notices to all business men who do not advertise while living. Delinquent subscribers will be charged fifteen cents a line for an obituary notice. Advertisers and club subscribers will receive as good a send-off as we are capable of writing, without any charge whatsoever. Better send in your advertisements and pay up your subscriptions, as hog cholera is abroad in the land."—Altoona (Kan.) Tribune.

For Radio Proficiency

Certificates of proficiency in radio telegraphy have been awarded by the department of marine and fisheries to the following: First class—H. Dunn, Powell River, B.C.; W. J. Cavanagh, Vancouver, B.C.; R. G. Doherty, Vancouver, B.C. Amateur: D. L. Que, Alliance, Alta.; W. P. Roberts, Hanna, Alta.; F. J. Shaw, Vancouver; D. W. Houston, Tyvan, Sask.; J. S. Houston, Tyvan, Sask.

Things are seldom what they seem when it seems as if they couldn't be worse.

Making French Real

Suggest Quebec Scholarships For High School Boys

After wrestling for a generation with American boys to whom the French language was about as vital as Sanskrit, Mr. Horace D. Taft, principal of the famous private school at Watertown, N.Y., has put into effect a new idea that promises to change the whole situation. It began with a sudden realization of the fact that just north of him is a French-speaking and French-living Canadian province. Mr. Taft thereupon wrote to the superintendent of public instruction in Quebec and asked if some of his boys could be placed for the summer in all French families. And now the boys are in Quebec learning French.

Of course, the parents of these boys had the money to pay for the experiment, and finding the money is always the rub. But would it be out of the question for the provincial government to offer a half-dozen Quebec scholarships each summer to Alberta high school boys and girls who had demonstrated their worth in class? French is an important curriculum subject, a great living language, and by law on a parity with English in federal matters. What is the department of education doing to make it vital to English-speaking scholars in Alberta?—Edmonton Journal.

Winnipeg Newspaper Union Fashions

A Smartly Simple Frock

This chic little frock is suitable for play or school-time and will be found quite simple for the home modiste to fashion. Contrasting material may be used for the wide facing on the skirt, the front plait, belt, and bands on the long or short raglan sleeves. No. 1630 is in sizes 8, 10, 12 and 14 years. Size 10 requires 2⅜ yards 36-inch plain material, and ⅝ yard contrasting; ⅛ yard less for short sleeves. Price 20 cents the pattern.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

Not Measured By Density

From Ottawa comes the estimate that the population of Canada is now 9,658,000, or an increase of 138,000 over last year. The total is not large but then prosperity cannot be measured by density of people. If it could, India and China would be the most prosperous lands of the world.

Our cynic says: All that stands between most men and the top of the ladder is the ladder.

Here and There

(116)
The Maritime Livestock Market was organized in March, 1927, to market Maritime livestock—chiefly hogs, lambs and some cattle—for 7,000 members of over eighty clubs in the three Maritime Provinces. The report of the first year shows $552,627 received for 29,617 lambs, 19,918 hogs, 20 calves and 616 cattle.

An extension to the air express services maintained by the Canadian Pacific Express Company has been announced and a new air line will be opened early in September between New York and Albany, and Montreal. Lines are already operating between Montreal, Montreal, Toronto, and Ottawa.

A name of unusual distinction will be added to the Canadian Pacific's Steamship [illegible] ships when the 20,000 ton vessel of the new "[illegible]" class is launched in Scotland. She will be named the "Duchess of York," and will be christened by Her Royal Highness the Duchess of York herself the ship's name being recently changed from the "Duchess of Cornwall."

Despite the doubts of nervous tourists, the grizzly bear is more attracted by the sight of a huckleberry bush or a stream full of fish than the prospect of a juicy specimen of humanity and the splendid crop of huckleberries now in British Columbia will probably contribute to a successful hunting season during the month of September and the early part of October.

Fort William, Ontario — Three grain elevator corporations with large interests at the Head of the Lakes are involved in a merger of several powerful Canadian terminal and line elevator companies, the new company being known as the Canadian Consolidated Grain Company. A total of 12,000,000 bushels of elevator capacity will be owned and operated by the new company.

Betty and Buster Bruin, two little black bear cubs, have sailed from Montreal for Italy where they will be presented to the Marquis de Pinedo, the famous Italian round-the-world flier. They are woolly babies, scarcely larger than a child's toy teddy bear and of an amiable disposition. They were obtained by Mr. E. Roncarelli of Montreal, through the General Tourist Department of the Canadian Pacific Railway and are similar to the little bears sent over by him a few years ago to Mussolini.

THE TOFIELD MERCURY

Vol. X., No. 31 — Wednesday, September 12th, 1928 — $1.50 Per Year. To U.S. $2.00

OBITUARY

Joseph Henry Wood

On Wednesday, August 29th, Joseph Henry Wood, old timer and popular resident of Tofield district was called to his reward.

Mr. Wood was born at Yellow Springs, Ohio, in 1860 and grew up in that state. In 1886 he was married to Miss Ella Patton, the ceremony taking place at Newton, Kansas.

In 1901, accompanied by the family, he came to Canada, settling in the Tofield district, where he has resided ever since.

The deceased was very well known throughout the district and was much respected by all who knew him.

He leaves to mourn his loss five sons, Lloyd of Tofield, William of Washington; Lester of Tofield; Arthur of Washington; and Melville of Tofield. Also four daughters: Margaret of Tofield; Mrs. H. Rollins of Viking; Ardie of Tofield; and Mrs. J. Matjeka of Calgary.

The funeral was held from the residence on Friday, August 31st, a large concourse of people assembling to pay their last respects to the departed. The flowers were both beautiful and very numerous. Interment took place in the Tofield cemetery.

STOP PRESS NEWS

As we go to press word comes of the passing away of Mr. Robt. Paradis. Mr. Paradis has been a resident of Tofield for many years, conducting a woodworking shop here. He has been in failing health for some time.

UNIMPROVED LAND SELLING.

Several quarters of unimproved land have been sold lately at prices $7.00 to $10.00 per acre. There is still some land within ten miles of Tofield to be had at these prices. You should buy that quarter or half section that you need for farming or pasturage purposes this fall.

My Listings also include several good improved quarters and half sections.

Chrysler Plymouth Cars
MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

AN OPPORTUNITY

We have been turning a good many quarters of land in the past few months and if you wish to sell it will pay you to give me a listing of same. Also we would like to state the TWIN CITY Tractors and Threshers are selling fast; if you care to get a Tractor or Thresher which will give you years of service and satisfaction, come in and talk the proposition over with us. We also are selling ALLIS CHALMERS Tractors which are known as a great tractor. Please call or 'phone.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. W. A. Mitchell, on September 9th, a son.

Mr. A. O. Innes spent a few days in the city this week.

Mrs. Paridis spent a few days in the city last week.

Mrs. H. Adams of Calgary is the guest of Mr. and Mrs. O. Letourneau.

Mrs. McClurg visited the city last week.

Mrs. Griswold and Mrs. L. Scott were visitors to the city last week.

Quite a number of visitors from Edmonton attended a session of the Eastern Star order here on Tuesday.

Miss Verna Paul returned to her home in Edmonton after spending her holidays at the Craig home.

The W.M.S. (United Church) will meet with Mrs. Kendall on Thursday, September 20th, at 3 p.m.

Mr. Douglas Hedstrom has taken a position in the local yard of the Canadian National Railway.

Miss Sybil Morrison left last week for Camrose where she will attend Normal.

Miss Esther Zook is leaving this week for Hesston, Kansas where she will attend college.

Miss Mabel Thompson spent several days this week with her sister, Mrs. Carl Blake during threshing.

Mrs. Snell and family visited with Mrs. Snell's father at Duhamel over the week end.

Among visitors to the city this week are Mrs. Letourneau, Mrs. Webb, Mr. and Mrs. Innes, Mrs. E. W. Rogers, Mrs. McCauley.

John Snell left Tofield last Friday for Mayerthorpe where he will reside with Father Quirk, formerly of Tofield.

Mrs. Martin returned home from Peace River on Thursday after spending three weeks with relatives and friends there.

Mr. and Mrs. Toboe motored to the city on Tuesday. Mr. Toboe's two youngest sisters of Winnipeg are visiting here.

School opened at Ingram on September 4th with Miss Dorothy Baptist as teacher. The four beginners were: Joan Yeres, Irene Oliver, John Mark Zook and Jackie McIsaac.

Dr. S. R. Laycock, professor of educational psychology, University of Saskatchewan, visited W. Swift, M.A., at the Swift home at Tofield on Wednesday of last week.

Mr. Geo. McLaughlin became seriously ill early this week and was taken to an Edmonton hospital, where he underwent an operation. While still very ill, strong hopes are held for his recovery.

Mr. Walter Bellamy, the local buyer for the Provincial Egg and Poultry Pool advises us that during the summer he has purchased and shipped to the pool 5421 dozen eggs, for which local farmers received a sum of $1287.50, or a little over 20 cents per dozen, as an average summer price.

Time was whirled back about four years to the Mercury staff when on Thursday last, Rev. Nugent Wilson stepped into the office. Looking hale and hearty, and with the self same mannerisms, the Rev. gentleman made it hard for us to believe that it is four years since he was in the office. Since that time, he has had charge of a parish in the West Indies and for the last year or so, has been the vicar of a parish in Lincolnshire, England. While at Tofield he was the guest of Mr. and Mrs. J. W. Robinson.

Mr. A. W. Wallis left Tofield on Saturday last to commence business in Calgary on the following Monday morning. Mr. Wallis has owned a shoe repairing establishment at Tofield for a number of years, most of the time conducting it personally. As a craftsman he was hard to beat, having spent many years in the British army doing this work. Of the old school of shoe repairers, he worked under the maxim that if a job was worth doing it was worth doing well. He enjoyed a very large patronage, but of late rural residents have become too prosperous to have their shoes repaired, consequently he moved to Calgary where there was a good opening among a large number of industrial workers.

KETCHAMOOT

Born.—To Mr. and Mrs. W. A. Mitchell on Sunday, September 9th, a son. He will answer to the name of William Henderson.

A daughter was born to Mr. and Mrs. Donald Cressy, nee Miss Bessie Owen, at Vilna on Saturday, Sept. 8th. Congratulations to both families.

Mr. and Mrs. Harrison and family motored to Lamont a week ago Sunday and spent the day visiting relatives. They were accompanied home by Mrs. Harrison's mother, Mrs. Yeres, who will be their guest for a week.

Mr. Chester Chisnork came down from Edmonton on Thursday to visit old time friends and to look after the interests of his farm as he has had 40 acres broken this summer.

Mr. P. F. Ingram visited at the C. A. Ingram and Sears homes on Thursday.

Miss Mabel Lawson is staying at the home of her brother, Herman, through the teaching school days.

Miss Martha Sosna is assisting with the house work at the W. A. Mitchell home.

Miss Hilda Nomeland has accepted a position as clerk at the G. Brace store in Tofield.

Miss Dora Contoure came down from Edmonton for the Smith—Lawson wedding and was a guest several days at the Geo. Lawson home.

Miss Ardie Wood is caring for mother and son at the W. A. Mitchell home.

Mr. and Mrs. J. Appleby and Son, and Miss Hedis Schultz motored to Bruce on Sunday.

Miss Emma Bruhs was the guest of the Schultz family over Sunday.

Mr. Moen of Bardo has built a new barn for Roy Lee on his farm.

Mr. Hugh Mitchell is remodelling the house on his farm, now rented by Mr. Tollefson.

Mr. and Mrs. K. Cairns of Strome, are visiting their friend Miss F. Fawcett at the Schultz home.

Little Irene Oliver underwent an operation last Friday for the removal of her tonsils and a small lump on the back of her hand at an Edmonton hospital.

W.I. NOTES

The Women's Institute re-opened for their fall sessions on Tuesday afternoon. A very pleasant afternoon was spent by all attending. Mrs. Barnes gave a report on the recent conference held in Ohaton on August 28th. Mrs. Pincott gave an interesting account of her trip to Pasadena, Cal. This was very much enjoyed by all. After the business was dealt with a very dainty lunch was served by Mrs. Pincott and Mrs. Firth.

The Institute will hold a bridge drive in their rooms on Monday, Sep. 17th. Everybody come and have a real sociable time. Admission 25c. Proceeds for the upkeep of the Institute.

LINDBROOK

Cutting is practically finished here and some are starting to thresh; it is likely that the frost damage will be great this year, the gardens are pretty nearly "napooh" now.

Messrs. Tiedeman and Pointer shipped cattle from here last week.

Cream continues to go out but the supply is getting noticeably smaller, the pastures drying up earlier this year and no doubt some of the bossies nearing the end of their lactation period being the causes.

Lindbrook school interior has been brightened with a coat of light colored Muresco and it certainly improves it. Mr. Edwards of Tofield being the "artist". The school reopened on the 4th with Miss C. Abbott as teacher for the next year.

Westlake school re-opened with Miss Fyfe as teacher.

Mrs. Dillane and children of Viking spent a few days as the guest of Mr. and Mrs. J. Leahy.

Miss Pierce has returned from her trip to California U.S.A. and is now staying with Mr. and Mrs. J. Leahy.

A word or two re the fall fire menace might not come amiss just now. The fall has been exceptionally dry so far and it seems inclined to be a windy one (perhaps you think we are windy too over this fire business but we've had some) so it behooves everyone to be a little more careful and if a fire is seen, to ascertain its whereabouts and stamp it out whilst possible to do so. The 15th is at hand and some of the duck shooters might start one from either camp fire or smoking. We've had hail, early frost, now a jolly good fire would just about fill the bill for this year, so be as careful as possible, please!

Mr. and Mrs. Ernest Hooper and family of Edmonton motored out to pay a visit to their relatives here, the Hooper's of Lindbrook.

U.F.W.A. NOTES

The regular meeting was held on September 4th at the home of Mrs. T. E. Seale. In spite of the busy season there was a splendid attendance of members and visitors. Among the latter was Mrs. D. W. Warner of Clover Bar who is an active member in the local there. Mrs. J. B. Warner gave a paper on "House Plants for Winter Blooming." The Secretary read a splendid paper which was prepared by Mrs. John McGinitie on "Storing Vegetables for Winter." Mrs. McGinitie was unable to be present but her paper was much appreciated.

Mrs. Gray read a paper on the same subject which contained some very useful information. A vote of thanks to the ladies for their interesting papers was moved.

The next meeting will be held at the home of Mrs. Ball on September 26th. The roll call will be answered with "current events."

There will be a paper by Mrs. Thompson on "Educating children along the lines of their natural talent." Visitors always welcome.

KINGMAN

Mrs. Orvild Bray visited in Edmonton for a few days last week.

Mr. Calder, of the Home Grain Elevator, spent the week end in Calgary.

Mrs. E. Erickson visited with friends in Camrose on Wednesday.

Mr. and Mrs. J. Munson and family, of Camrose, visited on Sunday with Mr. and Mrs. C. R. Blyckert.

Miss Gladys Pederson, of Edmonton, is spending her vacation in Kingman with her parents, Mr. and Mrs. C. Pederson.

G. Bjorgum began threshing his wheat on Wednesday last.

Mr. S. Hardin, of Alliance, spent the week-end with Mr. and Mrs. P. Rodnunsky.

Mr. and Mrs. Erick Erickson, and Mr. and Mrs. Emil Erickson were visitors at the John Anderson home on Sunday.

Mr. and Mrs. Albert Pederson and family of Bawlf, were Sunday visitors at the home of Mr. and Mrs. T. J. Rognes.

The home of Mr. and Mrs. Orvild Bray was the scene of a jolly party on Friday evening, when a large number of friends danced till early hours of the morning.

Mr. and Mrs. Sunre and family of Hay Lakes, visited with Mr. and Mrs. P. Stanley on Sunday.

Mr. and Mrs. P. Haugen of Tofield, spent Sunday with Mr. and Mrs. A. Johnson.

Don't forget the dance on Friday, September 14th. Music by Blue Bird Orchestra.

LAKE SHORE

Mr. W. E. Seale and Miss Mildred Anderson were Sunday visitors at the Bethel home.

Miss Emma Bruhs visited friends in the Ketchamoot district over the week end.

Mr. and Mrs. H. Rollins and family of Viking visited at the Wood home on Sunday.

Mr. and Mrs. D. W. Warner of Clover Bar visited at the Warner and Dodds homes last week, returning to their home on Saturday.

Mrs. Harve Adams of Calgary and Mrs. J. O. A. Letourneau of Tofield were visitors at the Wood home on Sunday afternoon.

J. J. Clark of Edmonton spent the week end visiting the Bethel family.

Jimmie Engleshaw was so unfortunate as to get a finger smashed in the cream separator the first of the week.

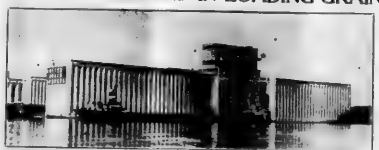
Mr. and Mrs. Jack Johnston and daughter Lila took Sunday dinner with Mr. and Mrs. R. C. Phillips.

Miss Mary Ruslcski is assisting Mrs. Roe Phillips with her housework.

Mr. and Mrs. T. E. Seale visited the latter's mother, Mrs. J. S. Munro on Sunday.

Miss Mabel Sayers returned to her home on Tuesday after spending two months with Mrs. R. C. Phillips.

MAKING A RECORD IN LOADING GRAIN



The rapidity with which grain can be handled at a terminal elevator when the best and latest methods and machinery are employed was tested the other day at Port Arthur, Ontario, at the new elevator of United Grain Growers [illegible]. With[illegible] seven hours and twenty minutes [illegible] bushels of wheat were loaded into the SS Le Moyne breaking all previous records. The fastest time previously made with a cargo of this size has been eight hours and thirty minutes.

The elevator is equipped with [illegible] loading spouts each fourteen inches in diameter, all of which were employed at the same time. These spouts run from loading bins, into which grain is dropped after being weighed at the top of the elevator in four hopper scales, each with a capacity of 2,500 bushels. Grain is brought to the scales in four elevating legs from the bottom of the "work house," where it is conveyed on belts from the storage bins. This rate of shipping means over 75,000 bushels per hour, equivalent to loading a car load of grain every minute.

The United Grain Growers' elevator shown in the picture, which was placed in service during the past crop year, has a capacity of [illegible] bushels. New features of design were incorporated in its structure and it was planned and equipped to provide for the most rapid and efficient possible handling of grain. The loading above referred to was accomplished in the ordinary course of business without any special preparations designed for making a record.

The S.S. Le Moyne belongs to the fleet of the Canada Steamship Lines, and is the largest vessel on the Great Lakes. She is 633 feet long, with a beam of 70 feet, while she draws up to 20 feet of water when fully loaded.

WORLD HAPPENINGS BRIEFLY TOLD

The engagement of King Boris, of Bulgaria, to Princess Giovanna, of Italy is reported.

Reductions ranging from a nickel to 50 cents a bottle are effective in Saskatchewan liquor prices, according to the price list issued by the Saskatchewan liquor board.

Attempts are being made to organize a meeting of countries directly interested in evacuation of the Rhineland, it is understood in League of Nations circles.

Only one fifth of an inch of rain fell in Vancouver during the month of August, making it the driest August since the taking of records commenced in 1905.

The Canadian Mail Contractors' Association in convention at Toronto, decided to urge abolition of the contract system and the institution of a salary basis of $70 per mile per year.

The New South Wales cabinet has approved the proposal of the state agricultural department to import high quality Aberdeen Angus cattle from Canada as part of a scheme to improve the export beef trade, particularly baby beef.

The U.S. department of agriculture has lifted the embargo on dairy products passing through Montreal. The embargo was placed in effect during a typhoid fever outbreak in the Canadian city. It originally covered 200 miles but has been increased from time to time.

A new list of broadcasting stations in Canada has just been issued by the Radio Branch, Department of Marine and Fisheries. A careful reading shows that there are four new licenses while one station has dropped its license bringing the total number of licenses in Canada to seventy-six. This list supplements the list issued late in June.

Missionaries can explain their religion. The hard part is to explain their civilization.

Little things console us because most of our affections are little ones.

Fraser River Gold

After more than half a century of neglect, the gold gold-bearing bars of the Fraser River are being extensively prospected again and mining men predict a new era of intensive development on this famous mineral-rich stream. Not since the early sixties has the Fraser been prospected so thoroughly as now.

The man who praises the baby always wins the mother's smile.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

It was not far from Craigie Mains to Hobsland, the home of Mr Thomas Barr, the Ayrshire cattle breeder, where, incidentally, we learned that our leader Mr Arkell had spent part of his honeymoon!

It is safe to say that none of us had ever seen a finer herd than that which was shown to us, fine, big, heavy, deep-milking cows, every one a picture of what an Ayrshire ought to be. The 75 cows in milk average between 800 and 1,000 gallons with one yielding 1,800 gallons, testing 4 per cent. Most of these cows were daughters of champion bulls. Mr. Barr does a great deal of business in Canada, and at this year's Royal Show a large proportion of winners was from stock of his breeding.

In the opinion of the dairymen members of our party, Mr Barr's byres were the best they had seen. Part of the barns are floored with concrete, part with brick. Mr Barr maintaining that brick flooring is healthier in winter and results in the avoidance of trouble in the knees and joints of the cattle. It is interesting to note that some of the fields on the farm have been in grass for 70 years.

Mr Montgomerie's Lessnessock farm at Ochiltree which we next visited, is best known to Canadians because its name is a prefix to the names of many animals which have helped to make Canadian Ayrshire history. This farm is not far from Mauchline, where the poet Burns had a farm of his own.

Last year 109 Ayrshires were shipped to Canada by Mr Montgomerie. His herd now supplies tuberculin-tested milk by contract to the hospitals belonging to the Municipality of Glasgow, testing 4 per cent. and running up to 4.8 per cent. This herd provides one of the most outstanding examples of grading up milk and butter fat yield. In 1908 he had 40 cows averaging 534 gallons of 3.60 per cent. butter fat over 24 weeks. In 1921, 52 cows averaged 720 gallons of 3.9 per cent. butter fat over 30 weeks, and in 1927, 52 cows averaged 920 gallons of 4.16 per cent. fat over 44 weeks.

It was a delight to see his fine herd of milking cows and the barns and byres which presented an object lesson in clean milk production. An interesting development was the "dehorning" of the calves of Lessnessock, a step which is being watched closely by other breeders. Mr. Montgomerie applies a preparation to the calves when they are a few days old which prevents the horns from growing.

The farm of Lt.-Col. Norman Kennedy, D.S.O., breeder of the famous Doonholm herd of Aberdeen-Angus cattle, lies in the very heart of the Burns Country, on the "Banks and Braes of Bonnie Doon," one mile from the poet's birthplace at Alloway. It was a revelation to see selected members of this wonderful herd which has such an enviable record of high awards to its credit at the shows of the Royal Agricultural Society of England, the Highland and Agricultural Society of Scotland; Smithfield, Edinburgh and Perth Spring shows and sales. Outstandingly interesting as were the animals themselves, they were rendered doubly so by the able exposition of the points of the Aberdeen-Angus breed by Mr. James Cameron, formerly agricultural editor of the Glasgow Herald and one of the foremost judges in Scotland, besides having judged at Smithfield and in the Argentine.

We were not allowed to leave Doonholm until Lt.-Col. and Mrs Kennedy had extended to us the hospitality of their beautiful home on the banks of the Doon, where in the fine grounds we were shown the five trees which were planted by the father of Robert Burns as gardener to the estate.

Interested as we were in these three famous farms, we were glad that opportunity permitted us to visit it if only for a short while, the home of Robert Burns. The wee clay cottage remains almost as it was in Burns' day, even to the furnishings—the kitchen table, the grandfather clock, the straight-backed wooden chairs, the plate rack and china, the hangings and the bed where the poet was born, the barn adjoining and the cattle stalls. A small home and a humble one, but to be entered with reverence by all who believe in the dignity of labour and the independence of man. Behind the cottage we visited the museum of Burns relics, the Auld Kirk where Tam o' Shanter watched the witches dance, and, not far distant, the "Auld Brig o' Doon," where his mare Meg lost her tail; and the Burns Monument.

Our excursions from Glasgow gave us little time to see the city itself, although all of us took opportunity to stroll along the famous Sauchiehall Street. Broad, with handsome shops on both sides, this fine thoroughfare is full of interest, and mirrors in its bustle and activity the vigorous spirit of this great industrial city.

Canada's trade connection with Glasgow is close. Glasgow has always favoured the removal of the embargo that was placed on Canadian cattle and the proportion of cattle licensed out for stores was greater than at any other port. Glasgow along with the rest of Scotland has also formed a high opinion of Canadian hams and bacon.

It was with special interest, therefore, that we visited the Glasgow Corporation's Merkeland Wharf at which cattle and pigs are landed. There are no finer facilities in the British Isles. The accommodation is for 4,600 head, and includes three sales rings, a large number of killing booths and excellent cold storage for carcasses before removal direct to buyers, butchers' shops or to the meat markets in the east end of the city.

And now, as guests of the Corporation of Glasgow, we were to attend our last official luncheon in Great Britain. We took our seats in the great banqueting hall, the Lord Provost, Sir David Mason presiding.

(To Be Continued.)

The flat, stale taste which you sometimes find in tea may be due to the package it is put up in. Red Rose Tea is of such fine quality that no chances are taken. It is packed in aluminum, the only material that gives complete protection against dust, dampness and deterioration.

Alberta Elevator Construction

250 New Elevators Have Been Built In Province This Year

Approximately 250 new elevators have been constructed throughout Alberta this year, it is estimated by local grain men. The total capacity of these elevators would be about 12,000,000 bushels, it was stated. Complete figures for elevator construction in the province were not available, but grain men stated that extension of facilities had been progressing rapidly in all parts of Alberta. The capacity of the elevators varied from 35,000 bushels to 140,000 bushels. The Alberta Wheat Pool alone has 110 more elevators this year than in 1927 and practically all the public grain elevator companies have increased their storage capacity.

Combine Reaper Threshers

It is estimated that more than five thousand combine reaper-threshers are in operation in Alberta during the present harvest season.

British Columbia Exporting Eggs

Three years ago British Columbia was importing eggs. This year that province has already exported over 200 carloads.

SUNDAY SCHOOL LESSON

SEPTEMBER 16

PAUL WRITES TO HIS FRIENDS IN CORINTH

Golden Text: "Behold, how good and how pleasant it is for brethren to dwell together in unity!"—Psalm 133:1.

Lesson: 1 Corinthians 1-4.

Devotional Reading: Ephesians 4: 1-6.

Explanation and Comments

Exhortation To Unity, 1 Corinthians 1:10-13. Through members of the household of Chloe, Paul learned that there were contentions among the members of the church at Corinth. It has been inferred that Chloe was a business woman of Ephesus who had sent slaves to Corinth in the pursuance of her trade, and that on the return of the latter they had brought back this news to Paul, who was then at Ephesus. If they had belonged to Corinth, it is argued, Paul would hardly have exposed them to reprisals by this disclosure in his letter. After his salutation and words of thanksgiving (verses 1-9), Paul takes up this report and appeals to his readers to be of one mind. "I beseech you brethren, through the name of our Lord Jesus," he wrote, a name which should be a reminder to them of their oneness as His disciples, "that ye all speak the same thing," that you agree in calling Christ your Leader, "and that there be no divisions among you."

A sadly needed bit of counsel this for our day! It is said that in one of the great cities of England a quarrel arose among the firemen, and at the first fire which they were to fight instead of putting out the flames they turned the hose on one another. This is a picture of what many Christian groups are doing today. The remedy is given by the Persian poet Sa'di:

If the litigious knew the taste
Of friendship with the Friend,
Think you that their life would waste
In quarrels without end?

"That ye be perfected together in the same mind and in the same judgment," continued Paul.

"Nothing doth so much keep men out of the church and drive men out of the church, as breach of unity."—Bacon.

There were three parties in the church at Corinth, Paul had learned, which were called by the name of the leader which each admired the most and regarded as most important: the adherents of Paul, those of Appollos and those of Cephas, or Peter. Then there was also the party "of Christ," which may have arisen as a protest against calling any man the leader of the church. To use the name of Christ as a watchword of a party must have seemed a terrible thing to Paul.

"Is Christ divided?" Paul questioned. Is Christ made a part of the whole instead of the whole? By this question Paul expresses his horror at the thought of degrading Christ to the level of his human messengers. "Was Paul crucified for you? Or were ye baptized into the name of Paul?" he continues. By the crucifixion of Christ they were saved, by baptism they were dedicated to Christ's service; it was inconceivable that they could put others on a level with Christ.

One may say, I am of Paul; another, I am of Apollos; but let neither forget that both Paul and Apollos are disciples of Christ, and remember the words of Christ Himself: "I pray for them; that they all may be one, as thou, Father, art in Me, and I in Thee, that they may be one in us."

Northern Trip Successful

Commander McMillan and Party Brought Back Interesting Information

The general result of scientific observations by Commander D. B. McMillan, who arrived at Sydney, N.S., on his exploration schooner Bowdoin from Labrador, has established the boundaries of plant, fish, and bird life further north than generally supposed.

Commander MacMillan said his expedition had been highly successful and that 6,000 specimens of plant life and many varieties of fish, birds and game were brought back by scientists in the party.

A number of these were hitherto not supposed to exist so far north as Nain, a point on the coast of Labrador where the commander had his headquarters. None of the party was ill during the time the expedition was on the Labrador coast. In the house they built with the lumber taken North last summer, they were so comfortable that they had frequently to open windows to cool off although the mercury at the time registered 45 below.

The Measure Of a Man

S. R. Guggenheim, the New York financier, said on the Mauretania:

Every man has a different tapeline, his own special tapeline, to measure his fellows by their wealth, the blue-blooded men by their blood, and so on.

Once an important personage lay very ill, and I said to an editor at the Lotos Club:

"How is Blanc today?"

"Blanc," said the editor, "passed on this afternoon."

"Poor Blanc!" I said. "Worth much?"

"Um—about a column," said the editor.—Literary Digest.

U.S. Feels Canadian Prosperity.

Farm Implements Imported From U.S. Reach High Valuation

A reflex of the prosperity prevailing in Western Canada which touches the United States is indicated by Canadian purchases of farm implements in that country. In July these purchases are stated to have broken all records. During that month the Dominion import shipments of this kind totalled $5,956,603 in value, making a record of $29,277,301 for the first seven months of the year.

The bulk of these purchases consisted of tractors and harvesting apparatus. During the month of July, more than 1,800 tractors were shipped to Canada, of which 1,422 were wheel tractors of from 15 to 32 horse-power. Other large items among the Canadian purchases were 3,945 harvesters and binders, 914 combines and 552 threshers.

These purchases from the United States are, of course, in addition to great quantities bought from Canadian manufacturing concerns and represent only a portion of the activity in the farm implement field due to this year's record crops.

Everybody Welcome

Nervous Curate (giving out notices): "The vicar will continue his pleasant series of Friday evening addresses in the parish hall, and the subject next Friday will be Hell. The vicar hopes to see you all there. The collection will be for the new heating apparatus."

Canada has 600 electric power plants, representing a capital of $800,000,000.

DIARRHOEA
Was So Bad
Child Passed Blood
Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhoea and before I knew it he was passing blood. I went to our medicine case and gave him a dose of
DR. FOWLER'S WILD STRAWBERRY
and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."
This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

COMPETITION IN FIELD CROPS

The village of Bounty, Saskatchewan, on the Moose Jaw-Macklin line of the Canadian Pacific Railway came into prominence at the Saskatoon Exhibition this year by winning a majority of the trophies offered for competition in field crops. The cups won by the Bounty boys were those donated by Quaker Oats, John East, Butler Byers, and the Kiwanis Shield. The names of the boys are, reading from left to right:—standing, Howard Sibbald, Harold Smith, John Gilchrist, Howard McFadden, reserve grand aggregate winner; seated, Roy Matheson and John McCoy.

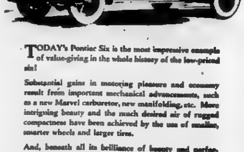
THE SKATING RINK

TWO GENTLEMEN interested in the welfare of the youngsters of Tofield and immediate district called at the Mercury office this week and requested that we say something that would eventually result in better conditions during the winter at the Tofield skating rink. We are afraid we did not give them the satisfaction they were expecting, and because of this we received something akin to a lecture from our better half. We have little to say concerning the rink, but are emphatic in the statements we do make. It is our opinion that the Tofield Town Council should shoulder the responsibility of providing proper skating facilities for the youngsters during the winter. Most everyone who have had any experience of rink management here, know that it is anything but a profitable undertaking. Either the skaters receive extraordinary poor service or the management loses money. Various schemes and stunts can be employed to make the loss lighter, but on the whole managing the rink is an unremunerative proposition.

Real satisfaction can only be obtained by the council accepting responsibility, engaging a capable caretaker, making as much money as they can and assuming the loss. Skating is Canada's youthful winter pastime and there are few municipalities that do not, in some form or another, provide skating facilities for the junior population.

However, at Tofield, while this is easily said it is not so easily done. The Tofield Town Council, we are sure, would do this and more, were plenty of funds available. Unfortunately every municipal dollar must be stretched to the limit and then there are hardly enough to go round. Even so, we consider the rink a responsibility which cannot with justice to the children, be avoided. Conditions at the rink have not been satisfactory for several years and the only way to make them satisfactory is to have someone with authority assume control.

IMPROVED
in Performance and Appearance



TODAY'S Pontiac Six is the most impressive example of value-giving in the whole history of the low-priced six!
Substantial gains in motoring pleasure and economy result from important mechanical advancements, such as a new Marvel carburetor, new manifolding, etc. More intriguing beauty and the much desired air of rugged compactness have been achieved by the use of smaller, smarter wheels and larger tires.
And, beneath all its brilliance of beauty and performance, Pontiac Six is a supremely dependable car ... a car that sails through a wearing, tearing, day-long drive and finishes with the same spirited freshness with which it started the trip.
Come in and investigate this amazing car—General Motors' lowest-priced six.

MOUNTAIN ANIMALS

(By Edward Brice, B.A., in The Barrhead News.

A week ago the editor stated that he might in this issue have a "Here and There" exclusively for the boys and girls, telling them something about the animals in the Rocky Mountain National Park of which Banff is the headquarters. Except where he speaks from personal knowledge all the other facts we heard in a wonderful lecture given by Mr. Dan McCowan, and Old Timer of Banff, who is permanently employed by the C.P.R. During the summer he takes views, many of which his wife colors, and in winter he shows them in east Canada and the States. As he is in the employ of the C.P.R. he lectures without remuneration so that any organization that avails itself of his services is entitled to the full proceeds. "News" readers in the district might avail themselves of Mr. McCowan for the purpose of receiving an amusing, instructive and highly entertaining illustrated lecture.

Among the pictures was a close up view of a young eagle's nest which he succeeded in taking after several days' attempts, with great danger of climbing up rocky precipices, and also attacks from the parent birds. He commented on the wonderful keeness of the eagle's sight. For instance if an eagle could read and talk you could tack a copy of "The News" to one of the elevators in Barrhead and an eagle sitting on the editor's office would be able to read without any effort the whole page and tell you what it said. An eagle soaring one mile in the air is able to see a mouse creeping through the grass.

The editor was surprised to learn that even the grizzly bear is chiefly an herbivorous animal, living on roots, berries, etc. When you find one in the open it will have claws about seven inches long on one foot and three on the other. Sometimes the long claws will be on the left paw and sometimes on the right. The reason is that some animals, like some people, are left handed and the short claws are on the foot that is used most for digging. This huge and fierce animal does not disdain hunting for mice, which he does by sweeping his arm through the grass with a scythe-like motion. He also digs gophers out of their holes.

Possibly every boy and girl of the Barrhead district has seen the beaver. Every boy and girl also knows that the poplar bark furnishes the food of the beaver. The logs which the animal cuts are floated down stream opposite to where its hut is and then the logs are sunk to the bottom. This is necessary in order that the beavers have a sufficient supply of food after the waters freeze. If the logs were not sunk the ice would freeze around them. Mr. McCowan stated that he had placed a poplar log in a beaver dam and the beavers had sunk it in 15 minutes. Of course when a beaver sinks the log it does not rise again. Men with all their science cannot duplicate this wonderful feat and no one has ever discovered how a beaver accomplished it.

The rocky mountain goats dwell among the high mountains throughout Alberta. When disturbed they never descend but always go higher. If a mother with a kid come to a crag too high for the little one to mount, the mother will lift it up with her head. If a goat be browsing on a narrow ledge of rock which suddenly comes to an end with insufficient room for him to turn round on all fours, he will stand up like a man and turn around putting his front feet on the precipice over his head.

Mr. McCowan mentioned some of the tragedies that occur to the wild animals in a great forest fire, when they perish by the thousands. When overtaken by the flames the quills of a porcupine burn like celluloid and assist in roasting the animal. The bears are rather fortunate as they move swiftly to the first stream or lake and submerge themselves with the exception of the nose. The moose is also able to travel faster than the fire. Their speed has been tested with an automobile and one has run in front of a car at a trot making thirty miles an hour before breaking into a gallop. Nevertheless in a recent forest fire the remains of a mother moose were found near that of her calf, which she had refused to leave to perish alone.

The young of several animals are quite different in color to their parents. For instance, young mule deer are spotted and young mountain lions are tiger striped.

There are several strange animals that inhabit only the highest parts of the mountains. One of these is the marmot or "whistler", as it is sometimes called, from the whistling call that it makes. We had a splendid opportunity of seeing several at Lake Louise. They chiefly live in holes among great broken masses of rocks that have tumbled down in rock slides, although one had his home under a large rock beside the pathway on the way to the glacier and he took refuge therein as we were passing along. However, he was sufficiently far away from his hole that if a grizzly had been walking along the path, Mr. Marmot would have furnished him a fine meal. This animal is about the size of a small badger. It is brown around the shoulders and the rest of the body is gray. On this same journey, in the Plane of Six Glaciers, we had a good view of two, each one standing up on a rock whistling, looking quite like giant gophers.

Another peculiar little animal that inhabits the highest peaks is the rock rabbit, which looks somewhat like a mixture of a gopher, a chipmunk and a squirrel, but its most peculiar feature are the comparitively large ears for such a small animal, being about the size of a housecat's.

As all animals in the Park are protected they become wonderfully tame. Deer sometimes wander on to the streets of Banff and they show no fear when you pass alongside of them in automobiles. The chipmunks will come up within two feet of you to have their pictures taken. Some of the chipmunks in the Park are quite different to those we have on the prairie. They have bodies about the size and coloring of a gopher and yet the general impression is that of a squirrel.

Six year old Marjorie showed her mother the likeness of a baby which she had just fashioned from paper with her scissors.

Pleased with the newly discovered skill of her daughter, the mother praised her with enthusiasm. "Why, that is a perfect baby! I believe you are an artist!" she said.

"Huh," replied Marjorie, hands on her hips and head thrown back, "I think I am a stork."

It suddenly occurred to the small Boy Scout that he had neglected to perform his daily good deed. He approached the infirm old lady on the corner.

"May I accompany you across this busy street, ma'am?" he asked.

"Why of course you may, you poor little fellow," she beamed, "How long have you been waiting for somebody to take you across?"

Here and There

(14)

Quebec City was en fete the better part of a week on the return to his native city of His Eminence Raymond Marie Rouleau, newly created Cardinal. Ecclesiastical, governmental, civic, military and lay leaders of the community joined in welcoming this prince of the church.

Four hundred thousand motorcars from the United States will be touring the highroads of the province of Quebec this year, according to the vice-president of the Royal Automobile Club of Canada, interviewed at the Chateau Frontenac, Quebec, this month. It is estimated they will spend over sixty million dollars in the province this coming season.

Edmonton.—Sale of the Lacombe and Northwestern Railway to the Canadian Pacific Railway is announced by the Provincial Premier. The C.P.R. agrees to indemnify the province against future liability on outstanding 5 per cent bonds for $274,700 and, in addition, pay $1,500,000 in cash, at the same time undertaking to construct a 20-mile extension within the next three years.

Calgary. — The Province of Alberta exported goods to the value of $9,120,306 to the United States during the year 1927, according to the annual report of S. C. Reat, United States Consul for Calgary district. The total exports show an increase of $764,660 or 17 per cent. over 1926. Cattle and hogs held a conspicuous place in these exports, the former amounting to $1,215,686 and the latter to $983,045.

Winnipeg. — Homestead entries made in the four western provinces in the calendar year 1927 totalled 6,447, as compared with 6,012 the year before—an increase in 1927 of 435. Entries by provinces — 1926 figures being in brackets — were: Manitoba 719 (942), Saskatchewan 2,819 (2,750), Alberta 2,796 (2,164) and British Columbia 113 (124). December filings totalled 488, an increase of 69 with Manitoba 46 (54), Saskatchewan 221 (219), Alberta 215 (139) and British Columbia 6 (7).

Thirteen new ocean liners, at least, of a total of 128,000 gross tons, are expected in Montreal during the coming season. Of this total Canadian Pacific vessels make up more than half, or 90,000 gross tons. These are the "Duchess of Atholl" and the "Duchess of Bedford", of 20,000 gross tons each, and the five Canadian Pacific freighters, the "Beaverburn", "Beaverford", "Beaverbrae", "Beaverhill" and "Beaverdale", each of 10,000 gross tons.

Saint John.—The Harbor Commissioners have now drawn up a $10,000,000 project of port development, to extend over a 5-year period, subject to the approval of the Minister of Marine. The general scheme includes the construction of one grain conveyor gallery at pier No. 7; a grain jetty, 1,350 feet long; a pier, 1,350 feet long and equipped with four one-storey, fireproof sheds and shipping office; one grain elevator of 2,400,000 bushels capacity with grain conveyor galleries for locating grain at pier No. 7 and the necessary railway tracks, railways, sewage facilities and water supply to serve the new works.

The Impatient West

Twenty five years ago the population of the three prairie provinces was considerably less than one million people; today it is well over two million people. Nevertheless, Western people talk of the slow growth in population, and are severely critical of the Government at Ottawa, irrespective of its political complexion, and the immigration policies which have prevailed.

Twenty-five years ago Manitoba was largely an undeveloped province while the Provinces of Saskatchewan and Alberta were yet to be born, this vast territory being known as the North-West Territories, lacking a fully autonomous form of government, and without many of the institutions, services and conveniences enjoyed by the people in other parts of the Dominion. Today these three provinces are as well organized, as up-to-date, as well served in most respects and better in some than the older provinces.

Twenty five years ago, with the exception of the main line of the C.P.R. and a few north and south branch lines this western country lacked railway facilities. Today the whole country is criss-crossed by numerous main lines east and west and by branches radiating out in all directions, while hundreds of additional miles of branch lines are being constructed every year. In this short space of time, Saskatchewan, the central of the three provinces, has out-distanced every province except Ontario in railway mileage.

During these twenty-five years the production of the West has doubled and trebled and re-trebled, hamlets have become villages, villages have grown into towns, towns have developed into modern cities, municipal systems have been created which compare favorably with those of older lands, courts of justice have been organized, thousands of schools have been erected, high schools, collegiate institutes and universities established; great elevator systems have been created, the telephone has been carried into the most humble rural home.

The ox gave way to the wagon, the buggy has given way to the automobile; the single furrow plough and yoke of oxen has been superseded to a large extent by the tractor and gang plough, the winding trails leading across the prairie up hill, down dale, and through the valleys to the far distant little railway station, calling for days and nights on the road to market a load of grain, have been converted into well built earth roads graded to a standard, with bridges and culverts eliminating the old mudholes. Tens of thousands of miles of these good market roads have been built in the last ten or fifteen years, and millions of dollars thereby saved to the people of these provinces.

But are the people satisfied? Not a bit of it. When the well designed, properly graded and constructed road, with good drainage, bridges and culverts replaced the old rutted trail and ungraded road, the people were enthusiastic and more than satisfied. But the best of earth roads makes hard going after days of rain, and roads which were regarded as eminently satisfactory even three short years ago are now roundly criticized and condemned because they are not all-weather roads.

The West is impatient. In many respects it is an excellent quality. The West is not and never will be content with less than the best. And what it wants, it wants immediately. It is impatient of delay. Take this matter of roads. If other provinces, states and countries can have gravelled roads and [illegible]

[illegible]

Yes, the West is impatient, and, at times, apt to be a bit inconsistent, too.

Decrease In Fish Catch

Production In Canada During July Less Than Last July

A decrease in the total catch of sea fish on both Canadian coasts was recorded during July last as compared with July 1927. In July last, the total catch amounted to 81,072,800 pounds, valued at $2,712,332, as against 87,451,900 pounds valued at $3,106,634 during July, 1927.

On the Pacific coast, the catch of halibut during the month under review was 5,066,200 pounds, while the catch of the preceding year was 3,-712,100 pounds.

COMPLETELY RUN DOWN

Symptoms That the Blood Is Thin Should Not Be Neglected

Weak, run-down, lacking strength, energy and ambition, nervous, sleepless, poor appetite, digestion disturbed, these are the symptoms named by a great majority of people who have been benefitted by the use of Dr. Williams' Pink Pills. These tonic pills correct the condition described and if you have any of these symptoms you should give these pills a trial. Their great value in cases of this kind is shown by the statement of Mrs. James A. Tibbetts, Halifax, N.S., who says: "I was completely run down in health. My blood was thin and watery and my nerves so bad that I did not sleep well at night. My appetite was poor and the least exertion left me weak and trembling. When I went out I would have a severe headache, and would have to lie down as soon as I got in the house. A friend advised me to try Dr. Williams' Pink Pills. I soon found they were helping me and by the time I had taken the sixth box I felt like a new woman, and have enjoyed good health ever since. For this reason I can highly recommend the pills to anyone run-down or troubled with their nerves."

Not only do Dr. Williams' Pink Pills help the nerves. [illegible]

Wheat Pool Advance Is 85c.

Initial Payment To Be Fifteen Cents a Bushel Less Than Last Year

The Canadian Wheat Pool will this year advance to its farmer members an initial payment of 85 cents a bushel on wheat, basis No. 1 Northern at Fort William. This advance is 15 cents a bushel less than a year ago, and reflects the caution of the Pool management arising out of the fact that Western Canada is now harvesting the [illegible] wheat crop in its history.

The Canadian Wheat Pools, which control the world's largest supply of exportable wheat, make an initial payment to their members when the wheat is delivered. Three other payments are made during the year and are determined by the price realized in the foreign market. The initial payment is therefore no indication of the total amount the farmer will eventually receive.

It is announced by the Wheat Pool management that they are starting the new crop year with old stocks practically sold out.

Import Game Birds

Ring-Necked Pheasants From Oregon Introduced In Medicine Hat District

Fourteen brace of ring-necked pheasants arrived the other day from Oregon, for the Medicine Hat Fish and Game Association. The birds will be placed in pens, already prepared for them on the Bray poultry farm on Ross Creek. The young pheasants are about three months old, apparently, and are about the size of a full grown Hungarian Partridge, although considerably longer in the leg. They are a lively lot and apparently have suffered no harm from the trip. [illegible]

Building Model Farms In Reclaimed Area

Government Schemes To Stimulate Land Sales In Sumas, B.C.

To stimulate the sale of British Columbia Government land in the Sumas reclamation area, Provincial officials are about to establish there three model farms, with buildings and complete equipment, to be sold as going concerns. The proposal, as outlined by Hon. E. D. Barrow, Minister of Agriculture, is that three complete farm units shall be created on choice Sumas land at Government expense. In every way they will be models of modern agricultural methods, with houses, barns and machinery. It is believed they will be sold without difficulty, but the main purpose is to attract farmers to the district and to encourage the establishment of first-class farms of similar character there.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

Defective Vision In Children

Willie can now have a new alibi when he fails to pass his school examinations. According to W. A. Blocker, chairman of the convention committee for the Guild of Prescription Opticians of America, eyestrain and defective vision is retarding 2,-[illegible] school children in their studies.

Veterinaries use Minard's Liniment.

B.C. Salmon Pack

The British Columbia salmon pack this year totalled 510,230 cases compared with 333,262 cases up to the same date a year ago.

Travelling By Airway

2,000 Passengers Fly Across English Channel of Five Weeks

Statistics just published show that Britain is rapidly becoming airminded. Every week for the last five weeks more than 2,000 people have taken the once perilous air journey across the English Channel. This is an increase of more than 300 over the highest figure for last year.

During the busiest air week last year less than 1,500 people took advantage of the quick service from London to Paris. London now has air trips to 73 European cities. There are nine scheduled services each day to Paris, the first at 6 a.m. and the last at 4.30 in the afternoon.

More than 30 per cent. of the cross-channel passengers are women and they have included the extremes in age, babies travelling from time to time as well as the septuagenarian, octogenarian and once a man of 90.

Carried Out Old Tradition

The astronomical clock at Hampton Court, said to be more than 400 years old, is traditionally supposed to stop when a resident of the place is about to die.

Recently the clock stopped.

Lady McGregor, who has lived in the palace for more than 60 years was killed in a motor accident barely a week later.

MINARD'S "KING OF PAIN" LINIMENT

Strength!

There's a giant of power in each of these famous batteries. You can't beat an Eveready Hot-Shot for heavy duty ignition work—gas engine, tractor or marine.

Crank once, and off you go! Gives millions of fat hot sparks before replacement is necessary. Metal case protects power supply from rain, fog or damp, and assures you full value for your money. Metal cased Hot-Shots in 6, 7½ and 9 volt sizes.

Built and guaranteed by Canada's largest battery manufacturer. Look for name "Eveready" on each battery. If it's not an Eveready, it's not a Hot-Shot.

CHAPTER I

Jangling his keys on their big ring, the sheriff led John McLean down several steps, then through a long narrow hall to the rear of the jail. From a distant corridor came the sound of a raucous voice attempting to sing one of the popular ragtimes of the day.

"Some fellow's still got a 'hang-over,'" observed the sheriff as he paused before a cell, consulted a number, then searched for the key. As the door swung open a sleepy voice was raised in mock solemnity.

"What ho, varlet! Why dost thou open the dungeon door? Has the king granted a reprieve?" His eyes blinking, the inmate stepped into the bright light of the hall. A dull red suffused his pale face as he saw the tall figure behind the sheriff.

"Hello, Dad! Nice morning," he smiled in a weak attempt at joviality, but the smile faded as he sensed a change in his father.

"My son arrested in a low gambling den!" the father said bitterly. "Donald, you have disgraced the family name. Your drinking carousals and gambling can have but one end. I have been too easy with you. For your own good I'm going to turn you loose. Until such time as you can return to me rid of your bad habits, and have proven yourself a man, you are not a son of mine. I—I'm done with you."

Donald's father turned abruptly on his heel and strode swiftly down the [illegible]

The sheriff's appraising eyes glowed with admiration as they rested on the young man. To the casual eye Donald appeared of slight build, but his old friend knew of the steel-like muscles of those arms and the strength of the long, straight legs.

The mind of the older man flashed back at a football game in Donald's High School days, with the State championship at stake. Donald had been sent into the game at the eleventh hour, and with defeat staring the home team in the face he had torn through the opposing lines like a madman for agonizing gains until his dark head flashed across the line to victory.

Donald came embarrassedly to his feet.

"Well, I guess I'll be moving."

"Here, boy, take this," the sheriff said awkwardly, thrusting a roll of bills into Donald's hand.

The young man's face flushed. "It's awfully good of you, Jim, but I——"

"It's all right, Don," interrupted the older man, summoning a smile. "I'm just giving you a loan."

Donald looked at him soberly. "I'll pay you back when—I—I—earn it."

His face very serious, the sheriff placed a hand on Donald's shoulder.

"Now, listen, Don. Your father and I talked here in the office for an hour before he bailed you out, and we agreed that the best thing was to let you go on your own. No, I am not going to give you a lecture, for you are not wholly to blame. Having a rich father is not the best thing for a young fellow, but because you got fired out of college should not make a husky boy like you lose his grip. You just step out and buck the line like you do in football and you'll sure make a touchdown." He gripped Donald's hand. "Good-bye and good luck, Donnie," he added feelingly.

Donald crossed the street to the Hancock House and sank moodily to [illegible]

(To Be Continued.)

Gardens On Skyscrapers

Country Brought To City In Next Century Is Prediction

Large cities with towering buildings will no longer be arid deserts of asphalt and concrete when we turn the next century according to Dr. William L. Bailey, of Northwestern University, New York. Skyscraper roofs will be bits of country brought to town, gardens, tennis courts, swimming pools, and small truck farms. Big cities will have learned to make the most of the sunshine, fresh air and cool breezes that bless the housetops.

To establish the comforts of the country on a city roof would be no mean engineering feat. Householders who cherish small city gardens or even window boxes, find that metropolitan life goes hard with green things growing. Ferns instead of flourishing and spreading rapidly languish and in a few weeks are worn out. Pansies blossom for a day and then collapse. Evergreen shrubs peak, and pine in the city in spite of the tenderest care.

Granted that the roofs could be made to blossom like the rose, who would be privileged to enjoy them? If space were allotted to tenants there would scarcely be standing room for all, not to speak of the wear and tear on the sprouting rad[ishes] and onions. Here is a problem for city planners to solve before 2001.

THE MOLARS

Consider for a moment the military "machine." In greatest prominence, the officers carefully groomed; next the sub-officers, and in the background, the rankers—who bear the brunt of battle.

Now then, consider the masticating "machine." In the forefront the incisors and canines well kept; next behind the bicuspids and to the rear, the molars you catch the smile. Twelve is their mustering strength, six upper and six lower, though this number is variable since frequently the third molar is missing, while again a fourth molar occasionally presents.

Now, a word about their roots. You have perhaps, had the "nerve" removed from one of these molar teeth, which operation proved very tedious necessitating your return two, three or four times for treatments—until you wished that you had had the "old tooth" taken out.

It is precisely because of the difficulties attending the management of these teeth when badly diseased that you should be on your guard to notice any trouble in its beginning and have it checked.

But of course you can have them pulled.

Well, take your lawn-mower, strip it of one or more of its blades. With what efficiency will it do its work? Diminished indeed. Suppose then, that you lose a molar or two or three or six or ten of them. How much masticating efficiency is left you? Very little, and what prospect for good health? Poor enough.

So if you would live long and healthfully guard well these ranks and see to it that they remain unbroken.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eclectric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

A Turnover Of $500,000 Reported For the Past Year

From a turnover of $200,000 in 192[illegible] to one of $500,000 in the business year just closed is the record of the Southern Alberta Co-operative Association. In the past year over 21,000 head of livestock were handled, 17,000 head being hogs and the balance cattle and sheep. Membership in the Association has grown in two years from 267 members to 1,170.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I used the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price 25 cents per box by The Dr. Williams' Medicine Co., Brockville, Ont.

German Fleet Grows

Fletcher's CASTORIA

EDMONTON

A Commercial Centre of Alberta

Through the co-operation of The Tofield Mercury we review many of Edmonton's manufacturing, wholesale, retail and professional firms, which are pioneers in this region and that have helped in a large way to make Edmonton a prosperous City and Community in which to live and work. Discretion has been used by the editors to review only business firms that are leaders in their respective fields of commerce and whose business policies carry recognition of years standing. This section edited by International News Syndicate, Spokane, Calgary, (Hotel Palliser Bldg), San Francisco. All Publishing Rights Reserved.

North West Roofing Co.

ESTABLISHED 1903

ROOFING CONTRACTORS

With offices located at 10743-105th Street in Edmonton, furnish the latest scientific roofing at reasonable prices. They specialize in gravel asphalt built-up roofing, composition roofing, Rubberite re-roofing which in conjunction with other materials make a permanent roof; do repairing, re-shingling and re-painting. A growing concern offering a complete service to the public, headed by Mr. D. McDermid.

The North West Roofing Company [illegible] met with [illegible] general public [illegible] and layer [illegible] materials known [illegible] and used [illegible] contractors. [illegible] are of the latest scientific equipment in [illegible] products of the best manufacturers which were [illegible] after an exhaustive [illegible]. [illegible] roofing new homes [illegible] buildings and re-roofing [illegible] shingles. They [illegible] shingles and asbestos shingle roofs, gravel asphalt built-up roofing, rubberite re-roofing, metal roofs, flat roofing and all types of roof repairing and refinishing.

The chief advantages of their roofing material and service is its fire resisting qualities which reduces fire hazard and insurance rates considerably, its durability, non-leak construction and presenting an appearance from an architectural point of view that is pleasing to the most critical.

The firm's activities extend thruout the Edmonton district and their work has met with the general approval of patrons served. To anyone interested they can furnish suitable references and arrange for the inspection of the old and new work completed. Their charges are in keeping with the character of work desired and consistent with good business but not beyond the means of those wishing quality work. Good roofing and keeping the same in suitable repair is of necessity an investment to the property owner.

Persons contemplating building or re-roofing will do well to consider and investigate the services offered by the North West Roofing Company before letting a contract, for they have a perfect understanding of how to lay roofing material to the best advantage and with speed. They do a large general contracting business and have earned the reputation as established.

Standard Typewriter Co.

SALES—RENTALS—REPAIRS

Located at 10231 Jasper Avenue, in Edmonton are exclusive distributors of the new L. C. Smith and Corona Typewriters and other leading makes of re-built machines which they sell, rent, exchange and repair offering the public a complete and comprehensive service under the direction of Mr. R. A. Hart.

The Standard Typewriter Company [illegible] headquarters for the [illegible] authorized agents for the L. C. Smith and Corona typewriters known the world over for their efficiency and quality of work. The firm deal as well in all other standard makes of re-built machines which necessarily are sold at factory prices representing a cash saving of about 50 per cent and machines are guaranteed to render satisfactory service to the purchaser.

It is hardly necessary to draw our readers attention to the fact that the modern typewriter has revolutionized correspondence and facilitated in no small manner the negotiation of business. The portable Corona has made it possible for business men, salesmen and professional men and women to travel from place to place and carry with them as they would a handbag the machine and thus accomplish correspondence wherever they may happen to be during their spare moments.

This firms service in the repair of machines can be depended upon as they employ only the most expert mechanics who have had factory training and understand the mechanism of the various typewriters on the market.

In the salesroom of the Standard Typewriter Co. are exhibited every known appliance and accessory to meet the requirements of the typist and business man interested in labor saving office devices such as the new Corona (No. 7) combination cash register and adding machine, several of which are now in use at Tofield, the standard office model (No. 10) adding machine. The first [illegible] combination cash register and adding machine is substantially compact, accurate, easily [illegible] and includes the practical measures with an attractive [illegible].

The Standard Typewriter [illegible] have made it a point to render the [illegible] service that cannot be over[illegible] of persons requiring the merchandise by the market and they enjoy a large and increasing business in the field district.

In expatiating the accomplishments of this firm through the [illegible] we wish to draw our readers attention to the facilities they offer [illegible] suggest they bear them in mind when in need of a typewriter repairs [illegible] other items of their distribution.

Elston Business College

This well known institution, located in the Adams Block (101st Street, opposite Ramsey's Dept. Store) in Edmonton, offers the residents of this and surrounding sections an opportunity which is unexcelled in any city. Students from this school may be found successfully located throut the country. Shorthand, Typewriting, Bookkeeping, Telegraphy and Penmanship, Commercial English and many other subjects are taught under the direction of Mr. David Elston.

Perhaps no institution, whether local or foreign, that operates in this section, is more worthy of favorable mention than this well known business college.

Since the day of its foundation, to the present time there has been but one idea in the manner in which it has been conducted, and that is the improvement of living conditions and the broadening of all who are brought in contact with it in an intellectual way.

For years past the importance of special training for a successful business career has been impressed upon the minds of the public. The large employers are constantly giving preference to the applicant who has trained himself for some line of work connected with the business in which he is about to engage, and as a result, the person who is untrained watches the new man or woman go past him to some higher position that carries not only an increase in salary but in responsibility.

A business course for the child is the aspiration of every modern parent, and with such an institution as this one in our midst, the future of your child is assured, for at a very nominal cost a complete course (day or night instruction) and most desirable preparation for business can be secured.

All the modern methods of instruction in the different courses have been introduced, and the instructors themselves have been selected with the view of making this college one of the best of its kind in Alberta. In this review we take pleasure in complimenting the Elston business College, a modern institution which has added much to the growth and improvement of this section.

Foster's Funeral Home Ltd.

Located in their new home at 10008-103rd Street in Edmonton, conduct a modern funeral home and mortuary, under the direction of Mr. Harold P. Foster. They go anywhere on short notice and maintain ambulance service. Enjoy a splendid business in northern Alberta.

Among the professions which have developed rapidly in the past few years is that of the modern mortuary. Indeed, this profession has reached a high point of efficiency. No firm has given the business more careful and painstaking attention than Mr. Foster. He has become a leader in this field and merits the commendation of the public.

Since the founding of his business he has been fair and honest in his endeavor to give the best of service. Not only has this accrued to the benefit of the public, but it has built for him a reputation.

Mr. Foster and his assistants are courteous and put forth their best efforts to comply with the wishes of their patrons. Their new establishment is complete from a standpoint of stock and equipment, and are able to offer service that is unexcelled.

In keeping with their progressive yet reliable, policies, they have kept in close touch with everything modern in the way of equipment.

They occupy their new funeral home that is one of the most up-to-date in Alberta. Men are on duty day and night, trained in the handling of the work and prompt ambulance service is always available.

It is indeed a real service to patrons of this new funeral home that shows a progressive spirit which permeates every department.

Entering this home one is impressed by the atmosphere of intimate privacy and homelike comfort and is filled with the feeling of confidence in newly made friends who are to guide your acts during your visit to take care of the little details which are so distressing in the hour of deepest sorrow.

The chapel is brightened by mellow lights and beautiful furnishings. In these rooms services are held and every detail arranged as if the funeral were being held in your own home.

As is well known, they have conducted some of the largest funerals in the province. We wish to compliment Mr. Foster on the satisfactory service he is rendering the public, and on his determination to maintain the service along modern lines and to conduct his transactions within the bounds of reason and business fairness.

James Richardson & Sons Ltd.

STOCKS—BONDS—GRAIN

With office located ground floor, Agency Bldg., in Edmonton, feature reliable and dependable market securities which have an immediate resale or market outlet.

Complete investment service is essential to the growth of every community and therefore we wish to direct our readers attention to this strong financial and reliable concern James Richardson and Sons, Ltd., who offer a wide range of general market stock and bonds which in all cases have an established resale value.

The matter of safe investment is a most important one and is a service requiring intimate knowledge of commerce, industrial development, banking methods, and the financial markets, both domestic and foreign, coupled with sound judgment, honesty and integrity. The activities of this investment firm is supervised by executives thoroughly conversant with every angle of their business and clients have found a satisfactory selection of approved securities to be a matter of course with this firm's patrons. This firm specializes in trading in grain. Farmers at certain times of the year find it necessary to hedge their grain thru purchase or sale of grain futures. James Richardson and Son's, Ltd. have private direct and instantaneous wire service continuous with the Winnipeg grain exchange and other important points of trade.

The firm are glad to discuss any investment matter with clients and are pleased to furnish any information or circulars they might desire, without obligation. A reliable service of this type, which is able to provide the proper bond or other security to meet the individual requirements of the client, is much to be desired, and out-of-town residents wanting the highest yielding securities, with absolute safety, will do well to acquaint themselves with the firm.

Mr. G. S. Dawson heads the office, and we wish to compliment him and his associates upon the valuable service they are rendering the public and the great confidence which they enjoy, and the high rating and reputation which is given them by banks throughout the country.

Readers of this issue will find a visit to the firm's office both interesting and profitable, as the direction of this institution is in the hands of prominent financial men which assure a continual progress and expansion not only of the firm but the territory it serves.

This firm employs no salesmen, conducting its business on a brokerage or commission basis and handles a grade of securities which may be sold within an hour if necessary.

Wm. Fane

AUTO BODY REPAIRS, CONSTRUCTION, UPHOLSTERING AND PAINTING

Located in his new and modern building at 9907-107th Ave., in Edmonton, repairs and rebuilds quality auto coach and commercial vehicle bodies. Does upholstering, makes and fits doors and fine laquer paint finishing. One of the most complete auto construction shops in the city, managed by Mr. Fane personally.

A modern establishment of this kind is recognized in automobile circles as a distinct and important asset to any city. Quality first, is always the chief consideration with efficient workmen and complete facilities to insure the best results.

This policy has built up an enviable reputation for Wm. Fane.

In his new building he is prepared to handle all kinds of automobile body, fender construction and repair work. He does fine upholstering and has become widely known as a rebuilder of auto bodies for passenger and commercial purposes to meet special requirements. He also specializes in fine auto painting using only the finest of laquer finishes warranted not to fade, peel or chip.

It might be interesting to observe the value of his service in the rebuilding and fitting of doors. It is said that the building and fitting of doors on regular factory made bodies involves more expense and effort than any other section of the body—fitting doors that will swing smoothly, lock and not warp or spring out of shape. Thus, it can be seen that the reconditioning of doors that have been damaged in one way or another is something that requires experience and skill.

This firm can save patrons no small sum in handling this work and put your car on the road without undue delay. Prospective patrons are assured that it is not necessary to send to the factory producing original body, buy a new door, pay transportation charges, fitting costs and suffer delayed service. This is an important angle of the auto repair business and this firm is equipped to do this work correctly.

The management of this concern is in the hands of Mr. Fane who is actively interested in home industrial progress and we are pleased to compliment him for the part he has played in the development of Edmonton's commercial interests.

Dr. Raymond C. Ghostley

OSTEOPATHIC PHYSICIAN AND FOOD SPECIALIST

Located at 701 McLeod Bldg., in Edmonton has a general practice in chronic and nervous disorders. Is among the prominent professional men enjoying a large clientele in this city and surrounding territory.

Science has progressed more rapidly during the last decade than in any previous period in the world's history, and one of the sciences that has been developed to a higher degree of perfection is that of osteopathy.

We are fortunately represented in this profession in Edmonton by Dr. Raymond C. Ghostley. He has taken post-graduate work and is today recognized as one of the foremost authorities in the field.

Diseased condition of the body are oftimes due to abnormanities of body tissues, whether muscle, bone nerve or vascular. Under normal conditions the resistance of the body to disease and diseased conditions enables it to defeat the actions of bacteria, but should some part of the body fail to function correctly, disease immediately gains foothold. Thus it is that the Osteopath can do much good by correcting these conditions. With his knowledge of the body, he adjusts these abnormal conditions by treatment and soon has the diseased part functioning normally. Nature takes her course and defeats the action of whatever has caused the disease, for Osteopathy only assists—nature cures.

Many people who suffer from chronic or acute diseases and bear them with commendable fortitude could be well and happy if they would take osteopathic treatment.

Again we do not always recognize the benefits to be derived from a specialist who treats just for these diseases. However, after a few treatments a favorable change is noted frequently and people wonder why they did not consult the Osteopath sooner.

Dr. Ghostley enjoys a high standing in the community and in this review on the onward progress of Edmonton we are glad to compliment him upon the excellent position he has attained in his profession and upon the high character of his work in assisting to keep the people of the community in a good and healthy condition.

Dr. B. J. Chevalier

CHIROPRACTOR

With offices located at 323 Tegler Building, in Edmonton, is one of the prominent professional men of the city enjoying a large clientele. His able work has won the endorsement of many prominent people of Alberta.

The practice of Dr. Chevalier has day considered one of the leading professional men of Alberta and consulted by many engaged in the same profession, having had years experience in giving chiropractic adjustments.

Science has made great advances in the last few years and many of the old fashioned ideas have been discarded for the new results of science.

The service rendered by Dr. Chevalier may be well termed competent and complete, as his adjustment and ability to cure has to do with all physical conditions of the body—restoring distorted tissue of the body by hand. Science has pointed out that chiropractic adjustments when administered by competent hands is a direct road to health. Drugless and without surgery, chiropractic is a science founded on an entirely different basis than any other health system. It has advanced with such rapid strides that today, it is the foremost non-therapeutical method in existence.

In correlation with his student and technical training he has equipped his office with several of the more recent instruments of scientific development necessary to cope with the progressive movement of the day in his particular field.

His practice has increased rapidly and people from all parts of the province visit his office frequently to consult him. The work he is doing in the relief of the suffering is phenomenal and his patients number among the prominent people of the immediate community.

We are pleased in this review to compliment Dr. Chevalier upon the merited success he is making and upon his excellent standing in the professional world and assure our readers that at his office they will receive the best in chiropractic spinal adjustments. Appointments may be made by 'phoning 5334 Edmonton.

The French Shoe Repairing Orthopedic Work

ORTHOPEDIC EXPERTS AND SHOE REBUILDING

Located at 10012-104th St., in Edmonton, offers the best in shoe repair service for men, women and children. They specialize in orthopedic work and build shoes to special order. One of the largest and reliable shops in the city. Country orders solicited on shoe repairing and carrying charges prepaid on all orders. Business personally managed by Mr. J. Balliere.

Within the period of years that the French Shoe Repairing and Orthopedic Work firm has been in business they have enjoyed an ever increasing patronage because of the reasonable charge to the public.

At the expense of thousands of dollars Mr. Balliere has installed the latest type of shoe repairing machinery which operates with minute accuracy and speed. It serves in the expeditious handling of the large volume of business accorded the firm. The best leathers and materials are used on all work and every order is checked for service before leaving the shop. This is especially true of mail orders reaching this plant daily. All returned parcels post charges are prepaid on out-of town orders. This is a feature which commends itself to the residents of outlying districts who at times are in a quandry as to where to send boots and shoes to be repaired in a satisfactory manner.

satisfactory manner. Mr. Balliere is also an orthopedic expert and is able to build to special order any kind of boot or shoe to meet requirements. A perfect fit is guaranteed on custom built shoes as Mr. Balliere has an established clientele in this particular work in and about Edmonton.

We are pleased in this edition to direct the special attention of our readers to this firm and assure them they will always find efficient and courteous service—service within the reach of the average pocket book.

Frank Whitton

FLORIST

With retail store located at 10143 Jasper Avenue, in Edmonton and greenhouses at Riverdale, specialize in cut flowers, plants and pot flowers; floral designs and emblems in beautiful color scheme. One of the best known firms in its field in Northern Alberta.

In this review of the industrial progress of Edmonton, it is eminently fitting that we devote some space to the floral service of Frank Whitton and a brief description of his greenhouses where are grown flowers of all varieties and hues.

The firm specializes in plants, pot and cut flowers which are carefully natured through the medium of a modern heating system, regulating the temperature to the proper degree that the best results and stock may be obtained. Here flowers bloom in great profusion the year 'round.

Flowers for all occasions are stocked by the firm and a 'phone call 5434 Edmonton, or wire will receive instant attention. His years of experience makes possible the proper selection for various specific needs and if you are in doubt as to suitable flower decoration he will gladly offer his advice and suggestions and provide estimates without obligation. Flowers may be ordered and delivery made by telegraph. This is another helpful service extended the public.

Mr. Whitton has furnished floral decorations for many of the prominent social and civic events of Edmonton, such as weddings, banquets, dances, house parties, receptions to visiting celebrities, funerals, etc. His floral design department is in charge of employees, whose wide experience enables him to furnish fraternal emblems or such of any kind and size worked out in beautiful color harmony. Necessarily, this is skilled workmanship, or an art, if you will, and his reputation has been earned by sincere endeavor to serve the public. The firm is under the personal management of Mr. Whitton who has given years to the study of horticulture. He has worked not alone for the increase of his business but for the development of the community as well, realizing that only thus can the greatest degree of success be attained.

THE LODGE PIANO HOUSE

Edmonton home of the famous Wurlitzer Pianos, located at 10347 Jasper Avenue, under the experienced and popular management of Mr. F. G. Lodge, render a metropolitan service to the public.

By reason of the wide range of quality and price in pianos it is very difficult for the uninitiated to select a musical instrument and feel that they are receiving full value unless one is dealing with a house that has established a precedent of confidence in the minds of the public and the individual. In this regard the Lodge Piano House has merited its reputation for fair dealing by reason of the fact that the management and associates know values and thus customers can depend upon getting an instrument of real worth and value received for his investment.

The Lodge Piano House line of pianos hold high rank and favor thruout the world and carry the endorsement of leaders in the world of music, every piano being sold with a guarantee.

The purchaser has every opportunity to please his fancy and make his selection from one of the largest and most complete stocks of pianos in the city which are sold on convenient terms. The Wurlitzer, for years a standard by which the worth of other instruments have been judged is their leader. They are known the world over and are used extensively in theatrical and radio broadcasting work, and consistently favored for the home and musicale.

Mr. Lodge, the president of this firm, is a man of wide experience in the piano business and has necessarily made an exhaustive search of the markets in order to represent manufacturers whose instruments have been successfully accepted by critics. He is well known in and about Edmonton business and musical circles and his judgment is highly respected and advice sought by many who are in need of information pertaining to musical matters.

The Lodge Piano House also carry a complete line of the late models Orthophonic Victrolas, Victrola (Master Voice) records, sheet music, and pianoforte teacher's music and supplies. Out-of-town residents unable to visit the store conveniently, are urged to make known their wants by mail or 'phone. A satisfactory and prompt mail order service is offered and such patrons are assured that careful attention will be given them.

This house specializes in real service. Our readers are invited to visit their show rooms and inspect their stock. Its courteous salespeople are at your command without obligation.

DENIAL MADE OF BAD TREATMENT OF HARVESTERS

Winnipeg.—Statements made at a colonization conference charging improper treatment of British harvesters at an immigration hall in Winnipeg, were declared false by Thomas Gelley, local immigration commissioner.

Mr. Gelley denied the charge made by Thomas Johnston, Labor M.P. for Dundee, Scotland, that British harvesters were kept in an underground cage," guarded by police.

"The immigration authorities have not detained any British harvesters in any way, shape or form, since their coming to this country," the commissioner said.

At the Canadian National Railways Immigration Hall, in the Union station, there is a grilled gate and policemen, two members of the Royal Mounted Police and one Winnipeg police officer, were stationed at the gate recently while arrangements were being made to ticket the 300 British harvesters back to the old country.

"These police officers," said Mr. Gelley, "were stationed at the grilled gate not for the purpose of keeping the British harvester in the hall, but for the purpose of keeping unauthorized persons out."

Mr. Gelley pointed out that Mr. Johnston was refused admission to the hall because he had not the necessary authority which could have been obtained from immigration or railway officials.

The charge was made by Mr. Johnston at a conference on colonization arranged by the Empire Parliamentary Association. The labor member declared the men were being herded together like sheep and forbidden to go out.

British citizens," Mr. Johnston declared, "are not in the habit of being treated that way."

Rt. Hon Thomas Shaw, Minister of Labor in the Ramsay MacDonald government, declared he had accompanied Mr. Johnston and seen the conditions with his own eyes.

Viscount Peel said he had no personal knowledge of the situation described by Mr. Johnston. But he had no doubt that at the proper time an investigation would be held and the matter fully looked into.

Novel Sentence For Thief

Must Work For Employer Until Reimbursement Is Made

Ottawa.—A unique sentence was imposed by Magistrate Hopewell in Carleton county police court, when Patrick Quinn was convicted of stealing $25 from his employer, Miss Martha Christopher, farmer, of Osgoode township. The magistrate sent Quinn back to Miss Christopher's farm "to put in 20 days of honest toil" to reimburse her for the money stolen. Crown Attorney Ritchie approved the magistrate's solution of the case, and Quinn was allowed to go on his recognizances to work out his own salvation.

To Seek Nobile Craft

Rome.—The dirigible N-5, a sister ship of lost Italia, is being prepared for a final attempt to locate those of the Italia's crew last seen with the gas bag, says Gionale d'Italia. The dirigible will have Maibach motors and in a few technical details will differ from its ill-fated predecessor. It is said General Nobile himself is supervising the work.

Purchase Northern Mine

The Pas, Man.—Colonel Orbelaint, of New York, representing certain mining interests in the American city, has purchased the Pat, Pine, Neosap and other groups of claims near Athapapuskow at Sourdough Bay from the Baker Patton interests for a sum which is reported to exceed $500,000.

Driver Did Not Stop

St. Louis, Mo.—A hit-skip motorist whose automobile struck and killed Jeremiah Horian, allowed his body to ride on the front bumper of his car for 50 feet and then fall under the automobile, where it was run over by the wheels of the car, witnesses said. The driver of the car did not hesitate.

Canadian Is Appointed

Geneva.—Hon. Philippe Roy, first Canadian Minister to France, was appointed official reporter on the question of settlement of Bulgarian refugees and the Bulgarian stabilization loan, at a session of the League of Nations Assembly.

Rush Serum To Winnipeg

Aid For Sufferers From Infantile Paralysis Sent From East and West

Winnipeg.—Children of two cities, Toronto and Edmonton, have come to the rescue of infantile paralysis sufferers in Manitoba.

Serum, made from the blood of recovered victims in the eastern and western cities, will be rushed to Winnipeg to aid in checking the spread of the disease and hasten the recovery of its present victims here and at rural points.

Aid from the two cities follows requests broadcast by health authorities in Winnipeg. Numerous recovered victims in Winnipeg have already given of their blood to make the serum, but as a precautionary measure it was thought necessary to get a further supply from outside points.

In Manitoba, chiefly in the city of Winnipeg, there have been 116 cases of infantile paralysis, with thirteen deaths, since the first case was reported in mid July. Health authorities consider the epidemic is abating.

U.S. Fishing Boat Seized

American Boats Detained By Customs Patrol At Coast

Victoria, B.C.—Seized by H.M.C.S. Thiepval and the Canadian customs patrol boat Despatcher while in a cove on the west coast of Vancouver Island near Clayoquot, two United States fishing vessels, the Marmot from Tacoma, and the Chief Seattle, from Seattle, were brought into Victoria harbor recently.

The two boats and the two occupants of each were handed over to the collector of customs for detention, while the facts of the case were wired to the Federal Department of Marine and Fisheries at Ottawa.

The two fishing crafts were found

The two fishing craft were found in Canadian waters recently, and although they were not fishing at the time, things looked suspicious and they were seized. The occupants said that they had taken shelter in the cove from a storm which they thought was approaching.

Distribution In October

Saskatchewan Pool Money Will Be Paid Next Month

Regina.—Although a despatch from Calgary stated that $1,000,000 net profits would be distributed to Alberta Pool members within the next 10 days, D. McRae, manager of the Saskatchewan Pool Elevators, states that distribution to Saskatchewan members will not take place until next month.

Stating that each province determined on its particular policy, Mr. McRae said: "Our policy for this is not announced until the financial figures are complete." It will be 10 days or two weeks before the Regina office will have a statement. The statement has to be submitted to the delegates of the Pool before it is made public.

American Aviator Under Arrest

Cherbourg.—Bert Acosta, American aviator, was released on bail but must face trial here because he flew over the Fortress and landed on the naval field without authorization. Three men who had flown here with Acosta and Charles A. Levine, who sailed for New York, posted $40 bail for the American, who said he had no money with him.

Drilling For Oil At Unity

Unity, Sask.—Unity Valley No. 2 well shows oil sands in tailing from nine inch casing at depth of 2,160 feet. Sand from tailings smells plainly of crude petroleum. A test with chloroform shows good oil extracted with no water to fight, and appearances are all favorable. Drilling is continuing carefully. Gas is showing as in former well. Expect oil soon.

Industrial Disputes

Ottawa.—Time lost in industrial disputes in July, 1928, was slightly less than during June, 1928, but almost double that during July, 1927. Eighteen disputes were in existence at some time or other during the month, involving 2,449 work-people and resulting in a loss of working time of 23,793 days.

Says Negroes Support Smith

London.—The black man's vote for the United States presidency goes to Al Smith, Democratic candidate, according to Marcus Garvey, self-styled "Moses" of the colored race, who made a dramatic London appearance, saying that he represents 11,000,000 negroes, who in turn represent 400 million more.

Interested In Wheat Pool

British Government Might Buy Wheat From Pool If Ramsay MacDonald Becomes Premier

Winnipeg.—If Rt. Hon. J. Ramsay MacDonald again becomes premier of Great Britain, his government may buy its wheat requirements from the wheat pool.

Mr. MacDonald on arrival in Winnipeg had lunch with representatives of the pool. It is understood he discussed the question, in which he has shown a lively interest. He is anxious to know at first hand the prospects of such a step eventually being taken.

The question of direct relations between the British Government and Canadian co-operative marketing agencies has been increasingly discussed in recent years. It is favored by many as an important step in Empire relations, but on the other hand is looked at askance in some quarters as savoring too much of socialism.

Is Not Resigning Post

Sir Austen Chamberlain Expects To Resume Work In November

London, Eng.—Following alarming reports regarding the health of Sir Austen Chamberlain, foreign secretary, it is learned in medical and other well informed quarters that there is no reason to suppose that the minister will not return from his trip to the West Indies and North America in good health.

An attack of bronchial pneumonia following strenuous work during the past year left Sir Austen in a weakened condition, but it is believed that rest and change will restore him to health and will enable him to resume his duties on his return in November.

RECORD CROP IS BEING GARNERED IN THE WEST

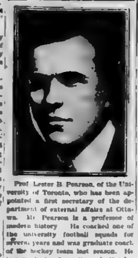
Winnipeg.—The rush to move what is estimated as the largest wheat crop in the history of the Canadian West is on in earnest with many thousands of bushels of grain being marketed daily. The rush is earlier than ever before, railway officials said.

With threshing reported general all over the West, cutting completed in Manitoba, and more rolling stock and general equipment massed at strategic points on the prairies than ever before, indications are that the whole operation of taking off the crop and marketing it will be completed in record time.

Cutting is reported as practically completed in Saskatchewan and well advanced in Alberta. Interior elevators are swept clean and ready for the pouring-in of the new grain. Stocks in the lake head terminals have been reduced to 4,831,000 bushels.

Reports of wheat yields are favorable on the whole and at most points the grading is high.

Receives Ottawa Appointment



Prof. Lester B. Pearson, of the University of Toronto, who has been appointed a first secretary of the department of external affairs at Ottawa. Mr. Pearson is a professor of modern history. He coached one of the university football squads for several years and was graduate coach of the hockey team last season. He is a graduate of varsity and attended Oxford for a year.

Plane At Saskatoon Seized By Mounties

Pilot Charged With Failing To Comply With Regulations

Saskatoon, Sask.—Royal Canadian Mounted Police seized an aeroplane operated in Saskatchewan, with Saskatoon as a base, by Norman Cherry, of the Cherry Airways, Ltd.

The plane was seized by the police acting upon instructions from the Civil Aviation Branch of the Department of National Defense. It is understood that Cherry had failed to comply with certain regulations governing the operation of a plane for commercial aviation in this province.

Cherry arrived here from the United States this spring and has been operating throughout the west.

Explorer Seeks Clemency

Dr. Cook Asks President Coolidge To Shorten Sentence

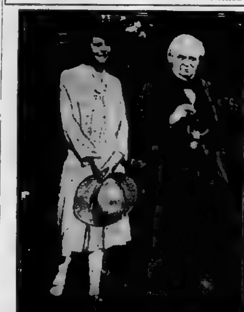
Fort Worth, Tex.—Dr. Frederick A. Cook, Arctic explorer and oil promoter, now serving a 14-year and nine months sentence in the United States prison, Leavenworth, recently sent an appeal for executive clemency to President Coolidge.

The petition, prepared by Dr. Cook from his cell at Leavenworth asks that the president commute the sentence to the time already served and remit fine and costs assessed in United States district court.

Find Post For McAndrews

Washington.—William McAndrews, former superintendent of Chicago schools, who was forced out by Mayor William Hale Thompson, is being considered, among others, for the post of United States commissioner of education, it is learned at the interior department. Dr. J. J. Tigert, of Tennessee, recently resigned.

CANADIAN PRIMA DONNA GUEST OF LLOYD GEORGE



Barbara Austen, native of Ontario and Canadian prima donna, who in private life is known as Miss Gwladys Jones, was recently the guest of Rt. Hon. David Lloyd George, Britain's war-time premier, at his home in Churt, Surrey. The visit was a sequel to a previous meeting in Canada when Miss Jones sang with Dame Clara Butt at a mass meeting where Lloyd George was the speaker.

Nova Scotia Legislature Has Been Dissolved

Provincial Election Is Set For October First

Halifax, N.S.—The Nova Scotia Legislature has been dissolved. This was announced by Premier E. N. Rhodes here, following a session of the executive council.

A provincial general election is set for October 1, with nomination day on September 24.

Coincident with the announcement of dissolution, Premier Rhodes, who leads a Conservative administration, issued his manifesto to the electors. In it the premier reviews the activities of his government, which assumed office following the election of June 1925. He compares the present condition of Nova Scotia with that in which the province found itself prior to his taking over.

It was during Premier Rhodes regime that the Legislative Council was abolished, and the manifesto is introduced by a reference to this.

Handwriting By Telegraph

Facsimile Messages Now Despatched Under New System

New York.—A telegraph service whereby a message is delivered in facsimile characters was inaugurated recently by the Postal Telegraph and Cable Company.

By this new system a person may scrawl a message on a blank in New York and in the same time that it takes to deliver a regular telegram the same scrawled message can be delivered in various parts of the country through a telephoto process.

The cost of this new service is one and one half times the ordinary telegraph service.

The same company also introduced recently a photograph service whereby pictures may be transmitted.

Famous Watch Maker Dead

Robert Ingersoll, Originator Of the Dollar Watch, Passes Away At Denver Sanatarium

Denver, Colo.—Robert H. Ingersoll, watch manufacturer and originator of the well-known dollar watch, died here at a sanatarium where he had been a patient since June 17.

Mr. Ingersoll was 69 years old and was born on a mortgaged farm in Michigan. Ingersoll and his brother Charles, capitalized Ingersoll's idea that watches could be made cheaply. The firm of Robert H. Ingersoll and Brother manufactured and sold more than 70,000,000 dollar watches.

Given Command At Coast

Major Ball Has Been Promoted To Rank Of Lieutenant-Colonel

Ottawa.—Announcement was made by the Department of National Defence that Major C. E. Ball has been promoted to the rank of lieutenant-colonel and to command of the 11th machine gun battalion in Vancouver. He will succeed Lieut.-Col. H. T. Logan, who has been transferred to the reserve of officers. Lieut.-Col. Ball served with the 11th Battalion C.E.F., in France and Belgium, being wounded and invalided home in November, 1917.

ENTRANTS FAIL TO FINISH COURSE IN WRIGLEY SWIM

Lake Shore, Toronto.—Lake Ontario was victor in the third Wrigley's marathon swim. Its chilly waters saw the defeat of some of the world's most famous swimmers and none of the 100 starters had sufficient stamina to finish the 15-mile struggle.

George Michel, French conqueror of the English Channel, who last year finished second in the 21-mile marathon was taken from the water at 10:12 p.m., after completing 12½ miles of the course in 11 hours, 12 minutes.

He had been the sole survivor since 8.42 p.m. when Ernest Vierkoetter of Germany, the 1927 champion and Louis J. Mathias, of Long Island N.Y., had fallen victims to the cold.

Vierkoetter was forced out after leading most of the way and completing two-thirds of the course. Michel was then the only swimmer left in the race.

The Frenchman, his flagging energy being constantly renewed by stimulants which consisted mostly of brandy was swimming slowly, and unsteadily under the glare of floodlights early in the night.

At 8.45 p.m., nearly ten hours after the 15-mile race started, the French swimmer had about four miles to go.

ROYAL PRINCES SAIL ON GOODWILL TOUR OF AFRICA

London, Eng.—The Prince of Wales and his handsome younger brother the Duke of Gloucester, have sailed to hunt big game in Africa and also to spread Imperial good will. For days the two adventurers and popular sons of King George have been busy packing for the trip while the newspapers of London have been carrying accounts and pictures of the regions and the black people they will see.

Sailing from Marseilles the Prince and his brother will go to Alexandria and then to Cairo and from there by motor to Ismailya on the Suez Canal. Here the British India steamer Madura will embark them for Mombasa and there they will entrain for the interior of Kenya.

Their baggage includes many fine sporting weapons and many an uncouth beast now roaming the native wilds is destined to fall before the aim of the Imperial hunters before Christmas finds them ready to return with the trophies of the chase. The trip for the Prince of Wales holds heavy burdens of official duties. He is bursting with speeches, prepared for reviews and inspections and ready with the smiles that have spread his popularity widely.

The Duke is looking forward avidly to his introduction to big game shooting.

A big shooting expedition has been arranged for Nairobi in October. After that Kenya, Tanganyika, Uganda and Rhodesia will welcome the Royal visitors. They will spend Christmas as guests of the governor at Capetown.

To Divide Marathon Money

Fourteen Swimmers In Wrigley Marathon To Receive $2,500 Each

Toronto.—Fourteen swimmers who distinguished themselves in the third Wrigley Marathon are to be rewarded with gratuities of $2,500 each by the Canadian National Exhibition.

The exhibition aquatic committee decided to distribute the $35,000 in prize money in this manner rather than to give the leaders more than those who dropped out hours before and miles behind them.

Realizing Wednesday's swim was unsatisfactory from all points of view, the committee decided that a race between two to five miles should be held later on.

'Plane Parts a Mystery

Wreckage Washed Up At Chatham, Mass., Has Not Been Identified

Chatham, Mass.—The mystery attached to pieces of airplane wreckage washed ashore at North Chatham has been deepened by the declaration of manufacturers that the fragments were positively not parts of the ill-fated Dawn, in which Mrs. Frances Grayson and her companions disappeared. The fragments are thought to be parts of wings. They bear numbers which are not clear but are either 52636 or 52636-97. No manufacturer's name could be found on the wood.

Russia Sings Peace Treaty

Joins Nations Who Have Pledged Adherence To Kellogg Pact

Moscow.—Soviet Russia formally joined the group of nations pledging adherence to the Kellogg anti-war pact. Foreign Commissar Litvinoff affixed his official signature to a written declaration which was given to French Ambassador Herbette for transmission to the United States.

Negotiations with the Soviet government have been carried on through France because the United States does not officially recognize the Soviet government.

Dentists To Accompany Byrd

Boston.—When Commander Byrd shoves off on his approaching Antarctic expedition his equipment will include a $10,000 dental laboratory, it became known here. Four dental surgeons will be members of the expedition, which should have nothing to fear from tough walrus steaks or other hardy fare.

Egypt Will Sign Pact

Cairo, Egypt.—The newspaper Al Saiassah says the Egyptian Government has handed the American charge de affaires its reply to the invitations to adhere to the Kellogg-Briand pact renouncing war, the reply being so worded as to safeguard the full rights of Egypt.

TOFIELD SCHOOL FAIR A WINNER

On Tuesday another mark of history in the annals of Tofield was set down when the Annual School Fair was held. The weather, which in previous years had been unkind, this year relented and gave us a fine day, though cool.

The exhibits as usual were numerous and the judges were in many cases hard put to make a decision. There were classes for everyone and grains, grasses, weed seeds, leaves, vegetables, flowers, sewing, knitting, darning, cooking, writing, drawing and other exhibits arranged in orderly array. The fair was held in the waiting room of the curling rink which afforded an ideal place to hold it.

A list of prize winners will be published as soon as available.

LOCAL AND PERSONAL

Mrs. Tobee and sisters returned home on Wednesday morning.

Mrs. Chatterham and E. W. Rogers motored to the city on Thursday.

Mr. and Mrs. Geo. Agnew motored to Viking on Sunday.

Mrs. John Phillips, senr., left on Tuesday for Vancouver.

Mrs. Gordon and children of Innisfail are spending a few days at the Ross home.

Mrs. Letourneau, and Mrs. Adams and daughter are visiting friends in Irma.

Editor Willis of Stettler, was a visitor to the Mercury office for a short time this week.

Mr. C. Heatherton, buttermaker at the local creamery is spending two weeks at his home at Innisfail.

The Tofield Ladies' Golf Club would like the lady golfers who have not paid the 1928 fees to do so as early as possible.

Mrs. Geo. Braden of Winnipeg is visiting her sister, Mrs. Wallen and Mrs. Preston, before leaving for Vancouver to visit friends there.

Rev. Nugent Wilson, former Anglican minister at Tofield, now of England, and who is spending a holiday in Canada will conduct services at Tofield Holy Trinity Church on Sunday, September 30th, at 7:30 p.m. Services will also be held at Logan at 11:00 a.m.

A special meeting of the young peoples' society connected with the United Church held a special meeting on Wednesday evening. A party of young people were down from Viking and assisted in the program. Refreshments were served and a very pleasant evening was spent by those attending.

Mrs. F. M. Webb, teacher of piano and organ wishes to announce that she will continue her music class as usual. Pupils wishing to enroll kindly do so as soon as possible. Special attention given to the foundation of music. Lessons, 50c., 75c., $1.00. 'Phone 42, opposite Anglican Church.

F. [illegible] Ball was a recent visitor to the [illegible]dminster territory, having sold three half sections of land there to local men. Mr. Lorne Harrison purchased one, Mr Clarence Henke, and Mr. Mrs. Wood, one.

F. Brenneman, son of Mr. J. E. Brenneman, left for Lawrence, Kan., on Friday last to attend School of Medicine [illegible] University there.

Messrs. Joe Titus, and James Brenneman left on Friday last for Hesston, Kansas to attend Hesston College and Bible school. They are sons of Mr and Mrs. J. E. Brenneman of Tofield.

Mrs. Gurbin left for Mayerthorpe last Friday, where she will reside.

AMISK CREEK

Nearly all the harvesting is finished and threshing is fairly general throughout the district. The weather has been almost ideal threshing weather and we hope it will continue.

Mr. W. Anderson lost a valuable horse last week.

Mr. and Mrs. T. Annelo motored to Camrose on Sunday to visit with their daughter Kennie, who is attending high school there.

Mrs. Flaaten, Alice and Ruby Berg, Mr. Berg and Gunvald Flaaten visited at the home of Mr. and Mrs. George Durnas of Salt Lake on Sunday.

PUBLIC NOTICE

Notice is hereby given that Grahn Bros., of Hay Lake, Alberta, have applied to the proper authorities to exchange road allowance running between sections 19 and 20, 50-20-w4, [illegible] Lake, for land in close vicinity and that said application has been duly granted. Any protest against this exchange must be made within thirty days from the date of this notice.

Dated at Tofield, this 19th day of September, 1928.

(Sgd.) GRAHN BROS.,
Hay Lake, Alberta.

UNIMPROVED LAND SELLING.

Several quarters of unimproved land have been sold lately at prices $7.00 to $10.00 per acre. There is still some land within ten miles of Tofield to be had at these prices. You should buy that quarter or half section that you need for farming or pasturage purposes this fall.

My Listings also include several good improved quarters and half sections.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

IMPORTANT

We Expect to Hold a Community Sale on Saturday, October the 6th.

We have a great number of miscellaneous articles to sell at this sale. Anyone desiring to dispose of their property will do well to put it in this sale. Anything to be listed in this sale must be in by September 29th in order to get on the bills. Get your sale date early for fall sales.

I am still buying grain for the Mitchell Grain Co. I made you money last year on your grain and will do so again.

Office Phone 19 — F. O. BALL — Res. Phone 13

First Quality Meats

For Saturday and Monday and other day selling, we have some exceptionally good beef, pork, and other meats. These were chosen with great care, and customers should be sure to take advantage of this selection.

POULTRY—FISH—CURED AND COOKED MEATS, VEGETABLES, FRUIT, ETC.

Hobson's Meat Market

C. HOBSON, Proprietor
MAIN STREET, — TOFIELD

BILLY ARMSTRONG

The youngest piper in Canada, who blew himself to the Highland gathering at Banff. See him smiling—and the rows of medals and a'. Billy may be good, but he has a long way to go, for, 'tis said, bagpipes and the violin are unique in this respect, that a performer on either instrument has never finished learning. Harold Eustace Key, musical director for the Canadian Pacific Railway, who contributed largely to the success of the Banff festival, and who is the authority for this statement, added that another point is that the bagpipes are a certain index of a player's physical and emotional condition.

LINDBROOK

Threshing is well under way here now, that is, those who are lucky enough to have any and some of these grain badly frozen, and with the fine dry weather it will soon be over.

Messrs. Painter and Scott shipped a car load of lambs from here last week.

The testers of the Gas Coy's pipe line here had quite an experience whilst testing the pipe line just south of J. Bailey jr.'s. place here last week. A section burst flying debris over thirty yards, quite a shock for Mr Bailey who was stooking just over the road. Repairs however were made at once, some who saw the "crater" made by the burst said it would hold a hay rack, kind of brings back the old days before Vimy eh? only some of these craters would hold quite a few hay racks.

Mr. W. Lancaster had to execute his pure bred Red Poll bull for obstreperous behavior. Seems the animal got away and was in the vicinity of Mr Glenn when Mr Lancaster heard of it and went to bring him home. He caught him all right and was leading him off, when the bull bunted him throwing him seven or eight feet away. Then Mr. Glenn went to his assistance and in the meantime, Bill had recieved another gentle jolt of a few yards, luckily no bones broken tho'. Then the bull was caught, tied up for the night and sentenced to be shot at dawn. The sentence was duly carried out.

Mr and Mrs. Ross Richard of Edmonton visited Mr and Mrs. J. Brown Jr. last week end.

The weed inspector was around last week spotting patches of weeds etc.

Miss A. Pearce is staying with Mrs. J. Wozencraft for a week or so.

KINGMAN

Mr. and Mrs. Jack Erickson and Connie, and Mrs. Orvild Bray motored to Camrose on Friday.

Mr. and Mrs. E. Erickson and Lily, motored to Edmonton on Wednesday. Lily is taking music lessons in the city again this year, and is studying for her A. T. C. M.

Inga Johnson is continuing her music with Miss Petra Sater of Camrose, for the following year.

Mr. and Mrs. C. Pederson spent Sunday in Camrose.

Mrs. Sam Slutsky left on Tuesday for her home at Foam Lake, Saskatchewan, after visiting for seven weeks with relatives in this district.

Mr. P. Radounsky and Esther spent the week end at Edmonton.

Mr. and Mrs. E. Erickson visited with friends in Daysland on Saturday night and Sunday.

There will be a dance in Kingman on Friday, September 28th. Music by the Blue Bird Orchestra.

CROP REPORT

Issued by the Department of Agriculture, Government of Alberta Edmonton, September 15, 1928

Telegraphic reports recieved by the Department of Agriculture show harvesting operations proceeding satisfactorily over the whole Province. A general rain on September 7, accompanied by light snow in some districts, delayed work for two or three days. Other than this, weather conditions have been ideal. The cutting of wheat is well advanced, but in some scattered districts from 15 to 20 per cent is still standing. The cutting of coarse grains is proceeding rapidly and all harvesting should be completed within a week if the good weather continues.

Threshing is under way in most places with approximately 7,000 machines at work. A large number of Combines and Swathers have been used and reports indicate that they have worked satisfactorily.

Frosts during the third week of August and a heavy frost on the 7th of September have caused considerable damage to all except the early crops, but on the whole the grade should be somewhat better than last year's crop, especially in view of the fact that the grain is dry and is grading straight.

Reports from Peace River state that threshing is well advanced. The The crop in this district is somewhat lighter than last years, especially north of Peace River. A number of all points report that the yield of wheat is running from 30 to 40 bushels per acre. The average for this province, however, will likely be about 25 bushels per acre. The estimated acreage in wheat is 600,000 acres. This will bring the wheat crop to the present year practically up to last year's tot-

HERE AND THERE

By Edward Brice, B.A., in the Barrhead News

Some times the editor's walk between his home and his office takes him through a little woodland path. During the past year or two the trees and bushes have been spreading to such an extent that the pathway became impeded somewhat. The other morning he noticed that some nearby resident had shown enough generosity to clear away sufficient of their obstruction to allow unimpeded walking.

No doubt there was somewhat of a selfish motive in the man's action as he no doubt lived nearby. However, you very often under similar circumstances find that people living very close to some bad portion of road may allow it to remain in a poor condition for years when perhaps a half day's or half hour's work would remedy the defect and in the course of a month their labors would be paid to them many times over by the improvement. Yet consciously or unconsciously they argue that it is no business of theirs to repair a road for the public benefit.

They are logically correct.

They also belong to the great majority.

Therefore an action such as the one mentioned above of one clearing the path away is striking because it is uncommon. The man also shows a very praiseworthy trait of character.

The editor was quite surprised the other morning in having a woman say "Thank you" when he opened the door for her.

A man may give up his seat in a crowded street car, politely raise his hat to the woman and allow her to sit down, but it is a very rare case where the fair one says "Thank You."

Canadian women are very badly in need of a little training in common politeness. Possibly one reason is that even where fathers assume the responsibility of chastising their sons very few undertake the responsibility of chastising their daughters.

EFFICIENCY

Foreman: "Now, Murphy, what about carrying some more bricks?"

Murphy: "I ain't feeling very good this morning, boss; I'm trembling all over."

Foreman: "Well then, get busy with the sieve." —Selected.

WHAT WAS WRONG

A navvy bought a coat and was advised by the salesman to use a coat hanger to keep the shoulders in good shape.

Next day the salesman was surprised to find the navvy in his shop complaining.

"And what is the matter with the coat?" asked the salesman.

"Oh, the coat is alright," said the navvy. "But the wood part of the hanger rubs my shoulders, and every time I turn my head the hook knocks my hat off."

A REAL GRIEVANCE

First Farmer: "How is it you no longer put up at the 'Blue Lion' when you drive to market?"

Second Farmer: "Because they are real frauds! Last winter, when I lodged there for a night, they made a great fuss of me and gave me a big bottle to take to bed. And when I opened it, what do'e think it was? Nothing but hot water!"

VERY EXPLICIT

Motorist: "Is it very far to the next town?"

Native: "Well, it seems further'n it is, but it aint."

A doctor who had been called in to see a patient strongly impressed upon him the necessity of drinking hot water with his whisky. "Otherwise," he said, "you must not take it at all."

"But how shall I get the hot water?" plaintively inquired the patient. "My wife won't let me have it for the whisky."

"Well, tell her you want to shave," answered the doctor, as he took his departure.

The next day the doctor called again, and when the wife opened the door he asked how the patient was.

"I'm awfully worried, doctor," was the reply. "I'm afraid he's gone raving mad. He shaves every ten minutes."

Experiment With Flax Straw

Two Tons Threshed Flax Straw From Saskatchewan To Be Sent To Glasgow

Experiments to be conducted with two tons of Saskatchewan threshed flax straw in Glasgow, Scotland, may result in the establishment of "several factories" in this province.

This is the prospect pictured by R. L. Pritchard, director of the Pritchard Flax Fibre and Pulp Company, Ltd., Glasgow, Scotland, in a letter to the provincial authorities.

Mr. Pritchard asks that two tons of threshed flax straw be shipped to his firm. He wants the straw baled in the smallest possible bulk in transportable bales of two to four hundredweights each and put on rail to the nearest Eastern Canadian port and shipped to Glasgow.

"We desire to have this waste flax straw after threshing with which to experiment and make flax tow from it," writes Mr. Pritchard. "We trust the economic value of this waste flax cultivation of your North West will gain your co-operation in ascertaining what value there is in these short lengths of flax straw which are of no practical use at present.

"In the working of this waste there is no retting or scutching by our process as the operation of the fibres in short pieces is only mechanical. We would like to [illegible] quantity of this waste flax straw could be procured throughout Saskatchewan, what distance the growers would deliver it at the most opportune time after their harvest is finished and what price per ton would induce the flax growers or threshers to save it and deliver it.

"If the quantity and cost of procuring it would be an inducement to the company we would establish several factories to work the straw into fibre in Saskatchewan so that the fibre only would be required to be transported which would greatly lessen the freight."

The provincial authorities will take steps to secure the required quantity of flax straw and the information sought by Mr. Pritchard and do all that is possible to encourage another industry to locate in the province.—Regina Leader.

Question Of Dietics

Vitamin Cure For Deficiency Disease Discovered In 1911

In 1911 Dr. Funk discovered the vitamin cure for beri-beri, a deficiency disease due to removal of the vitamin cover of rice. Soon the vitamin cures for rickets, polyneuritis, scurvy, pellagra and other deficiency diseases were discovered and called vitamins A, B, C, D, the first being fat-soluble "A" and found in fatty foods such as butter, cream, cod liver oil, liver, kidney, egg yolk, germ of cereals, flaxseed, carrots, sweet potatoes, etc. The water soluble "B" vitamins are found in succulent vegetables such as cabbage, cauliflower, celery, lettuce, parsnips, spinach, potatoes, corn, beans, fruits, nuts, milk and yeast.

More Worry For Bill

The record of a baptism, 1604, found in a Cottenham, England, church, refers to a John Coolledge believed to have been an ancestor of President Coolidge. This would have been enough to make Mayor Thompson of Chicago, go on a rampage in the days before his recent collapse.

"Well now, what time do I have to git to work mornings?" asked the new hired man.

"Any time you like," responded Farmer Fumblegate. "See it ain't [illegible] han half-past four."

[illegible] extra [illegible] which [illegible] the [illegible] to pro- [illegible] from the strong [illegible] while the [illegible]

[illegible] Abbey possesses [illegible] many window [illegible] that it is called "The Lan- [illegible] England."

"My husband and I have a joint bank account."

"That must be very awkward."

"Oh. Very convenient. He pays the money in and I draw it out."—Pele Mele, Paris.

Indians Show Interest In Red Cross

Blood Indians Of Alberta Impressed By Exhibit Shown At Lethbridge Fair

At the annual fair in Lethbridge, Alberta, where the Provincial Red Cross had an extensive health exhibit, large numbers of Indians from the Blood Reserves were interested spectators at the booth. Squaws gay with blankets of many colors and kerchiefs of brilliant hue gathered round to hear the story of Red Cross among the sick and crippled children of the province.

The old chiefs were especially impressed by the fact that some of their own tribes had sent children to be cared for in the Calgary and Edmonton Hospitals. The names of the little patients were received in solemn silence but a look of profound wonder stole over their bronze countenances as they saw the pictures of lame feet straightened, and twisted limbs restored.

Little Susan Medicine Pipe was a recent patient, while the son of Two Skins is waiting for a vacancy in the wards.

A tall, princely looking young brave, Mountain Horse, offered to assist the Red Cross in its annual campaign for funds, and his mother came forward with a promise to send some hand-made beaded moccasins as her contribution to the little sick children in hospital.

Uses Novel Rest Cure

Noted Author Finds Handkerchief Over Eyes Keeps Nerves Quiet

Sir Gilbert Parker, the novelist who recently returned from Palestine, where he went to get data for his novel on David, has lying about in his flat a long blue and white spotted handkerchief on the arm of a chair, folded in the shape one uses to blindfold anyone. Asked what it was for, Sir Gilbert said, "I went into Sir Henry Irving's dressing-room one evening. He was lying down with a big silk handkerchief, such as this one, over his eyes, and he said, 'I do this to get ten minutes' sleep every evening. It rests me.'

"I bought two hankies," added Sir Gilbert, "and tried the same effect. I am a very bad sailor, but when I travel now I tie one of these handkerchiefs over my eyes, eat very little for the first two days, and I haven't been seasick for the last 27 years. Now, when I am dictating, I tie a handkie over my eyes as well. The world is shut out. The handkerchief keeps the nerves of my eyes quiet, and so I can dictate for one or two hours without fatigue."

Reliable Weather Forecasts Predicted

Accurate In About 200 Years Says Boston Meteorologist

Weather forecasts may be expected to be accurate in about 200 years, according to George A. Loveland, Meteorologist of the United States Weather Bureau at Boston. Mr. Loveland declares that with the passing of two more centuries sufficient data will have been collected to make reliable forecasts possible.

Forecasts at present are about 85 per cent. correct, he declares. The weather is controlled directly by the sun, he says, but while astronomy is an exact science which has been studied for centuries, meteorology has been studied for about three quarters of a century.

When the effect of the sun's heat on the earth has been studied for two centuries more, Mr. Loveland hopes the meteorologist can with accuracy predict the weather far in advance.

Not Altogether Correct

Interviewer: "I have been informed, sir, that you began life as a poor bricklayer."

Great Contractor: "There are two mistakes in that sentence. I began life as an infant, and there is no such thing as a poor bricklayer."

[illegible] "If you hadn't taken so [illegible] we shouldn't have [illegible]"

[illegible] "And if you hadn't [illegible] have had so long to wait for the next one."

[illegible] "I say, waiter, I [illegible] bad form to speak disrespectfully of one's elders?"

The Waiter: "So I 'ave 'eard, sir."

[illegible] "Then I will be silent [illegible] coach."

The custom of referring to important people as "nobs" had its origin in the "Si nob," abbreviated Latin for "son of a nobleman."

The weasel, whose white winter coat forms the ermine of commerce, is found in various forms from the Arctics to the Tropics.

Would Collect Relics Of Gold Rush Days

Few Reminders Of Past On Old Cariboo Road

Efforts are being made at Kamloops, B.C., to preserve for posterity some of the few remaining relics that marked the picturesque gold rush of the old Cariboo Road.

The road is now a motor highway, becoming increasingly popular with tourists, but a few years ago it was traversed by covered wagons, ox teams and pack trains, while during the height of the Cariboo gold rush camels were brought into use as beasts of burden.

Before the country was opened up by the Pacific Great Eastern Railway and the automobile, practically all the freight was carried in huge wagons hauled by a dozen or more oxen or horses. But today the highway has been completely motorized and there are few reminders of the past except the old log-built roadhouses that years ago were the sole outposts of civilization in wide stretches of wild country.

Isaac Lehman, of Ashcroft, possesses one of the huge freight wagons which, hitched with a couple of others behind sixteen or twenty oxen, could have been seen winding its devious way along the Cariboo road in the old days. It is one of the few that remain and Lehman will give it to anyone who wants it.

Lying along the roadside between Quesnel and Barkerville in the old gold country of northern Cariboo is one of the famous B.X. Express Company's wagons, slung on leather before the days of steel springs. It is rapidly falling into decay. In Quesnel is the famous old coach in which governor-generals and multi-millionaires rode to the goldfields. No effort is being made to preserve it.

Representations may be made to the provincial government to have these relics collected and restored so that they may serve as a reminder of the province's most romantic pioneer era.

Treatment To Control Smut

Result Of Experiment Conducted By O.A.C. Expert

Experiments conducted in Kent County by a member of the staff of the O.A.C. are reported as follows: In addition to formalin, nine different substances were tried for the control of oat smut, some in the form of dusts and some as liquids. The smut in these plots varied from 1.2 per cent. to 12.4 per cent., except the formalin spray which had only a trace of smut. The untreated plots had 24.6 per cent. smut. Hulless oats were treated with formalin both as the spray and sprinkle methods and with copper carbonate dust. Where formalin had been used there was germination injury, where copper carbonate had been used there was only a trace of smut and where no treatment had been given there was 30.2 per cent. smut.

Aged Indian Visits England

The venerable chief, White Eagle, of the Osage Indians, who is now in England, is said to be 105 years old. He has been across the ocean before and was eyed with interest by many Britons during the Queen Victoria Jubilee in 1887. He was born in Colorado when Pike's Peak was a pup, and has seen about everything that could happen to the West. He is a good Indian and still a live one.

The first perambulator was built in 1780 for the baby daughter of the fifth Duke of Devonshire.

Class "A" Fairs

Western Canada's Five Big Fairs Were Most Successful This Year

On the whole the five big western fairs this summer were an unqualified success. The first of these, at Brandon, was seriously hampered by frequent rains, and while this would not affect the quality of the exhibits, generally, it did curtail attendance, adding nothing meanwhile to the comfort of the visitors at any time. The remaining four shows had the finest of weather, and new attendance records were created at each of them. Featuring the livestock exhibits on this circuit were outstanding entries from outside herds in the beef cattle classes. A uniformity of type and quality seldom attained in widely separated herds was particularly noticeable in Shorthorn classes, and the competition in both Shorthorns and Angus with American entries providing an international aspect, was especially keen. Dairy herds from five provinces were strongly in evidence at a number of these fairs, and here again competition was of the best. At all points local entries in the more important classes of livestock were fewer than might be desired, this being perhaps less true of the Regina exhibition than of the others. Competent critics declared the Regina Fair to be outstanding in regard to its stock entries.

The far famed Calgary stampede attracted visitors from all parts of Canada and the United States and the popularity of this event continues to grow. A perfect week of hot weather boosted the gate at Edmonton. Saskatoon experienced only one deluge of rain and this proved no deterrent to the eager crowds. New buildings and equipment replacing that lost through fire earlier in the season were completed and ready for the big event, and the Saskatoon management are to be congratulated on the initiative and enterprise which they displayed.

Always Prepared For Guest

Ancient Castle In Ireland Keeps Up Interesting Custom

On the north shore of Dublin Bay stands Howth Castle, an ancient Irish stronghold. It is now owned and occupied by a retired naval commander and a former shipmate of King George when Prince of Wales, who is careful to keep up its old traditions. At every meal, for instance, an extra place is provided at the table, and is reserved for any stranger arriving.

The origin of this interesting custom goes back to ancient times, when the heir of one of the Lords of Howth was kidnapped by gypsies, and only given back on condition that the hospitality of the castle should never be refused to anyone.

Where Canada Leads

Statistics show that Canada now leads the world in the production of nickel, asbestos, hydro-electric power and newsprint. The Dominion has the second greatest number of telephones in use, the second greatest number of automobiles, and the second greatest coal resources, and is third in the production of silver, gold and aluminum.

A visitor to a harvest festival service at a country church was admiring the beautiful flowers on the altar and elsewhere.

"Yes," said the old verger, "they are very nice, I'll admit. They are given away to those who are sick after the sermons."

Newspapers Of Early Period

English Mercurie, Published In 1588, Tells About the Spanish Armada

In answer to the claim made recently in Germany to the effect that the copy of the "Augsburg Aviso," dated 1609, now on exhibition at the International Press Exhibition at Cologne, is the oldest newspaper in existence, J. W. C. Bestland, 214 East Broadway, a collector of rare manuscripts, has produced a copy of the English Mercurie, printed in 1588, which he claims is the oldest original newspaper in the world today.

The English Mercurie, which was printed in Whitehall, Eng., on July 23, 1588, carries an account of the sighting of the Spanish Armada off the coast of England.

It is $7\frac{1}{2}$ by $9\frac{1}{2}$ inches in size, contains four pages and is printed on hand-made paper. It was printed during the reign of Queen Elizabeth by Christ Baker, Her Majesty's printer.

Bestland also has a copy of The Weekly News, printed in London in 1606 for Jeffrey Chorlton, to have been sold at Chorlton's shop at the great door of St. Paul's Church in London.

It was printed during the week of Monday, January 31, of that year, and contains an account of the execution of Guy Fawkes and seven other persons who endeavored to bomb the House of Parliament during the reign of King James.

The account is headed "Gunpowder, Treason and Plot." The foregoing papers were purchased thirty years ago by Bestland in England at which time he also secured an English prayer book which was printed in 1609.

Bestland also has a copy of The News, printed in London in 1665, containing an article describing the great smallpox plague that occurred in that city during that year. It was published by Thomas Newcomb, of London.

A copy of The London Gazette, published Monday, September 10, 1666, giving an account of the fire that swept London a week preceding the date, is also owned by Bestland, who claims that these publications are original and the first one mentioned is, so far as he has been able to learn, the oldest in existence.

Stuart River District

Western Canadian Business Man Establishes Model Farm In B.C.

J. G. Whiteacre, a well known western Canadian business man who is developing a model farm in the Stuart River District, Central British Columbia, advises that growing conditions have been favorable along the Stuart this year, and that he has excellent crops of wheat and oats. Mr. Whiteacre is performing a great service for the Stuart River section in the efforts he is making to place agriculture upon a profitable basis, the Mandalay being the model "ranch" of the interior. The Stuart lake and river district is one of the most beautiful parts of British Columbia and the pioneer settlers are establishing some very fine farms. The country abounds in game and the finest of trout and other fish are found in every lake and stream.

Sandy (to his daughter): "Young McPherson has asked me for your hand, and I have consented." Daughter: "You dear old dad!" Sandy: "So never mind going to the dentist's now to have that tooth pulled; wait until you are married."

Venus is almost exactly the same size as the earth.

The Influx From Overseas

Steady Stream Of Settlers Coming Into Western Canada

Settlers have been coming into Western Canada in a steady stream since the beginning of the year, and nearly all have gone direct to the farming districts to take up land or to take employment with farmers. Many came to join relatives or friends already settled. Since January 1st, to the end of August, 41,381 settlers from overseas passed through the Winnipeg office of the Colonization and Agricultural Departments of the Canadian National Railways. Of this number 6,603 were British workmen who came out to take part in the grain harvest, many of whom, it is expected, will remain in the country for the purpose of taking up land. The others were mostly agricultural folk from Great Britain, Scandinavia and other northern and central European countries. In addition to regular trains, it required 82 special trains to transport these people from the seaboard, and inspectors of the department who meet all trains carrying immigrants, travelled no less than 44,148 miles in the performance of their duty. In addition to the influx from overseas, a large number of farmers and others have come to Western Canada from the United States this year. Not a few having been attracted by the mining developments.

Russians Are Clever Students

New Canadians Make Most Creditable Showings At School Here

The Edmonton Journal says editorially: "A Russian lad who started at school in Calgary four years ago without a word of English has made an average of 91 in Grade 9 examinations. On one subject he made 100, and even on English literature, in which a foreign-born student is naturally at a disadvantage, he was marked 84. The achievement of this Calgary boy goes along well with that of a Russian girl in Toronto who at 15 did not know any English and at 19 was declared a brilliant student at Toronto University. It will not do to be scornful of the new Canadians. They have great possibilities, even as scholars, and these two young Russians who have so distinguished themselves are cases in point."

Oldest Tennis Court Found

Built In England Four Centuries Ago By Henry Eighth

Four hundred years ago King Henry VIII built the oldest tennis court extant in this country. The "bluff" monarch had taken over the great Palace at Hampton Court, which Cardinal Wolsey had built for himself out of his ample revenues; but it needed one or two little luxuries, and the tennis court was one. King Hal himself was a player here, and Elizabeth an onlooker, if not more.

The most famous of onlookers was probably William Shakespeare, for here he and his company appeared before the court in a round of festivities, which included play of every kind. Greatest of all the games played on this historic court was that one in May, 1885, when our renowned champion, George Lambert, lost his world position to Thomas Pettitt, the American, by five sets to seven, in a contest occupying three days.

"These rich people make me sick. What's the use of having money if you don't know how to enjoy it?"

"Well, what's the use of knowing how to enjoy it if you haven't got it?"

Employment Bureau Manager: "So you'd like to employ a mason. What kind do you want?"

Employer (a Scot): "I'd like to have one of those free masons I've heard so much about."

A German engineer is building an automobile 125 feet long, with fuel capacity for a month's travel, to use in the Sahara desert.

"Suddenly a man rushed out and said to me, 'Hands up, or I will blow your brains out.'"

"And did he?"—Lustige Kolner Zeitung, Cologne.

RAILWAY OFFICIALS AND DIRECTORS ON TOUR

CHAPTER I.—Continued

"Good-bye old pal," Donald whispered, his arms about the collie's shaggy neck. The dog turned slowly and unwillingly toward the house.

In the meantime, within the house, John McLean and his wife were discussing the possible result of the father's seeming severity.

"Donald is a great trial to us now, John," said the mother, "but we must not forget the happiness he has brought us in the past." She gazed long and lovingly at a photograph of her son as a child; then, with head bowed, her lips moved in silent prayer.

Upon his arrival at the wharf Donald found his baggage, destroyed the pass he had been in the habit of using, as his father was owner of the steamboat line, and bought a ticket to Bangor.

Reaching Bangor, he chose less expensive quarters than was his custom, locating at the Penobscot, on Exchange Street. In no mood for sleep he decided to take a stroll. Outside an all-night restaurant was a long string of cars, and from within came the sound of happy laughter.

A feeling of loneliness, coupled with a slight hunger induced him to enter. A big man sitting at the counter, attacking vigorously a T-bone steak, was the centre of interest, as evidenced by the cluster of taxi-drivers and other night-lunchers about him. He wore a wide-brimmed hat, high leather boots, corduroy trousers, a blue flannel shirt, and a red-mackinaw coat hung on the wall behind him. Blond, sun-washed hair stood up from his head aggressively, and his steely blue eyes were set in a face tanned a brick red.

"Yes, sir," spoke the blond giant between mouthfuls, "she's a he-man's country, she is. None of your bum chow that I used to git here in these Eastern loggin' camps, sow-belly and beans three times a day, and workin' for forty dollars a month from daylight until dark. No, siree! Me for the Coast with its four bucks a day. And talk about grub! Say, there ain't any hotel that puts up better scoffins than we git in the loggin' camps in good old B.C."

He looked around at his audience and, convinced that they were interested, he continued. "Yes, sir! British Columbia for mine. Say! What'd you think of three fir logs that makes a carload? Of cedars ten feet through? Of alders that you can't git your arms round? Some different than them toothpicks you got out there," jerking his thumb contemptuously toward the Penobscot River. "And minerals," he went on, "the mountains are filled with 'em—miles and miles that ain't never bin prospected. Prospectors comin' in every day with new strikes. And talk about fish! I seen the fish so thick they choked the rivers; you could darn near walk on their backs. That's the country, fellers. That's the place for men with git-up-and-git." He finished his repast with a gulp of coffee, fished a sack of tobacco and brown paper from his pocket, and rolled a cigarette. "A brand new country," he ran on, his eyes shining with enthusiasm, "that ain't half explored yet, and richer 'n a pail of cream. How much do I owe you, boy?" he asked as he drew out a wad of banknotes, peeled a bill from the outside of the fat roll and threw it carelessly on the counter.

"Keep the change," he said with a lordly air, then swaggered through the door. Several of the taxi-drivers followed, loudly importuning him to ride.

Donald finished his lunch and sat for a time smoking.

"That guy was a nut to flash his poke in front of that gang," observed the waiter, "Guess he's big enough to take care of himself," he added.

As Donald stepped out of the restaurant he saw the big man across the street with four of his former audience. From the shadow of a doorway he saw the party enter a ramshackle building after hearing one of them promise to get the Westerner a drink in spite of prohibition. Donald decided to walk by the place, and was startled by the sound of crashing glass and indications of a struggle.

"You will, will you?" he heard the unmistakable voice of the big Westerner.

With a bound Donald was at the door. He found the Westerner badly battered, but holding three men at bay. The fourth lay in a crumpled heap in the corner.

Only one of the men noticed Donald's entrance. He was a big, burly brute with the swarthy features of the Southern European, and he came straight for the intruder, crouching low. Donald's left had caught him on the eye, and as his head flew back Donald crossed viciously with his right. The blow landed with an impact that sounded like a cleaver sinking into a meat block, and the man dropped as though shot.

A rat-faced man, standing near a side door with a bottle in his hand, shouted a warning as Donald sprang to the Westerner's assistance. Both men turned their heads. The hamlike fist of the big blond giant struck the larger of the two men such a terrific blow on the side of the head that the recipient whirled completely around and sank dazedly to the floor.

"Duck!" yelled Donald, as he saw the little man's arm go back. The Westerner dropped, and not a second too soon. The bottle whizzed over his head, bringing a shower of plaster from the wall where it struck. With a curse the big man turned, but the little bottle-thrower had disappeared through the side door. The remaining thug, a tall, cadaverous looking youth, took one wild look round, then bolted through the front door.

The Westerner, gasping and rather pale, seized Donald's hand in his huge paw. "Pardner, you saved me from a hell of a lickin'! 'Bout two minutes more and. . . . ."

"Grab your coat and hat and we'll get out of here before the police come," interrupted Donald.

They went through the alley to Hammond Street, then down Exchange Street.

"Better come up to my room and have those cuts attended to," suggested Donald.

The Westerner touched gingerly the rapidly swelling lump over his ear. "You know," he observed, "those fellers never intended to start a rough-house. The little dip was pretty slick, but I caught him with his hand in my pocket, and when they saw that they had a fight in their hands, they tried to lay me out with a billy. Should have seen the funny look on that little rat's face when he lammed me with that loaded stick and I didn't go down. Guess this old bean of mine must run pretty heavy to bone." He finished with a chuckle. He looked at Donald curiously. "You sure handed it to that big dago quick. How did you horn in on the row anyhow?"

Donald told of being in the lunch-room when he had displayed his money and of the waiter's subsequent remarks.

"Huh!" snorted the big man disgustedly, "guess I need a guardeen."

With the assistance of the obliging night-clerk, who furnished antiseptic and court plaster, they patched the hurts of the much-bruised Westerner.

When the clerk left the room the big man turned to Donald. "My name's Jack Gillis. What's yours?"

"Donald McLean."

"Damn good name," he averred, looking Donald over critically.

"I bin visitin' my old home in Nova Scotia," he ran on. "Come down here to visit my sister. I'm gittin homesick for the Pacific Slope, and I'm goin' to hit for B.C. tomorrow mornin'."

"I'm on my way to Vancouver," said Donald.

The effect of this statement on Gillis was electric. "Do you belong in B.C.?" he questioned excitedly.

Donald told him how his glowing description of that land of promise had induced him to go West, and that this would be his first visit to the Coast.

"Well," observed Gillis, "if I've been the means of addin' a man like you to the population of B.C., then Jack Gillis has done some good."

"That's a real compliment," smiled Donald.

"I'm goin' on the mornin' train," remarked Gillis. "I'd like to have you travel with me."

Donald nodded.

(To Be Continued.)

Canada Wants No Shirkers

Lord Advocate For Scotland Says There Is No Place For Whiners Here

Canada is no place for "whiners," the Rt. Hon. H. P. Macmillan, Lord Advocate for Scotland, said in an address to the Victoria Canadian Club in referring to the troubles over imported English mine workers for the prairie harvest fields.

"I should like those who came to this country to read a little of Canadian history and understand some of the hardships faced by the pioneers here, by their womenfolk and their children to develop and settle this country." Mr. Macmillan said. "Workers who come across here and whine and complain of hardships don't know that they are born. This is no country for whiners. It would never have progressed as it has unless the people who came here, your fathers and some of you yourselves, had been willing to endure hardships.

"The man who comes here can't expect to land on a down pillow at once, but must face the spirit of the new land. Canada wants no shirkers.

"And I am sure those who come here and are willing to work and pioneer will be treated in the right spirit as they always have been. I am satisfied from what I have learned and seen on my way across, that among you those who merit a welcome will receive it."

Music Was Wedding Gift

Carried By Radio and Telephone From Switzerland To Manchester, Mass.

Ernest Schelling, renowned pianist, sat in his villa at Celigny, Switzerland, and played wedding music which was heard at Manchester, Mass., U.S.A., by guests at the wedding of Miss Anne Bulen Dennett, daughter of Mr. and Mrs. Carl P. Dennett of Boston and Manchester, and William Chase Paulton, of Santa Barbara, Cal.

The music, which was carried a distance of approximately 4,000 miles by telephone and radiotelephone, was the wedding gift of the pianist who is an intimate friend of the bride's father.

The ceremony took place at 5 o'clock, and 5:15, during the reception, the telephone brought to the Dennett drawing room the strains of Mendelssohn's wedding march. This was followed for half an hour by a number of Mr. Schelling's own compositions.

The music was conveyed from Switzerland to London by telephone, thence by radio to Boston, where it was relayed to Manchester.

Farmers whose land was used by passing picnic parties report that this year's crop of pop bottles, popcorn boxes and bread crusts should run about 25 bushels to the acre.

One view of an athletic man is the fellow who hires a small boy to cut the grass so he can play golf and obtain a little exercise.

A lightning conductor does not attract lightning. It merely conducts the electricity to earth when lightning strikes a building.

Horses have no eyebrows, and fishes no eyelids.

Your Hands Need Cuticura Soap

Every day to keep them soft and smooth. Bathe with either hot or cold water and always dry thoroughly. If chapped, red or rough use hot water and Cuticura Soap, rubbing in Cuticura Ointment after drying, especially at night.

Every year more and more Christie's Arrowroot Biscuits are sold because their Purity and High Quality has always been maintained. In the store or on the 'phone, always ask for Christie's Biscuits.

Chinese Habits and Customs

Everything Is Done Directly Opposite To Western Style

When two Chinamen meet they shake hands with themselves, not with each other. The chief topic of their conversation is food. The boys in China have girls' names and wear earrings, the men fly kites and play marbles, the women wear trousers. Chinese ships have no keels, the roses no scent. Books are read from the back forward and from the right to left. A Chinaman scratches his foot instead of his head when he be is puzzled. He can divorce his wife for talkativeness. He never quits a job, but gets a leave of absence and forgets to return.

A Chinaman's dinner starts with dessert and ends with soup. He pays more for suet than for beef. Most of his money is made of brass. All domestic servants in China are men. They never talk back to their employers. When invited out to dinner a Chinaman takes a servant along with him to help at table. Should the invited one be forced to remain at home through illness the dinner is sent to him. Chinese who can afford it boil their fish in wine. And, if they are rich enough to do so, use silver tooth picks. All beverages are served piping hot in China. John Chinaman imbibes freely of cups that inebriate but is seldom seen in an intoxicated condition.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Learned His Lesson

"Lots of reading on it," he observed, as he perused the text of the bond application with great interest.

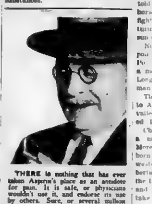
"Huh!" remarked the clerk with the paper. "I'll bet you didn't read your marriage license that carefully."

"Maybe not," was the reply, "but ever since I signed that I'm reading everything."

Alpha: "What was the denomination of that bill you loaned me?"

Theta: "Episcopalian, I guess; it keeps lent."

Friction is greater between soft substances than it is between hard substances.



THERE is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red;

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE WISDOM TOOTH

Otherwise the third molar, the word "Wisdom" being of no real significance excepting as it relates to the period of eruption which is at the approach of adult age.

Perhaps it has been your good fortune not to have had this tooth erupt for in truth, it is often a trouble bearer; it is the dental "degenerate," generally stunted in size but frequently absent altogether, but why missing?

This, the gradual lessening of the function of mastication and the reduction of the force of jaw movement, due to the substitution of softer and less gritty foods by civilized man, has led to a marked degeneracy of the dental mechanism.

So that, through economy of growth, due to disease, the tooth germ may fail to develop, or, developing, the jaws are so greatly contracted through disease, that frequently there is lack of space for it to erupt into position—a condition analogous to that of the eyeless fish of the Mammoth Cave. Nature cutting off that which goes unused.

Just a word more. Occasionally the unnatural retention of this tooth in the jaw—so-called "impaction," leads to serious disturbances, neuralgic pains, local infection, or constitutional ills. So when your physician, finding no specific cause for your general ill health, orders that "impacted" wisdom removed, you will better understand the reason.

But don't worry should the wisdom teeth not erupt; the chances are that you have been spared trouble.

Chief Buffalo Child Long Lance

Talented Western Canadian Is Author Of New Book, Called "Long Lance"

A man of magnificent appearance came to the office of Cosmopolitan Book Corporation last year and asked questions on the technique of writing a book. He was not seen around the Cosmopolitan offices again for about a year. Then he returned with a complete manuscript, left it silently, and was gone again.

The next day the manuscript was circulating around the office, page by page and being avidly read by half a dozen people at once.

The author was Buffalo Child Long Lance, a chief of the Blood Band of Blackfoot Indians. He had written how as a boy he suffered the tortures of training as a warrior and was educated in the teachings of medicine-men and wrinkled old braves. He had told the stories of a babyhood on horseback, of buffalo-hunting, bloody fighting, awesome "medicine," of capturing wild horses, of war and peace, sun dances and happy feasts.

Now a college graduate and an appointee by President Wilson to West Point, a hero of the World War and a most charming personality, Chief Long Lance turned up as a literary man of a high order.

The book was a rare contribution to Americana. The publishers prevailed on him to let the book be called "Long Lance."

Chief Buffalo Child Long Lance is a most extraordinary personality. More than thirty years ago he was born an ordinary Indian baby on the western plains in what is now Alberta. To tell of his boyhood before the Blackfoot Indians signed a treaty and went to the reservation would take the edge off his amazing book.

Had Some System

Hyde: "Your wife is very systematic, isn't she?"

Parke: "Yes, very. She works on the theory that you can find whatever you want when you don't want it by looking where it wouldn't be if you did want it."

New York now has thirty plants turning out airplanes and accessories in the metropolitan area. There are [illegible] to be 700 privately owned planes in the city.

Little Helps For This Week

"The Lord thy God, He it is that doth go with thee. He will not fail thee nor forsake thee."—Deut. xxxi: 6.

Yet if we will one Guide obey,
The dreariest path, the darkest way
Shall issue out in heavenly day.
And we, on divers shores now cast,
Shall meet, our perilous voyage past,
All in our Father's house at last.
—Richard Chenevix Trench.

So long as our existence lasts we must not give up the duty of cheerfulness and hope. He who has guided us through the day, will guide us through the night also. The pillar of darkness often turns into a pillar of fire. Have patience and perseverance; believe that there is still a future before us, and we shall at last reach the haven where we would be.
—Arthur Penrhyn Stanley.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use and certain and satisfactory in its action.

Room Was Too Small

An angler was describing to his friend a salmon he had caught.

"How big was it?"

"Biggest salmon you ever saw," said the sportsman.

"But that doesn't explain much to me," argued his friend. "The only salmon I ever saw was in a can. Measure with your hands to give me an idea."

The angler glanced at the walls of the room.

"All right," he said, "but we'll have to go outdoors to do it."

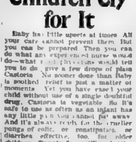
Minard's Liniment for Every Pain.

First Separator Came In 1882

The first centrifugal cream separator was imported into Canada from Denmark in 1882.

Many a man of few words keeps them working overtime.

Are *You* Ready



When *your* Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug. Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueller pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

EDMONTON

A Commercial Centre of Alberta

Through the co-operation of The Tofield Mercury we review many of Edmonton's manufacturing, wholesale, retail and professional firms, which are pioneers in this region and that have helped in a large way to make Edmonton a prosperous City and Community in which to live and work. Discretion has been used by the editors to review only business firms that are leaders in their respective fields of commerce and whose business policies carry recognition of years standing. This section edited by International News Syndicate, Spokane, Calgary, (Hotel Palliser Bldg), San Francisco. All Publishing Rights Reserved.

IMPERIAL OIL LTD.

DISTRIBUTORS OF "PREMIER" AND "ETHYL" GASOLINE AND "MARVELUBE" OIL

With Division Headquarters at Edmonton, under the direction of Mr. Frank Turley, are distributors of gasoline, oil and greases known for their high quality and general efficiency. "Premier" and "Ethyl" gasoline and "Marvelube" oil is available at service stations conveniently located in Edmonton and thruout Canada.

With the rise of the automobile industry to first place among the industries of the nation, with automobiles by far the predominating means of transportation, there has arisen an entirely new business of oil refining and distributing—a business which has made itself an indispensable factor in every community.

No business is more essential and valued than gasoline and oil distributing and we know of no better representative of this business than the Imperial Oil Ltd.

With its products available at many of the more prominent service stations throughout Edmonton and the Dominion, this Company is prepared to serve the motorist in a most capable manner. Their business has grown by strides and carries prestige for no other reason than the high quality of its product and its efficient service to the public.

"Premier" "Ethyl" gasoline needs no coaxing to spark and no wasteful crowding to keep the motor running. Its full free vaporation is natural under all conditions, taking the scientifically correct proportion of air that means a clean, dry, all burning explosion of true economy. Its ideal starting mixture ready for the faintest hint of the firing spark or the heaviest pulls of traffic emergency.

"Marvelube" oil permits smooth travel with better effect on your engine—giving maximum driving comfort without motor meanness or the delusive self-bribery of empty saving. Not only is "Marvelube" oil of high quality, but the company realizes that smooth motor performances also depends on the quality of oil used in your engine. The motor oil of this firms distribution is graded to suit every type of motor in use.

The products of the Imperial Oil Ltd are served to the public with that distinctive courtesy which makes the stations of its agents popular.

The officers of this company are men whose service to the community certainly need no comment. They are public spirited in every way.

Edmonton Auto Spring Works

Located at 95th Street and Jasper Avenue in Edmonton, manufacture all kinds of automobile springs for car or truck. Special attention given to spring repairing. A firm whose interests are devoted exclusively to this field and maintain one of the best and most complete shops in Alberta, under the direction of Mr Harry McCoy.

In this age of the automobile and rapid transportation, comfort has become a factor of paramount importance. Not only does one wish to be taken to his destination as rapidly as possible, but with the least degree of discomfort. Thus has evolved the science of automobile spring manufacture.

Mr Harry McCoy who heads this firm, has made a deep study of this business and is amply fitted to advise one on the proper selection of springs for his car; those which will insure the greatest degree of comfort and service. The kind of springs with which an automobile should be equipped depends upon the type of body and weight of the car. If the machine is a light one, a spring that will give easily and absorb the shock is advisable. If the car has a heavy body, another type of spring may be used to better advantage. It has been found that the quality of the spring depends upon two factors: the quality of the steel and the method of heat treatment it receives. Upon these factors depend the durability and resiliency of the spring. The Edmonton Auto Spring Works have in stock and manufacture to special order, only the best grade of springs, which are so designed that the weight of the machine, (passenger car or truck) is evenly distributed over the entire spring.

Much of the trouble with springs experienced by automobile owners is due to the lack of proper care. A repair and inspection department has been established by Mr. McCoy. Employees of this department will make an intelligent inspection of the springs of your car and if repairs are needed the work will be done by expert workmen at a reasonable charge. They specialize in resetting springs to proper tension. It behooves everyone who may be planning to take a long trip by machine or using their car for heavy hauling, to first have the springs tested as by making a small repair the cost of a new spring may be saved, in addition to reducing the depreciation and wear on the car, a highly economic procedure.

The Edmonton Auto Spring Works are a progressive firm ever ready to acquaint the novice with the worth of its service. Commercial houses operating trucks and cars for utility and delivery purposes regard the daily condition of its car springs as a serious matter to be regularly checked for wear and tear. Undoubtedly those of us residing in a rural district would be "money ahead" in following suit.

The Lindsay Walker Co. Ltd

OUTDOOR ADVERTISING

A progressive and well known firm with offices at 10728—98th St., in Edmonton, is a progressive concern which hold the co-operation and and good will of the public and aids in the development of Edmonton and vicinity through the outdoor advertising service they render.

The Lindsay Walker Company Ltd. is prepared to execute a high class posting service. The greatest care is exercised to make their posters artistic, aiming as they do, to add rather than detract from the landscape.

The publishers wish to direct the special attention of our readers to the Lindsay-Walker Company Ltd. and to the co-operation and good will extended this firm by the public. This concern aids in the development and expansion of Edmonton and vicinity through the valued service they render. They maintain a well trained organization, thus assuring the public of first class service. Their business places in local circulation thousands of dollars which would go elsewhere if this firm were not here to render such essential service.

Through out-door advertising this firm promotes the progress and expansion of individual corporations and the community itself. Artistic in its execution and careful and conscientious in its policies it provides a valued and necessary service in the most admirable manner. It is the duty of the individual to lend his support to such concerns as this one, for in doing so he thereby indirectly promotes his own welfare.

This company is complying with the trend of public opinion of the times as regards outdoor advertising and bulletin display work. They do not place any of their bulletins where they will mar a beautiful landscape or natural scenery. Neither do they place their bulletins where they will obstruct a view of railroad crossings, road intersections or other dangerous spots. They are complying with the spirit and letter of the law along these lines. All of their advertising structures are erected on privately owned premises and properties, for which they pay an annual rental.

In making a review of Edmonton business firms we desire to call the attention of the public to the position the Lindsay-Walker Company occupy in the business world, rendering as they do, a service always to the benefit of the community.

Johnstone Walker Ltd.

Located in Edmonton at 102nd St and Jasper Avenue. Is one of the prominent mercantile houses of the city, comprising special departments and carrying a large and varied stock. Johnstone Walker Ltd. have earned a worthy reputation as a shopping centre.

Johnstone Walker Ltd., is one of the largest in Northern Alberta drawing trade not only from Edmonton but from all the surrounding territory. They carry a large and complete stock of general merchandise in which may be found products of the best manufacture on the market at prices that are as low as possible in keeping with sound business methods. Their annual turnover represents many thousands of dollars in factory purchases and their consequent buying power permits the offering of exclusive merchandise at rock bottom prices with an occasional "special" from time to time.

Necessarily, the establishment is up-to-date in every respect and its many departments are replete. This is particularly true, in their wearing apparel and dress goods sections where are displayed the modes of the hour in the various materials and shades which have been approved by sooner has any style been accepted by the leading fashion authorities than it makes its appearance at this store and is presented at prices within the reach of all.

Each department being somewhat in the nature of a complete store in itself provoke favorable comment and so the name "Johnstone Walker Ltd." has become a general expression of the local public when shopping. Their hosiery and general ladies' wear department is especially popular. There, are carried a complete line of hosiery in the latest weaves and shades; also dainty lingerie for milady by the foremost makers experienced in accentuating character and grace in one's intimate wardrobe. Gloves and millinery for outward expression are still another offering. Truly the feminine wardrobe need not be expensively gathered in order to be correct and distinctive. To the contrary, the buyer for this firm's apparel department has exercised good judgment and stocked merchandise of good taste which is available at low figures.

Their cloak, suit and dress department carry the label of manufacturers of national reputation—of firms whose policies permit the release of garments guaranteed to be the last word in style and designed by fashion experts of international reputation, properly modelled in order to insure the necessary effect.

Shoes for men, women and children will be found elsewhere in the store and the critical customer has a wide range of good looking footwear by the leading makers to choose from and be assured of size and comfort.

The management of Johnstone Walker Ltd., is in the hands of Mr. Cecil Sutherland who has spent years in the study of this business. The general executive end strives to further their knowledge that they may better serve the public. We take pleasure in complimenting them through the press upon the success they have attained and urge our readers to visit their store when in Edmonton.

Bruce Robinson Electric Ltd.

Home of "Frigidaire" and Delco Farm Lighting Plants

With display rooms in Edmonton located at 10514 Jasper Avenue and represented in Tofield by P. M. Haugen, are factory branch distributors for Frigidaire, made by the world's largest manufacturer's of electric refrigerators and backed by the resources of General Motor's Corporation. The local distribution of this product as well as Delco Farm Lighting Plants and service is handled under the direction of Mr. L. W. Saddler, who is an authority on the subject of household refrigeration.

To-day Frigidaire, electric refrigeration, has become an accepted convenience in modern homes and a vital necessity in stores and hotels. Frigidaire is not an experiment—something that you may invest in with great anticipation and then have it fail. It has been tested and tried with confirmed success and is today in operation in many of the largest hotels and apartment buildings throughout the world; there being more than 600,000 placed on the market in twelve years.

Frigidaire is automatic. It keeps your refrigerator cold and your food fresh under all climatic conditions. It is operated by electricity and functions unbelieveably silent. There is nothing to turn off, nothing to remember, nothing to worry about and it can be installed in your present ice box. Special models are available for home installation as well as for commercial use in delicatessens, meat markets, cafes, dairies, etc.

Back of Frigidaire are the vast resources of the general motors corporation with its great engineering facilities, its financial strength, its rich experience in quantity production. These are the essentials that have made Frigidaire dependable, practicable, economical, low in price and easy to buy, as they are sold through the policy of the General Motors Corporation plan of deferred payments.

Bruce Robinson Electric Ltd. are interested in placing this ingenious device before the public served by this newspaper and Mr. Sadler or his local agent, Mr. Haugen, will be glad to arrange for demonstration without incuring any obligation on the theory that once you have seen the machine in operation you will not be satisfied to do without it.

We feel the utility value of this device is of such consequence that we appreciate the courtesy of Mr. Sadler in placing this review before our readers and suggest that persons interested call at the Edmonton sales room and see Frigidaire in actual operation.

Regarding the installation of Delco Farm Lighting plants which are now in universal use, prompt and efficient maintenance service is guaranteed, purchases of such equipment which is in keeping with the sales policies of the General Motors Corporation governing all products of its manufacture.

McCallum's Agencies

REAL ESTATE AND INSURANCE ESTABLISHED OVER 20 YEARS

Located at 10209-100th St. in Edmonton, handle real estate, exchanges, rentals and general insurance, doing an extensive business in the Tofield district. They specialize in and are headquarters for farms and city realty transactions. Mr. J. S. McCallum heads this firm.

The real estate firm of today is one that meets the demands of conservative people of this advancing day and age where all are seeking investments that not only are increasing in value but where a permanent income is assured. Mr. McCallum of the McCallum agencies is doing more than his share to meet that demand in Northern Alberta.

He specializes in and does a large business in farm lands, making or arranging loans on them as well as exchanging such properties for city lots and property and vice versa.

Through the service offered by Mr. McCallum the public has at its command a man who has studied the development of the province and has been closely identified with the growth of Edmonton and Alberta. Thus, he is well acquainted with the various soils in this section.

He has listed country and town property that could not fail to be attractive to anyone interested in the purchase of real estate. The residents of this community have learned that his word is as good as his bond as he never lists property above its true value and his familiarity with local conditions makes him an authority on property values.

Mr. McCallum has established correspondence throughout the Dominion who keeps him informed of the real conditions of property exchanges offered and wanted. His broad operations render his services invaluable to persons interested in negotiating deals.

In making this review of the onward progress of Edmonton, we are glad to compliment the McCallum Agencies and Mr. McCallum upon his standing in the community and professional world.

Burnett's Beauty Parlor and Vanity Millinery Shop

Located at 10120 Jasper Avenue, in Edmonton, is one of the best equipped and well managed barber shops and beauty parlors in the city, under the direction of Mrs. Annie Burnett and her son, I. Burnett who conduct the Vanity Millinery Shop in connection. Their training and knowledge obtained by years of experience has built for them the well merited patronage accorded.

In compiling a business review of Edmonton, we felt that it would not be complete without a word to Burnett's Beauty Parlor, inasmuch as this institution is of special interest to women. The management has built up a business that could well take its place in much larger city than Edmonton, for it has acquired a reputation that many more pretentious establishments might envy.

The well known profession of beauty culture has developed in the past few years from a trade to an art of science. This day an age of specialists has found the art of beauty culture advancing with rapid strides.

Burnett's Beauty Parlor is well equipped with all the latest devices for expeditious business, including the installation of a permanent waving machine, the latest word in representing the development of this art.

Their work comprises all the advanced methods such as shampooing, hair dressing, marcel waving, permanent waving, in which they specialize, water waving, American waving, French paper curl, scalp treatment, singeing, bleaching, dyeing—both hot and cold process, manicuring, massaging, face packs, hair bobbing and shingling. The parlors are electrically equipped and have up-to-date violet ray apparatus with special attachments for scalp, face and throat treatments.

To be accurate in their work, years of study must be given to the formation of the skin, supplemented with years of practical experience.

The management and their assistants desire to please and their splendid service makes their beauty parlor worthy of mention in this edition.

Appointments may be made by 'phoning 2133 Edmonton.

The Vanity Millinery Shop is operated in connection and carry at all times a complete stock and wide range of smart and trim hats for the Miss and Misses in the present day modes.

These are selected with discretion from the foremost makers and are up-to-the minute in style and quality and offered at reasonable prices. Out-of-town residents are especially invited to familiarize themselves with the service of these two shops.

The Wilson Stationery Co. Ltd.

10080 Jasper Ave. in Edmonton, under the direction of Mr. J. C. Walkinshaw, are successors to the E. N. Kennedy Co. having bought out this firm on April 12th last. A complete line of office furniture, files, desks, safes, bookcases, business efficiency systems, including office stationery, printed and ruled forms, blank books, domestic stationery, school books, Kodaks, amateur developing, films, Brunswick Panatropes and records, the latest fiction, best known reprints, greeting cards, etc. For all occasions and in good quantities and assortments are carried.

The Wilson Stationery Company Ltd. is Edmonton's leading firm dealing in office furniture, general efficiency methods equipment, and accessories. They handle only the best line of manufacture which have been selected after a careful survey of the market.

Their service is designed to meet with the approval of those wishing exclusive merchandise for executives' private offices, for general office use, for retail stores, professional offices, etc.

A department is maintained to serve patrons requiring modern and efficient filing cabinets, record forms etc. The firm have made a special investigation of present day office efficiency systems and are prepared to give intelligent information and render a real service to persons undecided as to the best and least complicated methods for reporting their business transactions throughout the year.

Printed and engraved stationery, business forms, ruled forms, blank books, miscellaneous office accessories, such as ink wells, blotter pads, desk lamps, cushions, and a score of other necessary articles are to be secured here.

There is probably no other line of retail business that requires the close supervision as does this one if a firm means to carry prestige with the public. What with the fast movement of industry, the everchanging and fast progressing methods being constantly devised and revised for twentieth century efficiency, a firm must be constantly "on its toes" so to speak, in order to meet the demand of successful business men.

As outlined above, the firm recently took over the former E. N. Kennedy Co. and thus in addition to their stock added a large line of general utility household items for the library, the school miss or boy and decorated favors, crepe papers, etc., for the party or home reception. Their amateur film development service is prompt and good work is done.

This firm is recognized by local business houses as one able to serve their interests properly. Out-of-town customers' wants are taken care of equally as well and all correspondence related to merchandise, price enquiries and orders received are given special attention.

Smith's Battery and Auto Electric Service

"EXIDE" BATTERY AND EXPERT MAGNETO SERVICE

Located at 10052-105th St. in Edmonton, are official representatives for the famous Exide storage batteries; a completely equipped service station prepared to re-charge or rebuild any make of storage battery and specializing in magneto and ignition electrical work. One of the prominent business houses of the City under the management of Mr. A. Smith.

People of this community who desire that their batteries shall be inspected and put in the best of shape by competent battery experts, will find it extremely profitable to take their cars to this modern and up-to-date service station which is fully equipped to execute the most detailed battery service. The very latest equipment available for battery work has been installed on the theory that the public will appreciate at least one firm who can truly offer a worth while service. The success they have acquired has merited the investment.

None but expert workmen are employed; men who understand the construction of storage batteries and who have spent years' of apprenticeship in the factories where batteries are made. Not everyone can become a competent battery engineer. It is not the work of just a day or a week or a month. It is the study of years that makes men perfect in this specialized trade. The employees of this firm has been specially selected because of their perfect understanding of the mastering laws of electricity and the fact of battery manufacture. This service is given to the people of the community at a moderate charge and the motorist is extremely fortunate in having a place nearby where such service can be obtained.

No less important is their electric ignition and magneto repair and installation work. The firm are direct distributors of the original old German Rubber Bosch magnetos, the new American Bosch, the "K—W", Dixie and Webster makes. This is a service which will appeal particularly to the farmer having magneto on his car, tractor or farm engine. Their charges are reasonable and work prompt and thorough.

The manufacturers of Exide batteries also make batteries for radio purposes and can be purchased through Smith's Battery and Auto Electric Service. We wish to congratulate this firm for the service rendered the public and the able manner in which their business is conducted.

Dr. Morris Kline

DENTIST

Located at 101014 Jasper Avenue in Edmonton, is among the prominent professional men doing quality dentistry. His work comprises plate work, extractions, crown and bridge work. Modern methods and competent work have built for him an extensive clientele in northern Alberta.

Science has made great advances in the past few years and great brains are constantly striving to improve health conditions of the human race. All branches of the medical profession have been effected and many old ideas concerning healthful living have been proven false. This advance has been applied particularly to the modern dentist and it is to him we look for proper medical guidance.

Dr. Kline has adopted the latest and accepted methods of dentistry for the benefit of his clientele. We refer particularly to his ability in providing correctly fitted plates permitting perfect sanitation of the mouth, comfort, service, speech, appearance and masticating of foodstuffs without impairing the taste. Many years have been spent in research work to overcome the obstacles of upper denture and Dr. Kline gives his personal attention to cases requiring plate restoration. He has a fine laboratory where all phases of mechanical dentistry are executed.

We refer our readers to Dr. Kline in the knowledge that they will receive the best of professional treatment. Dr. Morris Kline's 'phone is 2742.

WHITE STAR LINE CANADIAN SERVICE

WORLD HAPPENINGS BRIEFLY TOLD

The Ontario gasoline tax next year will be five cents a gallon.

Spain, Venezuela and Persia have been elected to fill the three non-permanent vacancies on the council of the League of Nations.

The Canadian Government telegraph office at Alice Arm, B.C. has been destroyed by fire of unknown origin. All equipment was lost.

Japan has notified Great Britain that she accepts the Anglo-French naval agreement "in principle," it was announced after a meeting of the cabinet.

All records for the current season were smashed on the Thacker farm at Burdett, Alta, where sixty-seven bushels of wheat per acre were threshed on eighty acres.

Different brands of empire-grown tobacco took a prominent place in the tobacco trades exhibition at Manchester, England. The exhibits included an attractive display of Canadian leaf.

A WONDERFUL TRIBUTE

Baby's Own Tablets Declared To Be Worth Their Weight In Gold

A mother has only to use Baby's Own Tablets once to be convinced that nothing else can equal them in banishing the ills of her little ones. Once used, always used, as long as there are small children in the home—that is the tribute thousands of mothers pay the Tablets.

Among the many, many mothers who are anxious to tell of their experience with Baby's Own Tablets is Mrs. Griffith, of East Hamilton, Ont., who writes —"Shortly after coming to Canada I began giving the Tablets to my baby boy who was then six weeks old. The result was so pleasing that since that time I have always kept the Tablets in the house. I have two children now and both of them are the picture of health. Baby's Own Tablets are the only medicine they have ever had and I really believe the Tablets to be worth their weight in gold."

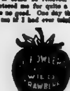
Baby's Own Tablets are free from all injurious drugs and can be given to the youngest babe with absolute safety. They are sold by medicine dealers or by mail at 25 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Giant hunting grasshoppers nearly five inches long, that prey on small animals such as mice and the young of ground-nesting birds, are found in the Congo.

The attitude of taking life as it comes is merely mental and therefore attainable.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried



"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1916."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

Historically speaking the Glasgow Town Hall is a comparatively recent building in the Venetian Renaissance style, and the hall in which we were entertained is lofty, airy and in its sheer spaciousness magnificent. Three beautiful wall paintings command attention, one depicting the legend of King Roderick and St. Mungo, the representation of which is still part of the City's coat of arms; a second a Glasgow scene of the Middle Ages, and it was interesting to note that in this scene was portrayed a Clydesdale, although the period covered is about 1500. The third is the Lusi[illegible] on the stocks of the Clyde before her completion. For all its comparative modernity, the banqueting hall can boast a history. Queen Victoria, King Edward, Queen Alexandra, King George, Queen Mary and the Prince of Wales have dined in it. Every Prime Minister of Great Britain since 1889 has been the guest of the City there, and in July, 1914, three weeks before the war, the German burgomasters dined there after visiting the shipping centres of England and Scotland. Only two toasts were honored, "The King" and "The Kaiser," and the German and British National Anthems were sung. Soon after the burgomasters were hurrying home, their trip cut short by the outbreak of the Great War.

Sir David Mason and the Corporation entertained us in characteristic Scottish style. The haggis was piped in to the tune of "Happy We've Been a' the Gither" by the City of Glasgow Police Band, at the end of which ceremony the chairman proffered Pipe Major Gray the time-honored refreshment, acknowledgement by the Pipe Major with the traditional response, "Thanks and a health to you" spoken in Gaelic.

A little secret history attaches to the fine new leopard skin which was worn by the Pipe Major for the first time and in our honor. It appeared that circumstances had compelled the Corporation to wield the economy axe, and in doing so, they had decided to cut out one pair of trousers from the annual outfit of uniformed city officers. It was proposed to spend twenty guineas on a leopard skin for the Pipe Major, but this would hardly have done in view of the incident of the trousers. Happily, however, the difficulty was overcome by a public-spirited citizen who presented the City with a properly mounted skin.

There were two musical programs, Gaelic airs, marches, strathspeys and reels by the pipe band and selections by the City of Glasgow Police Orchestra who honored us by playing Canadian songs and dances. Glasgow indeed entertained us royally.

We spent our afternoon watching a football match as guests of the Corporation and thoroughly enjoyed the experience.

The European part of our official programme was now ended, but there was one unscheduled event for which the party was responsible. We had almost completed a wonderful tour. We had seen more in thirty-two days than perhaps any party of the same size had ever seen. Doors, for which money was no key, had been thrown open to us. Privileges jealously guarded and keenly sought had been freely accorded to the Canadian Farmers' Party, and the hearts of both high and low had been opened as well as doors. Throughout we had been cared for with something more than efficiency by those who had charge of us—the officials of the Canadian National and of the Globe Travel Bureau had become our friends. We would not part without returning thanks and expressing our esteem. So we haled Mr Weir, the organizer of the tour in Europe, Mr. Groff, organizer in Canada, and Mr. Strachan, agricultural representative for the Canadian National Railways in Winnipeg, before a mock tribunal, apparently to try them for their sins, but in reality to present the first two with a silver salver suitably inscribed, and Mr. Strachan with a case of pipes. Mr. W. A. Wilson, of Canada House, who had been guide, philosopher and friend on so many occasions; Mr. John L. Harvey, Mr. Turnham, and Mr. Whitby, of the Globe Travel Bureau, and the four trusty drivers, who had driven us and our baggage so many hundreds of miles in perfect safety were likewise brought before the "judge" (Mr. Arkell), Mr. Wilson, to receive a letter of thanks from the party, Mr. Harvey an illuminated testimonial, his colleagues each a letter of appreciation supplemented by a money gift.

When we had responded the "judge" himself was placed in the dock and was presented with a letter and a gold watch engraved with an inscription; the party's tribute to the manner in which he had carried out the duties of the position as leader to which we had elected him. Mr. Arkell had responded to the speeches of great men on great occasions, but never had he found his task of replying so difficult as he did this night, so overcome was he with the surprise we had secretly prepared.

These were not all we thanked. There was Mr. Dan Johnson, Euro[illegible] Colonization Manager for the Canadian National Railways, "Brownie" (Mr E. W. Brown), Mr. Johnson's assistant whose singing we shall never forget, especially the impromptu "How Do You Do" song which pilloried members of our party; Mr. Frank England, Mr Weir's assistant, who, in the interests of Canada, saw that we were interviewed and photographed everywhere we went; and Miss Roberts, Mr Weir's secretary, who was always ready to type our letters however pressed with urgent work.

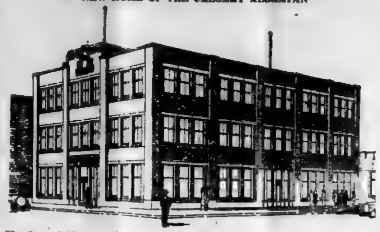
Another song from "Brownie," then "Auld Lang Syne," the last verse sung with arms crossed and hands clasped concluded a happy evening.

Sunday found us perhaps a little glum, for quite a number of our party was remaining to visit friends or relations. We had found that Canadians are Canadians wherever they are, whatever Province they hale from; and it was with sincere regret that we parted at Greenock from those who stayed behind. At length we were off; the shores of Britain were lost in the oncoming night.

Long live the Homeland now for HOME!

FINIS.

NEW HOME OF THE CALGARY ALBERTAN



When the new building now under construction for The Albertan Publishing Company, in Calgary, is completed, it will be the home of one of the most modern newspaper plants in Western Canada. Occupying a ground space of 75 by 120 feet, the building will cost when completed, apart from equipment, approximately $300,000. Standing three storeys in height, the exterior walls will be of Alberta tapestry brick, with Tyndall stone dressing, and the building will be occupied exclusively by the various departments of The Albertan Publishing Co.

The mechanical equipment is to be perfect, from the great Hoe and Goss presses, to the smallest unit of the battery of eighteen Intertype and Linotype typesetting machines. The business and private offices will be located on the ground floor at the front of the building. The pressroom will be located also on the ground floor at the rear, and plate glass windows will provide an unobstructed view for the public to see the giant presses in operation. The second floor will be given over to the various editorial departments, and the newspaper composing and stereotyping rooms. At the front of the third floor will be the editorial offices of the Western Farm Magazine, the first issue of which will be published on Nov. 10. At the rear of the top floor will be located the commercial printing department. A large community room is also to be located on the third floor and this will be used as a general conference or board room. Adjoining the community room will be a completely equipped radio studio. This will include a radio room, a reception room and a broadcasting chamber. The new building will be served by two elevators freight and passenger.

Carefully planned in all details, modernity has been the key-note throughout, and the Albertan building will conform in every respect to the very latest ideas in newspaper plant construction.

G. F. GEMEROY, General Manager

G. M. BELL, President of The Albertan Publishing Co., Calgary

M. WALKER, Superintendent

SUNDAY SCHOOL LESSON

THE CHRISTIAN BASIS OF TOTAL ABSTINENCE

Golden Text: "Let no man seek his own, but each his neighbor's good." 1 Corinthians 10.24.

Lesson: 1 Corinthians 8.1-13.

Devotional Reading: Romans 14. 13-21.

Explanations and Comments

Paul had been asked in a letter from the Corinthian Church whether or not one might eat meat which had first been offered to idols. The letter probably suggested that, as an idol was not a real god, it did not matter if the food had been offered to it. The writers doubtless wished to be known as "the party which stood for liberty of conscience, and probably for the Pauline axiom, 'All things are lawful to me.'" Paul's answer follows in this eighth chapter.

Moffatt's version of Paul's words makes them so clear that explanations are unnecessary:

With regard to food that has been offered to idols. Here, of course, "we all possess knowledge!" Knowledge puffs up, love builds up. Whoever imagines he has attained to some degree of knowledge, does not possess the true knowledge yet; but if anyone loves God, he is known of Him. Well, then, with regard to food that has been offered to idols, I am quite aware that "there is no such thing as an idol in the world," and that "there is only the one God." (So-called gods there may be, in heaven or on earth—as indeed there are plenty of them, both gods and "lords"—but for us there is one God, the Father, from whom all comes, and for whom we exist.) But remember, it is not everyone who has this "knowledge." Some who have hitherto been accustomed to idols eat the food as food which has been really offered to an idol, and so their weaker conscience is contaminated. Now mere food will not bring us any nearer to God; if we abstain we do not lose anything, and if we eat we do not gain anything. But see that the exercise of your right does not prove any stumbling block to the weak. Suppose anyone sees you, a person of enlightened mind, reclining at meat inside an idol's temple; will that really "fortify his weak conscience"? Will it not embolden him to violate his scruples of conscience by eating food that has been offered to idols? He is ruined, this weak man, ruined by your "enlightened mind," this brother for whose sake Christ died! By sinning against the brotherhood in this way and wounding their weaker conscience, you are sinning against Christ. Therefore if food is any hindrance to my brother's welfare sooner than injure him I will never eat flesh as long as I live never!

The friction match, first made in 1827 consisted of splinters of wood dipped in fused sulphur and then tipped with a mixture composed essentially of antimony sulphide, chlorate of potash and some adhesive gum.

The tender leaves of the tea plant are extremely sensitive to climatic changes. That's why Red Rose Tea is packed only in aluminum—so it will never lose strength or flavor through contact with dampness. Every package guaranteed to be in perfect condition.

Tourists Should Be Informed

As the tourist reaches our country he should be given a card containing full particulars in regard to highway regulations, the purchase and consumption of liquor and in reference to all other matters with which he should be familiar, while he is a guest of this province. It is a hardship to punish a visitor for transgressing a law in regard to which he has not been informed, a difficulty which would be completely overcome by the introduction of some such plan as this.

FULL ENQUIRY NEEDED

ONE Of the most distressing incidents of recent times to occur within the boundaries of Alberta is the occurence at the Ponoka mental hospital whereby one inmate, an elderly man, lost his life; another his guardian, stands charged with manslaughter, and seven others sentenced to jail for two months. Briefly the report relates that one Scott, so severely beat an inmate, Dr. Arthur Hobbs, as to cause severe injuries, and later death. Information regarding this was given the authorities by R. Lord, an attendant and he subsequently was assaulted by seven other attendants.

Little need be said regarding the enormity and callousness of the crime. For a man to severely beat a mentally afflicted inmate in his charge is beyond the comprehension of ordinary people. If the culprit is as guilty as the reports indicate he deserves any punishment served out to him.

The distressing part to the public is that a thing of this kind could happen in an Alberta and Canadian institution. We pride ourselves as being almost the acme of perfection as regards public institutions and where the duty of public service fails us we look for common sense to step in. There are scattered throughout Alberta and elsewhere many relatives and friends of unfortunate inmates of the Ponoka mental hospital to whom this occurence will be the means of raising fears and doubts as to the treatment accorded their relatives and friends. It is not likely treatment of the brutal kind mentioned above is general or even harsh treatment of any kind is habitually given. Nevertheless only a full and searching enquiry on the part of representatives of the public will restore anything like confidence in the minds of the people regarding conditions there.

Casey and Murphy stood looking into a jeweller's window. "Casey," asked Murphy, "how'd you like to have your pick here?"

"Sure," responded Casey. "I'd rather have my shovel."

Doctor—"Have you taken every precaution to prevent the spread of contagion in your family?"

Rastus—"Absolutely, doctah. We've done bought a sanitary cup, an' we all drink from it."

ALWAYS a great car . . always an outstanding value . . always a "Successful Six" . . Pontiac Six now earns its right to even more spectacular success.

Sweeping new refinements in the sturdy Pontiac Six-cylinder engine . . for example, New Marvel carburetion, improved manifolding . . add new and greater smoothness to Pontiac performance.

PONTIAC SIX
PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

J. C. Barger Co. Ltd.

This firm is located in Edmonton with main yard and offices at 9204-102nd St. and branch yard at 11062 110th Ave., under the direction of Mr. J. C. Barger, President, and R. B. Cate, Vice-President. They conduct an extensive lumber and builders' supply business that has aided in the development of Edmonton and Northern Alberta. They offer an excellent home building service and assist in furnishing lumber requirements and estimates without obligation. As an unsurpassed service to the home builder and contractor.

With customary mind directed toward the industrial and home building development of Northern Alberta and Edmonton the J. C. Barger Lumber Company Ltd. operates one of the largest and most satisfactory lumber concerns in this part of the province, catering both to the contractor and builder as well as the wants of the individual person and farmer engaged on private work.

While it has always been their aim to obtain a fair and legitimate profit from the enterprise Mr Berger who heads this firm, has gone about it in a constructive way and to the benefit of the general public with whom his firm comes in contact. The concern's policy has been to furnish a lumber and builders' supply service of quality consistent with the prices quoted, ranging from the cheaper grades to the most expensive. This method has created not only general good will throughout Northern Alberta but has produced a steady volume of business for the firm which has enabled them to sell at attractive figures and economically as well as be social and industrial growth of the community by extensive building.

A wide range of general building lumber, lath, shingles, moulding, etc. are carried. Also a complete line of required new milling interests they are prepared to manufacture to the customer's cost and by employing experienced help the business system of this firm works on a coordinated basis. That their organization is giving well merited good will throughout is a matter of common knowledge among those in the building lines.

A comprehensive angle of the business is the firm's farmers' service. Those of our readers who may be interested in building may bring their plans to the firm's office and be advised on construction and financing. Their service is appreciated favorably with that offered in the most metropolitan centres.

In making this review of the industrial interests of Edmonton we recognize the true value of the firm's activities and commend them to the public.

Canadian Shoe Co. Ltd.

MEN'S, WOMEN'S AND CHILDREN'S FINE SHOES

Located at 10143-104st St. in Edmonton, offers quality footwear for men, women and children at reasonable prices. This firm done a large business and serve the local and surrounding residents throughout the year. Conducted by M. J. MacLeod.

No satisfactory has been the service given this well established footwear firm in Edmonton, that the quality of their merchandise has become known to nearly every man and woman in Northern Alberta.

The reputation has been achieved and is because of the unsurpassed quality of their shoes, but to due also to be never failing courteous service which every employee of the firm extend to the public at all times, and the gold band guarantee back of every pair of shoes and merchandise taken from their store.

Salesmen are not permitted to meet the public in this store until they have received the knowledge of how to meet the most fastidious individual in the way of shoes. They are prepared to make correct measurements so that kind of footwear the customer needs. It is a fundamental principal of the Canadian Shoe Co. Ltd. to show more than a every article of apparel—they are an essential part of every man, woman or child's personality.

It is not over estimating the ease to say that this firm carries a many complete stock and a wide range of style in the present day models.

Considerable attention has been paid to the management to the development of their ladies' department. This department in particular has been equipped with every facility to make the patron or many satisfied by having their footwear fitted. Every salesperson must be given thorough instruction whether they make a purchase or not.

Mr MacLeod in charge is a man of wide experience in the field and has started no pains to properly serve the residents of Edmonton and the surrounding community. His factory connections make it possible to offer dependable footwear at reasonable prices in the average pocket book and then we find this store fully stocked at the beginning of each season.

Liberty Machine Works Ltd.

CYLINDER GRINDING AND MOTOR RECONDITIONING

Located at 10567—105nd St., in Edmonton, under the direction of Mr. R. W. Nicholl, is a prominent machine works specializing on cylinder grinding, ground cylinder repairing, rebabbiting bearings, motor reconditioning and are distributors of oversize piston pins, pistons and rings for Chevrolet, Ford and Essex trucks.

This is one of the complete and efficient general machine shops in Edmonton and enjoys a large patronage because of the fact that they turn out high grade work, get it done when promised and that their prices are reasonable.

The management of the Liberty Machine Works Ltd. realize when organizing their business that it would be necessary to equip their shops in the most complete and modern style, and then install modern and scientific machines for cylinder grinding and general motor machine and reconditioning work. This is borne out by the fact that in equipping the shops no antiquated machines, manufactures, rumbers and farmers.

Everyone who has had occasion to come in contact with this firm during the past years has learned that their work will not only be executed correctly, but that the required part will be perfect, and be repaired at a much lower cost than a new part can be had and that it can be done in a short time, thus saving the public endless delay in ordering parts.

Aside from the service just mentioned the Liberty Motor Works Limited do an expensive business in the reconditioning and repairing of motor engines, their staff of mechanics are well trained and experienced with the work entrusted to the market and are able to tear down, inspect and recondition any motor, make; valve grinding, bearing adjustments, crank shaft truing, gears, brake adjustment, wheel alignment, welding and radiator repairs being a part of their work which they handle are car or truck. Respective customers need have no hesitancy in approaching this firm, as they are handled upon both as to service and charge.

If for any reason you need any work of this nature it will pay you to get in touch with this concern. In the establishment will be found complete equipment for turning out high grade work as any in the City and they are known throughout the province for the efficiency and promptness of this service.

Auto Wreckage Ltd.
New and Used Auto Parts
Located at 10136 95 St. in Edmonton, under the direction of Mr. Albert P. Archer, is a firm that is furnishing the motoring public in a business every car owner should support. They purchase used wrecked cars and offer an opportunity to make great savings on new and used parts for passenger cars and trucks.

"Conservation of our resources" was the great cry during the war and it is now in their important new field we should conserve and make use of all waste material.

There have sprung up over night as it were various concerns who make a specialty of making use of this material. This is applied to a great many articles but to no greater degree than the automobile.

The Auto Wreckage Ltd. tear down and utilize the parts in various ways. By doing so they save the cost of producing those parts again, which relieves material and labor for the production of new parts and for new cars. There are many parts of an automobile that show but little wear after years of service and while they can be broken and are in many cases, they scarcely ever wear out. This places on the market these parts, practically as good as new at prices that are fitch under those of new ones. This accrues to the benefit of the motorist and this fact alone is causing wrecking concerns to grow in this one to increase in popularity each year. They have a large stock of parts for all makes of cars and trucks on hand and in all probability be able to take care of your requirements at prices mark under the price of new parts.

Because of the ready sale of these parts when salvaged this company will surprise you to know how little we give for the automobile or truck that you thought was good only for junk. Give them an opportunity to bid regardless of the condition of the machine and we are sure you will be satisfied.

The Auto Wreckage Ltd. realize that only by giving the best service could they hope to succeed and then they have insisted on carrying this line into every transaction they make. We are pleased in this review to compliment them on the nature of their business and to assure our readers that whenever they have anything to dispose of in their line they can do no better than to get in touch with this firm.

McGavin's Ltd.
WHOLESALE BAKERS OF "BUTTER KRUST" BREAD

Their plant consists of concrete and steel new plant constructed and located at 10045-105th St. in Edmonton, under the direction of Mr. Archibald H. McGavin, is one of the best known firms in their line in Northern Alberta. Their plant will be a model institution and a tribute to the industry and growth of the City. Products bear money value; by means of "Butter Krust" Bread made purely for pure; appetizing and wholesome.

One of the most prominent in Northern Alberta. Their new plant, now under construction, will be entirely of concrete and steel, modern and up-to-date in every particular. It will be ready for inspection by the public about two months. They are especially invited to visit at that time and view the latest equipment in the way of "sanitary" ovens and wrapping machines for the wholesale production of bread and learn how precisely and evenly the dough "mix" is prepared by the mixer in order to secure a tasty rich baking and sanitary loaf. Nothing has been spared in the progressive management and service by employees whose working conditions are ideal.

This firm's business has increased so rapidly that improvements have been made from time to time until today they have a model industry and a wide building indicates a still further expansion of its business. Everything that is up-to-date in organization as it is the policy of the institution not only to make bakery goods of the highest quality, but to turn out products that are as near an approach to the acme of perfection as their modern methods will permit. "Butter Krust" Bread contains carefully selected flour, provide for vigour, growth and energy, fats for body building, sugar for hardening of the bones and health vitamines as a vital necessity for proper nutrition.

The business has been closely allied with the large business interests of Edmonton for many years and has been instrumental in the upbuilding of the city and community, and the business which they are conducting should receive the patronage of the public.

Necessarily, McGavin's Ltd. are large distributors throughout northern Alberta, making shipments daily from their plant. Their daily capacity in their new plant will be 60,000 loaves. "Butter Krust" Bread is an established product and demanded by thousands of housewives. It is endorsed by merchants in this section. Could it be known that there is a difference in bread.

Hutton Carpet Cleaning & Upholstering Co.
CARPET CLEANING
RENOVATING — UPHOLSTERING
With offices and plant located at 10153 Jasper Avenue in Edmonton, under the direction of James H. Hutton, specialize in cleaning and repairing carpets for leading dividends, hotels, apartment houses and theatres; do upholstering, etc. Are one of the oldest in the city and offer prompt out-of-town service.

During recent years considerable study has been given to the construction of machines and devices for the proper cleaning and renovating of carpets and rugs with the result that important developments have taken place. The Hutton Carpet Cleaning and Upholstering Company have watched trade developments and have added such equipment as rapidly as it has been approved.

The modern mechanical devices in their plant represent an investment of many thousands of dollars which has paid good dividends to patrons and established the firm solidly. They are one of the oldest in the city and equipped to deal in this field aside from equipment and facilities offered, with experience and knowledge of fabrics are necessary to successfully handle this work. Their years of service to the public stands out in many evidences of their ability whether a rug be of ordinary value or an Oriental master piece worth hundreds of dollars, they are recognized in the way of delivery to the fabric or colors.

They specialize in carpet cleaning and upholstering work for apartment houses, hotels, theatres and public institutions, making rates for quantity on a contract basis. For the individual their prices are reasonable and service metropolitan in every respect. It is a splendid investment to let them serve you. The firm is patronized by out-of-town customers to such an extent that a special department has been organized to handle this business with despatch. They have complete facilities for repairing damaged Oriental or Chinese rugs and imitation and save many individual people of the community. Estimates on work can be had by 'phoning 1366 Edmonton.

Mr. Hutton, who directs the work, is a pioneer resident and actively interested in the growth of Edmonton. Through his despatch and dealings with the public he has made many friends for the company.

Campbell's Furniture Ltd.
EDMONTON'S LEADING FURNITURE HOUSE

Located in Edmonton at 10128-100A Ave. in Edmonton, under the direction of Mr. Thomas H. Campbell, under such satisfactory service as the result trade that it is recognized as one of the leading furniture houses in the city; carry a large stock of dining room, bedroom and living room furniture and attend to Chesterfield suites.

Campbell's Furniture Ltd. are not satisfied with stocking just a few articles, but carry a complete line of same. When preparing to sell furniture and home furnishings to the people of Edmonton and district they determined to keep in stock everything necessary to make a home a comfortable and cheerful dwelling.

Before a spade of earth is turned, or a brick laid, every detail of the home will have been planned by the architect who in his sketches gives the client the idea of the completed effects embodied in the finished building as well as the features of construction.

For its population, Edmonton is remarkably indicative in the way of fine durable buildings. Most of these have been designed by architects who each year add to the beauty of the new achievements in the field of building designs to meet the present day demand.

Prominent in the architectural field in Edmonton is Mr. Percival Wright, who has been responsible for the design of many later day structures of varied types.

Mr. Wright is an enthusiast in home building and is always ready to be consulted of many later day improvements in the way of conveniences and comfort. They are also expressive of the advancements of the times and are worthy of marked superior care. To express the best ideal that time has developed calls for skill in both planning and building. The property owner wishes to provide a home remunerial building plant or civic structure which will embody beauty, type and durability through the years to come, as well as floor plans and it is through the many families in completely furnishing or refurnish their homes without expense. Mr Campbell of this firm has had many years experience in the furniture business and has earned the support of the public.

They employ a large staff of people and are one of the most important stores in Edmonton serving the public from sourcing main sights in the most effective manner and we appreciate the privilege of pointing to their organization as one creditable position in retail channels.

BEAUCHAMP'S
MANUFACTURING FURRIER

Store located at 10021 Jasper Ave., Edmonton, under the personal direction of Mr. Louis E. Beauchamp, is one of the leading furriers in the city. Due to the fact that he treats his patrons fair and alike. He employs a large out-of-town patronage.

By reason of the wider range of quality and price it is very difficult for the unsolicited to select a fur or fur article of any description and get value received unless they are dealing with someone in whom they have implicit confidence. For this reason there is general satisfaction to doing business with the well known furrier.

Mr. Beauchamp is a manufacturing furrier of the highest order. He buys selected raw skins and makes them into stunning garments of genuine values which are sold direct to the wearer. Mr. Beauchamp also has associates know fur values and old customers have learned that when they make a price it denotes real and true value. This insures the customer of getting fur articles of the highest quality and big gallery at one price to all insures the trade of receiving fair treatment.

In addition to this he conducts a modern repairing and remodeling department and is equipped to remodel your last winter's coat if you desire.

He handles Hudson seal, fox, otter beaver, Persian Lamb both Mahe trimmed and Talinsky, raccoon, mink, and in fact it would be impossible to give a complete list of the vast variety of fur carried. Let it suffice to say that he is able to make to order anything in his line that you may desire.

His employees are courteous and will be pleased to show you the stock whether you desire to purchase just at present or not. They are thoroughly conversant with all features of the business and will be pleased to take up the purchase of furs with you. His operation on commission that adds to the latter day business house and with to direct our readers attention to their depot as one of the important business phases of Edmonton and to its management as among our best citizens.

Edmund Wright
ARCHITECT
With modern offices in the Credit Foncier Bldg., in Edmonton, is one of the foremost architects in Alberta and a man of high standing, experience and ability.

The work of the architect is held in high regard in the community in every phase of building endeavour as it is to creative ability and at times to the constructive genius. Every detail is sanitized and useful structure is accomplished.

Before a spade of earth is turned, or a brick laid, every detail of the home will have been planned by the architect who in his sketches gives the client the idea of the completed effects embodied in the finished building as well as the features of construction.

For its population, Edmonton is remarkably indicative in the way of fine durable buildings. Most of these have been designed by architects who each year add to the beauty of the new achievements in the field of building designs to meet the present day demand.

Tires for vulcanizing and general repair may be sent in by parcel post and a letter of instructions what will be carried out as requested. In the event a tire cannot be put in suitable repair for the road will not give satisfaction, etc., the patron will be advised to that effect and given attractive prices on a new tire replacement. In other words, their service is intended to be of an intelligent and constructive type, catering to the practical sense of economy of the day. Patrons are made to feel that their patronage is appreciated and desired.

Stuart Bros.

MEN'S CLOTHING AND FURNISHINGS
Mr. T. W. C. Stuart conducts this business.

Store located at 10010 Jasper Avenue in Edmonton, is a store where men and youths are served with everything in the furnishing lines. They feature "The House of Hobberlin" nationally advertised clothing, known favorably from coast to coast and offer a splendid service to out-of-town patrons. Mr. T. W. C. Stuart conducts this business.

When a clothier is able to satisfy the most exacting demands of his customers, it must be readily understood that he has reached an enviable position in his trade. Such is the case with the house which is one of the more prominent clothing and men's furnishing firms in Edmonton. The public has found that clothes from Stuart Bros. are satisfactory in every way and made of the best materials, the most exclusive patterns and mixtures can be had if one wishes, prices are proper the more moderate priced ones are tasteful and approved designs, they can be had here at attractive prices.

They specialize in "The House of Hobberlin" clothing and no matter what period materials you select, if you buy from them, our readers are assured of the satisfactory fitting which is distinctive of their clothes from those of the average store. They give the manner the air of distinction that belongs to all well dressed men, but which is hard to acquire, yet the price is within the reach of all.

Their men's furnishing department is on a par with their clothing department and here you will find shirts, collars, hats, gloves, hosiery shoes and in fact, all the essentials of dress that constitute the wardrobe of the modern gentlemen.

Stuart Bros. is one of the foremost clothing firms of Edmonton and has enjoyed a consistent growth with the passing of the years. They welcome out-of-town trade and such customers will be embraced over their extensive and smart stock of wearing apparel.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is supreme

In clean, bright Aluminum.

Christianity's Next Task

The signing of (1) the Treaty of Versailles in which is incorporated the covenant of the League of Nations (2) the naval treaties at Washington and (3) the Kellogg anti-war declaration recently at Paris were all hailed by press, pulpit and public as important milestones along the road to permanent world [illegible] and a better understanding among the races of the earth. Special [illegible] were held in churches to mark some if [illegible] all of [illegible] thousands of columns of editorial matter were printed lauding these [illegible] to put an end to racial animosities. And every word written [illegible] in praise and support of these great peace movements was [illegible].

But [illegible] Literary Digest, the new programme for a world-wide spiritual [illegible] adopted by the International Missionary Council at its [illegible] may be considered as revolutionary in the ecclesiastical world as the [illegible] named three events are in the political world. [illegible] of peace, but the Jerusalem Conference perhaps [illegible] problems which agitate the world and array nation [illegible] race and, concludes the Literary Digest, while [illegible] given to the deliberations and conclusions of the [illegible] Mount of Olives, no bells rung or paeans [illegible] praise [illegible] was done that posterity may rank Jerusalem with [illegible] Paris in the onward march of mankind toward [illegible] the ending of racial hatred.

Among the [illegible] discussed on the sacred mount outside the Holy City were the [illegible], the rights of minorities, the protection of women and children, [illegible] relations between strong and weak nations, the land question, [illegible] and spiritual co-operation, relations between church and state, and various other phases of world peace. Specialists on race relations and international relations from the minorities section of the League of Nations and the Universities of London, Harvard and Columbia, among other institutions, were present to contribute technical knowledge as these problems were attacked.

And [illegible] following lengthy and searching study of conditions as they [illegible] countries all over the world, and the relation and duty of the Christian church therein, this International Missionary Conference meeting at Jerusalem found that "the Church has not firmly and effectively set its face against race hatred, race envy, race contempt, or against racial, national and social pride or against the lust for wealth and exploitation of the poor or weak."

It was evident right at the beginning of the Conference that the old attitude of superiority of the West over the East, regarding of Nordic civilization and the Christian religion as one and the same, was not acceptable. The idea of race superiority was not admitted for a moment, and the Conference indicated its belief that the basis of race prejudice is economic. In lands where races live side by side participation by all in racial intermingling for social, cultural, and religious fellowship was declared to be the natural expression of Christianity, and was welcomed as a step toward world-wide understanding.

Who is there will deny that such belief and conclusions are in line with the teachings and spirit of the Founder of Christianity?

And does there not emanate from this Conference a special message for the people of Canada, and especially for the people of Western Canada? Of late there have been unfortunate revivals of ancient campaigns by certain classes of our people against other classes based solely on questions of race and creed. Most unfortunate of all is the fact that many of the leaders in these campaigns, which are a denial of Christ's whole life and teaching, are recognized leaders in the Christian church.

It is the fond hope and dearest ambition of many thousands of forward-looking patriotic Canadians that this young Dominion reaching out in its new nationhood will become a power for good in the world; that its greatness will be found not alone in its wealth of natural resources, its far-reaching trade and commerce, its cultural attainments, but in those spiritual attainments and contributions to all mankind which in the final analysis are the true measures by which to estimate the greatness of any people or nation.

Good Job For Him

He was the [illegible] earth and finally he was appointed to a naturalist. He was [illegible]. It took him an hour to feed the canary, two to stick pins through four butterflies, and after taking all afternoon to change the goldfishes' water he asked what else he could do.

"Well," said his master, "you might take the tortoise for a run!"

Forest Fire Costs

Canada's bill for forest fire losses amounts to more than $150 a week for every man, woman and child of the population. Federal and Provincial Governments are putting forth efforts to reduce and eventually wipe out this heavy loss.

The longest railway run is from Riga to Vladivostok, 6,000 miles.

Prosperity In Central B.C.

D. D. Munro, provincial government land settlement agent, Smithers, reports that crop prospects for Central British Columbia this year are very good. He states that since the erection and operation of the grain elevator at Prince Rupert, a number of farmers are going in for grain-growing with splendid results. He also says that the increase in mining is having a very beneficial effect and he is enthusiastic with respect to the future prospects of that territory.

During a spell of cold weather the Aberdonians were to be seen going about with their mouths open. There was a nip in the air.

The first geological period, called the azoic, contained no trace of life in any form.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over stimulated, and food sours. The corrective is an alkali which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

Tourist Trade Increasing

Figures For 1928 Will No Doubt Show Gain Over Last Year

While it was estimated that American tourists spent $200,000,000 in Canada last year, there is no doubt but that figures for 1928 will show fresh gains, stated R. K. Odell, assistant director of the natural resources intelligence service of the department of interior, who was in Edmonton in connection with affairs of his department.

Development of the tourist trade is of extreme importance to Canada and its value is fully recognized, said Mr. Odell. In carrying on its work, the federal branch is co-operating with the provincial governments and other local bodies.

ARE YOU RUN-DOWN?

All That Is Needed Is a Tonic To Build Up the Blood.

There are many people who have been semi-invalids so long that they accept their condition as a life burden. They have endured nervousness, broken sleep and a generally run down feeling so long that they have given up hope of again enjoying good health. In most of these cases a well chosen diet, fresh air and a tonic to build up the blood would do wonders. And as a blood building tonic no other medicine can compare with Dr. Williams' Pink Pills. There is scarcely a spot in Canada where you will not find some formerly ailing person who has found new health through the use of this medicine. The experience of Mrs. Thomas Ahearn, St. Alain, Que., bears out these statements. She says: "I have the greatest reason to be thankful for what Dr. Williams' Pink Pills have done for me. I was in a very weak and run-down condition. Frequently I would faint and my legs would swell badly. It was almost impossible to do any housework. It seemed as if my blood had turned to water. In this weak and despondent condition I began taking Dr. Williams' Pink Pills. A few boxes proved that they were helping me but I continued taking the pills until I had used a dozen boxes, by which time I found myself a completely restored woman, able to do my work without fatigue, a better appetite and a sense of cheerfulness where before I had been despondent. For all this thanks to the health-giving qualities of Dr. Williams' Pink Pills."

If you are feeling run-down, give Dr. Williams' Pink Pills a fair trial and new health will be yours. You can get the pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Important Fossil Beds

The Red Deer Valley of Alberta is exceedingly rich in fossil remains of dinosaurs and other extinct vertebrate animals, which are being slowly exhumed by erosion of the sides of the valley. It is the most productive collecting field in Canada and has already yielded much new and well preserved material to the museums at Ottawa, Toronto, Edmonton, and New York.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvellous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Many Occurrences Of Salt

Salt, either in natural brines or in beds of rock salt, is found in every province of Canada. Commercial production, however, is confined to Ontario, Nova Scotia, and Alberta.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Eclectric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

A Fervent Hope

At the grave of the departed, the old darky pastor stood, hat in hand. Looking into the abyss he delivered the funeral oration.

"Samuel Johnson," he said sorrowfully, "you is gone. An' we hope you has gone where we 'spects you ain't."

Canada's Experimental Farms

The Dominion Experimental Farms system of the Department of Agriculture stretches across Canada from the Atlantic to the Pacific and is the most comprehensive system of its kind to be found in the world.

A scientist says women are going to become the ruling sex. That's the worst of these scientists! They go to sleep for so long between their discoveries, that when they awake and speak "it's all over long ago."

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Inside the pedestal on which Cleopatra's Needle stands are several jars containing British coins, a railway guide, a number of children's toys, copies of newspapers and a map of London.

A motorist who has driven halfway around the world reports that tigers and elephants fled before him. It is wonderful how quickly wild beasts have acquired the pedestrian sense.

"A GREAT TONIC," SAYS MRS. RUSSELL

After Taking Lydia E. Pinkham's Vegetable Compound

Dunwick, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound during the Change of Life for nervous feelings, loss of appetite and to gain strength. It is a great tonic and I have taken a dozen bottles of it. It was recommended to me by a friend and now I recommend it to all women for such troubles as come at this time."

—Mrs. W. V. Russell, R. R. No. 5, Dunwick, Ontario.

Here's How—

You Can Always Keep Your Farm Buildings in Good Repair

THOUSANDS of farmers have learned how easy and economical it is to keep farms up-to-date with Gyproc. Whenever repairs or alterations are required—whenever new buildings are needed—they rely on this famous fireproof wallboard.

For fast, economical, fireproof construction there is nothing to equal Gyproc. It cannot warp, crack, shrink, bulge or burn. Its million-celled rock insulation protects stock from cold, heat and vermin. Saves time, saves labor, saves fuel—the easiest to erect and most satisfactory Wallboard you can buy.

Recipes For This Week

(By Betty Barclay)

PORTO RICAN ROAST

- 2 pounds round of beef.
- 1 small bottle stuffed olives.
- ¼ pound salt pork.
- 1 onion.
- 2 teaspoons salt.
- 1 pint canned tomatoes.
- ½ pint boiling water.

Make small slits or holes in the meat with a sharp knife on each side of the roast. Cut the salt pork in small strips an inch long and stuff the holes alternately with these and with stuffed olives. Fry out the salt pork in a heavy kettle, slice the onion, fry it in this, then remove all bits of onion and salt pork, brown the roast on all sides, and add one-half pint boiling water and the tomatoes. Season when half done. Simmer for three hours.

HONEY CREME

- 2 tablespoons granulated tapioca.
- 1½ cups boiling water.
- ½ cup strained honey.
- 1 thin slice lemon, rind included.
- ¼ teaspoon salt.
- 2 eggs.
- 1 cup nectars raisins.
- 2 cups cake cubes.

Plump raisins, drain and cool. Add tapioca to boiling water and add lemon, salt and honey. Cook in top of double boiler until tapioca is clear. Remove from fire and beat in beaten egg yolks and raisins. Beat egg whites until stiff and add to above mixture. Place cake cubes in a buttered baking dish and pour custard over them. Bake 20 minutes in a moderate oven (350 degrees F.). Serve warm or cold.

Veterinarians use Minard's Liniment.

Italy Bans Dirigible

The Italian government has decided to abolish the dirigible balloon as a weapon of warfare or a means of commercial transportation. It was assumed the decision was due directly to the disaster that befell the dirigible Italia on its recent North Pole flight.

Manager: "But, look here, these aren't testimonials!"

Office Boy (applying for post): "No, sir, but I thought they would help. They're copies of the death certificates of my four grandparents."

Buy Canadian Grown Bulbs

Canadian Grown Bulbs Replacing Importations From Holland

Canadian bulbs are rapidly displacing Holland grown stock, and the reason for this is apparent. British Columbia grown bulbs have been tested in every province of the Dominion on the experimental farms, and in practically every case the verdict was "as good" and in some cases "better" than imported bulbs.

These results are fully outlined in Bulletin No. 88, "Some Flowering Bulbs," which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

Tulips, narcissus, hyacinth, crocus, etc., are bulbs that are planted in the fall, and whether for the garden or the house orders should be placed immediately. The bulletin referred to gives suggestions and advice on soil, fertilizers, culture, etc., and in addition, lists the best varieties by color. The results of experiments are also given. A chapter on common bulb diseases completes a very excellent bulletin, which also contains many illustrations including a colored plate of Darwin tulips.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Northeast of Arisaig, in the country ever associated with the landing and departure of Prince Charlie, lies Loch Morar. It is the deepest loch in the British Isles.

Men are more intelligent than women, declares a political writer. Maybe that's why they have to wear double-breasted coats on hot days.

Foot Comfort

For aching feet use Minard's. Soothes and relieves pain.

MINARD'S "KING OF PAIN" LINIMENT

Youths From Britain Are Returning Home With A New Vision of this Dominion

Coming here a month ago for a tour of Canada as "ambassadors of empire," fifty representatives of the youth of the British Isles, 25 boys and 25 girls, between the ages of 14 and 21, are returning to their homes in England, Ireland, Scotland and Wales, as real ambassadors for Canada.

Their captivation by the charms and challenges of the Dominion, and their intention to boost Canada on their return home, were declared at a luncheon tendered the party by the city of Montreal.

"We," said Lady Marjorie Dalrymple, in charge of the 25 girls in the party, "will tell of the wonders we have seen and the practical splendor of Canada, the warmth of Canada's welcome and hospitality, and the warmth of feeling toward us of the Old Land. We go back full of great memories and high ambitions. We can all do our bit. I believe that if people come out here with open minds and a willingness to work, they will be helped."

Kenneth Lindsay, M.A., Oxon, in charge of the 25 boys of the party, said: "We are going back to set up fifty individual selling agencies for Canada. We go back with hopes high and confirmed optimists. We go back with a new vision of Canada."

"We recognize this is a land of milk and honey but not for those who are not prepared to work," went on Mr. Lascot. "We are going home to preach the gospel that you want here workers and not shirkers.

"We are not concerned about the 'peaceful penetration of the United States' in this country. We find on all sides a very great and sincere love for the empire and we feel this scheme has played a contributory part in that unity of empire which is one of the most potent influences in the preservation of the peace of the world.

"We came to Canada seeking the soul of Canada. We have seen something of the real Canada. We have visited typical Canadian homesteads, we saw the wheat fields, even have had a small part in gathering the harvest, we have visited typical city homes; we have seen your gold and other mines at work, we have climbed your mountains, we have sailed your lakes; we have seen something of your vast industries and we have seen a great deal of your vast natural resources. And we go back home with a real knowledge of the progress of Canada. We feel that the thing of importance is your future."

Mayor Houde suggested Canada adopt a similar scheme sending a group of Canadian youths to the British Isles on a return visit to this one. The idea was praised by Mr. Lascot, who promised full co-operation from the other side if the idea was put into practice.

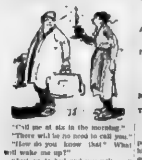
[illegible]

Nels T. Nelson, B.S.A., has been appointed chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the past four years at Windsor, Connecticut, U.S.A., and previously had several years' experience in tobacco culture. The rapid increase in tobacco production in Canada, which has increased from 13,000,000 pounds in 1921, to approximately 46,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

Western Cedar Poles

Recent tests at the Department of the Interior's Forest Products Laboratories, Vancouver branch, show that western cedar poles from fire-killed timber have practically the same strength as those obtained from green trees.

Woman may be a conundrum, but she always has a ready answer.



"Call me at six in the morning."
"There will be no need to call you."
"How do you know that? What will wake me up?"
"Just go to bed and you will see."
—Fliegende Blaetter, Munich.

Writer Interested In Canadian Home Life

British Woman Journalist Making Trip Through Dominion

Very few visitors to Canada are impressed with the luxuries of the Dominion, but that is just what strikes Miss Daisy Cryar, London journalist. Unlike most journalists who visit the Dominion it is not the [illegible] which interests her most. She will write of how Canadian women live and describe modern Canadian homes.

The women of the leisure class in England have no idea of conditions as they exist in Canada, according to Miss Cryar. "I am not referring to business women, but women of leisure. They think this is a terrible country and feel sorry for women who have to live here. They have no idea of the luxuries which are enjoyed here," Miss Cryar declared.

Canadian plumbing was one thing which caught the attention of the British journalist. "Your taps are so big. You turn on one and a whole Niagara of hot water comes gushing forth. Then you seem to indulge yourselves. You keep your homes warm, while in England we still depend largely on fireplaces which mean only a small portion of the house is hot."

Miss Cryar writes for the London Daily Mail under the pen name of "Nan Gloucester." Following her trip to Canada which is partly a holiday one, she plans to go to Paris from where she is writing a series of articles for the London Daily News and London Daily Mail.

B.C. Poultry Industry

Murdo Smith is establishing a large poultry business in connection with his farm at Terrace, B.C. Last month he added 500 high class laying pullets, purchased from the provincial University hennery, to his already big flocks.

W. N. TILLEY, K.C.,
Director, Canadian Pacific Railway

W. N. Tilley, K.C., is one of the leaders of the Canadian Bar. He has specialized in railway legal work and has been actively engaged as counsel in all of the larger railroad questions in Canada since 1916.

Mr. Tilley's connection with the Canadian Pacific began about ten years ago, when he became special counsel for the company, handling all their important appeals and actions as counsel in various rate enquiries.

Mr. Tilley's wide experience in constitutional railway and corporation cases has resulted in his being retained both in the Canadian courts and Privy Council in most of the important issues of the past ten or twelve years, his first outstanding case being the International Fisheries Arbitration at the Hague, where he appeared as one of the counsel for the Dominion of Canada and Newfoundland.

Mr. Tilley was born at Bowmanville, Ontario, in 1868, the son of the late Dr. W. E. Tilley, inspector of public and high schools. He was called to the Bar in 1894, and was gold medalist in his final year in law at Osgoode. He was created a K.C. in 1916.

Canada's Platinum Production

Canada is the third largest producer of platinum among the countries of the world, Russia and Colombia, South America, holding first and second place respectively. Last year Canada produced 11,226 fine ounces of platinum valued at $717,613.

A young woman was being cross-examined in court.

"How old are you?" interposed the magistrate.

She hesitated.

"Don't hesitate," said the other; "every second makes it worse."

MOTHER OF FAMOUS RUNNER

Mrs. Charlotte Williams, of Vancouver, was in Montreal to meet her son, the sprinting sensation of the Olympic games, who says she is "the proudest and happiest mother in Canada." "Really I never thought Percy was the best of the runners. I felt sure that it would be some American or European who would win. But I had ever so much confidence. I knew he would do well but he did better than I thought." Montreal reporters were amazed when they met Mrs. Williams, who looked so young and is so pretty. They thought at first she must be Percy's sweetheart. She is sure he won't go to university in the United States, but will attend the University of British Columbia.

Following Regular Course

Nothing the Matter With Gulf Stream Say Old Mariners

Two mariners from across the Atlantic have brought word to New York that, contrary to report, the gulf stream is following its regular course.

Some trans-Atlantic skippers had expressed the belief that the warmth-giving stream was shifting away from the British Isles, but this was disputed by Captain S. G. S. McNeil, of the Cunarder "Mauretania," and Captain Johnsen, of the Columbus of the North German Lloyd.

"There has been no change in the course of the gulf stream," said Captain McNeil. "It has been running rather stronger this summer, and this has caused the counter current westward from the northern edge to run a little faster.

"There are a number of people who have been crossing this ocean for twenty to thirty years and don't appear to be aware of the existence of the counter current. There is nothing wrong with the gulf stream."

Captain Johnsen said he has noted no change in the course of the stream. He suggested that for accurate scientific purposes slow moving ships be sent criss-cross over the range of the stream to establish authoritatively just what it is doing. Fast-moving ships are impracticable.

A Land Of Homes and Plenty

Comfort and Sound Life Of the People Of the Prairies

"The greatness of this new prairie land, Manitoba, Saskatchewan, and Alberta, lies not only in its growing towns but in the comfort and sound life of the country people scattered all over its territory. It is a land of homes and plenty. If its people have to work hard, they find time also for sport and pleasure. Almost every family has its motor car. Every farm house has its wireless, and nearly everyone keeps in touch with neighbors and the world by telephone. The prairies have long been trying to develop a new summer route through Hudson Bay, which will save all the long journey across land from Montreal and will hasten the day when those great cities (Winnipeg, Edmonton, Calgary, Saskatoon, and Regina) will be more and more the astonishment of the West."—My Magazine, London, Eng.

Geologists think England is tilting. They say that while the north and west are slowly rising, the south and east are sinking.

King Alphonso of Spain makes a hobby of medicine and is greatly interested in surgical operations.

Removal Of Fear Of War Greatest Factor In Development Of North American Countries

Renunciation of war is symbolized by the Canadian-American border, says the Washington Post, in an editorial commenting on Premier Mackenzie King's speech, at Geneva.

"All the arguments for peace find support, all the objections to the world peace treaty are reduced to unconvincing postulate, by the relations which have existed between the two countries for more than a hundred years. The old Rush-Bagot treaty has amply sufficed for the ends of amity. The international joint commission is the agency for the settlement of the ends at issue, and it always finds support for its judgments."

The Post comments that the "most quickening thing" said by the Canadian Premier at Geneva was his conclusion that the removal of the fear of war had been the greatest factor in the development and prosperity of the North American countries, and adds: "The growing world opposition to war cannot now lose sight of the advantage enjoyed by the neighbor countries of North America through the removal of fear of war. Canadian-American peace has been maintained in the face of wars that have time and again altered the face of Europe. This is an old story to Americans and Canadians, but it had a strange sound to many of the representatives of the war-wearied states. The psychology of peace, which has been the basis of permanent good-will between Canada and the United States and which has conduced to bring prosperity, can be obtained by all nations if they will make a habit of renouncing war. This will remove the fear of war, and with fear eliminated, armaments can be reduced and abolished."

Splendid Food For Stock

Soybean Makes Heavy Hay Like Clover But Needs Thorough Curing

The soybean, a crop well known in some parts of the United States and commencing to get a foothold in Canada, makes a very good class of hay. Officers of the Experimental Farms Division of the Department of Agriculture have written a pamphlet on Soybeans in Canada, that gives one a very good idea of the usefulness of the crop. The soybean, like clover, makes a heavy hay that is relished by live stock. It is ready for harvesting any time after the pods have developed until the leaves begin to turn yellow. G. P. McRostie, the head of the Forage Crops Division, says that the best time to cut is when the pods are well filled, for at this stage the highest yield and best quality is obtained. After being cut with the ordinary hay mower, it is left in the swath for about a day or until the leaves are thoroughly wilted. The practice in this respect is about the same as with clover. When wilted it is raked into windrows where it is allowed to cure. After two or three days, if the weather has been favorable, it should be put into small cocks for further curing and drying. Thorough curing is needed to prevent spoiling in the mow. The hauling and handling requires to be carefully done in order to preserve the leaves, which are the most valuable part of the feed, as much as possible.

Danger From Snakes

Experience With a Deadly Cobra In South Africa

One day my mother was horrified to see through a window, her baby in the open space playing with a huge cobra. The little child was sitting in front of the snake pointing with its finger at the quivering tongue of the snake, the snake had reared its head, and was hissing at the child with its head close to the child's face. It was a critical time, if the snake was in any way startled, or angered, it would strike at once and the child would be dead in a few minutes. What was the best thing to do to rescue the child? My mother did the very best thing she could have done under the circumstances. She took up a mouth organ which was near her, and played some music on it. This attracted the attention of the snake, and for a moment it left the child, and then, still playing, my mother approached the baby; the snake crawled away, and the child was brought to the house. Gentleness was the only way in which the child could have been saved.

It is wonderful how many people escape death in a country so full of snakes. As I am writing this, the papers tell how a boy put his hand into a hole in a wall to rob a bird's nest, but the snake had been before him, and was still in the nest and when the child's hand reached the place where the bird's eggs should have been, it touched the snake which struck, and the child was dead in a few minutes.—Dr. S. P. Impey in South Africa Cape Times.

Explore Barren Lands

Airplane Survey Finds Northern Tundra To Be Sixty Per Cent. Lakes

The "barren lands" of the far north were explored recently by a party of three men in a super-Universal Fokker monoplane of the Western Canada Airways. The four-thousand mile journey took twelve days.

The route taken was from Winnipeg north to Churchill and Chesterfield Inlet, across the Baker Lake barren lands to Fort Smith, Wallace Lake, Reindeer Lake, Cold Lake and return to Winnipeg.

The trip revealed that so-called barren land territory is composed of sixty-per cent. lakes, the explorers stated, and [illegible] and land [illegible] vegetation.

Not [illegible] the "place winged from Chesterfield Inlet nearly 1,500 miles north to Baker Lake, at which point a few trappers, priests and Eskimos live the year round.

Less sole leather is produced annually in Africa than in any other continent and in 1927 the total production amounted to only 17,000,000 pounds.

"What are the seven ages of woman?"

"Her real age and six guesses."

The Control Of Pests

Measures To Be Taken To Overcome Pests In Field and Garden

The greatest menace to agriculture is the large number of insect pests which with very little encouragement spread at an alarming rate. These are particularly prevalent and persistent in gardens, and unless control measures are instituted soon make crops of vegetables and flowers a total loss.

Injurious insects may be divided, roughly into two classes, by the nature of their mouth parts, "biting" insects which bite and chew their food, such as cut worm, leaf eating beetles, etc., and "sucking" insects which suck up their food by means of their beaks, such as aphids, the tree bugs, the scale insects, etc. For the first a stomach poison is necessary and for the second a contact insecticide.

"Insects of the Flower Garden and Their Control," is a new bulletin of the Department of Agriculture, No. 99 new series. This may be had on application to the Publications Branch, Department of Agriculture, Ottawa, and in it will be found a very full treatise on the cultural practices for the control of insects, also the formulae for insecticides and the way to apply them. Arthur Gibson, Dominion Entomologist, has covered the control of destructive insects in a very full and complete manner in this bulletin and the work is fully illustrated.

The Mighty Hunter

Big Hunter (at club at 2 a.m.): Yeah, sir, I've bearded the lion in his den; faced tigers—

Waiter (interrupting): You're wanted at the phone, sir. Your wife wants you to come home.

B. H.: I say, waiter, here's half-dollar for you. Just tell her I'm not at the club.

The average production of honey per hive in Cyril T. [illegible] apiary at Manitou [illegible], during the past four seasons was 125 [illegible].

He who lacks time to make lacks time to mend.

"Now that you have learned how to stop, you must buy a new car to learn how to turn."—Pele Mele, Paris.

A Great Car —any way you look at it!

If beauty possesses an appeal for you, you will admire Chevrolet's long, low Fisher Bodies with their fine upholsteries and appointments.

If comfort attracts you, you will revel in Chevrolet's easy-riding seats.

If you delight in performance, you will appreciate the power, speed and smoothness of the "Bigger and Better" Chevrolet engine.

If you value dependability and endurance, you will note Chevrolet's ruggedness.

If you check maintenance costs, Chevrolet has an economy-record that will interest you.

The "Bigger and Better" Chevrolet is a "great car" any way you look at it.

Ask for a demonstration. No obligation, of course.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

C. HOBSON, Proprietor
MAIN STREET, - - TOFIELD

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Gladen, on Tuesday, September 25th, a daughter.

The monthly meeting of the Anglican W.A. will take place on Wednesday, October 3rd, at 2:30 p.m. at the home of Mrs. J. W. Robinson. In case of bad weather the place of meeting will be in town at the home of Mrs. F. M. Webb.

Mr. Aldred, of Edmonton, one time music teacher here was a business visitor to Tofield this week.

Mr. Leonard P. Woodhams, will pay an official visit to Tofield on Monday, October 1st. Those desiring their eyes attended to can get in touch with him at the Royal Alexandra Hotel.

Mrs. Hedstrom of Mirror was in town on Monday.

Ruth, Donald and Enid McLaughlin spent Sunday in the City with Mr. and Mrs. McLaughlin. Mr. McLaughlin is improving.

Mrs. Adams and Adrof returned to Calgary after spending a couple of weeks here visiting friends.

Mr. Moore, who has been on the staff of the Tofield Creamery for some time left, recently left for Ponoka, where we understand he will undertake similar duties.

Clifford Lee was home over the week-end before commencing the fall term at the Alberta University.

Mrs. McDonough and baby of Edmonton spent a few days at the Abbott home this week.

Mrs. McLaughlin, who during Mr. McLaughlin's illness, is staying in the city, was home for a day on Wednesday.

The Catholic Women's League will hold a Bazaar on Saturday, November 17th, in the Institute Rooms. Afternoon tea will be served and there will be a sale of fancy work and home cooking. Everyone welcome.

Mr. and Mrs. Robt. Wood from Calgary and Mrs. E. Joiner from Edmonton were guests at the hospitable Hopgood home for a few days last week.

Rev. Nugent Wilson, former Anglican minister at Tofield, now of England, and who is spending a holiday in Canada will conduct services at Tofield Holy Trinity Church on Sunday, September 30th, at 7:30 p.m. Services will also be held at Logan at 11:00 a.m.

The Institute of Technology and Art of Calgary expects to establish in Tofield night classes in English, provided that a minimum enrollment of twelve adults be obtained. These classes will be under the supervision of the Department of Education, who will grant at least 50 per cent of the tuition fees. Prospective students please register with J. W. Chapman, Secretary-Treasurer of the Tofield School District. Classes will be held two nights per week, the individual fee being 15 to 20 cents a lesson.

TENDERS FOR TEACHERS' RESIDENCE

Sealed tenders will be received by the Board of Trustees of Summer S. D., No. 1668, at the office of the secretary-treasurer up to noon of October 5th, 1928, for the erection of a frame Teacher's Residence, according to Departmental Plan "T 4." Plans and specifications may be obtained from the Secretary-Treasurer on payment of a deposit of Five Dollars ($5.00), which will be returned on the receipt of a bona fide tender with plans and specifications. The lowest or any tender will not necessarily be accepted. Plans and specifications may be seen at the Department of Education.

WM. LENNIE,
Secretary-Treasurer.
Tofield, Alta., September 27th, 1928

A railway smash took place near Tofield on Sunday last when a train loaded with wheat smashed into a standing freight. The caboose of the standing freight was entirely demolished. The driver and fireman of the oncoming train jumped to safety. There was fortunately no one in the caboose at the time and no person was injured. The cause of the crash was the inability of the engineer to bring his train to a stop in time, as there is a downward grade at this point.

WINTER TRAIN SERVICE WILL BE IMPROVED

As a result of the great increase in winter travel between Ontario and the prairie provinces, the Confederation the Canadian National Railways crack passenger express which now runs between Toronto and Vancouver linking these cities with Brandon, Regina, Saskatoon and Edmonton will operate as far west as Edmonton until January 5th. The winter schedule will begin on September 27. This will be the first time Toronto has had a direct connection through western Canada during the winter months.

The service between Edmonton, Jasper and Prince Rupert has also been altered. Effective September 30, train number five will leave Edmonton at 12:30 p.m. (M.T.) Sunday, Tuesday and Friday instead of daily except Sunday. Effective November 18, number 5 will leave Jasper at 8:40 a.m. (P.T.) Monday, Wednesday and Saturday instead of daily except Monday arriving at Prince Rupert at 3:00 p.m. Sunday, Tuesday and Thursday instead of daily except Tuesday.

Effective November 13, number 6 will leave Prince Rupert at 11:30 a.m. Monday, Wednesday and Saturday instead of daily except Sunday arriving at Jasper Sunday, Tuesday and Thursday instead of daily except Monday. Effective September 30th, number 6 will leave Jasper at 10:30 p.m. Sunday, Tuesday and Thursday instead of daily except on Monday arriving at Edmonton at 8 a.m. Monday, Wednesday and Friday instead of daily except Tuesday.

AN OPEN LETTER TO THE PEOPLE OF ALBERTA

Since the inauguration of the Peace Time Programme of the Canadian Red Cross, the Alberta Division has spent hundreds of thousands of dollars within the province. This money has been spent in relief work, out-post hospitals, home nursing classes, immigration work, and in connection with the Crippled Children's work, on which work alone $160,000.00 has been spent.

A large part of the money spent, a quarter of a million, in fact has been given to us in annual grants by the National Office in Toronto, who believe the work the Alberta Division was doing was worthy of that support. The funds at National office however, have become depleted, and this year our grant was cut by $15,000.00 and next year we will have to be self-supporting.

This situation leaves the question of the continuance of Red Cross services in Alberta squarely up to the people of the province. We need $[illegible],000.00 yearly to carry on our work. Over $50,000.00 of that sum must be raised by voluntary contribution. Unless therefore you rally to the support of Red Cross and by each doing his or her share, enable us to raise this amount, Red Cross must discontinue the services which it has been giving.

This means stopping our immigration and health work, reducing our outpost hospital work, and and worst of all curtailing our crippled children's work. Are you willing this should happen?

As president of the Alberta Division I feel that Red Cross Services are too valuable to lose, and I believe that when the people of this province really realize that Red Cross must have greater support or it ceases operation, there will be no question of their answer.

There will be a provincial wide campaign starting at once. I appeal to all to do their share. Give at least one dollar and become a member; give more if you can. If you would rather, you can give a grain donation, as all elevator agents will issue cash or storage tickets in the name of the society and forward them to us for you. Do what you can to assist those in charge in your district and give your membership or donation to them or if you prefer, send your membership or donation to 407 Civic Block, Edmonton.

The main thing is give your support in every possible way. Don't let Red Cross Fail.

Yours faithfully,
W. EGBERT,
Lieutenant Governor and President Alberta Division, Red Cross Society.

BARDO

Everybody is busy threshing, taking advantage of the nice weather. Four machines are threshing here within a radius of little more than a mile. Most of the farmers are disappointed in the grade of their grain, so much of it was damaged by the early frost.

Mr. Swartzendruber and his wife from Iowa, are here visiting his sister, Mrs. John Yoder Sr. There was a reunion of the Yoder family at the Dan Brenneman home on Sunday, about thirty were present.

Mr. and Mrs. Ab. Weber entertained a large number of neighbors and visitors from abroad on Sunday.

Mr. Joe King and family who have been visiting relatives here for some time have returned to Illinois. The Stalter family who drove through with them have gone to Oregon where they will visit his sister before going back home.

Four of the Brenneman boys have gone to Kansas to re-enter school, Joe, Titus and James to Hesston. Fred will enter the University of Kansas for his first year in the medical course.

Albion and Bernard Anderson planned to drive through from Bellingham, but the night before they were to start Albion's car was stolen, so Bernard came on the train. He is working with the Rude-Finseth machine.

Mrs. John Ness of Bellingham, Wash., and Mrs. Thor Horte of Daysland, Alta., are here visiting relatives and friends.

Mrs. P. B. Anderson and Mrs. Nordhus are on the sick list.

Mrs. Haakedal entertained company from New Norway, and Mr. and Mrs. Pete Haugen of Tofield on Sunday.

Mrs. Chas. Whillans visited with Mrs. Hills on Tuesday.

The Bardo schools are under the same management as last year. Miss Myrtle Rude and Carey Brecken. The new teacher at Grande Forks is Miss Bergquist of Hawlf. Miss Betsy Ness will teach at the Lutheran College at Camrose.

Mrs. Alf Anderson is assisting Mrs Jacobson during the threshing.

Mr. and Mrs. Geo. Hendrickson of Armena are moving to the John Anderson farm which they have bought. The people of Bardo are glad to welcome "Magda" back home.

Mondred Finseth, had his hand badly cut when coupling the separator to the engine. He is unable to work and the wound is very painful.

KINGMAN

Mr. Crocket of Edmonton, visited at the Jack Erickson home for a few days last week.

Miss Lily Erickson spent a few days in Daysland last week with her friend, Miss Irene Horte.

Mrs. F. Horte, of Daysland, and her sister Mrs. J. Ness of Bellingham, Wash., are visiting friends and relatives in the Kingman and Bardo districts for a couple of weeks.

Mrs. F. Erickson motored to Tofield on Wednesday.

Mrs. A. Asp is visiting with her mother in Daysland for a few days.

Mrs. C. R. Blyckert accompanied Mr. and Mrs J. J. Munson of Camrose to Edmonton on Saturday.

Mr. Bill Gold and Miss Viola Erickson of Edmonton, visited with Miss Lillian Lindberg on Sunday.

Mr. Nels Jardie and Miss Crawford motored to Edmonton on Saturday.

Mr. and Mrs. J. Haugen and family of Edmonton, visited at the P. Simonson home over the week-end.

Mr. and Mrs. D. Thompson visited at Armena on Sunday.

Mrs. Ed Thompson and Miss Ida Thompson spent a few days in Edmonton last week.

Mr. Asp and family motored to New Norway on Sunday.

Nearly all the threshing in the Kingman district will be finished by the end of the week.

Mr. and Mrs. John Anderson entertained a number of friends on Sunday afternoon.

KETCHAMOOT

With six threshing machines running in our district and ideal threshing weather the grain is being turned out very fast, farmers are not very enthusiastic but it is a long way from a crop failure. The potato crop is light this year.

Mrs. Austin McBeth and three children of Calgary came last Friday for a visit with Mrs. McBeth's mother, Mrs. Frank Hull.

Little Miss Eileen Stirrett and brother, Estin, have been under the doctors care for several weeks, due to after effects of the "flu," but are thought now to be improving nicely.

Mr. and Mrs. D. H. Mitchell, Mr. and Mrs. Leslie Salsbury and little daughter, and Mrs. P. F. Ingram motored down from Edmonton a week ago Saturday and spent Sunday visiting relatives.

Miss Ardis Wood returned to her home last week after several days nursing at the W. A. Mitchell home.

Mr. and Mrs. P. O. Moline and family, and Mrs. C. A. Ingram motored to Edmonton on Friday.

Miss Mildred Ingram is assisting her sister Mrs. T. D. Ferguson to cook for threshers.

Mrs. A. McMullen entertained the M.A.S. at her home on the 12th. A good attendance was present including three visitors, Mrs. Peter Lee, Mrs. Harrison and Mrs. Tory. The October meeting will be held at Mrs. Wm. Lee's.

U.F.W.A. NOTES

The regular meeting was held at the home of Mrs. Ball. There were 12 members and three visitors present.

Mrs. Gray occupied the chair and Mrs. Murray took the place of the secretary who was absent.

After some discussion it was decided that the meetings hereafter be held in the municipal building until further notice.

Mrs. Wm. Thompson had prepared a splendid paper on "Educating children along the lines of their natural talent," as Mrs. Thompson was not present the Secretary Protem read the paper. A round table talk followed. A hearty vote of thanks was voted Mrs. Thompson.

The next meeting will be held in the municipal hall on Thursday, October 11th at 2:30 p.m. The roll call will be answered with conundrums. Mrs. Phillips will give a paper on co-operation between the home and the school.

HAIL LOSS CLAIMS REACH $4,500,000

CALGARY—In addition to the heavy hail losses incurred by the hail insurance board of Alberta as previously announced, line insurance companies operating in the province have also suffered a net loss of about two million dollars. The total amount paid out in claims has been in the neighborhood of four million dollars. This, with the claims dealt with by the hail insurance board bring the total amount paid out this season to more than four and one half million dollars.

Some of the insurance companies it is stated had been exceptionally heavily hit as they carried a large amount of insurance in the districts that received the brunt of the big storm on August 11.

In face of the large losses last season and again this year it is considered probable that some of the companies will discontinue writing hail insurance in Alberta. Others again are taking their heavy losses smiling in the hope that they will be able to recoup next year.

OATS 128 BUSHELS To The ACRE

A fine yield of oats was grown on the farm of D. L. Yoder, 15 acres going 128 bushels to the acre. This is an exceptionally fine yield and the oats were of good quality.

In a wheat field of 35 acres, Mr. Yoder received a yield of 44 bushels to the acre.

Oliver Thompson and C. Engstad motored to Edmonton on Sunday.

The Kingman girls motored to Camrose on Monday evening for a game of basketball with the Normal girls, and were defeated by a score of 24 to 14.

WORLD HAPPENINGS BRIEFLY TOLD

Thomas Lawson is the first Canadian sculling champion of Toronto on Toronto Bay.

The first academic class has graduated from the English school established by Governor J. De La Warr.

A Chinese bridge team and the engineers of a new large ship at Mexico City defeated the first place of Australia, in the day-night 1400 notary. They held supremacy 1926 which was without.

The municipal government dying posts to Hudson Strait are a strong possibility it was stated by Squadron Leader T. A. Lawrence, who with eight others, has returned from 18 months' service in the North.

Members of the provincial government and Lord Lovat, under secretary of state for the Dominions in the British Government discussed the placing of British settlers on the land in British Columbia. The government favored the fullest co-operation.

French Canadian resident of New England, may decide the presidential election, Ordinarily these states are Republican but it is thought Democrats will get the majority of the French-Canadian vote which is considerable.

Fire losses in Canada during the week ended September 12, 1929, are estimated by The Montreal Times at $729,300, as compared with $239,000 for the previous week, and with $292,450 for the corresponding week of last year.

Establishment of the largest paper mill in British Columbia is virtually assured, according to a recent reply in the Vancouver Star. The lands department, in an interview stated that the Fraser Pulp and Paper Company is preparing to go ahead with the erection of a plant in Prince George.

The commission appointed by the government of Peru to consider the Kellogg pact for the renunciation of war has recommended that Peru adhere to the pact, but should adhere to the conditions and reservations of certain European governments.

Many Fly On Homebush

Bush Is Seen At Dominion Land Office At Edmonton

All previous records since pre-war days were exceeded during the week of August 9th to 16th, in the number of homesteads filed on at the Edmonton Dominion Land Office. The total for the above period this year was 114, while for the same period of last year only 58 such entries were taken up. Local officials attribute the increase to several causes, the general improvement in conditions the new regulations which permit a party to have previously proved up a homestead to retire on Crown land, and to the large number of settlers now pressing the opportunity to secure land closer to transportation and social amenities than formerly.

About two-thirds of all the employees in the telephone business in the United States and Canada are women and girls.

It is said man can live for five times as fast as a bird. Maybe he just has hardly ever hear of a bird working seven days of a week.

ABOVE—The "C. O. Stillman" world's largest Tanker. BELOW—The "Calgarian" most modern of Tank ships

With the launching in England on September 14th of the motor tank ships "Calgarian" Canada's interests which already own and operate the world's largest tank ship (also one of the most modern and efficient of tankers, and a "Canadian" also fleet who further possess one of the two largest oil fleets of the world.

The "Calgarian" ships from the ways at Haverton Hill-on-Tees with Miss Eleanor Rose, daughter of Vice-Admiral Sir Lionel Halsey, Controller Lieut. acting as sponsor. The "Calgarian" is a 13,500 ton vessel with an indicated horse-power of 6,500, which makes her one of the most powerful and efficient ships of her size. She is guaranteed a service speed of 12 knots. She has a length 'tween perpendiculars of 520 feet, a breadth moulded of 72 feet 6 inches and a depth moulded of 37 feet 6 inches. Her modern equipment will permit loading and unloading of 12,000 barrels of oil in twenty-four hours. She will be manned complement, in addition to the officers, of 76 men, serving mess as well as sleeping between Tuxpan in Peru, Cartagena in Colombia, and Montreal and Halifax. She will establish new records for economical transport of petroleum.

The "Calgarian" is the last of three large modern seagoing tankers, and one ship, tanker, which were built during some time ago in British shipyards for Imperial Oil. Preceding her in launching were the Windsorite for later service and the "Imperialite" and "Canadolite." The latter of the fleet in which she will serve is the world's largest tanker, the "C. O. Stillman" of 12,000 tons, the "Victolite," "Vancouverite," "Calgarolite," "Montrolite" and "Canadalite" of 18,000 tons; the "Quebecite" and the "Regionite"; the Mississippi

Livestock Industry Prosperous

Good Prices Now Being Obtained In Western Canada

A cycle of prosperity now rules the livestock industry of Western Canada, in the opinion of ranchers and cattle men, according to reports that they were turned out for three years ago and high prices higher. Lambs and mutton are also selling at a worth-while price and good, heavy, well-finished animals are getting the demand. A survey of the livestock situation in the United States indicates a gradual shortage of beef cattle making for strength in the Canadian market, so much so that Canadian producers find it profitable to ship there despite the duty of two cents per pound imposed on fat cattle. Steers and feeder cattle from the Canadian prairie are also adapted in the middle west.

The Yellow Tip Method

A new age for monotone has appeared on the "English" pitch. It is hoped that it will be particularly effective in checking those parents who are not too careful when out of earshot of food under repair to their darlings grant the wearing, the contentment. "Here Bunny, fitted it under Regent's Canal, you can't go along in a large white signboard with the admonition: "This Here Bunny Wanted" painted on it in large red letters. ugust 1 will be

Southern Canadian Airport

The Canadian Gateway airport at Derby Line, Vermont, was dedicated recently with Vermont and Chairman officials in attendance. The dedication address was delivered by Congressman Ernest W. Gibson. Fifteen airplanes from various Canadian and American cities came and, in the exercises.

The happiest people are those who are so busy they don't have time to think about whether they are or not.

Russia could be being used now it should make a nice little thing to ship on when you're in a hurry

Huge Hurry-Co-Round

Gulf Stream Is An Old As Atlantic Ocean

The huge Gulf Stream, which moves miles wider than all the rivers of the earth combined, is not changing its course, according to the latest scientific reports, counselling on statements of the Virginia Academy defining a possible reversal of current.

There has been a gulf stream and trade-winds to blow as it, the scientific report, describing the trade winds causes the huge current as an electric fan directed at the surface of a pile of water will cause all the water to swirl about.

The warm waters of the Caribbean Sea, blown westward by the trade winds into the Gulf of Mexico swirl around and are emitted in the Florida Straits, whence the stream, 40 miles wide and many feet deep, moves with such momentum northeastward that it preserves its identity for 3,000 miles to reach Europe.

The Gulf Stream is a merry-go-round of the Atlantic Ocean, and of the British Isles, helping to provide it a mild but foggy climate in that region, the railway for passengers between Ireland and Canada, and one branch turns south to the Arctic Ocean, where it brings the warm waters to the Arctic Ocean.

Gulf for the great stream, England might have also climate of Labrador and Norway, the breakers of Greenland.

Record Cheese Shipment

Cheese valued at $500,000 shipped from Montreal in a single week to foreign markets totalled more than 10,000 boxes, an increase of nearly 20,000 boxes compared with the same week a year ago. Prices paid at country points were records for the year to date.

The prime population of England and Wales has increased from 36,000,000 to 40,000,000 since 1801.

A Growing Industry

Fish Production Trends In B.C. Being Big Business

The growth of fish production from on the west coast of Vancouver Island is shown in a report of the Canadian Department of Fisheries. With the fitting of the boat in 1925 fifteen power launches, and a production of 3,611 tons of planked and 1,000,721 gallons of pilchard oil were taken, as well as 2,000 tons of herring. There were in operation pertaining $3,115 in boats and on all production of 2,623,136 gallons. The movement in the first year was chiefly to Japan, but in 1927 more than 1,000 tons were shipped to Hamburg. The entire production of pilchard oil last year was shipped to the United States.

New Insomnia Cure

Lie With Head The North Section Of Bed, Is Claim

The most-time-you can't sleep, try lying with crepe in the morning with your head to the north. Pole—instead of mounting sheep, the London Sunday Standard advises.

Many wish the head north and the feet south, but the author, in stating a physician. "The human body is a magnet through which electricity circulates north to south."

It was explained that, on the electric theory, the north end of the magnet attracts the south.

Announcer—"I simply cannot wait later evening."

"Station Manager—"Hold baby half an hour."

Announcer—"Because my wife will be listening in—and you're not on speaking terms."

In the Wallachi salt mines at Ocna there are extant, stations and stations made of salt.

Indian Day Celebrations at Banff

Upper—The size of the crowds when Indians of all tribes meet for the Stampede Lower left—Squaws doing their food contest. Lower right—An Indian of today depicting one of a hundred years ago

No section of Canada can claim a monopoly of Indian Summer, but, to Banff, Alta., belongs Indian Days. Indian Summer comes in the fall and may last two or three weeks; Indian Days never in July and are only three in number; but, for those for whom they are named, those it never real pleasure crowded into that short time than they experience during the other three hundred and sixty-two days of the year.

For three days the Indian is "King of Banff". His prides his tepees under the steep cliffs of Cascade Mountain, known to the Indians from ancestral days as "Stoney Chief". Close to "Stoney Chief" and still known by its original name stands "Stoney Squaw". The latter is a pretty mountain, much smaller than its neighbour, but with an appealing feminine dignity all its own. The reason, then, for the Indians' original choice of names is obvious to all.

For these three festival days the Indian is lord of all he surveys, and all through the village of Banff and in and around the famous Banff Springs Hotel the scene resembles a veritable monster Indian camp. The event that probably led up to the adoption of Indian Days occurred in July 1890 when rail traffic both east and west at Banff was tied up for a period of ten days, as heavy rains had washed out the tracks in both directions. The Banff Springs Hotel, then but a small structure, was crowded with tourists who found time long heavily on their hands.

The hotel manager at that time and Tom Wilson, the famous Rocky Mountain guide, then put their heads together and decided to invite up the whole Stoney Indian Tribe from the Morley Reserve to Banff, to mingle with the visitors.

What is today the main road to the hotel was on that occasion staked off as a race track, the winning post being placed at the hotel entrance. Every form of sport and sport known to the Indians was held, in addition to many suggested by the white spectators. Altogether the visit of the Indians was a marvellous success, and it ultimately led to the establishment in 1907 of an annual Indian Day, which in time grew into the outstanding advertised Indian Days. The Indians then formed to these days with the greatest enthusiasm and early on in the year start counting "only so many days now till we go to Banff". The Indian village of a hundred tepees is, as said before, located at the foot of Cascade Mountain for the festival, and is semi-circular in form, each band of the tribe having a section to themselves. Rations are served directly the Indian village is in shape. The Government donates three buffalo a piece to the Indians, and the first one of these is then shot by a young grandchild, and quickly cut up by the waiting butchers. Its skin and spoils are the first Indian delicacies employed, and within thirty minutes after the shot is fired, there is not a vestige left of what was once a lovely animal, weighing approximately one ton.

Here and There

Would You Like Electricity In Your Home?

THE KOHLER Automatic Electric Light and Power Plant will give it to you with the minimum of expense and trouble and the maximum of economy and dependability.

The KOHLER Automatic Electric Light and Power Plant is exceptionally well made in every particular. Has four cylinder vibrationless engine containing all the refinements of a high grade motor. It is radiator cooled; force feed lubrication; vacuum tank; automatic governor (proportions fuel consumption to load plant is carrying), etc. Dynamo is 1500 watt capacity and is also splendidly made. The plant is purely automatic—that is, when you turn on a light or appliance the plant starts and when the last light or appliance is turned off it stops.

There are thousands in use in the United States and all parts of the world.
Both President Coolidges summer homes are lighted by Kohler plants and many other notable installations have been made.
But while the quality is as high as can be procured the price is no higher than the ordinary run of private electric plants.
A 1500 watt plant, which we recommend for most farm installations come at $700.00 f.o.b. Tofield and at that figure is the best electric light plant investment a farmer can make.
There is an 800 watt model at a lower price and 2000, 5000, and 10,000 watt models for larger consumers.
Further information will be gladly given by—

THE WEATHER

IT WOULD be decidedly unkind to let this exceptionally long spell of glorious weather pass by without some forgs of mention. Taking it as it comes Alberta weather averages up about as good as the weather of most other places and decidedly better than some. We are fortunate in not having to undergo severe hurricanes and tornadoes, which coming unawares, wipes out many lives and does millions of dollars worth of damage.

The fine weather that is now and has been prevailing for some time, is a veritable blessing to the farmer.

Just contrast the weather situation with that of last year. Cold, rain, snow, with the consequent delaying of threshing. This year bright sunshine and threshing 75 per cent, perhaps more, finished by the end of September.

FRUIT DUMPING

NOT SO long since we bought a box of fruit locally and reading the label, noticed that it was grown in the United States. A week or so later we received a copy of "The Vernon News" in which were bitter complaints regarding United States fruit houses dumping their surplus product on the Canadian market in order to hold up their home market. This fruit, we are told comes in duty free. The Okanagan fruit growers, so we are informed, do not object to bona fide competition, but it is the "dumping" of fruit into Canada at lower prices than the United States home market that is crippling their business.

The Okanagan Valley is admirably suited to the growing of fruits. It is populated by a fine class of people, and if their claims of unfair competition are true and just, there is full cause for government intervention.

It is only reasonable to suppose that the prairie house wife likes to procure her fruit as cheaply as possible, but we do not believe that the prairie house wife desires to buy fruit dumped into Canada at a price which, if persisted in long enough, will wipe out the Okanagan Valley's chief industry. The prairie housewife when buying dumped United States fruit when it is cheaper is following the course of good business. She sees the quality and hears the price and rarely knows or enquires where it is grown. Her duty is to feed her family as cheaply as possible.

The Okanagan Valley has been settled and developed by reason of the fruit industry, it would be a great mistake for the government to allow the "dumping" of foreign fruit to ruin an entire country side.

WAR ON WEEDS

WE HAVE had so much to say about weeds this summer, that our readers will be thinking that on this subject at least we never know when to stop. Be that as it may, the subject is important enough and for their own interests, farmers must pay attention to it. As far as weed problems are concerned, we are merely conveyors of information and not originators of it.

Now is the time to attend to the matter of the prevention of weed seeds spreading. By the wind, from plants ripened; by means of the threshing machines, and numerous other ways, weed seeds spread at this time of the year to reappear at points miles away. No amount of care will entirely prevent weed seeds from spreading to some extent, but care exercised universally at this season of the year will help a great deal in keeping your own and your neighbors farm free of weeds.

PUBLIC NOTICE

Notice is hereby given that Gordon Bros., of Bay Lake, Alberta, have applied to the proper authorities to exchange road allowances running between sections 19 and 30, 50-20-w4, thrown Stove Lake, for land in place presently, and that said application has been duly granted. Any protest against this exchange must be made within thirty days from the date of this notice.

Dated at Tofield, this 19th day of September, 1928.

(Sgd.) GORDON BROS.,

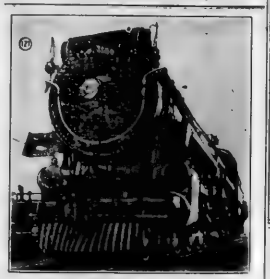
A Little Sub Here
A Little Sub There
Subscriptions, Subscriptions
—Everywhere
Like grain stooks standing in a farmer's field—are subscriptions scattered throughout a rural district. Each are holding a promise as good as gold—yes better than gold—yet they must be collected up before they are of real and practical value. With a team, wagon and pitchfork, the farmer can collect his grain stooks, take them to the threshing machine, from which golden grain emerges which in turn is taken to the elevator, where in exchange, the farmer receives coin of the realm.
The newspaper man cannot do this, he is dependent upon the good will of subscribers—when they come to town to drop in and pay. Fall time is subscription time and we would be delighted to renew your subscription now.
Special Note.—After October 1st the price of the Mercury will be $2.00 per year. We are among the very last of weekly newspapers to raise our price, the great majority having been selling for $2.00 per year for the past seven years.
THE TOFIELD MERCURY

Consistent Advertising Brings Results



EMPIRE'S LARGEST
Built from designs originated in the motive power department of the Canadian Pacific Railway, the 3100 is the largest passenger locomotive in the British Empire and the most powerful Canadian workman turned her out at Angus Shops, a graceful mechanism nearly one hundred feet long, with a tractive effort of 60,000 pounds equal to 2,385 horse power. The use of Canadian made steel parts has reduced its weight to 42,400 pounds, but the high ratio of tractive power to weight is a notable feature of the new engine. The boiler pressure, 275 pounds, is the highest of any locomotive in Canada. The eight drive wheels have a diameter of 74 inches and the cast nickle steel cylinders are 25½ inches by 30 inches. The length over all of the new Canadian Pacific engines is 97 feet 8 inches. Two have been built at present for the Toronto-Montreal run.

An Inspiring Sight

The prairies of Western Canada during this year of grace, 1928, have been a joy to behold. In the early summer following the ... rains the ... verdant ... of the recently sown grain crops presented a restful ... promise for the future. As week followed week of almost ... weather, with only an occasional storm affecting restricted ... and an absence of rust and insect pests the early promise of a bountiful crop grew gradually into a certainty.

... prairies were in early spring and the ... days of summer ... as they were as the crops became taller and the ... and ... as they swayed to the passing breeze ... the late summer and early fall ... that the West ... comes into ... a picture which ... rival and ...

... written ... when ... day closing with a glorious sunset the promise of still ... perfect harvest weather to follow. The writer has just completed a motor trip through hundreds of miles of grain fields. And what a sight. If the ... could make such a trip surely their ... would be ...

... almost perfect roads ... only well graded dirt roads, ... as level as a billiard table, or with the feeling of a bird ... as the car speeds over more rolling country, dropping into a valley here and winding up through the hills, only one sight reaches the ... and that panorama extends unchanged as far as the eye can reach — a ... expanse of yellow golden grain. The whole country is golden yellow.

And no great industrial city in the world can show a scene of greater ... can be heard the click and clatter of the binders as they ... down the ripened grain and with automatic carelessness ... the bound sheaves ... ready for the stookers. With amazing frequency the ... the newer combines, reaper and thresher, some using ... others threshing the grain as the ... machines ... the irresistibility of a tank in modern warfare. In some ... the harvest hands are busy in groups gathering the sheaves into stooks ... road a threshing gang is at work, horses hauling great ... pitchers, engineers, firemen, drivers, all ... working at high pressure to accomplish a maximum ... fails.

And ... speeds along the road it becomes a necessity to slow down ... every few minutes as we pass or allow to pass a box wagon or ... truck ... with the wheat being hurried to the elevators ... far from artistic but essentially modern and practical adjuncts to ...

Wonders Of the Unknown

Wireless Has Revealed Many Things But Much Remains To Be Learned

Sounds, so faint that no human ear can detect them, but which run into the waters of an aquarium, will stun and kill small fish. An earthworm can hear well below the soil the tread of a thrush above, and so keep out of harm's way. One may see a slug in a pansy bed but can you hear it munching away as it makes a meal?

There is many a quiver in the air that means nothing to human beings but has a message for the insect or the bird. Since the beginning of time, electrons have rushed through the ether at the speed of 186,000 miles per second, but we never knew of their existence until ten years ago, when "wireless" revealed it. What more remains in a world unknown to human senses?

HAD NO APPETITE WEAK AND DIZZY

This New Brunswick Woman Restored By Dr. Williams Pink Pills

Mrs. James Belyea, Brown's Flat, N.B., says: "I am writing to tell you the great good I had through the timely use of Dr. William's Pink Pills. My health had failed and I was troubled with great weakness. I had no appetite and frequently had dizzy spells. The least exertion would make my heart palpitate violently and I felt tired at all times. I had doctored a great deal without getting much relief, and was feeling greatly discouraged when I finally decided to try Dr. Williams Pink Pills. The happy results following the use of this medicine can best be summed up by saying that I am again perfectly well, able to do my housework and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."

If you have any, or all, of the symptoms above noted, do not delay begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to note the improvement in your condition after a few weeks. You can get these pills through any dealer in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a little booklet, "Building Up the Blood," will be sent free.

Intelligent Congressman

Shipowner: We must have government aid! Congress does not realize how expensive it is to operate a ship. Why, barnacles alone cost American ships $100,000,000 a year.

Congressman: You ought to cut that item down. Use a cheaper grade of barnacles, or get along with fewer of them.

Painless and perfect in their action. Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Turks Are Progressing

Recipes For This Week

(By Betty Barclay)

DELICIOUS VEAL

Use veal steak one-half inch thick. Cut into pieces large enough for a serving. Beat the yolk of one egg and add a teaspoon or more of water, into this dip the veal, then roll in bread crumbs which have been toasted and well seasoned with salt and pepper. Have an iron spider piping hot with about one-fourth inch hot fat in the bottom. Pan-fry the veal quickly on both sides until a nice brown, then cover the veal with hot milk (a pint or more of sour cream may also be used). Cover tightly and set in a slow oven for about one hour, removing the lid for the last fifteen minutes.

FAIRY FLUFF

- 4 egg yolks
- 4 tablespoons sugar
- ½ cup orange juice
- Grated rind 1 orange
- Grated rind 1 lemon
- 2 tablespoons hot water
- 4 egg whites
- 2 tablespoons sugar
- Lady-fingers

Beat egg yolk with four tablespoons sugar, add orange juice and grated rind, lemon juice and grated rind, and hot water, and cook in double boiler until mixture thickens stirring constantly. Beat egg whites until stiff, add two tablespoons sugar and fold into first mixture. Chill, line sherbert glasses with lady-fingers, fill with orange mixture and serve.

Milk May Be Sold In Sheets

Danish Farmer Has Invented Wonderful New Machine

The world is used to several varieties of prepared milk and to milk powder, but shortly it will be made and sold in sheets.

A landed proprietor at Copenhagen has invented a device which extracts the water from fresh milk and leaves dry milk which comes from the machine in a form resembling sheets of rather heavy tissue paper ...

Some Good Bargains

Land Bought For Almost Nothing Is Now Invaluable

Probably the world's best bargain was made by Peter Minuit, a Dutchman, who bought the whole of Manhattan Island from the Indians in 1626 for goods worth $24. Almost as good was that of Simon Van Der Stell, one time governor of Capetown, who bought the bay of Port Natal for $50 worth of goods.

The East India Company made a gigantic bargain in the year 1668. Charles II. had just been given the island of Bombay as a dowry at his marriage with Infanta Catherine, of Portugal. The King thought the place worthless—as the Portuguese had done—and allowed the Company to rent it for £10 a year. In 1641 an agent of Lord Stirling's sold the whole of Nantucket Island to Thomas Mayhew for £40; eighteen years later Mayhew sold a joint interest to nine partners for £30, and two beaver hats! The island is now a separate county of Massachusetts.

A worth-while sale was effected by Roger Ludlow, a year before Mayhew bought Nantucket. Ludlow gave the Indians six fathoms of wampum, 6 coats, 10 hatchets, 10 hoes, 10 knives, 10 pairs of scissors, 10 jew's harps, 10 fathoms of tobacco, 3 kettles, and about 10 looking glasses for all the land between the Norwalk and the Saugatuck rivers in Connecticut extending one day's walk from the Sound.

Explanation Is Simple

Exceedingly strange are the whys and wherefores of names. Take, for instance, the letter "Q"—how many of us have ever stopped to think ... to ask ourselves why we call it "Q"? And the answer is just as strangely curious as the question. The name of the letter "Q" is from the French word "queue" meaning "tail" "Q" is simply an "O" with a tail!

Millions Still In Slavery

Slavery is still practised in nineteen countries of the world. The number of slaves is estimated at at least 4,000,000. These men, women and children can be taken and sold for profit like any article of commerce. There are still nearly 2,000,000 slaves in Abyssinia out of a population of 10,000,000.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Aspirin without it! A druggist always has Bayer, with the proven directions tucked in every box.

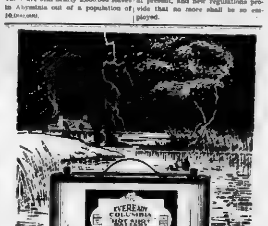
Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. ...

Ex-Kaiser Recovers Farms

Former Kaiser Wilhelm of Germany, has won a suit for the recovery of two confiscated farms. The farms were seized by the Government of the Union of South Africa in 1920. ...

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

There are 42,997 women employed underground in the mines of Japan at present, and new regulations provide that no more shall be so employed.



Weatherproof

Dry batteries last longest when protected from wet or damp. Eveready Hot-Shots give you full value for your money, because they are housed in metal cases.

Before you buy a battery for ignition in exposed places, make sure it bears the name "Eveready Hot-Shot." Other batteries may resemble these famous power plants in appearance, but only Eveready can make the genuine Hot-Shot.

The Eveready Ignitor shown on the left is the longest lived single dry cell money can buy. It is for use indoors or under cover.

MINARD'S "KING OF PAIN" LINIMENT

Pimples Itched And Burned Badly Cuticura Healed

Minard's Liniment for Every Pain.

RAILWAYS OF ALBERTA SOLD TO THE C. P. R.

Edmonton.—The Government announced recently, the completion of negotiations by which, subject to confirmation and ratification by the Dominion and Provincial legislatures and the shareholders of the Canadian Pacific Railway the Provincial Government railways will be sold to the Canadian Pacific Railway with the express power to the Canadian National Railways to participate in half the obligations and half the benefits.

The purchase price is:

First—The payment of $25,000,000 as follows:

(a) Assuming first mortgage bonds of the Edmonton, Dunvegan and British Columbia Railway to the extent of $9,420,000.

(b) Payment of the sum of $15,580,000 as follows: $3,000,000 on the first of June, 1929, $5,000,000 in four years thereafter.

Balance, $5,580,000 in ten years thereafter with interest at 4 per cent. from the date of sale.

Second. The purchaser assumes all payments made and commitments entered into in the extensions now being made to the Edmonton, Dunvegan and British Columbia and Central Canada Railways. As these extensions will probably involve another $1,000,000 or more by the time the sale is consummated, it will be seen that the total purchase price is in the neighborhood of $26,000,000.

The company further agrees to complete sixty miles of additional extensions in the next five years. It was not possible to get any commitment with respect to the coast outlet, but it will be remembered that in the joint offer submitted at the last session the presidents of the two railway companies would make no commitment whatever in this respect.

In the first offer made by Mr. Beatty on his return from the Peace River the $15,580,000 was to be paid in ten years with interest at 4 per cent. In the subsequent negotiations that have taken place this was improved to provide for the instalments of principal as above indicated.

Mail Pension Cheques

Manitoba Old Age Pension Scheme Now In Operation

Winnipeg.—Hon. W. J. Major, K.C., attorney-general of Manitoba, announced that approximately 1,700 old age pension cheques will be mailed to aged persons in the province of Manitoba at the end of ... by the old age pensions branch of the Workmen's Compensation Board.

The pensions are at the rate of $20 a month.

Legislation passed at the last session of the provincial government provided for the old age pensions scheme. The scheme was approved in an agreement between the provincial government ... There are still nearly 2,000 claims for old age pensions ...

Nations Must Agree On Naval Matters

Or Conference On Disarmament Would Be Useless Says Dr. Loudon

Geneva.—An early meeting of the League of Nations preparatory commission on disarmament would be useless unless an accord on naval matters is reached among the five leading sea powers, says Dr. Loudon president of the commission.

Dr. Loudon, who is Dutch ambassador to France, suggested that the best way to meet this condition would be through a private conference at Paris of representatives of the United States, Great Britain, France, Italy and Japan. He said such a conference might readily reach an agreement on the points respecting naval matters which now divide them.

He said that unless a working basis could be found among these powers he would not take the responsibility of re-convoking the preparatory commission except upon a direct mandate from the full assembly of the League.

River Steamer Wrecked

Sinks After Hitting Huge Boulder In Peace River

Peace River.—The steamer D. A. Thomas, according to reports reaching here, is sunk 80 miles below here broken in the middle by a huge boulder.

Since the palatial steamer left here September 10, loaded with freight for Vermilion Chutes and other way points, navigation has been carried on under the most trying circumstances, due to the extremely low stage of water. She was on her way upstream loaded with 60 head of cattle and several passengers when disaster overtook her. The cattle swam ashore and all aboard were rescued.

The steamer Thomas was built by the late Baron Rhondda in the summer of 1915, and was one of the finest on the inland waters. The material for her construction was freighted in over the old Grouard trail by teams when the end of the steel was at Peace, and her cost was upwards of $100,000.

Northcott Is Apprehended

Youth Wanted On Murder Charge, Is Arrested In B.C.

Vancouver.—Gordon Stewart Northcott, wanted by the Riverside, California, authorities on a murder charge in connection with the alleged slaying of several youths on a chicken ranch, and for whom the entire Canadian ... has been searched for four days, was arrested at Okanagan Landing, five miles south of Vernon, by provincial police Constable Marley ..., according to information telegraphed to Inspector ... Cruickshank, in charge of the Vancouver District.

The arrested youth, according to the police, did not deny his identity nor did he actually admit it. ...

Loss From Damage Claims

Canadian and U.S. Railways Face Heavy Liability Each Year

Winnipeg.—Representatives of Canadian and United States Railways are meeting in Winnipeg to seek some method of reducing the enormous amount of damage claims paid for lost and damaged goods. Last year this amount totalled $36,000,000.

A great deal has been done already as was reported at the meeting. In 1920 when the railways were first aroused and took definite action the figure was $119,000,000. Since then reductions have been brought about each year. Shippers and receivers are co-operating better with the carriers and a great deal of education has been done among railway employees with a view to ... handling and the other causes of loss. The American Railway Association employs three full-time special representatives to gather data on the subject and present it to the parties concerned.

Famine In Russia

850,000 Persons Will Be Fed Through Public Funds

Kharkov, Ukraine, Soviet Russia.—Eight hundred and fifty thousand persons will be fed through public funds during the coming winter in the Ukraine, the grain crop having fallen far below the need of the population. Ordinarily the Ukraine is one of Russia's best granaries and in good years has wheat both to eat and to export.

The Moscow government has appropriated 31,000,000 rubles, the Ukrainian government 10,000,000 rubles and social service organizations have begun a campaign to raise an additional 6,000,000 rubles to provide nourishment this winter for the stricken population. One-third of the Moscow advance is a gift and the balance is a loan.

SAYS CANADA PROVED TO BE A REVELATION

Southampton, Eng.—"Canada is the best holiday country I ever struck," said Rt. Hon. J. Ramsay MacDonald, leader of the Labor Party in the House of Commons, on his arrival here after a visit to the Dominion.

In an interview he said he did not think immigration to Canada would ... even substantially alleviate our unemployment problem."

Discussing the British miner-harvester migration, Mr. MacDonald said:

"There is no doubt a very determined attempt is being made by certain people to spread discontent among the harvesters. It is my impression that a considerable number of the men will remain and get employment in Canada.

"From east to west in Canada the ...

NOTED ENGLISH STATESMAN

The late Lord Haldane, Viscount of Cloan, noted English statesman, who died recently at the age of 72.

New Northern Route Is Complete Success

Was Opened By Blasting Of Montreal River Channel

The Pas, Man.—Saskatchewan's new route into the mineralized country of the far north, made available by the federal government blasting rocks out of the Montreal River in North Central Saskatchewan, is a complete success.

Hon. Thomas C. Davis, attorney-general of Saskatchewan, and Frederick MacDermid, K.C., of Saskatoon accompanied by their wives, left Prince Albert on September 5, to make the swing around the great water half circle in the northern part of the province.

The voyage ended Tuesday afternoon, September 18, at The Pas, and was a complete success in every way, only 14 days being required for the entire trip.

That the distinguished travellers were accompanied by their wives proves conclusively the ease with which the new passage can be made.

Rules In Oratorical Contests Altered

Manitoba Trying To Reduce Interference With School Studies

Winnipeg, Man.—Alteration of rules for international oratorical contests, designed to reduce to the minimum interference with school studies, has been decided upon by the provincial central committee. Under the new rules, Manitoba will take part in the 1929 contest. The revised conditions are:

That the contest be open to students of grades 10, 11 and 12 only. Last year students of grade 9 were eligible.

Schools teaching any of the grades from 10 to 12 are to be asked to decide their respective champions by Christmas, by any method they determine, provided public speaking by a considerable number of the pupils is involved.

New Branch Lines

Settlers In Saskatchewan Are Promised Railway Facilities After Long Wait

Winnipeg, Man.—Settlers of Saskatchewan who have waited in some cases for as long as twenty-five years for railway services are assured of these before the end of 1929, is the announcement from Western Headquarters of the C.P.R. made here.

In the south section of the province a line of eighteen miles will be completed easterly from Coronach, 37 miles westerly from Wood Mountain to the Consul branch of the C.P.R.

Another branch line 12 miles easterly from Ogderre will give railway ... to settlers of the Lake Johnston district.

Possibly the most important of the lines are those from Hatton, Atkins and Pennant. The Hatton extension north-easterly of about eighteen miles will tap the Fox Valley country at the west side, and the line from Pennant 24 miles south-westerly, will tap it from the east side.

From Atkins, the first station east of Swift Current on the Main Line of the C.P.R., a branch approximately 30 miles long will be sent northward. This line will eventually connect Swift Current direct with Saskatoon.

In Central Saskatchewan the following lines are being projected:

From Foam Lake, southwesterly 27 miles.

From Rosetown to Perdue, 45 miles.

From Unwin, westerly 20 miles.

Northern Saskatchewan will benefit by the 10 miles northeasterly from Lloydminster.

New Branch Line Opened

First Train From Melfort North Makes Journey Over C.P.R.

Melfort, Sask.—The opening of the new branch from Melfort north on the C.P.R. created considerable excitement and loud cheering when the first passenger train made its journey to the end of the steel at Edenbridge. Crowds of people greeted the "iron horse" which was quite reminiscent of the days gone by when the first trains made their journey across the western prairies.

Every station platform along the way was jammed with people who were present to greet the first train to traverse the distance between Melfort and Edenbridge over the new C.P.R. branch line. With shouts and cheers they hailed its coming, thinking, no doubt, of the benefit to be received in being linked with the outside world.

DEATH TOLL IN STORM AREA MOUNTS HIGH

Washington.—With death reports ...

AIR EXPRESS TO BE INAUGURATED IN WEST SOON

Winnipeg, Man.—The ability to save time by air express was proven recently when the de Havilland 61 plane of the Western Canada Airways ... a stop on the grounds ... Saskatoon for delivery ...

... the return to the form ... of the journey later than expected but from ... to Saskatoon ... miles was ... in three hours and forty ... minutes, which is a saving of several hours.

This trial trip has proved to be quite satisfactory and the officials of the Canadian Pacific Express will inaugurate early next month a regular bi-weekly service, connecting with arrivals and departures of trains at cities between here and Calgary.

The method of procedure for this service is that the express agent will gather all parcels marked with the air express stamp and convey them by truck to the airfield where, after careful checkings, they are turned over to the pilot, who after signing receipt deposits them in a specially designed cubicle in the lower front part of the 'plane. Upon arrival in each city the parcels destined for that point are turned over to the express agent for delivery.

Looks For Better Prices

United States Farmers Are Urged To Hang On To Their Crops

Washington, D.C.—Secretary Jardine asserted in a statement released through the Republican national committee that "if Governor Smith is elected and tariff rates are reduced to the schedules of the Underwood Act, as Governor Smith forecast in his acceptance speech, the entire farm industry will be thrown into a state of utter demoralization."

He reiterated his views that wheat farmers should hang on to their crops. He said that the present price level is lower than justified, and that everything pointed to an increase.

Noting prospects of increases in this country's wheat crop, and the forecast for the biggest Canadian crop in history, he said, however, that from a world point of view the situation is about the same as last year. Shortage of rye abroad and growth of world population, he asserted would increase foreign demand.

Chrysler Plymouth Cars
MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

Kindly 'phone Mrs. Abbott or Mrs. Beirnes by Saturday, October 6th. If we cannot arrange to go to Mrs. Verge's our meeting will be held in the rooms as usual. The programme will be as follows:

Roll call—"Sing-song from each member."

Business and social afternoon

SERIOUS FIRE AT TOFIELD FARMERS' SUPPLY CO. STORE IN GREAT DANGER

Between six and seven on Saturday evening last, fire was discovered by Mike Steve in the warehouse of the Tofield Farmers' Supply Co. The blaze spread so rapidly that nothing could be done to save the building already well alight. The main building which was only a few feet from the fire was in danger so a number of volunteers formed a bucket brigade and kept the south end well drenched with water while others climbed upon the roof and kept the roof thoroughly wet.

There was considerable merchandise in the warehouse, mostly heavy ware and in addition some oil was stored there. The fire lasted for some long time and when it was dying down a barrel of oil or gasolene exploded throwing flames high into the air. On one occasion for a few seconds there was a large ball of flame detached from the fire floating forty or fifty feet in the air. This only lasted for a few seconds.

The fire will not interfere with business as fresh stocks were immediately ordered, and the big majority of the company's goods were in the main portion of the building

The cause of the fire is unknown.

On behalf of the Company, Mr. L. C. Hay wishes to thank all those who assisted at the fire on Saturday night.

WORLD BASEBALL SERIES NOW UNDERWAY

Thursday will see the first game between the New York Yankees and the St. Louis Cardinals for the world's championship in baseball

As in the past few years broadcasting stations will announce the game play by play, and fans all over the continent can follow the game play by play. Radios will be tuned in about 12:30 Tofield time when the games are due to commence. Those who have not radios and wish to hear the plays as they are made, will no doubt find a DeForest Crossley giving service at the McLaughlin Hardware Co., an Atwater Kent at the Tofield garage, a Marconi at Swift and Emery's, a Day Fan at R. W. Piccott's, and a King at M. C. Hammond's.

WILL FILL IMPORTANT ROLE

Britain's First High Commissioner To Canada Should Be Helpful In Both Countries

Sir William Clark, who has arrived in Canada to serve as Britain's first High Commissioner to this country, will fill a very important role and one that gives promise of being valuable to both countries concerned. As Sir William himself has declared, he will serve as an additional channel of communication between the Ottawa and London governments, "two governments, he adds, serving equally the same King and governing nations within one and the same Empire."

Britain's High Commissioner to this country should be able to offer important advice to the British Government on a number of matters that will inevitably arise. There is, for instance, the question of immigration. The question of British immigration into this country is perhaps the most important one so far as the two governments are concerned. The new British High Commissioner, who is a trained observer of economic questions, should be helpful in solving this difficulty. He will be in a position to advise the British Government as to Canada's powers of absorption, as to just what type of immigrant this country requires. Indeed he should be in a position to advise with accuracy, and with a full knowledge of all aspects of the situation, both the British and Canadian Governments on this important question. In fact, it is just possible that this new link between the two countries which has been created is just what is necessary to render a problem no longer a problem.

On other matters, too, Britain's High Commissioner to Canada should be of distinct service. Sir William Clark gives promise of being an ideal man for the post and Canada will welcome him heartily to her shores.

The Peace River

Success Being Achieved In All Branches Of Agriculture

The eyes of agriculturists are now turning to the Peace River country where the winters appear to be comparatively mild, and where wheat, oats, and timothy seed can be grown and take prizes in world competition. In this wonderful stretch of country often by the middle of April the winter grains and grasses are greening and the first week in May sees the tulips and hyacinths in full bloom.

Summer temperatures range around 80 and though early frosts are at times experienced, harvesting is usually well in hand by the first week in September. Some splendid wheat yields were reported a year ago in the Grande Prairie and Valhalla districts running from 42 to 70 bushels to the acre.

The work done on the Beaverlodge Experimental Sub-Station is fully set forth in the report of that station which is available for distribution and may be had on application to the Publications Branch, Department of Agriculture, Ottawa. The Peace River country is developing very rapidly, and the agriculture practiced is very diversified. Success is being achieved in all branches including grain, dairying, poultry and bee-keeping.

SUNDAY SCHOOL LESSON

OCTOBER 7

PAUL IN EPHESUS

Golden Text: "We are His workmanship created in Christ Jesus for good works which God afore prepared that we should walk in them."—Ephesians 2:10.

Lesson: Acts 19:1-41; Ephesians 4:16.

Devotional Reading: Ephesians 3:14-21.

Explanations And Comments

The Forfeited Chance, Acts 19:8, 9. On his third missionary journey Paul came to Ephesus, where he followed his customary method of speaking first to the Jews, and then to the Greeks. For three months in the synagogue he reasoned and persuaded as to the things concerning the Kingdom, the subject of Jesus' teaching. But instead of heeding his message the Jews hardened their hearts, and some of them even spoke evil of "the Way" (used as a synonym for Christianity; recall Acts 9:2). Paul was obliged to break with the Jews, leaving the synagogue for the lecture-room of Tyrannus, where many of them followed him. Tyrannus was probably a Gentile who had a school of philosophy. Paul may have seemed to the Ephesians to be one of the wandering professors of philosophy who were so numerous in the early Empire. In the lecture-room of Tyrannus from eleven to four, after that philosopher had finished his lectures, Paul proclaimed unto his hearers Jesus the Christ.

Two Fruitful Years, Acts 19:10. For two years Paul continued teaching in the school of Tyrannus, and "all that dwelt in Asia heard the word of the Lord, both Jews and Greeks." Within easy reach of Ephesus were the other cities of the Roman Province of Asia (on the western shore of Asia Minor). During these years were probably found the others of the Seven Churches of Asia of Revelation 1:4, 11.

Many of the converts who had practiced magical arts came and, publicly renouncing their deeds, brought their books and burned them in the sight of all. "These were books of formulae for compelling the assistance of spiritual beings, or securing the affections of a beloved, or for inflicting pain and spiritual torment."—A. S. Peake. The set destroyed property valued at fifty thousand pieces of silver, or the customary pay for fifty thousand days' labor. Probably there were few copies of the magicians' scrolls, and to their rarity was due their valuation.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

— BY —

ALEX. PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER II.—Continued.

The next day, dressed in light clothing and a pair of running shoes, Donald went around Stanley Park. Wishing to condition himself, he ran the greater part of the way.

Spring comes early in Vancouver as compared with the East. In January the buds are bursting in Stanley Park. The balmy sea air, scented with earthy odours from the deep woods, seemed to Donald to possess magic properties. The blood sang in his veins. Overhead, big white sea-gulls screamed and soared, squirrels retreated in chattering fright as he raced down the road, and over all was the sound of the booming surf. The wind rushed past his ears, and he shouted aloud from sheer exuberance of spirits and the joy of living.

Donald covered the distance from English Bay to Granville Street at a jogging trot. The air of the gymnasium seemed close after being in the open. The big Australian fighter was in the ring with one of his sparring partners. The slap of gloves was like music to Donald's ears.

"Just in time," welcomed Andy as he led him to the dressing-room, where he quickly shifted to fighting togs and then walked over to the ring.

A crowd of boxing-fans sat by the ring-side watching the big fellow work out. Donald's entrance caused a stir. His lithe, muscular body was the attraction of all eyes.

"'Op in," commanded Andy.

While an attendant was putting on his gloves, Donald studied the big man he was to help train. He would weigh at least two hundred pounds. His shoulders were enormously broad and square, and the muscles of his arms stood out in knobs and bunches. His face was a pasty colour, as though his training had been done inside. His jaw was square and strong, his eyes a mild blue, and his nose looked as though it had stopped many a solid punch. ...

... and circled him warily. The big man feinted with his left. Donald danced within range, and the Australian let loose a terrific right swing that would have felled an ox. Donald side-stepped, jabbed his left twice to his opponent's face, and his right missed Hagin's jaw by the fraction of an inch. A surprised look came over the big man's face. A murmur of applause came from the audience.

"Strike me pink! What a left 'and!" ejaculated Andy. Hagin scowled and tried to bring the fighting to close quarters, but was easily avoided by his lighter opponent.

Donald now took the aggressive. His left found weak spots in the big man's defence, and repeatedly he sent in stinging jabs that drove his adversary's head back with a snap. Try as he might, Hagin could not get away from that whizzing left. It is a bitter pill to be bested by one's sparring partner. So far the Australian had been given a boxing lesson. He forced Donald into a corner and made for him savagely. Donald ducked under the flail-like swings, and shot a left upper-cut to Hagin's jaw. The latter staggered weakly to the ropes. Donald was after him like a flash. Just then he saw Andy gesticulating wildly and shaking his head. Hagin lunged forward and Donald fell into a clinch. The gong rang.

"What's the trouble, Andy?" asked Donald as he reached his corner.

"Strike me lucky!" whispered Andy hoarsely, "you're punchin' me meal-ticket. You're makin' a blinkin' boob out of me 'eavyweight."

"You told me to knock him out of the ring," reminded Donald.

"Sure I did. But 'ow the 'ell did I know that you were a blinkin' cyclone? Strike me blind, a left 'and like that I 'aven't seen since I 'andled Young Griffo."

"What shall I do in the next [illegible]?"

"Tyke a punch and go down—'urt your 'and—anything to quit. But for 'eaven's sake don't mess up me 'eavyweight any more! If the public ever 'ears of this our big fight is all off!"

In the next round Donald dropped to the floor as they broke from a clinch in the centre of the ring. He rose to one knee holding his hand and making a wry face.

"Too bad," sympathized Andy as he ordered him to the dressing-room.

"RED ROSE TEA"

Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

RED ROSE TEA is put up only in Clean, Bright Aluminum Packages. The very best container for good quality tea.

WHOOPING COUGH

Whooping cough is very dangerous to children and sometimes fatal to grown-ups, more people die from it than from Scarlet Fever

The mother whose children have had whooping cough does not need to be reminded of its symptoms—the ear remember her child running to her gasping for breath, catching hold of her skirt for support and finally breaking into that painful rasping cough. Whooping cough starts with a slight cold, running at the nose, fever, and a dry cough. The eyes are bloodshot. After a week the cough gets worse and the child coughs many times in succession. He becomes pale and draws his breath with a sharp whooping sound. Then is the time to call in a doctor. This whooping cough is not always present.
